

Alcon
2025
Annual Report

Alcon

is the global leader in eye care dedicated to helping people *See Brilliantly*. With an over 75-year heritage, we are the largest eye care company in the world, with complementary businesses in Surgical and Vision Care. Being a truly global company, we work directly in 56 countries and serve patients in more than 140 countries and territories. We have a long history of industry firsts, and each year we commit a substantial amount in research and development to meet customer needs and advance patient care.

Letter from the Chair of the Board

2025 has been a transformative chapter in Alcon's journey - defined by disciplined execution, strategic innovation and steadfast commitment to delivering sustainable value.

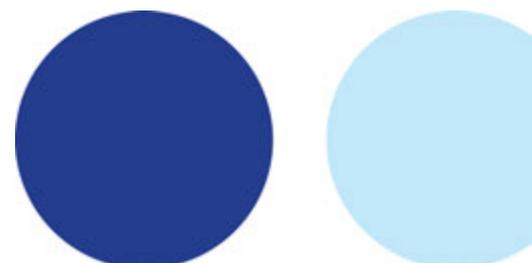

To Our Valued Shareholders,

As I reflect on the past year, 2025 has been a transformative chapter in Alcon's journey—defined by disciplined execution, strategic innovation and a steadfast commitment to delivering sustainable value. It was also a year that tested our resilience as we navigated tariff pressures and challenging market conditions. While these headwinds tested our agility, they did not deter our focus. We remained anchored on our long-term vision and continued to deliver for our stakeholders.

STRATEGIC EXECUTION AND PORTFOLIO EXPANSION

This year, we launched an unprecedented number of high-impact innovations in our Surgical and Vision Care Franchises that are already driving clinical adoption and commercial momentum. These include our next generation cataract and vitreoretinal surgical platform, the first new ophthalmic pharmaceutical product we've launched since spin, an enhancement of our leading trifocal IOL platform, a non-invasive laser therapy for glaucoma and the first weekly replacement contact lens.

These launches reflect our ability to translate R&D investment into differentiated innovation, expand our addressable market and reinforce our competitive positioning.

CAPITAL STEWARDSHIP AND STRATEGIC M&A

In 2025, we advanced a series of targeted acquisitions that are complementary to our portfolio and further position Alcon for long-term growth. These include LumiThera, which expands our capabilities in retinal health and light-based treatments, and Aurion Biotech, whose cell therapy platform opens new possibilities in corneal disease.

Each of these transactions reflects our commitment to investing in differentiated technologies that align with our strategic priorities. As we look forward, we will remain focused on disciplined capital deployment and thoughtful integration to ensure sustainable value creation for our shareholders.

GOVERNANCE, ENGAGEMENT AND SUSTAINABILITY LEADERSHIP

Strong governance and proactive shareholder engagement are foundational to long-term performance. In 2025, we continued our outreach to institutional investors on board governance, executive compensation and sustainability. We value the constructive dialogue with our investors and remain committed to transparency, responsiveness and alignment with shareholder interests.

We also strengthened our Board with the addition of **Deborah Di Sanzo**, who brings extensive experience in healthcare technology, digital innovation and operational leadership. We believe that her experience leading global businesses at Philips and IBM Watson Health will help guide Alcon's strategy as we advance digital capabilities and patient-centric solutions worldwide.

150,000

children with improved vision through associate-led vision screenings

Improved vision for

5 million

people afflicted with untreated cataracts in low- and middle-income countries, including 1 million considered cataract-blind

Additionally, our commitment to social impact and sustainability continues to deepen. In 2025, we achieved our 2025 Social Impact goals, providing more than 150,000 associate-led screenings to children and improving sight for over 5 million people with untreated cataracts in low- and middle-income countries. Building on this success, we have set new goals to expand our target to provide 200,000 vision screenings to children and provide comprehensive professional education to 3,000 surgeons through our Phaco Development (PD) program by the end of 2030.

We remain focused on delivering results, listening to shareholders and executing with discipline. On behalf of the Board of Directors, thank you for your continued trust and partnership. We look forward to building on this year's achievements and continuing to drive long-term value creation.

Sincerely,

F. MICHAEL BALL

Chair of the Board
Alcon Inc.

Message from the CEO

We will look back at 2025 as a watershed year for Alcon innovation. Through internal R&D, strategic acquisitions and enhancements to existing technologies, we were able to introduce an unprecedented number of new products.

Dear Fellow Shareholders,

In 2025, Alcon advanced its mission to help the world *See Brilliantly* through an unwavering focus on three priorities: Delivering innovative solutions to eye care professionals and patients, enhancing operational excellence, and expanding access to vision care globally.

Although the year began with headwinds, including global trade uncertainties and challenging market conditions, by the third quarter our efforts began to gain traction. Throughout the year, we steadily invested behind our unprecedented wave of product launches and our growing R&D efforts. By year-end, our growth was accelerating and we exited the year in a strong position for 2026. The result was net sales growth of 5% as reported, or 4% on a constant currency¹ basis, to \$10.3 billion; diluted earnings per share (“EPS”) of \$1.98 and core diluted EPS¹ of \$3.07. We delivered cash from operating activities of \$2.3 billion and generated \$1.7 billion in free cash flow¹, enabling us to return \$848 million to shareholders through share repurchases and dividends.

DELIVERING BOLD INNOVATION

As Mike mentioned, we will look back on 2025 as a watershed year for Alcon innovation. Through internal R&D, strategic acquisitions, and enhancements to existing technologies, we were able to introduce more than 10 significant new products, many in multiple markets.

¹ A non-IFRS measure. Refer to Item 6b of this Annual Report for additional information and reconciliation to the most directly comparable measure presented in accordance with IFRS.

Let me focus on just a few of these innovations:

- **Unity VCS & CS:** Our new flagship ophthalmic surgical platform, *Unity VCS* delivers greater efficiency and workflow optimization in both vitreoretinal and cataract procedures with a single piece of equipment. Surgeons have responded enthusiastically to *Unity VCS*, which features many first-to-market technologies, and it is already available in the United States, Europe, Japan, Australia, India, and Canada, with other market introductions planned. We also initiated the launch of *UNITY CS*, our standalone cataract platform, with further additions to the *Unity* family of surgical instrumentation planned throughout 2026. Recently, Alcon was named the Overall Winner of the 2026 Business Intelligence Group (BIG) Innovation Awards for the development of *Unity VCS*.
- **PanOptix Pro:** In our market-leading intraocular lens (“IOL”) business, *PanOptix Pro* has emerged as a meaningful differentiator amid an increasing number of competitive entries, building on the success of Clareon *PanOptix* with unprecedented light utilization, better image contrast, and a low visual disturbance profile.
- **TRYPTYR (acoltremon ophthalmic solution) 0.003%:** Our first Alcon pharmaceutical launch since spin, *TRYPTYR* increases natural (basal) tear production, as early as Day 1. Its novel mechanism and rapid efficacy have driven encouraging early uptake by ophthalmologists and optometrists, and our partnership with a digital pharmacy platform is streamlining patient access.

Beyond these launches, our business development activities have expanded our reach into new therapeutic areas, including cell therapy for corneal dystrophies through our majority stake in Aurion Biotech, photobiomodulation therapy for dry age-related macular degeneration (“AMD”) with the LumiThera acquisition, and direct selective laser trabeculoplasty (“DSLTL”) for glaucoma from Belkin. Going forward, we will remain agnostic about the source of innovation, while leveraging our global product development, manufacturing and commercial expertise to maximize the value of any asset.

OPERATIONAL EXCELLENCE AND RESILIENCE

In 2025 we accelerated enterprise-wide, end-to-end process improvement initiatives. Designed to increase the speed with which we deliver innovation to the market and enhance the customer experience, these projects, which are supported by new digital technologies, including AI, and optimized organizational structures, touch every function in the company and every aspect of the value chain.

Last year we also leveraged our global supply chain and manufacturing footprint to adjust to the new global trade environment, enhancing our ability to make products in the regions in which we sell them and help mitigate the impact of tariffs.

EXPANDING ACCESS AND SERVING OUR COMMUNITIES

Shifting to social impact, I'm proud to reiterate that Alcon achieved both ambitious goals we established for 2025:

- We completed **150,000** vision screenings for primary school children to improve vision and enhance academic success, while delivering comprehensive eye care for those who need it.
- We also restored or improved vision for **5 million** people with untreated cataracts in low- and middle-income countries, including 1 million considered cataract-blind.

And as Mike reported, we have now set new social impact goals for 2030.

I'm also proud that our 25,000+ associates around the world contributed their time and talents, as individuals and teams, to support the communities in which we live and work. More associates than ever before participated in Alcon in Action, providing more than 15,000 volunteer hours to tackle health, housing, hunger, education, and the environment through activities with 150 community organizations. Dedicated teams also made progress against our sustainability targets. A comprehensive summary of these initiatives can be found in our latest Social Impact and Sustainability report on our website, <https://www.alcon.com/about-us/social-impact-and-sustainability/>.

LOOKING AHEAD

As we enter 2026, the new products launched in 2025 will continue to gain momentum as they are successfully commercialized around the world. Our teams are energized, our execution is focused, and our commitment to our customers and their patients is stronger than ever.

In closing, I extend my deepest gratitude to you, our shareholders, for your continued support and trust in our vision. Together, we continue to build the world's leading eye care company and shape the future of eye health so that more people around the world are able to See Brilliantly.

With appreciation,

DAVID J. ENDICOTT

Chief Executive Officer

Social Impact & Sustainability

Alcon pursues a vision for the world in which all people have access to high-quality eye care. We innovate boldly, expand training, and build eye care infrastructure, while reducing our environmental impact around the world.

Brilliant Lives

With our partner organizations, we enable communities to access critical eye care services.

Brilliant Innovation

Our diverse talent from around the world innovates world-class products that change lives.

Brilliant Planet

We care for our planet by focusing on reducing emissions and waste.

INTRODUCTION AND USE OF CERTAIN TERMS

Alcon Inc. publishes Consolidated Financial Statements expressed in US dollars. Our Consolidated Financial Statements responsive to Item 18 of this Annual Report filed on Form 20-F with the US Securities and Exchange Commission (the "Annual Report") are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). "Item 5. Operating and Financial Review and Prospects", together with "Item 4.B. Business Overview" and "Item 6.D. Employees", constitute the Operating and Financial Review ("Rapport annuel"), as defined by the Swiss Code of Obligations.

Aurion Biotech, Inc. is one of our consolidated subsidiaries in accordance with IFRS as issued by the IASB. References in this Annual Report to "we," "our," "us," "Alcon," and the "Company" refer to Alcon Inc. and its consolidated subsidiaries except where it is not required. In this Annual Report, references to the "eye care market" are to the Surgical and Vision Care markets in which we participate, including the sale of ophthalmic surgical devices, contact lenses and ocular health products, but not including the sale of spectacles and prescription ophthalmic pharmaceutical products other than glaucoma and dry eye pharmaceutical products; references to "United States dollars", "US dollars", "USD" or "\$" are to the lawful currency of the United States of America, and references to "CHF" are to Swiss francs, the lawful currency of Switzerland; references to "International" are to the entire world except the United States of America, unless the context otherwise requires; references to "associates" are to our employees; references to the "SEC" are to the US Securities and Exchange Commission; references to the "FDA" are to the US Food and Drug Administration; references to "EMA" are to the European Medicines Agency, an agency of the EU; references to the "NYSE" are to the New York Stock Exchange; references to the "SIX" are to the SIX Swiss Exchange; references to "IOL" mean intraocular lenses; references to "ATIOL" mean advanced technology intraocular lenses; and references to "Alcon shares" or "our shares" are to Alcon ordinary shares, nominal value CHF 0.04 per share, with ticker symbol "ALC."

All product names appearing in *italics* are trademarks owned by or licensed to Alcon or its subsidiaries. Product names identified by a "®" or a "™" are trademarks that are not owned by or licensed to Alcon or its subsidiaries and are the property of their respective owners.

MARKET INFORMATION

This Annual Report contains certain industry and market data that were obtained from third-party sources, such as industry surveys and industry publications, including, but not limited to, publications by Market Scope, GfK, Circana and Nielsen. This Annual Report also contains other industry and market data, including market sizing estimates, growth and other projections and information regarding our competitive position, prepared by our management on the basis of such industry sources and our management's knowledge of and experience in the industry and markets in which we operate (including management's estimates and assumptions relating to such industry and markets based on that knowledge). Our management has developed its knowledge of such industry and markets through its experience and participation in these markets.

In addition, industry surveys and industry publications generally state that the information they contain has been obtained from sources believed to be reliable but that the accuracy and completeness of such information is not guaranteed and that any projections they contain are based on a number of significant assumptions. Forecasts, projections and other forward-looking information obtained from these sources involve risks and uncertainties and are subject to change based on various factors, including those discussed in the section "Special Note About Forward-Looking Statements" below. You should not place undue reliance on these statements.

SPECIAL NOTE ABOUT FORWARD-LOOKING STATEMENTS

This Annual Report contains, and our officers and representatives may from time to time make, certain “forward-looking statements” within the meaning of the safe harbor provisions of the US Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as “anticipate,” “intend,” “commitment,” “look forward,” “maintain,” “plan,” “goal,” “seek,” “target,” “assume,” “believe,” “project,” “estimate,” “expect,” “strategy,” “future,” “likely,” “may,” “should,” “will” and similar references to future periods. Examples of forward-looking statements include, among others, statements we make regarding our liquidity, revenue, revenue growth, gross margin, operating margin, core operating margin, core operating margin growth, effective tax rate, foreign currency exchange movements, tariff impact, nonoperating expenses, earnings per share, earnings per share growth, operating cash flow, free cash flow, our plans and decisions relating to various capital expenditures, capital allocation priorities and other discretionary items such as our market growth assumptions, our social impact and sustainability plans, targets, goals and expectations, and generally, our expectations concerning our future performance. You should not place undue reliance on these statements.

Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties and risks that are difficult to predict such as:

- cybersecurity breaches and technology failures that could disrupt operations;
- our ability to effectively manage the risks associated with transformational information technology changes such as the ethical use of artificial intelligence and disruptive technologies and the migration to cloud-based platforms;
- compliance with data privacy, identity protection and information security laws, particularly with the increased use of artificial intelligence;
- the impact of a disruption in our global supply chain, including the effect of tariffs, or important facilities, particularly when we single-source or rely on limited sources of supply;
- our reliance on outsourcing key business functions;
- the increasingly challenging economic, political and legal environment in China;
- global and regional economic, financial, monetary, legal, tax, political and social change;
- our ability to comply with anti-corruption, anti-bribery, export control, trade sanction, or similar laws;
- our ability to attract and retain qualified personnel;
- our ability to manage the risks associated with operating as a third party contract manufacturer;
- our success in completing strategic acquisitions, including equity investments in early-stage companies, on favorable terms or at all, and in integrating acquired businesses;
- the success of our research and development efforts, including our ability to innovate to compete effectively;
- our ability to manage the rapid evolution and adoption of artificial intelligence;
- terrorism, war and similar events;
- our ability to forecast sales demand and manage our inventory levels and the changing buying patterns of our customers;
- pricing pressure from changes in third party payor coverage and reimbursement methodologies;
- our ability to comply with all laws to which we may be subject;
- the ability to obtain regulatory clearance and approval of our products as well as compliance with any post-approval obligations, including quality control of our manufacturing;
- the effect of product recalls or voluntary market withdrawals;
- our ability to manage social impact and sustainability matters;
- our ability to properly educate and train healthcare providers on our products;

- our ability to protect our intellectual property;
- the accuracy of our accounting estimates and assumptions, including pension and other post-employment benefit plan obligations and the carrying value of intangible assets, and the adequacy of our financial reporting, accounting practices and internal controls;
- our ability to service our debt obligations;
- the need for additional financing through the issuance of debt or equity;
- the effects of litigation, including product liability lawsuits and governmental investigations;
- legislative, tax and regulatory reform;
- the impact of being listed on two stock exchanges;
- the ability to declare and pay dividends;
- the different rights afforded to our shareholders as a Swiss corporation compared to a US corporation;
- the effect of maintaining or losing our foreign private issuer status under US securities laws; and
- the ability to enforce US judgments against Swiss corporations.

Some of these factors are discussed in more detail in this Annual Report, including under “Item 3. Key Information—3.D. Risk Factors”, “Item 4. Information on the Company” and “Item 5. Operating and Financial Review and Prospects”. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in this Annual Report as anticipated, believed, estimated or expected. We provide the information in this Annual Report as of the date of its filing. We do not intend, and do not assume any obligation, to update any information or forward-looking statements set out in this Annual Report as a result of new information, future events or otherwise.

3.A. [RESERVED]

3.B. CAPITALIZATION AND INDEBTEDNESS

Not Applicable.

3.C. REASONS FOR THE OFFER AND USE OF PROCEEDS

Not Applicable.

3.D. RISK FACTORS

You should carefully consider the risks described below, together with all of the other information included in this Annual Report, in evaluating Alcon and our securities. The following risk factors could adversely affect our business, financial condition and results of operations and the price of our securities.

Risks Related to Our Business Generally

Cybersecurity breaches and technology failures could disrupt operations, adversely impact our reputation and compromise confidential or protected data.

We rely on complex and interdependent information technology systems, including internet-based platforms, to support essential business processes. We are also increasingly developing or acquiring technology-based products to improve patient outcomes, which may involve collecting personal information electronically.

The size, complexity, and in some cases, age of our information technology systems make them vulnerable to external and internal security incidents, including malicious intrusions, cybercrime, state-sponsored attacks, malware, misplaced or lost data, programming or human errors and other similar events. For technology-based products connected to the internet, failure to update software on our medical devices, whether by us or our customers, could increase their vulnerability to attacks, potentially impacting healthcare facility operations, patient safety and data confidentiality and integrity.

Our technology landscape has become more complex as we rely on third-party partners to maintain cyber resilience. Cyberthreats continue to evolve and grow more sophisticated, making detection and defense increasingly difficult, particularly given strong competition for a limited pool of cybersecurity professionals. Consequently, breaches may remain undetected for extended periods. We have experienced adverse incidents and expect future attempts, and we may not be able to prevent breakdowns or breaches in our systems or those of our partners. Further, several of our third-party partners and suppliers have experienced cyber incidents; however, none of these events have resulted in any material system failure or had any other material impact on our business.

A significant breach could impair critical processes such as scientific research, clinical trials, regulatory submissions, manufacturing and supply chain operations, and could result in loss of intellectual property, enforcement actions, fines, litigation, remediation costs and reputational harm. These risks are heightened when associates work remotely. Any such event could require substantial additional investment to restore systems and maintain business continuity.

An inability to effectively address the ethical, regulatory and operational risks of artificial intelligence and disruptive technologies could negatively impact our business and reputation.

Recent technological advances in disruptive technologies such as artificial intelligence (AI) present both opportunities and risks. The healthcare industry has benefited from automation of medical tasks, diagnostics, personalized treatment, predictive analytics and virtual healthcare assistance. In eye care, we may leverage AI in areas such as automated refraction for prescriptions, retinal imaging analysis, contact lens fitting, cataract detection, surgery and glaucoma diagnosis and management. However, if we fail to keep pace with rapidly evolving AI technologies, our competitive position and business results may suffer.

The introduction of these technologies, particularly generative AI, into internal processes or product offerings—whether through internally developed software or third-party platforms—may create new risks and liabilities. These include heightened regulatory scrutiny, litigation, compliance challenges, ethical concerns, confidentiality and security risks and other factors that could adversely impact our business and reputation. Improper use of AI by our personnel, even without our knowledge, could also expose us to significant risk. AI-driven development may lead to intellectual property loss, infringement claims, data privacy issues and cybersecurity vulnerabilities. AI-generated outputs can be inaccurate, misleading or biased, resulting in unintended consequences such as discriminatory outcomes or flawed medical analyses, which could harm patients and damage our reputation. We also risk falling behind if competitors use AI more effectively to improve operations or develop products or services that we are unable to compete against.

AI-based software also presents technical and operational risks specific to our industry. Algorithms used in clinical decision support, diagnostics or device automation may be flawed, and training data may be insufficient or biased—potentially impacting patient outcomes or regulatory compliance. Inappropriate data practices by developers or users could impair results. If AI-assisted analyses are inaccurate, we could face competitive harm, legal liability and reputational damage. Cyberattackers may also exploit AI to generate malicious code, sophisticated phishing attempts or deepfakes—manipulated content that impersonates individuals, including senior management, to spread false messages or commit fraud. Such incidents could harm our reputation and financial performance. Additionally, AI use may inadvertently expose confidential patient or proprietary data, potentially compromising our intellectual property protections and regulatory standing.

Finally, compliance with emerging AI regulations across jurisdictions could increase costs, require operational changes or limit our ability to use AI in certain markets. For example, the EU Artificial Intelligence Act may impose significant obligations, including transparency and reporting requirements, that could disadvantage us or require changes to our business practices. Regulatory changes could further increase compliance costs and negatively affect our ability to innovate and compete.

Data privacy, identity protection and information security compliance may require significant resources, and our failure to comply with applicable law could lead to significant liability.

Our routine business operations, including through the use of information technologies such as the internet, social media, artificial intelligence, mobile technologies and technology-based medical devices like our surgical equipment, increasingly involve collecting, storing, accessing and processing personal data and other information about patients, vendors, customers, associates, collaborators and others that are subject to privacy and security laws, regulations and customer-imposed controls. Failure to protect that information could expose personal data to unauthorized access. As we transform into a more digital organization through the launch of products and services such as MARLO, SMARTCataract, ADI and other technology and data-driven projects, our risk increases. See "Item 4. Information on the Company—B. Business Overview—Our Products." Any such event could give rise to significant liability and reputational harm, including potentially substantial monetary penalties.

We are subject to privacy laws and regulations that continue to evolve, including Swiss privacy laws, the EU General Data Protection Regulation (GDPR), the California Consumer Privacy Act (CCPA) and the US Health Insurance Portability and Accountability Act (HIPAA) with respect to some of our products and services. In addition, there are different and potentially conflicting data privacy laws in effect in the various jurisdictions in which we operate, and we must understand and comply with each law and standard while ensuring data security. We must also make significant efforts to ensure that any international transfers of personal data comply with applicable law.

Failure to comply with these laws could lead to significant monetary liability, enforcement actions and reputational damage. Compliance obligations may require substantial investment in systems, processes and personnel, and as regulations evolve, these costs may increase.

Migration to cloud platforms could disrupt critical systems and increase costs.

We have a five-year strategic plan to create a digitally empowered business, which involves an ongoing cloud transformation to migrate critical systems and data to cloud-based platforms. We expect this transformation to enhance scalability, automation and system modernization; however, it also introduces significant operational, financial and compliance risks. If we fail to execute this transition effectively, we could experience business disruptions, cost overruns and regulatory penalties, including:

- Migration may cause downtime or service interruptions due to incompatibility of legacy systems, misconfiguration or connectivity issues.
- Noncompliance with privacy regulations or data residency requirements can lead to financial penalties.
- Unexpected costs may arise from underestimating migration complexity, licensing fees or data transfer charges.
- Misconfigured cloud services can create vulnerabilities, increasing the risk of data breaches and non-compliance with privacy and audit requirements.
- Failure to deliver a secure and efficient cloud environment could undermine customer confidence and damage our reputation.

We also face challenges related to governance, data integrity and organizational readiness. Without robust security frameworks and oversight, we may fail to enforce standardized usage policies, leading to inconsistent practices and increased risk exposure. Inadequate planning or monitoring could result in incomplete or inaccurate data transfers, operational inefficiencies and system downtime. Our migration strategy depends on external vendors and licensing arrangements, which may introduce additional risks if these parties experience outages, fail to meet obligations or encounter security incidents. Transitioning from on-premises to cloud environments requires new skills and processes, and insufficient change management could lead to delays, cost overruns and reduced productivity.

Any of these events could materially affect our operations, financial condition and strategic objectives.

Disruptions in our global supply chain or important facilities could cause production interruptions, delays and inefficiencies.

We manufacture and source products and materials on a global scale, and our operations and those of our suppliers could be disrupted by a number of factors, including disruptions in logistics; strikes and other labor disputes; loss or impairment of key manufacturing sites; loss of key suppliers; supplier capacity constraints; raw material and product quality or safety

issues; inflation; industrial accidents or other occupational health and safety issues; the impact on our suppliers of tighter credit or capital markets; epidemics and pandemics; natural and man-made disasters, including climatic events (including any potential effect of climate change), power grid failures, acts of war or terrorism, workplace violence, political unrest, fires or explosions; changes in public policy, law or public opinion affecting the availability of key components in our manufacturing process; and other external factors over which we have no control.

We single-source or rely on limited sources of supply for some components, raw materials and production services, such as sterilization, viscoelastics and active pharmaceutical ingredients (API) used in the production of our products. The loss of one of these suppliers or the inability of any such supplier to meet performance and quality specifications, requested quantities or delivery schedules could cause our sales and profitability to decline and harm our customer relationships. A price increase from a supplier where we do not have an alternative could also reduce profitability if we cannot pass the increase on to customers. To ensure sufficient supply, we may determine that we need to provide financing to some suppliers, such as the financing arrangement with Lifecore Biomedical, Inc. we entered into in May 2023, which could increase our financial exposure.

In past years, we have incurred shortages of critical components. For example, beginning in 2022 and continuing through mid-2023, our contact lens care business was impacted by a shortage of components used to manufacture bottles. These shortages have resulted, and may continue to result, in delays in the manufacture of our products, increased costs to source alternative supplies, harm to our reputation and loss of business to competitors.

Finally, in some cases, we manufacture our products at a single facility, and regulatory approvals of our products are often limited to a specifically approved site. If we fail to produce enough of a product at a facility, or if our manufacturing process at that facility is disrupted, we may be unable to deliver that product on a timely basis. Problems may arise during the manufacturing process for a variety of reasons, including technical, labor or other difficulties, equipment malfunction, contamination, failure to follow protocols, destruction of or damage to any facility, power grid failures or other events. In the event of a quality control issue, we may voluntarily, or regulators may require us to, close a facility indefinitely. If any such problems arise, we may be unable to purchase substitute products from third-party manufacturers to make up any resulting shortfall, as such manufacturers may only exist in limited numbers or appropriate substitutes may not be available. This risk is particularly relevant for products for which we represent a substantial portion of the market, such as vitreoretinal equipment and related products including viscoelastic. A failure to deliver products on a timely basis could lead to customer dissatisfaction and damage to our reputation. Significant delays in the delivery of our products or a delay in the delivery of a key product could also negatively impact our sales and profitability.

Our reliance on outsourcing key business functions to third parties heightens the risks faced by our businesses.

We outsource certain key business functions to third parties and invest significant effort and resources in doing so. These functions include research and development collaborations, clinical trial activities, manufacturing operations, human resources, warehousing and distribution, certain finance functions, submission of regulatory applications, marketing activities and data management. Outsourcing these services could expose us to suboptimal quality of service or deliverables and result in missed deadlines, erroneous data, supply disruptions, non-compliance with legal or regulatory requirements and industry standards, and reputational harm, any of which could negatively affect our results.

If third parties fail to meet their obligations, we may lose our investment in these collaborations and fail to receive expected benefits. Contractual remedies may be inadequate to compensate for damage to our business or lost profits. Many companies to which we outsource may have limited resources and may lack compliance capabilities comparable to ours. If these third parties fail to comply with contractual duties, regulatory obligations or applicable laws—including anti-bribery laws and export and trade controls—or act inappropriately while performing services for us, we could be held responsible for their acts, suffer reputational harm and face penalties.

Any such failures by third parties could have a material adverse effect on our business, financial condition, results of operations or reputation.

While China remains an important and attractive market, our operations are subject to increasingly challenging economic, political and legal environment.

Approximately 6% of our net sales in 2025 were made to customers in China, and we expect that percentage to grow, particularly in our surgical franchise. However, economic conditions in China have been, and may continue to be, volatile and uncertain. The legal and regulatory system in China continues to evolve and is subject to change. There is also significant uncertainty about the relationship between the US and China, including with respect to geopolitics, trade policies, treaties, government regulations and tariffs. Recent US actions under multiple trade authorities have resulted in reciprocal tariffs and actions by other countries, including China, creating a patchwork of tariffs and restrictions. Temporary tariff agreements and suspensions have proven volatile and subject to modification or reversal without advance notice. These developments increase unpredictability for companies operating across borders and could adversely affect our transactions with customers in China, particularly where handled by our US subsidiaries.

Pricing pressure in China has intensified as the government pursues healthcare reform initiatives aimed at reducing costs. The Volume-Based Procurement (VBP) program, first implemented for medical devices in 2019 and expanded in 2023, uses a tendering process that drives prices lower and can cause abrupt changes in revenue streams as product selections shift. These dynamics create uncertainty for our surgical portfolio and may negatively impact margins.

In addition, the Chinese government has a strong preference for purchasing locally manufactured goods as part of its broader strategy to support domestic industries, enhance technological self-sufficiency and reduce reliance on foreign imports. Policies such as "Made in China 2025" and related procurement rules favor domestic manufacturers, particularly in public tenders and VBP programs. These measures make it challenging for foreign companies to compete unless they partner with local firms or establish a domestic manufacturing presence. Such developments could require us to adjust pricing, absorb higher costs or restructure operations, any of which could adversely affect our business.

Changing economic and financial environments in many countries and increasing global political and social instability may adversely impact our business.

We operate in more than 140 countries and territories and our results are influenced by local and global economic, financial, political and social conditions. Unpredictable developments, including trade disputes, anti-immigrant sentiment, tariffs, sanctions, economic nationalism, social unrest, terrorism and conflicts in regions such as the Middle East, North Korea, Ukraine and Taiwan, could disrupt global supply chains, increase costs and reduce demand for our products.

The global trade environment remains highly volatile. Governments have imposed tariffs, sanctions and other restrictions that affect our ability to sell products and increase the cost of doing business. For example, the ongoing trade dispute between the US and China, exacerbated by tensions involving Taiwan, could adversely affect exports of our surgical equipment to China. The US has implemented a patchwork of tariff measures under multiple authorities and recent executive actions have raised duties on imports from several countries. These measures have triggered retaliatory tariffs from key markets such as the EU and China, creating uncertainty and potential disruption to our supply chain. Temporary tariff suspensions have been announced but remain volatile and subject to reversal, adding further unpredictability to global trade conditions.

Economic nationalism programs, such as India's Atmanirbhar Bharat placing high tariffs and opaque import licensing rules designed to favor domestic manufacturers, may also make it difficult for us to compete. These policies include preferential treatment for local suppliers in public procurement and regulatory scrutiny of foreign companies, particularly in sectors such as medical devices. Such developments could require us to adjust pricing, absorb higher costs or reconfigure supply chains, any of which could negatively impact profitability.

Local economic conditions may also affect the ability of payors, distributors, customers and suppliers to pay for our products or meet contractual obligations. We have significant receivables dependent on payments from governmental and non-governmental entities worldwide and delays or defaults, particularly in fiscally challenged jurisdictions, could affect profits and cash flow.

Further, in many emerging markets, average income levels are relatively low, government reimbursement for healthcare products and services is limited, and prices and demand are sensitive to general economic conditions. These factors may limit our ability to realize the expected benefits of investments in these markets and could adversely affect our business, financial condition and results of operations.

Economic deterioration due to inflation, epidemics or pandemics, natural or man-made disasters (including climatic events such as effects of climate change), acts of war or terrorism, political unrest, fires, explosions and other external factors beyond our control could further impact demand. Declines in consumer spending may particularly affect elective surgical procedures and discretionary purchases such as contact lenses which often require out-of-pocket payments. For example, while cataract surgery involving monofocal IOLs is generally covered by insurance or government programs, certain ATIOL products may only be partially reimbursed, making individuals less willing to incur costs in weak economic conditions.

If we fail to comply with anti-corruption, anti-bribery, export control, trade sanction or other global trade laws, we could face penalties, and our business could be materially adversely affected.

We operate internationally and sell products in more than 140 countries and territories, and accordingly, we are subject to numerous legal regimes in the countries in which we operate. This includes emerging markets with evolving legal systems, and jurisdictions perceived to have high levels of public sector corruption. Our global operations are subject to various, heavily enforced anti-corruption and anti-bribery laws, such as the US Foreign Corrupt Practices Act ("FCPA") and similar laws that prohibit improper payments to government officials or third parties. Enforcement efforts can be broad-based or industry-specific. For example, in 2023 China launched a broad anti-corruption campaign targeting the healthcare industry. While we strive to abide by these laws and regulations and maintain internal controls, we face significant risks if any of our associates, third party business partners or agents fail to comply with the relevant laws. Any violation of the applicable anti-bribery, anti-corruption or similar laws could result in investigations, loss of export privileges, severe

criminal or civil sanctions and suspension or debarment from certain government contracts, any of which could have a material and adverse effect on our business, financial condition and results of operations.

We also must comply with global trade laws including import, export control and economic sanctions regulations. These laws may prohibit certain transactions or require us to obtain export licenses before shipping products or technology. Compliance can restrict access to products, increase costs and occasionally interrupt supply. Failure to comply or maintain required permits could result in civil, criminal or administrative penalties and disrupt operations. For example, following Russia's invasion of Ukraine, the US, EU, UK and other governments imposed coordinated sanctions and export controls including:

- Comprehensive financial sanctions against major Russian banks including removal from SWIFT;
- Designations of Russian individuals with significant business interests, military involvement or government ties; and
- Enhanced export controls and trade restrictions targeting a broad range of goods.

Although sales in Russia and Belarus are not material, we have worked to maintain patient and provider access to our products in those markets. Sanctions and trade laws change frequently often without notice. Any violation could lead to investigations, adverse media coverage and sanctions harming our reputation, business, results of operations, cash flows and financial condition.

We may be unable to attract, develop and retain qualified personnel, which could impair our ability to execute our strategy.

Our success depends on our ability to recruit, develop and retain highly skilled personnel across critical functions, including senior scientific and management teams, researchers, development specialists and manufacturing staff. Losing key talent or failing to build a strong pipeline could delay product development, disrupt operations and hinder achievement of strategic objectives.

Competition for talent in our industry is intense, particularly in the US, where specialized expertise is concentrated. Our ability to hire and retain qualified individuals depends on offering competitive compensation and flexibility to reward performance. However, laws and customary practices on executive pay—especially in Switzerland and other European jurisdictions—may limit our ability to match US market benchmarks. This disparity can make it more difficult to recruit and retain talent in key markets.

Beyond compensation, we face risks throughout the associate life cycle:

- **Recruitment challenges:** Tight labor markets and specialized skill requirements increase hiring costs and time-to-fill critical roles;
- **Performance management:** Inconsistent evaluation processes or failure to address underperformance can reduce productivity and morale;
- **Career development:** Lack of clear career paths and development opportunities may lead to disengagement and attrition; and
- **Succession planning:** Inadequate planning for leadership transitions or critical roles could create operational gaps and weaken strategic execution.

Frequent travel requirements between Switzerland and the US add complexity. Certain associates may be unwilling or unable to commit to regular international travel, which is essential for collaboration and oversight of global operations. Restrictions on global mobility—whether due to immigration policies or public health crises—could further limit our ability to deploy talent where needed.

Our manufacturing operations require a stable workforce. Tight labor markets have increased labor costs, and failure to manage these costs effectively could pressure margins and disrupt production.

Failure to attract, develop and retain qualified personnel could result in:

- delays in product development and regulatory submissions;
- operational disruptions, including manufacturing and supply chain interruptions;
- loss of institutional knowledge and leadership continuity;
- increased recruitment and retention costs; and
- reduced competitiveness in innovation and market execution.

Any of these outcomes could materially adversely affect our business, financial condition and results of operations.

To the extent we operate as a third-party contract manufacturer, we may face risks similar to, but not identical to, those we experience when manufacturing products for ourselves.

We currently act, and plan to continue acting, as a third-party contract manufacturer for a limited number of customers. While we are not seeking additional contract manufacturing revenue, we remain party to certain historical contracts. In addition, if we divest or out-license certain products, we have agreed, and may continue to agree, to manufacture those products on behalf of the purchaser of those rights. Acting as a third-party contract manufacturer exposes us to risks similar to, but not identical to, those we face when manufacturing products for ourselves, including:

- Shortages or price increases of components specified by our contract manufacturing customers may delay shipments and lead to contractual penalties;
- We may bear the risk of component price increases that occur between periodic re-pricing of products during the term of a customer contract;
- Our contract manufacturing customers do not commit to long-term production schedules, making it difficult to plan production and optimize manufacturing capacity;
- Customers may require rapid increases in production, which can strain resources and reduce operating margins;
- Because many of our costs and operating expenses are relatively fixed, reductions in customer demand can harm our gross profits and operating results; and

We may encounter significant delays or defaults in payments owed to us by contract manufacturing customers.

Our investments in early-stage companies with unproven technologies may result in significant losses, balance sheet volatility and liquidity constraints.

We invest in convertible notes and equity securities in, or enter into option agreements, to acquire early-stage companies that develop and commercialize emerging technologies. Many of these technologies are unproven and may never achieve market acceptance. These investments carry significant risks, including the potential for complete loss of our investment. Early-stage companies often face numerous challenges, such as limited operating histories, untested business models, uncertain revenue streams, high capital requirements and regulatory hurdles. In addition, the technologies these companies develop may fail during development or proof-of-concept stages. Even if successfully developed, these technologies may fail to gain commercial traction, become obsolete due to rapid technological advancements or be subject to unforeseen legal or regulatory constraints.

Our ability to realize returns on these investments depends on various factors, many of which are outside our control, including market conditions, competitive pressures and the ability of these companies to secure additional financing. Many early-stage businesses experience high failure rates, and if the companies in which we invest are unsuccessful, we may be required to write down or write off these investments, adversely affecting our financial condition and results of operations. Even if these investments generate returns, they may take years to materialize, creating uncertainty regarding our ability to monetize our holdings in a timely manner.

If an early-stage company in which we have invested successfully completes an initial public offering (IPO), our ability to realize gains from our investment may still be subject to significant risks. Newly public companies often experience extreme stock price volatility due to factors such as limited trading volume, market speculation and changing investor sentiment. As a result, the market value of our holdings in these companies may fluctuate significantly. In some cases, we may be subject to lock-up agreements or other trading restrictions that prevent us from selling shares for a specified period after the IPO, exposing us to the risk of a decline in stock price before we can liquidate our position.

Furthermore, even after any restrictions lapse, we may be unable to exit our investment at desirable prices due to market conditions, liquidity constraints or other factors affecting the trading dynamics of the newly public company. If the stock price of an invested company declines significantly after going public, we could suffer substantial losses.

Our investments in early-stage companies with unproven technologies may not be successful, and these investments may negatively impact our financial condition, operating results and shareholder value.

We operate in a highly competitive industry, and failure to innovate could adversely affect our market position and growth.

Our industry is highly competitive, and in both our surgical and vision care businesses, we face intense competition. In surgical, competitors range from large manufacturers with diversified product lines to smaller companies offering specialized products. Development by other companies of new or improved products, processes or technologies—including digital solutions—may render our products less competitive or obsolete. In contact lenses, we face strong competition from existing global players and expect increased competition from manufacturers in Asia. Competitors and new entrants are also challenging traditional distribution models through non-traditional, disruptive approaches such as

direct-to-consumer, internet and other e-commerce channels. These developments could reduce the importance of the eye care professional ("ECP") channel, where we have a significant presence, and increase pricing pressure.

In ocular health, particularly pharmaceuticals, we compete against companies with more established R&D capabilities, greater experience in preclinical and clinical trials and broader product portfolios. Our vision care business also competes with eyeglass manufacturers and providers of other vision correction options, including ophthalmic surgery. New drug discoveries could disrupt core elements of both our surgical and vision care businesses.

While we currently hold leading positions in several markets, our success depends on maintaining or building on those positions. We cannot predict the timing or impact of competitive product introductions, including new market entrants, "generic" versions of approved products or private-label alternatives. To compete effectively, we must continue to develop or acquire advanced technologies, integrate them into proprietary products, obtain regulatory approvals where required and manufacture and market successfully. Shifts in market share can occur due to product issues, physician advisories, safety alerts or publications about our products. Competitors' products may be safer, more effective, more convenient, better reimbursed or more aggressively marketed than ours. In pharmaceuticals, generic versions of branded products, including ours, may be sold at substantially lower prices. In an environment of managed care, provider consolidation, increased competition, and declining reimbursement rates, failure to innovate could force us to compete primarily on price. See *"Our research and development efforts may not succeed in bringing new products to market or may fail to do so in a cost-efficient manner or at a scale sufficient to grow our business."* and *"We may not successfully complete or integrate strategic acquisitions to expand or complement our business."*

Our financial performance also depends on our ability to build and expand the markets in which we compete. While we expect growth in key areas such as multifocal contact lenses and ATIOLs, market sizes may not increase beyond current levels and we may not regain or gain market share, expand our market penetration, or increase procedural volumes. Decreases in market size or share, declines in average selling prices or lower procedural volumes could materially adversely affect our results. Failure to expand our markets beyond existing levels could limit our ability to grow in line with industry expectations. Our ability to respond to competitive pressures will depend on reducing costs, maintaining margins, achieving manufacturing efficiencies and sustaining capacity.

Our research and development efforts may not succeed in bringing new products to market or may fail to do so in a cost-efficient manner or at a scale sufficient to grow our business.

Our ability to maintain and grow our business, replace sales lost to competition and capitalize on new and potentially disruptive technologies depends heavily on the success of our research and development activities. We commit substantial financial, human and capital resources to product development through internal programs and Business Development & Licensing ("BD&L") transactions. Developing and marketing new products is costly, lengthy and uncertain. Even when projects reach commercialization, they may later be discontinued for technical, clinical, regulatory or commercial reasons.

Despite these investments, our research and development activities and external collaborations may not produce commercially successful products that are sufficient to replace lost sales or generate incremental revenue to grow our business. We may fail to identify promising opportunities or realize expected value from strategic partnerships. In some cases, new products may cannibalize existing product revenues rather than drive growth.

Further, even if we secure regulatory approval and achieve initial commercial success for new products, our products may abruptly cease to be viable due to unforeseen safety concerns. See *"We may implement product recalls or voluntary market withdrawals of our products."*

The pace of technological change in our industry is rapid, and emerging innovations—such as AI-driven diagnostic tools, telehealth platforms, drug-device combination therapies, and advanced biomaterials—could disrupt traditional surgical and vision care models. If we fail to anticipate or adapt to these developments, the products we develop may become less competitive or obsolete.

If we cannot maintain a cost-effective pipeline of successful new products sufficient to sustain growth, offset competitive erosion and capture market opportunities, our business, financial condition or results of operations could be materially adversely affected. For a description of the regulatory approval processes required to market our products, see *"Regulatory clearance and approval processes for our products are expensive, time-consuming and uncertain, and failure to obtain and maintain required regulatory clearances and approvals could prevent us from commercializing our products"* and "Item 4. Information on the Company—4.B. Business Overview—Government Regulation."

We may not successfully complete or integrate strategic acquisitions to expand or complement our business.

As part of our growth strategy, we regularly evaluate and pursue external investments, alliances, license arrangements, acquisitions and other transactions—collectively referred to as "BD&L" transactions—to expand or complement our business. For example, in 2025 we acquired a majority interest in Aurion Biotech, Inc., and closed the acquisitions of Cylite

Pty Ltd. and LumiThera, Inc. In 2024 we closed the acquisition of BELKIN Vision, Ltd. These and other ventures may bring new technologies, products or customers to enhance our position in the ophthalmic industry. However, we may be unable to identify suitable acquisition candidates at attractive prices or at all. Acquisition efforts can be impeded by competing bids from other companies and by governmental regulation, including market concentration limitations and other competition laws.

Additionally, certain acquisitions may be subject to approval by the target company's shareholders or other material closing conditions. For example, in August 2025, we announced our intent to acquire STAAR Surgical Company ("STAAR"). After an extended period of discussions with STAAR, STAAR was unable to receive the necessary shareholder approvals to consummate the acquisition. Future deals could face similar outcomes. If we are unable to successfully complete these acquisitions, we may incur significant costs without realizing the anticipated benefits, synergies or scale, which could delay or impede our growth strategy and adversely affect our business, financial condition and results of operations.

Even when we successfully complete an acquisition, we face risks related to our ability to:

- integrate the acquired business effectively, including overcoming cultural differences and retaining key personnel, customers and suppliers;
- maintain consistent standards, controls and policies across acquired entities, including integration into our internal control over financial reporting;
- achieve expected synergies and realize anticipated financial or strategic benefits within projected timeframes, if at all; and
- operate in categories or markets where we have limited or no prior experience.

Acquisitions also require significant resources and may divert management's attention from our existing business. They can result in unforeseen liabilities, tax or accounting complexities and potentially dilutive issuances of equity securities, as well as increased debt, contingent liabilities and operating expenses—all of which could adversely affect our financial condition and results of operations. If the economic benefits associated with any acquisition or investment do not meet our expectations, we may be required to record impairment charges related to goodwill, intangible assets or other assets associated with such transactions.

Governance gaps may increase as associates adopt AI tools outside approved controls.

The rapid evolution and widespread availability of AI-driven tools make it difficult for us to evaluate new technologies in accordance with company policy before they are used in practice. As AI products, features and plugins are released at a pace that outstrips formal review processes, associates may adopt unapproved tools, often unknowingly, outside of our governance and security frameworks. This creates a form of "shadow IT" and introduces material risks, including:

- sensitive product design files, clinical trial data and patient information could be uploaded to external AI platforms or unvetted applications, creating exposure under HIPAA, GDPR and other privacy laws;
- unapproved tools bypassing internal controls required for FDA submissions and ISO 13485 compliance, which can undermine documentation integrity and audit readiness;
- AI-generated outputs incorporating third-party data or unclear licensing, leading to ownership disputes and jeopardizing patent filings;
- expansion of our attack surface as ungoverned tools create entry points for threat actors using automated and AI-enhanced methods, potentially compromising device firmware or connected health platforms. Alcon has observed several attempted cyberattacks in which threat actors sought to use AI to enhance or automate malicious activity. While none of these attempts resulted in a material impact to the company, we expect such attempts to continue to increase in sophistication and volume; and
- inconsistent processes, errors in regulatory filings and interruptions in critical R&D and manufacturing workflows due to use of systems that are not integrated with validated infrastructure.

Failure to address these governance gaps could result in financial loss, reputational harm and regulatory penalties.

Terrorism, war, and other events may harm our business, operating results and financial condition.

The continued threat of terrorism and related security measures, military actions or other acts of war—such as the ongoing conflicts between Russia and Ukraine and in the Middle East—may disrupt global economies and create significant uncertainty. These events, along with economic sanctions, trade restrictions and government or market reactions (including sanctions related to the Russia-Ukraine conflict), could negatively impact our business, operating results and financial condition.

Additionally, events such as the loss of critical infrastructure or utility services—including energy, transportation or telecommunications—could have similar adverse effects. To the extent such disruptions or uncertainties result in delays or cancellations of customer orders or interfere with the manufacture or shipment of our products, our business, operating results and financial condition could be materially harmed.

Our inability to forecast demand accurately may adversely affect our sales and earnings and increase quarterly variability.

We balance the need to maintain inventory levels sufficient to ensure competitive lead times against the risk of inventory obsolescence due to changing customer requirements, fluctuating commodity prices, product changes, transfers or life cycle considerations. To manage inventories effectively, we must estimate customer demand and produce products in quantities that substantially correspond to that demand. If we fail to forecast demand accurately or determine the optimal product mix, we may face production capacity issues and be unable to manufacture sufficient quantities of certain products. Failures in our information technology systems or human error could also lead to inaccurate forecasting.

As the number of unique products (SKUs) we offer grows—particularly with increasing variations in IOL and contact lens styles—the precision required for demand forecasting rises. This proliferation of SKUs could increase the risk of product unavailability and lost sales, as well as global inventory requirements for consigned products such as IOLs. These factors may negatively impact working capital and lead to write-offs due to obsolescence or expired products.

Compounding these risks, our manufacturing processes involve lengthy lead times to acquire and install new equipment and product lines. If we fail to forecast demand adequately, we may be unable to scale production in time to meet unexpected increases in demand.

Additionally, a significant portion of our vision care products are sold to major healthcare distributors and retail chains. Our sales and quarterly growth comparisons, as well as inventory estimates, may be affected by fluctuations in their buying patterns due to seasonality, pricing, competitor recalls or other factors. Overestimating demand could result in excess inventory and obsolescence, while underestimating demand could force us to produce additional quantities at higher cost or forego sales entirely.

Changes in third-party payor coverage and reimbursement methodologies and potential regulatory price controls may adversely impact our ability to sell our products at prices necessary to support our current business strategy.

The prices, sales and demand for some of our products, particularly our surgical and pharmaceutical products, could be adversely affected by the increased emphasis managed care organizations and governments continue to place on reducing health care costs. In addition, some third-party payors will not provide reimbursement for a new product until we demonstrate its innovative value or improved patient outcomes, which could impact our ability to grow the market for sales of the product. For our pharmaceutical products, we must compete for placement on formularies of managed care organizations. Exclusion of a product from a formulary can lead to reduced usage within that organization. There have also been recent initiatives by third-party payors to challenge the prices charged for medical products. Physicians, eye care professionals and other healthcare providers may be reluctant to purchase our products if they do not receive adequate reimbursement from third-party payors to cover the cost of those products and for procedures performed using those products. This risk can be heightened in times of higher inflation if reimbursement rates do not keep pace with increasing costs. Reductions in the prices for our products in response to these trends could reduce our profit margins, which would adversely affect our ability to invest and grow our business.

Governmental programs that typically reimburse at predetermined fixed rates may also decrease or otherwise limit amounts available through reimbursement. For example, in the EU, member states impose controls on whether products are reimbursable by national or regional health service providers and on the prices at which products are reimbursed under state-run healthcare schemes. Some member states operate reference pricing systems in which they set national reimbursement prices by reference to those in other member states. Countries implementing a volume-based procurement process, such as the one initiated in China, can lead to decreased prices. The US recently passed the Inflation Reduction Act in 2022, which introduced significant changes to how drugs are covered and paid for under the Medicare program, including the creation of financial penalties for drugs whose prices rise faster than the rate of inflation, a redesign of the Medicare Part D program to require manufacturers to bear more of the liability for certain drug benefits and the introduction of government price-setting for certain Medicare Part D drugs starting in 2026. Other governmental funding restrictions, legislative proposals and interpretations of policy may negatively impact amounts available through reimbursement, including by restricting payment increases to hospitals and other providers through reimbursement systems or by restricting whether reimbursement is available for our products at all.

In the United States, federal policymakers have also periodically pursued executive-branch initiatives aimed at tying reimbursement under Medicare or other federal programs to the lowest prices available in certain foreign markets, sometimes referred to as “most favored nation” pricing. Although prior versions of these initiatives have faced legal, operational and implementation challenges, future executive orders, rulemaking or agency actions could revive or expand

these policies. Any such measures could require price concessions, impose new reporting or compliance obligations or create uncertainty around reimbursement levels. If implemented, these actions could reduce the prices we are able to charge for certain products, limit access to federal reimbursement or otherwise adversely affect our business, financial condition and results of operations.

We expect that additional health care reform measures will be adopted in the future in the countries in which we operate, including those initiatives affecting coverage and reimbursement for our products, any of which could limit the amounts that governments will pay for health care products and services, which could adversely affect the growth of the market for our products or the demand for our products or result in additional pricing pressures. We cannot predict the effect such reforms or the prospect of their enactment may have on our business.

Financial markets, including inflation, interest rates and volatile exchange rates, are unpredictable, which could lead to unexpected impacts to our earnings, the return on our financial investments and the value of some of our assets.

Financial market conditions may adversely affect our earnings, the return on our financial investments and the value of some of our assets. For example, inflation rates in the US and EU were at multi-decade highs in 2022 and remained elevated in 2023, which increased the cost to manufacture our products. If inflation rates were to rise again, we would need to manage this pressure through pricing actions and productivity initiatives while maintaining margins and market share. Increasing prices to offset inflation may cause some customers, particularly in elective surgical and contact lens businesses where patients typically do not receive reimbursement, to reduce purchases or choose lower-cost alternatives. Failure to manage inflationary pressures could adversely impact our results of operations or cash flows.

Fluctuations in interest rates could also materially impact our financial condition and results of operations. Higher interest rates could increase borrowing costs and interest expense on future debt issuances or refinancings. Lower interest rates could reduce interest income on cash and short-term investments. Changes in interest rates may also affect market conditions, capital availability and investor demand for equity and debt securities, influencing our ability to access financing on favorable terms.

Exchange rate volatility between the US dollar, our reporting currency, and other currencies can result in significant changes in reported sales, costs and earnings in US dollars and in the reported value of assets, liabilities and cash flows. A stronger US dollar relative to foreign currencies negatively impacts our consolidated financial position and results of operations as foreign currency amounts translate into fewer US dollars. Despite any hedging measures we may undertake, because a significant portion of our earnings and expenditures are in currencies other than the US dollar, and because our expenditures in Swiss francs and US dollars exceed our revenue in those currencies, exchange rate volatility may materially impact our business, results of operations and financial condition. Additionally, some customers pay us in US dollars, and when the dollar is strong, their debts to us become harder to repay.

Countries experiencing financial distress, high inflation or large capital outflows may impose foreign exchange controls, which could limit our ability to distribute retained earnings from local affiliates or pay intercompany obligations.

For more information on the effects of currency fluctuations on our Consolidated Financial Statements and on how we manage currency risk, see "Item 5. Operating and Financial Review and Prospects—5.A. Operating Results—Effects of Currency Fluctuations" and "Item 11. Quantitative and Qualitative Disclosures About Market Risk."

We are subject to laws targeting fraud and abuse in the healthcare industry.

We are subject to numerous global laws addressing healthcare fraud and abuse, including state and federal anti-kickback and physician self-referral laws. For example, the US federal anti-kickback statute prohibits knowingly offering, paying, soliciting or receiving remuneration to induce or in return for purchasing, leasing, ordering or recommending any healthcare item or service reimbursable under Medicare, Medicaid or other federally financed programs and in some cases private insurance. These laws have been interpreted to apply broadly to arrangements between manufacturers and prescribers, purchasers, formulary managers and other healthcare professionals. A claim for reimbursement resulting from a violation of the anti-kickback statute constitutes a false or fraudulent claim under federal law.

Pricing and rebate programs for covered outpatient drugs reimbursed under federal healthcare programs must comply with complex and evolving requirements under the Medicaid drug rebate program and other statutes, including the Omnibus Budget Reconciliation Act of 1990, the Veterans Health Care Act of 1992 and the Deficit Reduction Act of 2005, each as amended. Guidance on these requirements is limited, and interpretations by the Centers for Medicare & Medicaid Services (CMS), other agencies or courts could differ from ours, resulting in adverse consequences for us. If products are offered through the Federal Supply Schedule of the General Services Administration, additional laws and requirements apply. Similar controls and restrictions exist in the EU, its member states, Japan and elsewhere. Our activities are also potentially subject to federal and state consumer protection and unfair competition laws.

In recent years, the US government and several states have enacted legislation requiring medical device companies to maintain marketing compliance programs and file periodic reports, and similar legislation is being considered in other

states. Many of these requirements are new and uncertain, and failure to comply could result in enforcement actions, fines and adverse publicity. If physicians or other providers we work with fail to comply with applicable laws, they may face sanctions that could negatively affect our business.

Failure to meet these requirements can result in civil litigation, criminal prosecution, fines, injunctions, product recalls or seizures, suspension of production, withdrawal of approvals, whistleblower actions or exclusion from government contracts, any of which could materially adversely affect our business, financial condition or results of operations.

Regulatory clearance and approval processes for our products are expensive, time-consuming and uncertain, and failure to obtain and maintain required regulatory clearances and approvals could prevent us from commercializing our products.

Our businesses are subject to extensive regulation in the countries where we operate, and the trend is toward increasingly stringent requirements. Regulatory authorities such as the FDA continue to increase testing and documentation requirements, raising costs and extending timelines for product introduction. Similar trends exist in the EU and other markets. Compliance is costly and materially affects our business by increasing the time, complexity and expense of obtaining and maintaining approvals for new and existing products.

Most of our products are regulated as medical devices or pharmaceuticals and face rigorous development and approval processes, particularly in the US and EU, though some products may be regulated under other categories such as lasers, dietary supplements or medical foods. Developing new products and obtaining FDA clearance or approval, CE marking or other marketing authorizations is lengthy, expensive and uncertain. Regulatory authorities may require additional testing or clinical data, delaying authorization or limiting approved indications. Even after approval, regulators may impose post-marketing obligations or restrict promotion and distribution. We discuss these regulations more thoroughly in "Item 4. Information on the Company-4.B. Business Overview-Government Regulation-Product Approval and Monitoring".

We may also be unable to maintain existing registrations, licenses or clearances. Routine modifications to products, labeling, instructions, manufacturing processes or packaging may require notification or re-registration, creating operational complexity. Managing multiple versions of products globally can require additional inventory, bridging stock and redress operations, which may strain manufacturing capacity and supply chains. These challenges could lead to prolonged product shortages and loss of customers, negatively impacting sales.

Legislative and regulatory reforms may impact our ability to develop and commercialize our products.

The global regulatory environment is increasingly stringent and unpredictable, and unexpected changes can adversely affect our business, financial condition and results of operations.

First, compliance with changes and new requirements relating to regulatory approvals and postmarket obligations applicable to our products is costly and onerous. As discussed in "Item 4. Information on the Company – 4.B. Business Overview – Government Regulation – Product Approval and Monitoring," the EU Medical Device Regulation (EU MDR) imposes stricter requirements for the marketing and sale of medical devices. All new devices marketed in the EU require certification under EU MDR. Devices certified under prior directives with valid CE certificates may remain on the market until December 2027 or 2028 depending on classification, provided the manufacturer submitted an application for conformity assessment by May 2024. These changes require significant investment in testing, documentation and notified body reviews. Several countries that previously lacked medical device regulations have introduced them, and others have expanded or plan to expand existing frameworks. While some countries may harmonize regulations, requirements continue to differ significantly. In the US, the FDA is pursuing efforts to modernize device regulation, including changes to the 510(k) pathway that could broaden evidentiary requirements for substantial equivalence, increasing cost and time to market. Additionally, the Quality Management System Regulation (QMSR) becomes mandatory in February 2026, aligning FDA requirements more closely with ISO 13485. Given the number of devices we market, it is possible not all products will be certified by the EU MDR deadline, and some may be rationalized if certification costs are prohibitive.

Second, new legislation and new interpretations of existing healthcare statutes are frequently adopted, which could affect our business. For example, in the US, federal and state healthcare reform measures have introduced changes to reimbursement methodologies, transparency reporting and compliance obligations that have had significant impact on our operations.

Third, if countries such as the US eliminate prescription requirements for contact lenses, our marketing and distribution model would need significant changes. Such reforms could reduce the role of ECPs as intermediaries, requiring us to invest heavily in direct-to-consumer marketing and distribution infrastructure, which could increase costs and negatively impact sales of vision care products.

Finally, within our surgical business, a considerable portion of sales and growth relies on patient-pay premium technologies in markets where access has been established. For example, in the US, two landmark rulings issued by CMS created a bifurcated payment system for certain ATIOLs, with part of the cost reimbursed under Medicare and the

remainder paid out-of-pocket. For more details, see "Item 4. Information on the Company – 4.B. Business Overview – Our Products – Surgical." If CMS or other authorities amend regulations governing patient-pay reimbursement for advanced technologies, our sales and growth could be negatively impacted. Similar changes in other jurisdictions could further limit access to premium technologies and reduce demand.

We may implement product recalls or voluntary market withdrawals of our products.

The manufacturing and marketing of our products, including surgical equipment, instruments and pharmaceuticals, involve an inherent risk that our products may prove defective and pose health risks. We are subject to laws requiring us to report adverse events, and issues identified through monitoring or clinical studies may lead to voluntary or mandatory actions, including recalls, withdrawals or changes to product instructions.

Government authorities such as the FDA have the authority to mandate recalls for material deficiencies or defects in design, labeling or manufacture. We may also voluntarily initiate field actions, such as corrections or removals, due to component failures, manufacturing errors, design or labeling defects or other issues. If a correction or removal addresses a health risk or a US Food Drug, and Cosmetic Act ("FDCA") violation, it must be reported to the FDA. Similarly, safety-related field actions in the European Economic Area must be reported to regulators in each affected country.

A recall of one of our products—or a similar competing product—could impair sales and subsequent regulatory approvals of other products and lead to a general loss of customer confidence. Recalls can also trigger inspections, regulatory actions or litigation, and may result in significant costs and reputational harm.

The manufacture of our products is highly regulated and complex.

The manufacture of our products, including surgical equipment, instruments and pharmaceuticals, is complex and subject to extensive regulation by health authorities worldwide, including the FDA. Whether produced at our own facilities or by third parties, we must ensure compliance with current Good Manufacturing Practices, quality system requirements, and other applicable regulations, such as national and local environmental, health and safety laws, as well as our own quality standards. In recent years, health authorities have intensified scrutiny of manufacturers' compliance with these requirements.

Any significant failure by us or our third-party suppliers to meet these requirements or health authorities' expectations could result in the shutdown of production facilities or lines or prevent us from importing products across borders. In addition, if we fail to properly plan for manufacturing capacity, the complexity of our processes could lead to long lead times to increase capacity. These events could cause product shortages or prevent us from supplying products for an extended period. Such shortages or shutdowns have led to, and could continue to lead to, significant revenue losses and potential third-party litigation. Health authorities have also imposed substantial penalties for noncompliance. Failure to comply fully could delay approval of new products to be manufactured at the affected site.

If we fail to comply with environmental, health and safety laws and regulations, we may face significant administrative, civil or criminal fines, penalties or other sanctions. We may also incur substantial costs to comply with current or future environmental, health and safety laws and regulations, which have become more stringent over time, including potential laws addressing global climate change. Compliance with these laws may increase costs or impair research, development or production efforts.

We may be subject to penalties or market restrictions if we fail to comply with post-approval regulatory requirements.

Our products are subject to extensive post-approval regulation, including requirements related to testing, manufacturing, labeling, advertising, promotion, recordkeeping, reporting, import and export. Regulatory authorities such as the FDA and their counterparts globally monitor compliance with these requirements.

We are required to report adverse events and product malfunctions. In the US, for example, we must notify the FDA of any incident in which a marketed medical device may have caused or contributed to a death or serious injury or has malfunctioned in a way that could recur and cause harm. In the European Economic Area, manufacturers must report serious or potentially serious incidents to the relevant authorities.

Our advertising and promotional activities are also subject to strict regulatory oversight. Marketing approvals typically limit our products to specific uses, and we are prohibited from promoting unapproved or "off-label" uses. We must ensure that all product claims are adequately substantiated. Claims deemed false, misleading or deceptive may result in enforcement actions, consumer litigation or competitor challenges. In addition, interactions with healthcare providers are subject to complex laws and industry codes that govern promotional practices, including restrictions on benefits, sponsorships and educational activities. These rules vary by jurisdiction and are subject to evolving interpretations. Failure to comply could lead to investigations, fines or reputational harm. As our associates increasingly use social media, the risk of disseminating inappropriate or noncompliant messaging has increased. We have previously modified or withdrawn promotional materials at the request of regulators and may be required to do so again.

Failure to comply with applicable regulatory requirements or to adequately respond to notices of violation could result in enforcement actions, including warning or untitled letters; fines, civil penalties, injunctions or criminal prosecution; product recalls, seizures or import detentions; delays or refusals in product approvals; suspension or withdrawal of existing approvals; operating restrictions or production interruptions; and export bans.

Any of these actions could result in unexpected costs, damage our reputation and adversely affect our business, financial condition and results of operations.

Social impact and sustainability matters may impact our business and reputation.

Investors, advocacy groups, lenders and other market participants increasingly evaluate companies based on social impact and sustainability (SIS) performance, which is viewed as contributing to long-term value. Various organizations rate SIS performance across topics such as climate change, human rights, ethics and compliance, corporate governance, board oversight of sustainability issues and access to products and solutions. These ratings are widely publicized and influence investment decisions, including eligibility of Alcon securities for certain portfolios and funds.

From time to time, we are asked by certain investors to set ambitious SIS goals and provide robust disclosures on progress. Some customers, particularly EU and UK governments, have adopted procurement policies imposing sustainability standards, which may affect our ability to win tenders. In response, we have adapted our corporate responsibility program to evolving SIS frameworks and announced goals and objectives. These goals reflect current plans and aspirations, but factors beyond our control may prevent achievement. Efforts to accomplish and report on these goals present operational, reputational, financial and legal risks.

Standards for SIS tracking and reporting remain new, fragmented and evolving. Regulatory authorities in the US, Switzerland and Europe have imposed, and may continue to impose, mandatory SIS disclosure requirements, which could require significant revisions to our goals and reporting processes and increase compliance costs. Enhancing processes and controls to meet evolving standards and third-party assurance requirements may require substantial resources, and the lack of consistent or meaningful comparative data across the industry could make it difficult to benchmark performance or demonstrate progress.

While many stakeholders advocate for SIS progress, there is also backlash against certain initiatives from government officials, consumers and others. Reconciling these opposing views may not be possible. Failure or perceived failure to meet SIS expectations, goals or reporting standards could negatively impact our reputation, ability to attract talent, competitiveness and investment appeal, and could expose us to enforcement actions or litigation.

If we fail to properly educate and train healthcare providers on our products, then customers may not buy our products.

We market our surgical and certain vision care products including pharmaceutical products to healthcare providers such as ECPs, public and private hospitals, ambulatory surgical centers, eye clinics and ophthalmic surgeons' offices and group purchasing organizations and our other vision care products to retailers and distributors. We have developed and strive to maintain strong relationships with these groups who assist in product research and development and advise us on how to meet consumer and surgeon needs. We rely on these groups to recommend our products to their patients and to other members of their organizations.

Contact lens and lens care consumers tend not to switch products regularly and are repeat purchasers. As a result, the success of these products depends on an ECP's initial recommendation, which may be influenced by our ability to educate the ECP on our products. Even if we succeed in educating ECPs, their influence over consumer choice may decline, which could make our business more dependent on direct-to-consumer marketing. Increased direct-to-consumer marketing could strain our relationships with ECPs who may view such efforts as a threat to their business.

In our surgical business and with pharmaceutical products, ECPs including ophthalmic surgeons play a significant role in determining treatment and selecting products for conditions such as cataracts, vitreoretinal disorders, refractive errors, glaucoma and dry eye. Acceptance of our products depends on our ability to train ECPs and their clinical staff on safe and appropriate use, which takes time. Training may take longer than expected and could delay sales growth. After training, we rely on ECPs to advocate for our products in the broader marketplace. Convincing ECPs to dedicate time and resources to training is challenging, and we may not succeed. If we fail to educate ECPs on the merits and proper use of our products, they may not adopt them, which would limit commercialization and profitability.

Even if we protect our intellectual property to the fullest extent permitted by applicable law, our competitors and other third parties could develop and commercialize products similar or identical to ours, which could impair our ability to compete.

We rely on a combination of patents, trademarks, designs and copyrights to protect our intellectual property. The scope, strength and duration of these rights vary significantly by product and jurisdiction. We also rely on trade secrets, know-how and other confidential information to supplement these protections. In the aggregate, these intellectual property rights are of material importance to our business.

These protections may limit competitors from commercializing products covered by our intellectual property rights, but they do not prevent competitors from marketing alternative products that compete with ours. In addition, these rights may be challenged by third parties or regulatory agencies, and trade secrets protected through confidentiality agreements may be independently developed or misappropriated. In certain countries, particularly emerging markets, ambiguities in the law and enforcement difficulties may render intellectual property rights less effective than in Western Europe or the US.

For our pharmaceutical products, we face challenges from third parties seeking to manufacture and market generic versions before patent expiration. In the US, generic manufacturers may challenge the validity or claim non-infringement of our patents through the Abbreviated New Drug Application (ANDA) process with the FDA and related litigation. Loss of patent protection for a pharmaceutical product would generally lead to a significant and rapid decline in sales as lower-priced generics become available.

Therefore, even if we protect our intellectual property to the fullest extent permitted by law, competitors and other third parties may nonetheless develop and commercialize products similar or identical to ours, which could impair our ability to compete and adversely affect our business, financial condition and results of operations.

We are a multinational business that operates in numerous tax jurisdictions.

We conduct operations in multiple tax jurisdictions, and the tax laws of those jurisdictions generally require that transfer prices between affiliated companies in different jurisdictions be the same as those between unrelated companies dealing at arm's length and that such prices be supported by contemporaneous documentation. While we believe we operate in compliance with applicable transfer pricing laws and intend to continue to do so, our transfer pricing procedures are not binding on tax authorities. If tax authorities in any jurisdiction successfully challenge our transfer prices as not reflecting arm's length transactions, they could require us to adjust our transfer prices and reallocate income, which could result in a higher overall tax liability and possibly interest and penalties.

The integrated nature of our worldwide operations can produce conflicting claims from tax authorities in different countries as to the profits to be taxed in each country. Most jurisdictions in which we operate have double tax treaties with other foreign jurisdictions, which provide a framework for mitigating the impact of double taxation on our revenues and capital gains. However, mechanisms developed to resolve such conflicting claims are largely untested, can be lengthy and do not always contain a mandatory dispute resolution clause.

In recent years, tax authorities around the world have increased scrutiny of company tax filings and have become more rigid in exercising discretion. The Organization for Economic Co-operation and Development (OECD) has proposed changes to international tax standards under its Base Erosion and Profit Shifting Action Plans to address transparency, coherence and substance. Most recently, the OECD released plans, including model rules and guidelines, for further amendments to international tax standards, including Pillar One, which reallocates taxing rights based on customer location, and Pillar Two, which establishes a 15% global minimum tax. Many countries are drafting or have enacted legislation to implement Pillar Two rules, with some effective dates as early as January 1, 2024.

Several jurisdictions implemented domestic rules inspired by OECD Pillar Two in 2024. The OECD issued further guidance in January 2025 and January 2026, including new interpretations of existing rules, a "Side-by-Side" mechanism that exempts US-parented groups from certain elements of Pillar Two and extensions of safe harbors that may affect compliance burdens and potential exposure. Adoption of a Side-by-Side mechanism would partly mitigate the risk of retaliatory tax or tariff measures, but there remains uncertainty about how jurisdictions will interpret and implement the 2025 and 2026 publications. We have not recorded a material impact to current tax expense, but new interpretations or guidance could increase tax expense and affect our financials. We continue to expect Pillar Two to lead to a recurring increase in our tax expense and effective tax rate, although we do not expect that impact to be material. Recommendations by the OECD or other supranational bodies such as the EU could also require broader disclosures to tax authorities on global operations, leading to greater audit scrutiny.

On July 4, 2025, budget reconciliation bill H.R. 1 was enacted in the US, introducing, among other items, amendments to a number of corporate income tax mechanisms such as GILTI and FDII and methods, including the option to accelerate the deduction of domestic research and development expenses as well as the depreciation of certain categories of assets.

In general, tax reform efforts, including changes to tax base or rate, transfer pricing, intercompany dividends, cross-border transactions, controlled corporations and limitations on tax relief for interest on intercompany debt, will require us to continually assess our organizational structure and could increase the risk of international tax disputes, raise our effective tax rate and adversely affect our financial condition.

Goodwill and other intangible assets may result in significant noncash impairment charges.

We carry a substantial amount of goodwill and other intangible assets on our Consolidated Balance Sheet, primarily related to the Alcon brand name, as well as technologies, acquired research and development, currently marketed

products and marketing know-how. If the fair value of these assets or the cash-generating units containing goodwill falls below their carrying value, we may incur significant noncash impairment charges. For example, we recorded \$45 million and \$9 million in impairment charges in 2025 and 2024, respectively.

For details on impairment testing, factors that could trigger an impairment and the impact of impairment charges on our results, see “Note 2. Selected Accounting Policies – Goodwill and intangible assets” to our Consolidated Financial Statements.

We may underestimate future pension and other post-employment benefit obligations.

We sponsor pension and other post-employment benefit plans in various forms. While most plans are defined contribution, some associates remain under defined benefit plans. For these defined benefit plans, we make significant assumptions and estimates about future events when calculating the present value of expected obligations, including discount rates and future compensation increases.

Actual results may differ materially from our assumptions due to changing market conditions, withdrawal rates or participant life spans. For example, at December 31, 2025, a decrease of 0.25% in the discount rate applied to our defined benefit obligations would have increased our year-end obligation by \$26 million. Differences between assumptions and experience could require additional contributions. Further, employer contributions may be required if plan funding falls below levels mandated by local regulations.

If our financial reporting, accounting practices or internal controls are inadequate, we could face regulatory penalties, litigation and loss of investor confidence.

We prepare our consolidated financial statements in accordance with IFRS as issued by the IASB and are subject to complex accounting and disclosure requirements under applicable securities laws. Preparing accurate financial statements requires significant judgment and estimates, and changes in IFRS or interpretations could affect our reported results.

We rely on internal controls over financial reporting to ensure the integrity of our disclosures. Under Section 404 of the Sarbanes-Oxley Act, we must assess and report on the effectiveness of these controls, and our independent auditors must attest to management’s assessment. If we identify a material weakness or fail to maintain effective controls, we could be required to restate prior financial statements, which may result in regulatory inquiries, penalties, shareholder litigation and reputational harm.

In addition, we depend on timely and accurate information from multiple systems and third-party service providers. Errors, system failures or cybersecurity incidents could disrupt our financial reporting processes. Any failure to maintain effective internal controls or comply with applicable reporting requirements could adversely affect our business, financial condition and the market price of our securities.

Our existing debt may limit our flexibility or adversely affect our liquidity.

We had \$4.7 billion of outstanding debt as of December 31, 2025, and we may incur additional indebtedness in the future for various reasons, including fluctuations in operating results, capital expenditures and potential acquisitions.

Our indebtedness may:

- make it difficult for us to satisfy our obligations, including interest payments;
- require us to dedicate cash flows to debt service, reducing funds available for capital expenditures, BD&L or other strategic transactions, working capital and dividends;
- limit our flexibility to plan for and respond to changes in our business;
- negatively impact our credit rating and increase borrowing costs;
- place us at a competitive disadvantage relative to less-leveraged competitors;
- increase our vulnerability to adverse economic and industry conditions, including interest rate changes; and
- make it difficult to refinance existing debt or obtain new financing on commercially reasonable terms.

Any of these events could materially adversely affect our business, financial condition or results of operations or significantly reduce our liquidity and impair our ability to meet debt obligations. In addition, recent monetary policy changes and interest rate increases have raised borrowing costs and may continue to do so.

We may need to obtain additional financing, which may not be available or, if it is available, may not be on favorable terms and could result in shareholder dilution.

We may need to raise additional funds to:

- finance unanticipated working capital requirements or refinance existing debt;
- develop or enhance infrastructure and existing products and services;
- engage in mergers, acquisitions or other strategic BD&L transactions;
- fund strategic relationships; and
- respond to competitive pressures.

If we raise funds through equity or convertible debt, existing shareholders may experience dilution, and holders of these securities may have rights or preferences senior to those of current shareholders. Financing used for research and development, acquisitions or capital expenditures may not generate expected returns or cash flows. Significant judgment is required to select investments that deliver optimal returns, and we could make investments that are less profitable than alternatives we do not pursue.

Litigation and governmental investigations may harm our business or distract our management.

We are, and may in the future be, subject to investigations and legal proceedings involving product liability, sales and marketing practices, commercial disputes, employment, antitrust or competition, securities, health and safety, environmental, tax, international trade, privacy, intellectual property (including Hatch-Waxman litigation) and anti-bribery regulations such as the FCPA. See “Item 8. Financial Information-8.A. Consolidated Statements and Other Financial Information-Legal Proceedings”.

Substantial, complex or extended litigation could result in significant expenditures, affect our ability to market and distribute products and divert management attention. For example, intellectual property litigation could lead to damage awards or injunctions preventing manufacture and sale of affected products or requiring significant royalty payments. In 2024, we resolved litigation with Hoya Corporation after the court granted summary judgment in our favor on certain key claims, and also resolved the patent infringement claims we had assumed in connection with the acquisition of Aerie Pharmaceuticals Inc. We may not be successful in defending ourselves in the future.

Even meritless claims can generate adverse publicity, increase legal costs and hinder insurance coverage. Litigation and investigations could result in:

- significant legal expenses and damage awards;
- injunctions or restrictions on product sales;
- reputational harm and adverse publicity;
- limitations on insurance coverage or increased premiums; and
- management distraction from core operations.

Any of these outcomes could materially adversely affect our business, prospects, financial condition and results of operations.

Failure to comply with laws that result in legal proceedings or government investigations may negatively affect our business.

We operate in multiple jurisdictions and must comply with a wide range of laws and regulations, which vary by country and continue to evolve as enforcement priorities and public expectations change. Associates, contractors, consultants, partners or vendors may engage in misconduct or noncompliance, exposing us to liability.

We face increasing transparency requirements, including disclosure of payments or transfers of value to healthcare professionals and organizations, as well as compliance with privacy laws such as the EU General Data Protection Regulation and the California Consumer Privacy Act. We also operate in developing countries where compliance cultures may be less established.

Although we maintain a global ethics and compliance program, it may not prevent violations. Any actual or alleged failure to comply with laws or heightened expectations could lead to substantial liabilities, reputational harm and losses not covered by insurance.

Government investigations and enforcement actions in our industry are increasing and may involve criminal proceedings or retroactive challenges to prior practices. These proceedings are unpredictable and can result in:

- large judgments or penalties, including repayment of amounts allegedly obtained improperly;
- costly settlements, including corporate integrity agreements that impose long-term compliance obligations;
- exclusion from government reimbursement programs; and

- reputational damage and related civil litigation.

Any such outcomes could materially adversely affect our business, financial condition or results of operations. See "Item 8. Financial Information-8.A. Consolidated Statements and Other Financial Information-Legal Proceedings."

Risks related to the Ownership of our Shares

Your percentage ownership in Alcon may be diluted in the future.

In the future, your percentage ownership in Alcon may be diluted because of equity issuances from acquisitions, capital markets transactions or otherwise, including equity awards that we may grant to our directors, officers and associates under our associate participation plans. These additional issuances will have a dilutive effect on our earnings per share, which could adversely affect the market price of our shares.

Our maintenance of two exchange listings could result in pricing differentials of our ordinary shares between the two exchanges.

Our shares trade on the NYSE in US dollars and on the SIX in Swiss francs, which may result in price differentials between the two exchanges for a variety of factors, including fluctuations in the US dollar/Swiss franc exchange rate and differences in trading schedules.

We may not pay or declare dividends.

Although we expect to continue recommending a regular cash dividend based on prior year core net income, we may not pay or declare dividends in the future. Any dividend declaration, timing and amount is subject to shareholder approval at the General Meeting and depends on factors such as our financial condition, earnings, corporate strategy, capital requirements, covenants and legal requirements.

Any dividends we declare will be denominated in Swiss francs. Exchange rate fluctuations will affect the US dollar equivalent of dividends received by holders of shares held via DTC or registered with Computershare Trust Company, N.A. in the US. If the Swiss franc decreases against the US dollar, the US dollar value of dividends will decline. See Item 8.A. Consolidated Statements and Other Financial Information – Dividend Policy for more information.

As a foreign private issuer, we are subject to different US securities laws and rules than a domestic issuer, which may limit the information publicly available to US shareholders.

We report under the Securities Exchange Act of 1934, as amended ("Exchange Act") as a foreign private issuer. As a result, we are exempt from certain provisions applicable to US domestic companies, including rules on proxy solicitation, certain insider reporting and short-swing profit liability obligations and requirements to file quarterly reports on Form 10-Q or current reports on Form 8-K. We are also exempt from Regulation Fair Disclosure and may rely on exceptions from certain NYSE corporate governance requirements. Consequently, US shareholders may not have the same protections as shareholders of US domestic issuers.

We prepare our financial statements under IFRS, which differs from US GAAP in areas such as pension accounting, taxation and recognition and impairment of long-lived assets. Our reported earnings and financial information may therefore not be comparable to companies reporting under US GAAP.

We may lose our foreign private issuer status.

We currently qualify as a foreign private issuer and are not required to comply with all periodic disclosure and current reporting requirements applicable to US domestic issuers. To maintain this status, either (a) a majority of our shares must be owned of record by non-US residents or (b) a majority of our executive officers or directors may not be US citizens or residents, more than 50% of our assets cannot be located in the US and our business must be administered principally outside the US.

If we lose foreign private issuer status, we would be subject to more extensive Exchange Act requirements, including reporting under US GAAP instead of IFRS, which would be costly and could require significant changes to historical financial statements. We may also need to modify corporate governance practices and incur higher compliance costs. Loss of this status could make it more difficult and expensive to obtain director and officer liability insurance and could materially increase our regulatory burden.

Our status as a Swiss corporation may limit our flexibility to raise capital, issue dividends and manage capital needs.

Swiss law reserves certain corporate actions for shareholder approval that boards in other jurisdictions may execute independently. For example, shareholders must approve dividend payments and authorize increases or decreases in share capital. While our shareholders have authorized limited flexibility for capital adjustments and conditional share capital, some of these authorizations expire in May 2028 and require renewal.

Swiss law generally grants existing shareholders subscription rights for new share issuances and advance subscription rights for shares issued in connection with convertible instruments, which can only be restricted or excluded by a qualified shareholder vote. Swiss law also limits flexibility in structuring share classes compared to other jurisdictions. These requirements may restrict our ability to raise capital quickly or adjust our capital structure, and situations may arise where greater flexibility would have benefited shareholders.

It may be difficult to enforce US judgments against us.

We are organized under the laws of Switzerland, which may make it difficult for investors to serve process within the US or enforce US court judgments against us, including those based on US securities laws. Swiss counsel has advised that enforcement of US judgments in Switzerland is uncertain and subject to the Swiss Federal Act on Private International Law, which precludes applying foreign law if it conflicts with Swiss public policy and mandates compliance with Swiss procedural standards.

Switzerland and the US do not have a treaty for reciprocal recognition and enforcement of civil judgments. Under Swiss law, a US judgment may only be enforced if:

- the US court had jurisdiction under Swiss law;
- the judgment is final and non-appealable;
- enforcement does not contravene Swiss public policy;
- due process standards were met; and
- no conflicting Swiss or third-country judgment exists.

These limitations may make it difficult or impossible for US investors to enforce judgments against us in Switzerland.

ITEM 4. INFORMATION ON THE COMPANY

4.A. HISTORY AND DEVELOPMENT OF THE COMPANY

General Corporate Information

Alcon is a stock corporation (*Aktiengesellschaft*) organized under the laws of Switzerland in accordance with article 620 et seq. of the Swiss Code of Obligations and registered with the register of commerce of the Canton of Fribourg, Switzerland ("Commercial Register") under registration number CHE-234.781.164. Alcon is registered in the Commercial Register under each of Alcon AG, Alcon SA and Alcon Inc., all of which are stated in Alcon's articles of incorporation (our "Articles of Incorporation") as our corporate name. Alcon was formed for an unlimited duration, effective as of September 21, 2018, the date of the registration of Alcon in the Commercial Register. On April 9, 2019, Alcon's shares were listed on the SIX and the NYSE under the ticker symbol "ALC."

Alcon is domiciled in Fribourg, Switzerland and our registered office is located at Rue Louis-d'Affry 6, 1701 Fribourg, Switzerland. Our headquarters is located in Geneva, Switzerland at the following address: Chemin de Blandonnet 8, 1214 Vernier, Geneva, Switzerland. Our telephone number is +41 58 911 2000. Our principal website is www.alcon.com. The information contained on our website is not a part of this Form 20-F.

General Development of Business

Alcon was originally founded in 1945 by pharmacists Robert Alexander and William Conner, who opened a small pharmacy under the "Alcon" name in Fort Worth, Texas. In 1947, Alcon was first incorporated and began manufacturing specialty pharmaceutical products to address ocular health needs. In the succeeding years, Alcon began operating internationally with the opening of an office in Canada and first formed its surgical division.

In 1977, Alcon was acquired by a Swiss subsidiary of Nestlé S.A. and, consequently, Alcon began operating as a wholly owned subsidiary of Nestlé until 2002. On March 20, 2002, Nestlé completed an initial public offering of approximately 25% of Alcon's outstanding common shares upon which Alcon was publicly listed and traded on the NYSE under the symbol "ACL". In a series of transactions from 2008 through 2011, Novartis AG acquired 100% of Alcon's outstanding common shares creating the Alcon division within Novartis.

On April 9, 2019, Novartis completed the legal and structural separation of Alcon into a stand-alone company through a spin-off transaction, upon which Alcon became a stand-alone, independent company.

Since the spin-off, Alcon has focused on launching innovative new products, investing in manufacturing line expansion and pursuing adjacencies such as pharmaceuticals.

Significant Acquisitions, Dispositions and other Events

Significant Investments

From time to time, we make significant investments in certain of our manufacturing facilities to enhance our production capabilities. For more information, see "Item 4.D. Property, Plants and Equipment—Major Facilities".

Acquisitions

In the past three years, we have entered into certain acquisition transactions, including (i) the acquisition of 100% of the outstanding shares and equity of LumiThera Inc. ("LumiThera"); (ii) the acquisition of all remaining outstanding shares and equity of Cylite Pty, Ltd. ("Cylite"); (iii) the acquisition of 99% of the outstanding shares and equity of Aurion Biotech, Inc. ("Aurion"); and (iv) the acquisition of 100% of the outstanding shares and equity of BELKIN Vision Ltd. ("BELKIN"). For further details on certain of our significant transactions in 2025, 2024 and 2023, see Notes 3 and 21 to the Consolidated Financial Statements.

Share Repurchase Program

On February 25, 2025, our Board announced the adoption of a share repurchase program of up to \$750 million of our Ordinary shares. The shares acquired are held in treasury and are intended to offset the dilutive effect of shares vesting

under our equity based incentive plans. Alcon funded the repurchases through cash generated from operations. The program was authorized by the Swiss Takeover Board and subject to customary safe harbor conditions. The share repurchase program was originally expected to be completed over a three year period, but was completed in January 2026. As of December 31, 2025, 8,437,394 shares were repurchased for a total consideration of \$682 million. See "Item 16E—Purchases of Equity Securities by the Issuer and Affiliated Purchasers."

Transformation Program

On November 19, 2019, we announced a multi-year transformation program to better align our organizational structure with the scope of Alcon's business operations globally. We created four shared business centers designed to create efficiencies for reinvestment into key growth drivers. The transformation program was originally projected to deliver annual run-rate savings of approximately \$200 to \$225 million, to be reinvested into key growth drivers, with an original projected cost of the program of \$300 million by 2023. On November 15, 2022, we announced additional transformation initiatives to deliver incremental efficiencies. As a result, we projected incremental run-rate savings of approximately \$100 million, with incremental program costs of approximately \$125 million. As expected, this program was completed by year-end 2023 and in line with estimates.

Additional Information

The SEC maintains an internet website at www.sec.gov that contains reports, proxy and information statements and other information regarding companies that file documents electronically with the SEC. Our internet website is www.alcon.com. The information included on our internet website or the information that might be accessed through such website is not included in this Annual Report and is not incorporated into this Annual Report by reference.

4.B. BUSINESS OVERVIEW

Overview

Alcon is the global leader in eye care with \$10.3 billion in net sales during the year ended December 31, 2025. We research, develop, manufacture, distribute and sell a full suite of eye care products within two key businesses: Surgical and Vision Care. Based on sales for the year ended December 31, 2025, we are the number one company by global market share in the ophthalmic surgical market and in the vision care market. We employ over 25,000 associates operating in 56 countries and serve consumers and patients in over 140 countries and territories. We believe our market leading position and global footprint allow us to benefit from economies of scale, maximize the potential of our commercialized products and pipeline and will permit us to effectively grow the market and expand into new product categories.

Our Surgical business is focused on ophthalmic products for cataract surgery, vitreoretinal surgery, refractive laser surgery and glaucoma surgery. Our broad surgical portfolio includes implantables, consumables and surgical equipment required for these procedures and supports the end-to-end needs of the ophthalmic surgeon. Our Vision Care business comprises daily disposable, reusable and color-enhancing contact lenses, cell therapies to treat ocular diseases and a comprehensive portfolio of ocular health products, including products for dry eye, ocular allergies, glaucoma and contact lens care, as well as ocular vitamins and redness relievers. Alongside our world-class products, Alcon provides best-in-class service, training, education and technical support for our customers.

Our Surgical and Vision Care businesses are complementary and benefit from synergies in research and development, manufacturing, distribution and consumer awareness and education. This allows us to position ourselves as a trusted partner for eye care products across the continuum of care from retail consumers, to optometry, to surgical ophthalmology. For example, in research and development, we can apply our expertise in material and surface chemistry to develop innovative next-generation products for both our IOL and contact lens product lines. Similarly, our global commercial footprint and expertise as a global organization provide us with product development, manufacturing, distribution and commercial promotion and marketing knowledge that can be applied to both of our businesses.

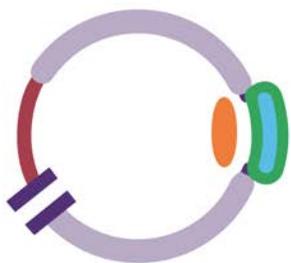

We are dedicated to providing innovative products that enhance quality of life by helping people See Brilliantly. Our strong foundation is based on our longstanding success as a trusted brand, our legacy of industry firsts and advancements, our leading positions in the markets in which we compete and our continued commitment to substantial investment in innovation. With more than 75 years of history in the ophthalmic industry, we believe the Alcon brand name is synonymous with innovation, quality, service and leadership among eye care professionals worldwide.

Our Markets

Overview

We currently operate in the global ophthalmic surgical and vision care markets, which are large, dynamic and growing. As the world population grows and ages, the need for quality eye care is expanding and evolving, and we estimate that the size of the eye care market in which we operate is approximately \$37 billion and is projected to grow mid-single digits on average per year from 2025 to 2030.

Although it is estimated that 90% of all visual impairments are currently preventable, treatable or curable, we operate in markets that have substantial unmet medical and consumer needs. For example, based on market research, it is estimated that there are currently 65 million people with moderate to severe vision impairment due to cataracts, 1.8 billion who suffer from presbyopia, 157 million with uncorrected refractive errors, 146 million with diabetic retinopathy, 131 million living with glaucoma and approximately 1.6 billion who suffer from symptoms of dry eye, among other unaddressed ocular health conditions. In addition, there are 1 billion people living with some form of unaddressed visual impairment. Below is a brief description of these ocular disorders.

| Eye disorders and location | Disorder | Results in |
|----------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
|  Refractive errors Front of eye | Myopia (nearsightedness), hyperopia (farsightedness), and astigmatism (oddly-shaped cornea) | Blurred or impaired vision |
|  Presbyopia Intraocular Lens | Hardening of the natural lens due to age (35 Years and beyond) | Inability to focus up close |
|  Dry eye / Allergy Cornea | Poor quantity and quality of tears / Reactions to allergy-causing substances (e.g., pollen, dander, and mold) | Blurred vision, itching, redness, and general discomfort |
|  Cataracts Intraocular Lens | Clouding of the eye's natural lens | Blindness if untreated |
|  Retinal Diseases Retina | Vitreomacular traction, retinal detachment, severe eye trauma, ocular complications of diabetes (diabetic retinopathy) | Can cause irreversible loss of vision |
|  Glaucoma Optic Nerve | Damage to the eye's optic nerve, usually from increased pressure in the eye | Vision loss and blindness |
|  Cornea Conditions Cornea | Various conditions including keratoconus, corneal dystrophies, edema, and ulcers and keratitis | Distorted vision and vision loss |

Our Surgical and Vision Care products are targeted at addressing many of these unmet medical and consumer needs. We expect the surgical and vision care markets to continue to grow, driven by multiple factors and trends, including:

- **Aging population with growing eye care needs:** A growing aging population continues to drive the increased prevalence of eye care conditions worldwide, as the number of persons aged 60 years or over is expected to more than double by 2050, rising from 962 million globally in 2017 to 2.1 billion in 2050.
- **Innovation improving the quality of eye care:** Technology innovation in eye care is driving an increased variety of products that more effectively treat eye conditions. The importance of vision correction and preservation, the high return on healthcare spend and the improved patient outcomes are leading to increased coverage and reimbursement opportunities from governmental and private third-party payors, expanding patient access to such eye care products.
- **Increasing wealth and growth from emerging economies:** It is estimated that by 2035 the global middle class population is expected to exceed 5 billion people with the majority of growth coming in emerging markets. This major demographic shift is generating a large, new customer base with increased access to eye care products and services along with the resources to pay for them. The expansion of training opportunities for eye care professionals in emerging markets is also leading to increased patient awareness and access to premium eye care products and surgical procedures, facilitating their growth.
- **Increasing prevalence of myopia, progressive myopia and digital eye strain:** It is estimated that by 2050, half of the world's population (nearly five billion people) will be myopic. Further, the modern work environment, along with leisure preferences, have increased the number of hours people spend in front of a screen, adversely impacting vision and increasing the risk of progressive myopia and digital eye strain.

The Surgical Market

The surgical market in which we operate is estimated to be approximately \$14 billion and is projected to grow approximately 4-6% on average per year from 2025 to 2030. The surgical market includes sales of implantables, consumables and surgical equipment, including associated technical, clinical and service support and training. Surgical implantables are medical devices designed to remain in the eye, such as monofocal IOLs, ATIOLs and stents placed in the eye during cataract surgery. Consumables include hand-held instruments, surgical solutions, equipment cassettes, patient interfaces and other disposable items typically used during a single ophthalmic surgical procedure. Finally, surgical

equipment includes multi-use surgical consoles, lasers and diagnostic instruments used across procedures to enable surgeons to visualize and conduct ophthalmic surgeries. Market growth is expected to be driven mainly by:

- An aging population causing increased global demand in cataract and vitreoretinal procedures;
- A growing role of generative artificial intelligence and digital transformation that will drive connectivity between clinic and operating room equipment, fuel artificial intelligence-driven solutions to drive patient outcomes and accelerate advancements in imaging technology;
- Continued adoption of premium patient-pay technologies, namely ATIOLs, where international penetration continues to expand to catch up to the US levels of approximately 20%; and
- Increasing use of advanced technologies, including enhanced diagnostic tools, new surgical options for glaucoma and wider adoption of phacoemulsification in cataract surgeries, which is now used in over 50% of cases in emerging markets versus over 98% in the US.

Additionally, the global burden of diabetic retinopathy is expected to remain high through 2045, at which point 161 million people are projected to suffer the condition.

The Vision Care Market

The vision care market in which we operate is estimated to be approximately \$23 billion and is projected to grow approximately 4-5% on average per year from 2025 to 2030. The vision care market is comprised of products designed for use by eye care professionals and consumers. Products are largely categorized across two product lines: contact lenses and ocular health. Market growth is expected to be driven mainly by:

- Fast growing daily disposable silicone-hydrogel ("SiHy") contact lens and premium reusable lens segment fueled by better material, improved health and comfort and enhanced vision acuity;
- Advancements in specialty lenses combined with increasing demand for toric and multifocal lenses, which command an approximately 20-40% pricing premium over spherical lenses, allowing patients to continue wearing contact lenses as they become older and helping to expand the market;
- A significant population of approximately 1.6 billion people worldwide who suffer from symptoms of dry eye, but do not have clinical signs of dry eye, over 750 million people who have both symptoms and clinical signs of dry eye, and over 650 million people who are at risk of developing dry eye in that they have clinical signs, but are not yet suffering from dry eye symptoms;
- A rising number of elderly people worldwide such that primary open-angle glaucoma (POAG) now affects an estimated 84 million people and ocular hypertension, often a predecessor to POAG, is estimated to affect another 48 million people;
- Growing access and consumption of vision care products in emerging markets such as Asia, which had an estimated single-digit contact lens penetration as compared to double digits in the developed world; and
- Increasing consumer access through the expansion of distribution models, including internet sales and other direct-to-consumer channels.

Our Business

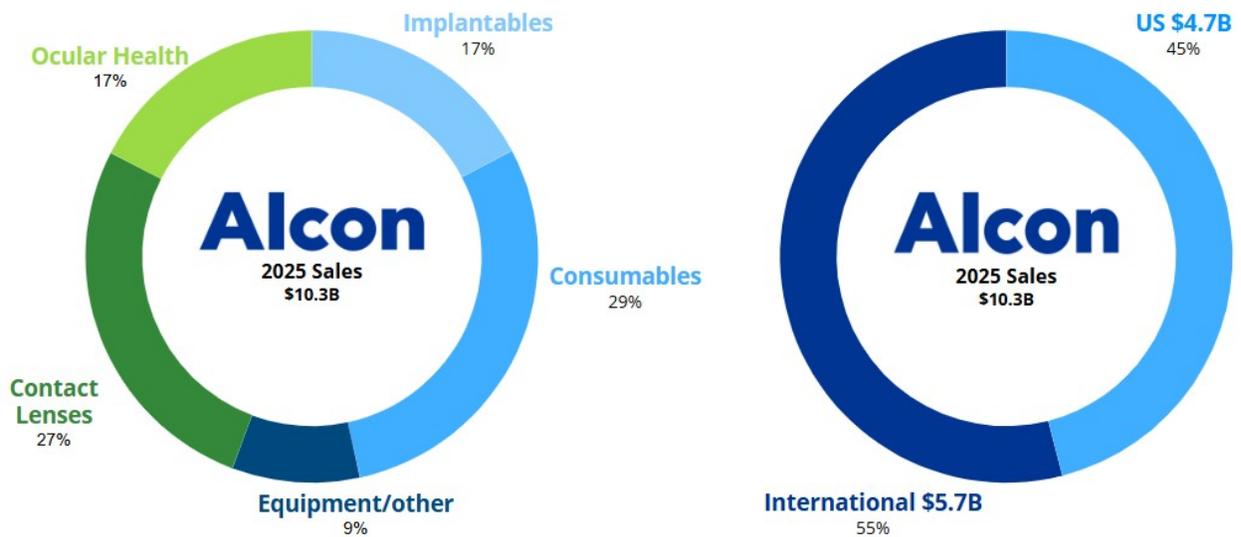

Overview

With \$10.3 billion in net sales during the year ended December 31, 2025, we are the global leader in eye care. Our broad range of products represents one of the most complete portfolios in the ophthalmic industry and comprises high-quality and technologically advanced products across all major product categories in the surgical and vision care markets. Our Surgical and Vision Care products are used in treating multiple ocular health conditions and offer leading eye care solutions for patients throughout their lives.

VISION CARE (VC) includes contact lenses and ocular health products, including artificial tears, allergy drops, and glaucoma drops.
 SURGICAL (SX) includes intraocular lenses (IOLs), surgical equipment, consumables, and MIGS devices

Our leadership position across most of our product categories provides us the scale and expertise to enhance our ability to extend our product offering through the launch of new and innovative products and to expand our geographic reach into ophthalmic markets worldwide. Our Surgical business had approximately \$5.8 billion in net sales of implantables, consumables and equipment, as well as services and other surgical products, and our Vision Care business had approximately \$4.6 billion in net sales of our contact lens and ocular health products, during the year ended December 31, 2025.

Percentages may not sum to 100% due to rounding.

We believe the Alcon brand name is synonymous with innovation, quality, service and leadership among eye care professionals worldwide. In each of our markets, we rely on our strong relationships with eye care professionals and consumers to attract and retain customers and expand the market. We customize our selling efforts with the goal of surrounding eye care professionals with Alcon representatives who can help address each aspect of a customer's needs. Our field force supplements the direct promotion of our products by providing customers with access to clinical education programs, hands on training, data from clinical studies and technical service assistance.

We have 16 state-of-the-art manufacturing facilities that employ our proprietary technologies and know-how. We believe our global footprint, knowledge base in manufacturing, state-of-the-art facilities and capacity planning enable us to handle increased levels of product demand and product complexity. Furthermore, our global manufacturing and supply chain allows us to leverage economies of scale and reduce cost per unit as we ramp up production.

We believe we have made one of the largest commitments to research and development of any surgical and vision care company, with more than 2,100 associates worldwide researching and developing treatments for vision conditions and eye diseases, and have sought innovation from both internal and external sources. In 2025, we invested \$990 million in research and development. In addition to our in-house research and development capabilities, we also consider external innovation opportunities and routinely screen for companies developing emerging technologies that we believe could enhance our existing product offerings or develop into innovative new products. We intend to continue to pursue acquisition, licensing and collaboration opportunities as part of our goal of remaining a market leader in innovation.

Our Surgical Business

We hold the number one position in the global surgical market, offering implantable products, consumables and equipment for use in surgical procedures to address cataracts, vitreoretinal conditions, refractive errors and glaucoma. Our Surgical business has the most complete line of ophthalmic surgical devices in the industry, creating a "one-stop shop" for our customers that we consider to be a key differentiator for our business. For the year ended December 31, 2025, our Surgical business had \$5.8 billion in net sales.

Our Vision Care Business

Our Vision Care business consists of an extensive portfolio of contact lens and ocular health products, aimed at helping consumers *See Brilliantly*. Our product lines include daily disposable, reusable and color-enhancing contact lenses. We also offer a comprehensive portfolio of ocular health products, including products for dry eye, ocular allergies, glaucoma and contact lens care, as well as ocular vitamins and redness relievers. With \$4.6 billion in vision care net sales for the year ended December 31, 2025, we aim to continue to innovate across our vision care portfolio to help our patients around the world see brilliantly.

Our Strengths

We have a strong foundation based on robust industry expertise, leading brands and excellence in customer service, backed by more than 75 years of history as a trusted brand. Our strengths include:

- **Global leader in highly attractive markets with the most complete brand portfolio.** With \$10.3 billion in net sales in the year ended December 31, 2025, we are the leader in an attractive eye care market, which is supported by favorable population megatrends and is expected to grow mid-single digits per year from 2025 to 2030. Our Surgical business is the market leader in sales of ophthalmic equipment used in the operating room and is supported by the largest installed base of equipment worldwide, which we use to cross-promote our surgical consumables and IOLs. In our Vision Care business, our extensive portfolio of contact lens and ocular health products includes well-recognized brands such as *TOTAL*, *PRECISION*, *Systane*, *Pataday* and *Opti-Free*. We believe our global leadership position and extensive brand portfolio allow us to benefit and build on the robust fundamentals driving growth in our markets.
- **Innovation-focused with market leading development capabilities and investment.** We believe we have made one of the largest commitments to research and development in the eye care market, with proven research and development capabilities in the areas of optical design, material and surface chemistry, automation and equipment platforms. Currently, we have more than 2,100 individuals dedicated to our research and development efforts, including physicians, doctors of optometry and PhDs. In addition, we actively seek opportunities to collaborate with third parties on advanced technologies to support our eye care business.
- **Global scale and reach supported by high-quality manufacturing network.** We have an extensive global commercial footprint that provides us with the scale and reach to support future growth, maximize the potential of new launches, enter new geographies efficiently and to take advantage of the large, dynamic and growing surgical and vision care markets. Our commercial footprint, which includes operations in 56 countries, reaches

consumers and patients in over 140 countries and territories and is supported by over 4,100 sales force associates, 16 state-of-the-art manufacturing facilities employing our proprietary technologies and know-how and our extensive global regulatory capability. Our extensive sales and distribution network, supported by our market leadership position and focus on innovation and customer experience, enhances our ability to expand our geographic reach and extend our product offerings through the launch of new and innovative products worldwide.

- **Outstanding customer relationships and a trusted reputation for customer service, training and education.** We believe that maintaining the highest levels of service excellence in our customer experience is a critical success factor in our industry. In our Vision Care business, we regularly meet with eye care practitioners to gain feedback and insights on our products and consumers' needs. We also provide training support at approximately 45 state-of-the-art interactive training centers around the world, as well as through numerous digital and event-based training programs that we provide for practitioners, clinical support staff, students, residents, patients and consumers. In each of our businesses, we have built and maintained our relationships with key participants to establish our trusted reputation in the industry.
- **World leading expertise in eye care led by a first-class management team.** Our expertise in eye care is driven by our more than 75-year history in the industry and is supported by a high-quality workforce of more than 25,000 associates. We believe our institutional knowledge provides a competitive advantage because our associates' industry expertise, relationships with our customers and understanding of the development, manufacture and sale of our products helps us to better identify new customer needs, assess markets for entry and identify promising technologies. In addition, we believe the diverse experience of our management team in running complex businesses allows them to add significant value to our company. In particular, we benefit from having a management team with an extensive background in the eye care industry.

Our Strategy

Our going-forward strategy builds on five key pillars in order to generate sustainable and profitable growth:

- **Maximize near-term portfolio potential by growing key products.** In Surgical, we aim to maintain our leadership in the IOL market with the *Clareon* platform fully rolled out globally, including *PanOptix Pro*, *PanOptix*, *Vivity* and their toric options. We expect that improved diagnostics and new optical designs will help overcome barriers to ATIOL adoption and expand the patient-pay market. We will continue investing in next-generation presbyopia-correcting lenses, launch our new operating room ecosystem (*UNITY VCS*) and develop advanced office diagnostic equipment (*UNITY Dx*) to enable seamless integration between the clinic and the OR. We also plan to grow our glaucoma portfolio through the *Hydrus* microstent and *Voyager* DSLT. In Vision Care, we will strengthen our leadership across categories through increased eye care professional and consumer education and ongoing product innovation. We aim to expand our position in the daily disposables market with our *DAILIES TOTAL1* and *PRECISION1* family of products, and trade patients up to premium reusable lenses with our *TOTAL30* and *PRECISION7* family of products, both of which are designed for comfort and visual performance. We are advancing presbyopia solutions with new lens designs to improve vision and comfort, reduce chair time and increase adoption—unlocking a potential \$5 billion market. Additionally, we expect to grow the dry eye segment with our *Systane* portfolio and newly launched *TRYPTYR* and boost allergy relief with *Pataday*, addressing significant unmet needs and market opportunities.
- **Accelerate innovation and deliver the next wave of technologies.** We are committed to driving innovation to remain a market leader in ophthalmic research and development. In Surgical, our R&D focuses on expanding the ATIOL portfolio to optimize vision restoration and reduce variability in outcomes through advanced optics, adjustable materials and accommodating lenses. We are also progressing next-generation technologies to support cataract, vitreoretinal and laser-refractive surgery and to improve our visualization solutions. In Vision Care, we are advancing new contact lens materials, coatings and designs to enhance visual performance, extend product lines and improve comfort. We are also developing products to expand our portfolio in dry eye diagnostics and treatment, presbyopia solutions and overall ocular health. Finally, we will continue to complement internal innovation with strategic BD&L opportunities, partnering with leading academic institutions and early-stage companies.
- **Capture opportunities to expand markets and pursue adjacencies.** We see significant growth potential in underpenetrated markets for both premium surgical devices, such as ATIOLs, and our Vision Care portfolio. To drive adoption, we will continue investing in promotion and customer education globally. In emerging markets, rising affluence, better technology access and increased patient awareness are expected to accelerate uptake. We have expanded our Surgical glaucoma portfolio with the addition of *Voyager* DSLT and re-entered the ophthalmic pharmaceutical space via acquisitions like Aerie Pharmaceuticals, adding commercialized products (*Rocklatan*,

Rhopressa) and a strong pipeline, including *TRYPTYR* (FDA-approved and launched in 2025). This transaction also strengthened our pharmaceutical R&D capabilities. Beyond these areas, we see opportunities to grow in adjacent categories—such as pharmaceuticals, office-based diagnostics, surgical visualization and consumer-driven ocular health—through internal development and strategic M&A. Our global footprint and eye care expertise position us to attract and retain new customers in these segments.

- **Support new business models to expand customer experience.** In Surgical, we intend to continue to identify new business models that benefit healthcare providers and improve access to leading Alcon products and technologies. For example, in the future, we may pursue value-based business models that reward improved patient outcomes, as well as models that contract the entire procedure versus individual products. In Vision Care, where e-commerce entries have created some disruption of traditional sales channels, we believe that digital technology can address pain points experienced in existing paths to purchase. We intend to continue investing and innovating in digital capabilities to develop new business models in response to channel shifts and the increase in direct-to-consumer influence.
- **Leverage infrastructure to improve operating efficiencies and margin profile over time.** With the significant organizational and infrastructure investments we have made over the last several years, we believe we have established a stable foundation that will allow us to continue to enhance the productivity of our commercial resources. We expect to drive significant top line growth and increase operating leverage through improved sales mix, further supply chain efficiency initiatives and support new lower-cost manufacturing platforms to meaningfully improve our core operating income margins over time. We are also optimizing our end to end processes and systems to ensure streamlined and efficient operations and improved customer experience.

Our Industry

Selected Conditions that are Treated by Eye Surgery and Surgical Products

Cataracts

A cataract is the progressive clouding of the normally transparent natural lens in the eye. This clouding is usually caused by the aging process, although it can also be caused by heredity, diabetes, environmental factors and, in some cases, medications. As cataracts grow, they typically result in blurred vision and increased sensitivity to light. Cataract formations occur at different rates and may affect one or both eyes. Cataract surgery is one of the most frequently performed surgical procedures. According to the National Eye Institute, cataracts are the leading cause of blindness worldwide even though effective surgical treatment exists. Currently, surgical removal of the clouded lens followed by insertion of a transparent artificial replacement lens, called an IOL, is the preferred treatment for cataracts. The clouded lens is usually removed through a process known as phacoemulsification. During phacoemulsification, an ophthalmic surgeon makes a small surgical incision in the cornea (approximately 2-3 millimeters wide) and inserts an ultrasonic probe that breaks up, or emulsifies, the clouded lens while a hollow needle removes the pieces of the lens. Once the clouded lens is removed, the surgeon inserts an intraocular lens through the same surgical incision. An ATIOL is a type of IOL that also corrects for refractive errors, like presbyopia and astigmatism.

Cornea Conditions

The cornea is the transparent, dome-shaped surface that covers the front of the eye and plays a critical role in focusing light onto the retina. A variety of conditions can affect the cornea, some of which require surgical intervention or specialized products. Common corneal conditions include:

- **Keratoconus** – A progressive thinning and bulging of the cornea into a cone-like shape, causing distorted vision. Advanced cases may require corneal cross-linking or corneal transplantation.
- **Corneal Dystrophies** – A group of inherited disorders characterized by abnormal deposits in the cornea, such as Fuchs' endothelial dystrophy, which can lead to corneal swelling and vision loss.
- **Corneal Edema** – Swelling of the cornea due to fluid buildup, often resulting from endothelial cell dysfunction or prior eye surgery.
- **Corneal Ulcers and Keratitis** – Open sores or inflammation of the cornea, frequently caused by infection or trauma. Severe cases may require surgical intervention to prevent vision loss.
- **Pterygium** – A benign growth of tissue extending from the conjunctiva onto the cornea, often linked to UV exposure. Surgical removal may be necessary if vision is impaired.

Surgical treatments for corneal conditions range from minimally invasive procedures, such as corneal cross-linking, to full-thickness corneal transplantation. Advances in lamellar techniques, such as Descemet's Stripping Endothelial Keratoplasty (DSEK) and Descemet Membrane Endothelial Keratoplasty (DMEK), have improved outcomes by replacing only the diseased layers of the cornea rather than the entire tissue.

Retinal Disorders

Vitreoretinal procedures involve surgery on the back portion of the eye, namely the retina and surrounding structures. Vitrectomy is the removal of the gel-like substance, known as vitreous, that fills the back portion of the eye. Removal of the vitreous allows a vitreoretinal surgeon to operate directly on the retina or on membranes or tissues that have covered the retina. These procedures typically treat conditions such as diabetic retinopathy, retinal detachment or tears, macular holes, complications of surgery on the front of the eye, diabetic macular edema, trauma, tumors and pediatric disorders. Vitreoretinal surgery can also involve electronic surgical equipment, lasers and hand-held microsurgical instruments as well as gases and liquids that are injected into the eye.

Refractive Errors

Refractive errors, such as myopia, commonly known as near-sightedness, hyperopia, commonly known as far-sightedness, and astigmatism, a condition in which images are not focused at any one point, result from an inability of the cornea and the lens to focus images on the retina properly. If the curvature of the cornea is incorrect, light passing through it onto the retina is not properly focused and a blurred image results. For many years, eyeglasses and contact lenses were the only solutions for individuals afflicted with common visual impairments; however, they are not always convenient or attractive solutions. Laser refractive surgery offers an alternative to eyeglasses and contact lenses. Excimer lasers, which are low-temperature lasers that remove tissue without burning, are currently used to correct refractive errors by removing small amounts of tissue to reshape the cornea. These lasers remove tissue precisely without the use of heat and without affecting the surrounding tissue. In the LASIK procedure, the surgeon uses either a femtosecond laser or an automated microsurgical instrument, called a microkeratome, to create a thin corneal flap that remains hinged to the eye. The corneal flap is then folded back and excimer laser pulses are applied to the exposed layer of the cornea to change the shape of the cornea. The corneal flap is then returned to its normal position. LASIK has become the most commonly practiced form of laser refractive surgery globally.

Presbyopia

Presbyopia occurs when the natural crystalline lens inside the eye becomes less flexible and loses the ability to focus on close objects. Presbyopia is a vision condition that accompanies the natural aging process of the eye. It cannot be prevented and affects nearly two billion people worldwide. Although the onset of presbyopia among patients may seem to occur suddenly, generally becoming noticeable when patients reach their mid- to late 30s or early to mid-40s, sight reduction typically occurs gradually over time and continues for the rest of the patient's life. Some signs of presbyopia include difficulty reading materials held close to the reader, blurred vision while viewing a computer screen and eye fatigue along with headaches when reading. Presbyopia can be accompanied by other common vision conditions, such as myopia, hyperopia and astigmatism. Presbyopia, while most commonly managed with reading glasses, can be addressed surgically by the implantation of an ATIOL that allows for the correction of presbyopia at the time of cataract surgery.

Glaucoma

Glaucoma, a group of eye conditions that damage the optic nerve, is the second leading cause of blindness worldwide. While elevated intraocular pressure was historically considered to be synonymous with glaucoma, it is now known that many patients with glaucoma have normal intraocular pressure. Treating glaucoma is typically aimed at lowering intraocular pressure for patients with normal or elevated pressure.

Most commonly, glaucoma is managed using medication (e.g., drops). For cases requiring additional intervention, laser-based procedures such as Direct Selective Laser Trabeculoplasty (DSLT) and Selective Laser Trabeculoplasty (SLT) alongside conventional surgical techniques, such as filtration surgery and tube shunts, are used to lower IOP. DSLT is a novel, non-invasive laser treatment specifically targeting the trabecular meshwork to increase aqueous outflow with minimal discomfort and downtime, making it an attractive option for early intervention. Filtration surgeries, such as trabeculectomy, involve the creation of a new channel to drain aqueous humor from inside the eye, while tube shunts establish a route for fluid to exit through an implanted device. Additionally, minimally invasive glaucoma surgeries (MIGS), which generally aim to work to increase aqueous outflow, have seen rapid adoption among both glaucoma and cataract specialists.

Selected Conditions and Eye Care Considerations that are Addressed by Vision Care Products

Refractive Errors

Refractive errors such as myopia, hyperopia, astigmatism and presbyopia are commonly addressed by the use of contact lenses. Presbyopia, for example, can be addressed by the use of multifocal and multifocal toric contact lenses.

Dry Eye Disease

Dry eye disease is a ubiquitous, complex and multifactorial condition, and its effect on patients ranges from intermittent and irritating discomfort to a serious, chronic, progressive and irreversible vision-threatening disorder. The incidence of dry eyes rises with age, and longer life spans and aging populations throughout the world are key contributors to increased demand for treatment. Evolving patterns of work and play also contribute to increased demand for treatment, as more people spend significant amounts of time working on computers and other digital devices. Wealthier, professional and urban population segments are expanding in rapidly emerging economies and other developing nations, and these populations have greater access to health care and more resources with which to acquire treatment. In addition, more sophisticated diagnostic tools and a greater variety of dry eye products and treatments, such as artificial tear products and pharmaceuticals, are offering improved effectiveness and greater relief as they simultaneously stimulate demand.

Infections and Contamination due to Inadequate Contact Lens Care

Proper care of contact lenses through compliance with disinfection regimens is important in reducing the risk of infection and irritation associated with the use of reusable contact lenses, as contact lenses are subject to contamination from cosmetics, grease, bacteria, soaps, hand lotions and atmospheric pollutants, and from proteins contained in natural tears. When used properly, contact lens care products remove such contaminants from the surface of the contact lens. In addition, lens rewetting drops may be used to rehydrate the lens during wear and to clear away surface material.

Ocular Allergies

Allergic conjunctivitis occurs when the conjunctiva of the eye becomes swollen from inflammation due to a reaction to pollen, dander, mold or other allergy-causing substances. When the eyes are exposed to allergy-causing substances, which can vary from person-to-person and are often dependent on geography, a substance called histamine is released by the body and causes blood vessels in the conjunctiva to swell. "Allergy eyes" can become red and itchy very quickly. Seasonal Allergic Conjunctivitis ("SAC") is the most common type of eye allergy. People affected by SAC experience symptoms during certain seasons of the year. Allergy eye can be treated with various ocular health products including medications, such as antihistamines, and combinations of antihistamines and redness relievers.

Glaucoma

Glaucoma is commonly managed using prescription eye drops to reduce intraocular pressure for patients with normal or elevated pressure.

Our Products

We research, develop, manufacture, distribute and sell eye care products. Our broad range of products represents one of the strongest portfolios in the eye care industry, with high-quality and technologically advanced products across all major product categories in ophthalmic surgical devices and vision care. We are organized into two global business segments: Surgical and Vision Care.

Surgical

We hold the number one position in the global ophthalmic surgical market, offering implantable products, consumables and equipment for use in surgical procedures to address cataracts, vitreoretinal conditions, refractive errors and glaucoma. Our Surgical portfolio includes equipment, instrumentation and diagnostics, IOLs and other implantables and a broad line of consumables, including viscoelastics, surgical solutions, incisional instruments, surgical custom packs and other products. For the year ended December 31, 2025, net sales for our implantables, consumables and equipment and other surgical products were \$1.8 billion, \$3.0 billion and \$0.9 billion, respectively.

Cataract, vitreoretinal, refractive and glaucoma surgeries are generally performed in hospitals or ambulatory surgery centers and are supported through a network of eye clinics, ophthalmic surgery offices and group purchasing

organizations. The primary ophthalmic surgical procedures for cataract, vitreoretinal and glaucoma surgery are broadly reimbursed in most mature markets. Third-party coverage or patient co-pay options are also available for refractive laser correction and ATIOLs. Finally, a growing private pay market for premium surgical devices provides a mutually beneficial environment for patients, providers and medical device companies by allowing patients to pay the non-reimbursable cost of a procedure associated with selecting premium devices, such as ATIOLs.

Our installed base of equipment is core to our market leading position in our Surgical business, with best-in-class platforms in cataract and vitreoretinal equipment and the largest installed base of cataract phacoemulsification consoles, vitrectomy consoles and refractive lasers in the industry. These platforms each have long buying cycles that last approximately seven to ten years and act as anchoring technologies that drive recurring sales of our consumables and help cross-promote sales of our implantable devices.

Sustainable patient access to quality eye care is core to our business. Alcon has invested significant resources to innovate new technologies, expand reimbursement pathways (public and/or private insurance) and teach new skills to clinicians around the world to improve patient outcomes and eye care access. Across our Surgical portfolio, we sell a tiered offering of products intended to meet the specific needs of customers in markets around the world at different price points. Newly launched offerings that bring considerable technology innovation to the market are typically introduced at a price premium to offset the cost of research and development. As these products age and/or competitive products advance, prices typically trend downward, requiring continuous innovation cycles to maintain and/or grow our margins. We also develop specific products to match customer needs in different customer segments, for example, premium-tier and mid-tier surgical consoles that can be manufactured and sold at different price points in different markets. Likewise, we have introduced the *Legion* system to help fill the gap in access to phacoemulsification surgery. This affordable system brings some of the advanced features of the *Centurion* system, combined with the greater serviceability, durability and portability to developing markets.

Our Installed Base and Portfolio

Our strong installed base of equipment and deep clinician relationships drive sales of our IOLs and consumables. We differentiate ourselves through the quality and breadth of our portfolio, offering a “one-stop-shop” solution that combines reliability, accessibility and innovation. Our Cataract Suite supports every stage of the surgical workflow—from clinical planning to cataract removal and post-operative optimization.

Cataract Surgical Platforms

Since 2013, we have sold *Centurion*, our cataract surgery vision system, in most major markets. *Centurion* features *Active Fluidics* technology, which helps maintain anterior chamber stability by allowing surgeons to set and maintain target intraocular pressure (IOP) during cataract removal, delivering greater intraoperative control.

In late 2025, we introduced *Unity CS*, the latest evolution of our cataract surgical platform. *Unity CS* integrates 4D Phaco technology, enabling phacoemulsification that is twice as fast and uses 40% less energy, improving efficiency during lens removal. The system also streamlines workflows for faster setup, teardown and intraoperative adjustments, helping surgeons increase operating room throughput and procedural efficiency. *Unity CS* reflects our commitment to advancing cataract surgery with solutions that meet the evolving needs of surgeons.

We also offer the *LenSx* Laser System in select major markets. *LenSx* was the first femtosecond laser cleared by the FDA for cataract surgery. It can perform critical steps generally handled manually by a surgeon—such as corneal incisions, capsulorhexis creation and lens fragmentation—with image-guided precision.

Visualization Systems

Our *NGENUITY 3D* visualization system enhances surgical visualization with a high-dynamic 3D camera, advanced image optimization, surgeon polarizing glasses and an ultra-high-definition 4K OLED 3D display for improved depth perception. We also offer the *LuxOR* ophthalmic microscope with proprietary ILLUMIN-i technology, which provides an expanded illumination field and a six-times larger, highly stable red reflex zone.

Biometry

The ARGOS biometer integrates swept-source OCT (SS-OCT) technology with image-guided planning and intraoperative guidance. It simplifies workflows and connects seamlessly with our cataract refractive suite, ensuring precision at every stage.

Planning Solutions

We offer a suite of technologies that enhance surgical planning, guidance and connectivity throughout the cataract workflow.

- **Verion:** Our *Verion* reference unit and digital marker provide advanced planning, imaging and guidance tools to improve accuracy and efficiency. These solutions help surgeons align IOLs precisely and streamline pre-operative and intraoperative steps.
- **ORA:** Complementing *Verion*, the ORA System delivers real-time intraoperative measurements to optimize IOL placement—such as aligning toric lenses to the astigmatism axis—and supports post-operative analysis for continuous outcome improvement.
- **SMARTCataract:** Part of our SMART Solutions digital health platform, *SMARTCataract* enables remote surgical planning and automates data transfer from diagnostic devices to OR equipment. This reduces manual data entry and saves valuable time.
- **ADI:** Our cloud-based platform, *ADI*, connects clinics and surgery centers to streamline workflows. It integrates patient data transfer, inventory management and online ordering, reducing administrative tasks and improving efficiency. *ADI* also supports real-time connectivity with our devices, including *Unity CS*, *Centurion* and *Verion*, delivering complete, connected care across the surgical process.

Our innovative glaucoma surgery solutions address critical unmet needs in managing this progressive and potentially blinding disease—covering the full continuum from mild to severe glaucoma.

- **Voyager Laser System (DSLT):** Developed from our acquisition of BELKIN Vision's Eagle Direct Selective Laser Trabeculoplasty technology, this system offers a non-invasive, incision-free first-line treatment for glaucoma. It enables fast, single-application procedures that broaden access to effective care and reduce the burden on healthcare systems.
- **Hydrus Microstent (MIGS):** A minimally invasive glaucoma surgery device indicated for use in conjunction with cataract surgery to reduce intraocular pressure (IOP) in adult patients with mild to moderate primary open-angle glaucoma (POAG). It is designed to lower intraocular pressure by enhancing the eye's natural outflow pathway via implantation into Schlemm's canal. Hydrus is approved and marketed in several major markets, including the US.
- **EX-PRESS Glaucoma Filtration Device:** A surgical solution for refractory glaucoma, functioning similarly to a trabeculectomy by shunting aqueous humor from the anterior chamber to a subconjunctival reservoir. Unlike traditional trabeculectomy, *EX-PRESS* does not require removal of scleral or iris tissue, offering a less invasive option for complex cases. This device is approved and marketed in the US, Europe, Canada, Australia, China and other markets.

Together, these technologies reflect Alcon's commitment to treating the whole paradigm of glaucoma—from early intervention to advanced disease management—through surgeon-focused solutions and patient-centric care.

Surgical Portfolio Implantables

An IOL is a tiny, artificial lens for the eye, which replaces the eye's natural lens that is removed during cataract surgery. Our IOL portfolio reflects a strong legacy of innovation, offering a comprehensive range of solutions tailored to diverse patient needs. Our optics portfolio includes:

- **Monofocal IOLs:** Deliver sharp vision at a single distance, addressing basic visual correction needs;
- **Toric IOLs:** Correct preexisting astigmatism, enhancing visual outcomes for patients with this common condition; and
- **Presbyopia-Correcting IOLs (PCIOLs):** Includes advanced trifocal lenses like *Clareon PanOptix*, which provide seamless near, intermediate and distance vision, *Clareon Vivity*, our extended depth of focus (EDOF) IOL that balances a broader range of vision with a visual disturbance profile comparable to a monofocal lens and our next generation lens, *PanOptix Pro*, which provides more uninterrupted light distribution across the full visual range and is designed for better image contrast.

Our IOLs are predominantly made of *Clareon*, an advanced hydrophobic acrylic material offering exceptional clarity, reduced edge glare and enhanced stability.

We also offer delivery systems to simplify the surgical process while ensuring precision:

- **AutonoMe:** The first automated, disposable, pre-loaded IOL delivery system, designed for seamless and precise implantation of *Clareon* IOLs; and
- **UltraSert:** Combines the control of manual systems with the safety and efficiency of a pre-loaded injector, offering enhanced ease of use.

Advanced Technology IOLs (ATIOLs), such as trifocal and EDOF lenses, provide significant patient benefits beyond standard monofocal IOLs, including improved vision at multiple distances or a broader range of focus. However, ATIOL adoption varies globally due to reimbursement and pricing models, with the US offering partial coverage through Medicare and commercial insurers. Outside the US, payment models are shaped by local healthcare policies.

Overall, our IOL portfolio is designed to deliver superior clinical outcomes, enhance patient satisfaction, and simplify surgical workflows, ensuring that surgeons can address a wide array of patient needs with confidence.

Surgical Portfolio Consumables

To provide convenience, efficiency and value for ophthalmic surgeons, Alcon offers *Custom Pak* surgical procedure packs for use in ophthalmic surgery. Unlike conventional surgical procedure packs, our *Custom Paks* allow individual surgeons to customize the products included in their pack, which results in less waste in the environment. Our *Custom Paks* include both our single-use products as well as third-party items not manufactured by Alcon. We believe that our *Custom Pak* offering allows ophthalmic surgeons to improve their efficiency in the operating room, while avoiding the complexity and cost of having to kit surgical items for each respective procedure. We offer more than 10,000 configurations of our *Custom Paks* globally.

Vitreoretinal Suite

Our vitreoretinal surgical portfolio is among the most comprehensive in the industry, supporting procedures for the back of the eye in nearly every market where we operate.

For vitrectomy procedures, we have marketed the *Constellation* Vision System globally since 2008. In the second quarter of 2025, we introduced *UNITY* VCS, the next-generation platform replacing *Constellation*. *Unity* VCS integrates *Hypervit* 30K technology, delivering 1.5x faster vitreous cutting rates to reduce surgical time while maintaining precision and control. Like its predecessor, *UNITY* VCS is designed to streamline workflows and enhance efficiency across the surgical process, reflecting our commitment to innovation and improved patient outcomes.

Beyond our surgical platforms, we offer a full line of vitreoretinal products, including:

- Procedure packs, lasers and handheld microsurgical instruments;
- *Grieshaber* and *MIVS* disposable retinal surgery instruments;
- Scissors, forceps and micro-instruments in multiple gauge sizes; and
- Medical-grade vitreous tamponades for replacing vitreous humor during retinal procedures

We continue to advance our portfolio with smaller gauge instruments (27+) and higher-speed vitrectomy probes. For example, our *Hypervit* probes, operating at 20,000 cuts per minute (cpm), help minimize traction that can cause iatrogenic tears and post-operative complications.

Refractive Suite

Our refractive products include lasers, disposable patient interfaces used during laser vision correction procedures, technology fees and diagnostic devices necessary to plan the refractive procedures. Our *WaveLight* refractive suite includes the EX500 excimer laser, designed to reshape the cornea, and the FS200 femtosecond laser, designed to create a corneal flap and to deliver laser refractive therapy as part of the LASIK refractive procedure.

Our refractive portfolio also includes *Contoura* Vision, powered by the *WaveLight Topolyzer* VARIO diagnostic device, and the recently launched *WaveLight Plus*, our most advanced LASIK treatment designed to provide surgeons with the ability to perform more personalized laser procedures for patients with near-sightedness or near-sightedness with astigmatism.

Vision Care

Our Vision Care portfolio comprises daily disposable, reusable and color-enhancing contact lenses, cell therapies to treat ocular diseases and a comprehensive portfolio of ocular health products, including products for dry eye, ocular allergies, glaucoma and contact lens care, as well as ocular vitamins and redness relievers. For the year ended December 31, 2025, net sales of our contact lens and ocular health products were \$2.8 billion and \$1.8 billion, respectively.

We serve our customers and patients through optometrists, ophthalmologists and other eye care professionals, retailers, optical chains and pharmacies, as well as distributors that resell directly to smaller retailers and eye care professionals, who sell the products to end-users. The vision care market is primarily private pay, with patients substantially paying for contact lenses and ocular health products out-of-pocket. Partial reimbursement is available in some countries for visits to eye care professionals and a portion of either spectacle or contact lens costs.

Sales of our contact lens and ocular health products are influenced by optometrist, ophthalmologist and other eye care professional recommendations, our marketing and consumer education efforts and consumer preferences. In addition to price, contact lenses compete on functionality, design and comfort, while ocular health products compete largely on

product attributes, brand familiarity and professional recommendations. For our contact lens and ocular health products, we typically compete in the premium price segments of the market and we use improvements in functionality, design and consumer convenience to maintain our pricing position over time.

Alcon is the second-largest company in the branded contact lens market by 2025 market share and the leading manufacturer of daily disposable silicone hydrogel (SiHy) lenses in the US. This leadership is driven by our core brands: *TOTAL*, *PRECISION1*, *DAILIES AquaComfort PLUS* and *Air Optix*.

TOTAL

Our *TOTAL* lenses feature water gradient technology that reduces end-of-day dryness by achieving nearly 100% water content at the lens surface. Positioned as a super-premium offering, the line includes:

- **DAILIES TOTAL1:** The first and only water gradient daily disposable lens.
- **DAILIES TOTAL1 multifocal:** Our multifocal version supports growth in the presbyopia segment, which we believe represents a multibillion-dollar opportunity.
- **TOTAL30:** A premium reusable (30 day) lens to encourage trade-up to next-generation technology.
- **TOTAL30 toric and multifocal:** We introduced toric and multifocal versions of *TOTAL30* in 2023, and we expect to launch a *TOTAL30* multifocal toric version to complete the family.

PRECISION

Our *PRECISION* line of lenses is our mainstream disposable SiHy lens, priced between our super-premium *DAILIES TOTAL1* and value-focused *DAILIES AquaComfort PLUS*. It offers precise vision, dependable comfort and easy handling.

- **PRECISION1:** Our mid-priced daily disposable silicone hydrogel (SiHy) lens.
- **PRECISION1 for Astigmatism:** After launching *PRECISION1* spherical lenses, we introduced a toric version featuring the *PRECISION BALANCE 8|4* design for stability. Studies show 47% of patients need astigmatism correction, but fewer than 15% wear toric lenses—creating significant growth potential.
- **PRECISION7:** Our newly launched, first weekly replacement lens, featuring the *ActivFlo* re-wetting system for clear vision and comfort. We believe a 7-day replacement schedule will be easier to remember than a two-week schedule.
- **PRECISION7 for Astigmatism:** We launched *Precision7* for Astigmatism with the launch of the sphere modality. This lens benefits from the same proprietary *PRECISION BALANCE 8|4* design for lens stability.

DAILIES AquaComfort PLUS

Our most affordable daily disposable lens, available in monofocal, toric and multifocal options. It releases moisture with every blink for reliable comfort—ideal for value-conscious wearers seeking simplicity.

Air Optix

Our monthly replacement line includes SiHy lenses in monofocal, toric and multifocal options, plus *Air Optix Colors* and *Air Optix plus HydraGlyde*. *HydraGlyde* combines *SmartShield* technology and a moisture matrix for deposit protection and lasting hydration.

We continue to see growth in our contact lens portfolio from:

- Trade-up to premium lenses;
- Expansion of toric and multifocal offerings; and
- Increased penetration in emerging markets.

Our ocular health portfolio includes leading brands such as:

- **Systane** – artificial tears and dry eye products
- **Pataday** – eye allergy relief drops
- **Opti-Free** and **Clear Care** – multi-purpose and hydrogen peroxide disinfecting solutions

Leadership in Dry Eye Care

Alcon is a global leader in artificial tears, driven by a focus on product performance and innovation under the *Systane* brand. The *Systane* portfolio offers a full range of solutions for temporary relief of burning and irritation caused by dry eye, including options for daily and nighttime use and for contact lens-related discomfort.

Demand for preservative-free eye drops continues to grow. Our multi-dose preservative-free (MDPF) products, *Systane Ultra*, *Systane Hydration* and *Systane Complete*, deliver effective relief without preservatives, meeting a key need for eye care professionals. In 2025, we launched *Systane Pro*, a new formulation combining nano-lipids from *Systane Complete* with hyaluronic acid (HA) to address more severe dry eye symptoms. It is the first *Systane* product to feature both HA and lipids, offering comprehensive relief for all types of dry eye.

Allergy Relief

Previously prescription-only, the *Pataday* family became available over the counter in the US in 2020. These products—*Pataday Twice Daily Relief*, *Pataday Once Daily Relief* and *Pataday Once Daily Extra Strength*—contain olopatadine, the number 1 doctor-prescribed ingredient for eye allergy relief.

Ophthalmic Pharmaceuticals

In 2021, we began expanding in the ophthalmic pharmaceutical space by acquiring the exclusive US commercialization rights to *Simbrinza*, indicated for reducing elevated intraocular pressure (IOP) in patients with open-angle glaucoma or ocular hypertension. Then, in 2022, we expanded further by acquiring *Eysuvis* (short-term treatment of dry eye disease) and *Inveltys* (post-operative inflammation and pain treatment) followed by the acquisition of Aerie Pharmaceuticals, Inc. The Aerie acquisition included two commercialized products: *Rhopressa*, a Rho kinase inhibitor for open-angle glaucoma and ocular hypertension, and *Rocklatan*, a fixed-dose combination of latanoprost and netarsudil.

In 2025, we launched *TRYPTYR* (acotremon ophthalmic solution) 0.003%, a next-generation therapy for dry eye disease that is a first-in-class TRPM8 receptor agonist for the treatment of the signs and symptoms of Dry Eye Disease (DED) that rapidly stimulates natural tear production as early as Day 1. *TRYPTYR* is designed to address both the inflammatory and neuropathic components of dry eye, offering a differentiated mechanism of action compared to traditional lubricants or corticosteroids. It works by modulating ocular surface inflammation while targeting neural pathways associated with ocular discomfort, providing potentially faster relief for patients. *TRYPTYR* represents a significant step forward in our commitment to advancing dry eye care through science-driven innovation.

Contact Lens Care

Alcon is also a market leader in contact lens care, offering:

- **Opti-Free PureMoist** – multi-purpose disinfecting solution
- **Clear Care** and **AOSEPT PLUS** – hydrogen peroxide disinfecting solutions

These products remove harmful microorganisms from contact lenses and include rewetting drops to improve comfort. Our contact lens care business benefits from strong synergies with our contact lens portfolio.

Additional Ocular Health Products

Our portfolio also includes:

- **Tears Naturale** and **Genteal** – artificial tears and dry eye products
- **Naphcon-A** and **Zaditor** – allergy relief drops
- **ICAPS** and **Vitalux** – ocular health vitamins

Principal Markets

Alcon serves consumers and patients in over 140 countries and territories worldwide. The US is our largest market with 45% of our net sales in 2025. See Note 4 to the Consolidated Financial Statements for net sales by segment and geography for each of the last three fiscal years. US sales of the vast majority of our products are not subject to material changes in seasonal demand; however, sales of certain of our vision care products, including those for allergies and dry eye, are subject to seasonal variation. In addition, sales of our surgical equipment are also subject to variation based on hospital or clinic purchasing cycles.

Research and Development

Innovation drives every aspect of our business as we strive to deliver new, best-in-class products for customers and patients. From early-stage discovery to clinical deployment, our global research and development (R&D) capabilities span clinical research, optical design, material and surface chemistry, software development, automation and equipment platform engineering.

We invested approximately \$990 million, \$876 million and \$828 million in research and development in 2025, 2024 and 2023, respectively. Our research and development organization employs more than 2,100 individuals, including physicians, optometrists and PhDs, who bring extensive experience in ophthalmology and product development.

Supporting Innovation and Product Development

To accelerate R&D and drive efficiency, we have launched our Product Development Productivity initiative to streamline processes, integrate digital tools and remove barriers across the product life cycle. These improvements are expected to shorten development cycles and make launches more predictable.

Our R&D center in Bengaluru, India, continues to grow as a strategic hub and is now home to more than 400 associates, spanning six sub-functions and 70+ specialized capabilities. Expanding expertise in artificial intelligence (AI), machine learning, chip design and data annotation is enabling better insights, faster development and enterprise-wide digital transformation. Since opening in 2024, our Fort Worth research clinic also continues to advance new studies that support clinical validation for emerging therapies and technologies.

We regularly review and refine our operating model to optimize efficiency and productivity. Across our Surgical and Vision Care pipelines, we have more than 84 pipeline projects in process as of December 31, 2025, including 56 that have achieved positive proof of concept or are undergoing regulatory review. In addition to our in-house research and development capabilities, as part of our efforts to pursue strategic research and development partnerships with third parties, our dedicated BD&L team completed 21 BD&L transactions in 2025.

Key Achievements in 2025

In 2025, we expanded into new therapeutic areas, including regenerative medicines, digital diagnostics and precision laser technology. This momentum is reflected in several major product launches and strategic acquisitions that have broadened our capabilities and reinforced our leadership across ophthalmology.

Among this year's milestones:

- **Clareon PanOptix Pro IOL**: The first US launch featuring *ENLIGHTEN NXT* technology, which is designed to maximize light utilization and minimize scatter, delivering uninterrupted light distribution across the full visual range.
- **UNITY Vitreoretinal Cataract System (VCS)** and **UNITY Cataract System (CS)**: Next-generation surgical systems designed to enhance cataract and vitreoretinal procedures with first-to-market innovations like *UNITY 4D Phaco*, *HYPERVIT 30K*, and the *UNITY Intelligent Fluidics* system.
- **TRYPTYR** (acoltremon ophthalmic solution): A first-in-class prescription treatment for dry eye disease that achieved statistically significant tear production improvements ($p < 0.0001$), addressing a major unmet clinical need.
- **Voyager DSLT**: The only Direct Selective Laser Trabeculoplasty device for glaucoma and ocular hypertension, designed to improve access and adoption for first-line laser treatment.

- **SYSTANE PRO PF:** A triple-action, long-lasting and preservative-free dry eye solution that advances patient comfort and ocular surface health.

We also expanded the reach of *WaveLight Plus*, the world's first fully personalized LASIK treatment, to the US and Canada. Using ray tracing to create a "digital eye twin," this technology allows ophthalmologists to customize procedures to each eye's optical fingerprint. Clinical results have been exceptional: 100% of myopic eyes achieved 20/20 vision at three months post-procedure, 89% reached 20/16 and 50% achieved 20/12.5. These outcomes redefine the frontier of refractive surgery.

Together, these advances reflect a sharper innovation focus: combining AI-driven analytics, regenerative science and next-gen device engineering to deliver transformative solutions for surgeons and patients alike.

Acquisitions and Strategic Partnerships

In addition to R&D, we completed certain strategic acquisitions that have extended our reach across vision correction, diagnostics, surgical technology, regenerative medicine and retinal therapy.

As a global leader, we are committed to supporting an ecosystem of disruptive and incremental innovation from internal and external sources. The Alcon Seed Fund (ASF) drives innovation in eye care by identifying and investing in early- and mid-stage technologies positioned to advance ophthalmology. In 2025, ASF partnered with the Association for Research in Vision and Ophthalmology to support the Eye Pitch Live event, which gives entrepreneurs the opportunity to compete for up to \$1 million in investment, helping to accelerate disruptive ideas in therapeutic and diagnostic solutions. ASF's scouting and technology evaluation efforts spanned hundreds of innovative opportunities.

In total, ASF invested in 16 projects in 2025, bringing the active portfolio to 25 engagements. These efforts underscore ASF's role in Alcon's innovation strategy, providing early access to transformative technologies and fostering partnerships that can shape the future of eye care.

Advancing Vision Science

We also advanced scientific collaboration in 2025 through the Alcon Research Institute (ARI), one of the world's largest corporate-funded vision research organizations. This year, ARI's annual scientific meeting, the Steven M. Podos Colloquium, convened global vision leaders under the theme "Next Generation Gene Therapy Strategies," continuing its tradition of awarding approximately \$1 million in grants to senior investigators, young scientists and clinicians.

Marketing and Sales

Alcon conducts sales and marketing activities throughout the world. During the year ended December 31, 2025, 45% of our sales were in the US. We are present in every significant market in the world where ophthalmology and optometry are practiced, with operations in 56 countries supported by over 4,100 associates dedicated to direct sales and with products sold in over 140 countries and territories.

Our global commercial capability is organized around sales and marketing organizations dedicated to our Surgical and Vision Care businesses and we customize these efforts to the medical practice needs of each customer. In addition to direct promotion of our products, our sales representatives provide customers with access to clinical education programs, data from clinical studies and technical service assistance. Our selling models also include focused efforts in key channels, including strategic accounts, key accounts and pharmacies.

In each of our markets, we rely on our strong relationships with ECPs to attract and retain customers. We engage healthcare professionals to serve as clinical consultants, to participate on advisory boards and to conduct presentations regarding our products. In addition, we have established or sponsor several long-standing programs that provide training and education to eye care professionals, including providing training support at approximately 45 state-of-the-art interactive training centers around the world. These facilities introduce ophthalmologists to our surgical equipment and cataract products through hands-on training in surgical techniques while exposing them to leading ophthalmologists.

In our Surgical business, our marketing efforts are supported by global advertising campaigns, claims from clinical registration and post-approval studies and by the participation of marketing and sales representatives in regional and global medical conferences. Technical service after the sale is provided using an integrated customer relationship management system in place in many markets. All of our technical service in the US, and a high percentage of that service outside the US, is provided by service technicians employed directly by Alcon. In countries where we do not have local operations or a scientific office, we use distributors to sell and handle the physical distribution of our products. Within our Surgical business, the practices of our marketing and sales representatives continue to change to meet emerging market trends, namely consolidation of providers, increasing pricing pressures, proliferation of smaller competitors, increasing

demands for outcome evidence and a shift from relationship-based selling orientated toward physicians versus professional economic buyers focused on cost.

In our Vision Care business, we support our products with direct-to-consumer and ECP-oriented marketing campaigns, including advertising, promotions and other marketing materials, and with retailer-focused marketing and promotional materials. The fast-evolving landscape for our Vision Care business varies significantly by country. Three key trends in marketing and sales help drive the continuing evolution of our Vision Care business:

- Internet-based purchasing is increasing, as online players grow and the internet plays a bigger role as a source of consumer information and a platform for price referencing;
- Channel consolidation is accelerating, as chains grow in size and vertically integrate; and
- Independent eye care professionals vary in influence, as many align more closely with retailers.

We see an opportunity to leverage digital technology to address pain points experienced by consumers and patients in existing paths to purchase. We also intend to continue investing and innovating in digital capabilities to develop new business models and practice implementation support in response to channel shifts and increases in direct-to-consumer influence.

While we market all of our products by calling on medical professionals, direct customers and distribution methods differ across our business lines. Surgical products are sold directly to hospitals and ambulatory surgical centers, although we sell through distributors in certain markets outside the US where we do not have local operations or a scientific office. In many countries, contact lenses are available only by prescription. Our contact lenses can be purchased from eye care professionals, optical chains and large retailers, subject to country regulation. Our ocular health products can be found in major drugstores, pharmacies, food stores and mass merchandising and optical retail chains globally, with access subject to country regulations, including free-sale, pharmacy-only and prescription regulations. No single customer accounted for more than 10% of our global sales in 2025.

Manufacturing, Quality and Supplies

Manufacturing

We generally organize our manufacturing facilities along product categories, with most plants being primarily dedicated to the manufacture of either our Surgical or Vision Care product offerings. As of December 2025, we employed approximately 4,800 people to manufacture surgical products at nine facilities in the US, Belgium, Switzerland, Indonesia, Ireland and Germany and approximately 4,400 people to manufacture Vision Care products at seven facilities in the US, Germany, Singapore and Malaysia. Our functional division of plants reflects the unique differences in regulatory requirements governing the production of surgical medical devices as well as the different technical skills required of associates in these manufacturing environments. All of our manufacturing plants are ISO 13485:2016 and ISO 14001:2015 certified. Currently, we manufacture approximately 90% of our products internally and rely on third-party manufacturers for a limited number of products.

The goal of our supply chain strategy is to efficiently produce and distribute high quality products. To that end, we employ cost-reduction programs, known as continuous improvement programs, involving activities such as cycle-time reductions, efficiency improvements, automation, plant consolidations and procurement savings programs as a means to reduce manufacturing and component costs. For example, in Vision Care, in an effort to reduce the cost per contact lens, we have implemented programs designed to reduce the time it takes to ramp to peak production levels for the newly installed manufacturing lines. To comply with good manufacturing practices and to improve the skills of our associates, we train our direct labor manufacturing staff throughout the year. Our professional associates are trained in various aspects of management, regulatory and technical issues through a combination of in-house seminars, local university classes and trade meetings.

The manufacture of our products is complex, involves advanced technology and is heavily regulated by governmental health authorities around the world. Risks inherent to the medical device and pharmaceutical industries are part of our operations. If we or our third-party manufacturers fail to comply fully with regulations, there could be a product recall or other shutdown or disruption of our production activities. We have implemented a global manufacturing strategy to maximize business continuity in case of such events or other unforeseen catastrophic events.

Quality

Product quality and patient safety are vitally important for Alcon and our industry. Our customers and patients must always feel safe when using our products. Our Quality Management Systems group ("QMS") is responsible for establishing and maintaining a robust and compliant quality control system across Alcon. QMS regularly monitors industry trends, as

well as global and regulatory changes, and adjusts our processes and procedures to adhere to current standards and best practices. In addition, our Quality Compliance group audits our internal processes and suppliers for compliance with approved processes and procedures.

Supplies

The components used in certain of our Surgical products, such as viscoelastics, and our ocular health products, such as our products for dry eye and pharmaceuticals, are sourced from facilities that meet the regulatory requirements of applicable health regulatory authorities. Because of the proprietary nature and complexity of the production of these components, a number of them are only available from a single or limited number of health regulatory authority-approved sources. The majority of active chemicals, biological raw materials and selected inactive chemicals used in our products are acquired pursuant to long term supply contracts. When we rely upon a sole source or limited sources of supply for certain components, we try to maintain a sufficient inventory consistent with prudent practice and production lead-times and to take other steps necessary to ensure our continued supply. The prices of our raw materials are generally stable; however, we continue to monitor established indices for key raw materials and negotiate any price impact with the supplier.

Human Capital Management

Alcon's culture is summarized in the Alcon Blueprint. The Alcon Blueprint includes Alcon's foundational principles and values and behaviors and serves as the bedrock for how we attract, develop and retain top talent. We seek a range of talents and perspectives that embody our values and contribute to our mission to help people to *See Brilliantly*. Our talent acquisition process encompasses all facets of sourcing, attracting, assessing, selecting and onboarding of new associates. Alcon focuses on the care and growth of associates through learning and development, performance feedback, career progression and a focus on associate engagement – all while ensuring competitive compensation and benefits. Our Chief Human Resources Officer, working with various groups with human resources, develops systems and processes to support Alcon's ability to attract and retain the best talent while fostering a culture of inclusion.

Intellectual Property

We strive to protect our investment in the research, development, manufacturing and marketing of our products through the use of patents, trademarks, copyrights, designs, trade secrets and other intellectual property. We own or have rights to a number of patents, trademarks, copyrights, designs, trade secrets and other intellectual property directly related and important to our businesses. As of December 31, 2025, we owned or had rights to approximately 2,650 patent families.

We believe that our patents are important to our business but that no single patent, or group of related patents, currently is of material importance in relation to our business as a whole. Our strategy is to develop patent portfolios for our research and development projects in order to obtain market exclusivity for the innovative features of our products in our major markets. The scope and duration of protection provided by a patent can vary significantly from country to country. However, even after the expiration of all patents covering a product, we may continue to derive commercial benefits from such product.

When appropriate, we will enforce our intellectual property rights to ensure that we are receiving the protections they afford us. Similarly, we will staunchly defend our right to develop and market products against unfounded claims of infringement by others. We will aggressively pursue or defend our position in the appropriate courts if the dispute cannot otherwise be promptly resolved.

In addition to our patents and pending patent applications in the US and selected non-US markets, we rely on proprietary know-how and trade secrets in our businesses and work to ensure the confidentiality of this information, including through the use of confidentiality agreements with associates and third parties. In some instances, we also acquire, or obtain licenses to, intellectual property rights that are important to our businesses from third parties.

All of our major products are sold under trademarks that we consider in the aggregate to be important to our businesses as a whole. We consider trademark protection to be particularly important in the protection of our investment in the sales and marketing of our vision care and contact lens and ocular health products. The scope and duration of trademark protection varies widely throughout the world.

We also rely on design and copyright protection in various jurisdictions to protect the physical appearance of our surgical and diagnostic equipment and the software and printed materials our business relies upon, including software used in our surgical and diagnostic equipment. The scope and duration of design and copyright protection for these materials also varies widely throughout the world.

Competition

The eye care industry is highly competitive and subject to rapid technological change and evolving industry requirements and standards. We compete with a number of different companies across our two business segments—Surgical and Vision Care. Companies within our industry compete on technological leadership and innovation, quality and efficacy of their products, relationships with eye care professionals and healthcare providers, breadth and depth of product offerings and pricing. The presence of these factors varies across our Surgical and Vision Care product offerings. Our principal competitors also sometimes form strategic alliances and enter into co-marketing agreements in an effort to better compete. We face strong local competitors in some markets, especially in developed markets, such as the US, Western Europe and Japan.

Surgical

The surgical market is highly competitive. Superior technology and product performance give rise to category leadership in the surgical market. Service and long term relationships are also key factors in this competitive environment. Surgeons rely on the quality, convenience, value and efficiency of a product and the availability and quality of technical service. We primarily compete with Carl Zeiss Meditec AG, Bausch & Lomb Incorporated, Hoya Corporation, Glaukos Corporation and Johnson & Johnson in the surgical market.

We expect to compete against companies that offer alternative surgical treatment methodologies, including multifocal, tunable and accommodating ATIOL approaches, and companies that promote alternative approaches for responding to the conditions our products address. At any time, our known competitors and other potential market entrants may develop new devices or treatment alternatives that may compete directly with our products. In addition, they may gain a market advantage by developing and patenting competitive products or processes earlier than we can or by obtaining regulatory approvals / clearances or market registrations more rapidly than we can.

We believe that the principal competitive factors in our surgical market include:

- disruptive product technology;
- alternative treatment modalities;
- breadth of product lines and product services;
- ability to identify new market trends;
- acceptance by ophthalmic surgeons;
- customer service and clinical support;
- regulatory status and speed to market;
- price;
- product quality, reliability and performance;
- capacity to recruit engineers, scientists and other qualified associates;
- digital initiatives that change business models;
- reimbursement approval from governmental payors and private healthcare insurance providers; and
- reputation for technical leadership.

Shifts in industry market share can occur in connection with product issues, physician advisories, safety alerts and publications about our products. In the current environment of managed care, with consolidation among healthcare providers, increased competition and declining reimbursement rates, there is also increasing pressure on price.

Vision Care

The vision care market is also highly competitive, and our primary competitors are Johnson & Johnson, Bausch & Lomb Incorporated and The Cooper Companies, Inc. In addition, AbbVie, Inc. (Allergan) is a competitor in ocular health.

We believe our *DAILIES TOTAL1* provides the most advanced daily disposable SiHy contact lens with its advanced "water gradient" technology and *PRECISION1* provides a mainstream daily disposable SiHy lens with aqueous extraction and surface treatment. While daily disposable contact lenses remain appealing to many lens wearers, approximately two-thirds of contact lens wearers globally choose reusable lenses. Despite this preference, innovation within the reusable lens segment has lagged behind daily disposable lenses over the past 10 years. *TOTAL30* and *PRECISION7* product families are

designed to change that by delivering a premium offering within the monthly and 1-week reusable space, respectively. We also compete with manufacturers of eyeglasses and with surgical procedures that correct visual defects. We believe that there are opportunities for contact lenses to attract new customers in the markets in which we operate, particularly in markets where the penetration of contact lenses in the vision correction market is low. Additionally, we compete with new market entrants with disruptive distribution models that could potentially innovate to challenge traditional models, including the eye care professional channel in which we have a significant presence. We also believe that laser vision correction is not a significant threat to our sales of contact lenses based on the growth of the contact lens market over the past decade and our involvement in the laser vision correction market through our Surgical business.

In ocular health, the market is characterized by competition for market share through the introduction of products that provide superior effectiveness and reduced burden for treating eye conditions. Recommendations from eye care professionals and customer brand loyalty, as well as our product quality and price, are key factors in maintaining market share in these products.

Government Regulation

Overview

Our businesses are subject to varying degrees of governmental regulation in the countries in which we operate, and the general trend is toward increasingly stringent regulation. In the US, the drug, device and dietary supplement industries have long been subject to regulation by various federal and state agencies, primarily as to product safety, efficacy, manufacturing, advertising, labeling and safety reporting. The exercise of broad regulatory powers by the FDA continues to result in increases in the amounts of testing and documentation required for the commercialization of regulated products and a corresponding increase in the expense of product introduction. Similar trends are also evident in the EU and in other markets throughout the world. In addition to market access regulation, our businesses are also subject to other forms of regulation, such as those relating to anti-bribery, data privacy and cybersecurity, social impact and sustainability and trade regulation matters. We are also subject to regulations related to environmental and safety matters, which are discussed in greater detail in "Item 4.D. Property, Plants and Equipment—Environmental Matters".

Product Approval and Monitoring

Most of our products are regulated as medical devices in the US and the EU. These jurisdictions each use a risk-based classification system to determine the type of information that must be provided to the local regulatory bodies in order to obtain the right to market a product. In the US, the FDA classifies devices into three classes: Class I (low risk), Class II (moderate risk) and Class III (high risk). Many of our devices are Class II or III devices that require premarket review by the FDA. The primary pathway for our Class II devices is FDA clearance of a premarket notification under section 510(k) of the FDCA. With a 510(k) submission, the manufacturer must submit a notification to the FDA that includes performance data that establish that the product is substantially equivalent to a "predicate device", which is typically another Class II previously-cleared device. Our Class III devices require FDA approval of a Premarket Approval application. With a Premarket Approval application, the manufacturer must submit extensive supporting evidence, including clinical data, sufficient to demonstrate a reasonable assurance that the device is safe and effective for its intended use. With respect to our drug products in development or currently marketed, approval by the FDA is generally required to market those products in the US. To receive such approval, the FDA requires extensive clinical trials to demonstrate safety and effectiveness and evidence that our manufacturing processes comply with current Good Manufacturing Practices. Following approval we must have systems in place to continuously monitor the safety of distributed drug products and confirm compliance with the Drug Supply Chain Security Act.

In the EU, CE marking is required for all medical devices sold. Prior to affixing the CE Mark, the manufacturer must demonstrate that their device conforms to the relevant essential requirements of the EU's Medical Device Directive through a conformity assessment procedure. The nature of the assessment depends upon the classification of the device. The method of assessing conformity varies depending on the type and classification of the product. For most Class I devices, the assessment is a self-certification process by the manufacturer. For all other devices, the conformity assessment procedure requires review by a "notified body", which is authorized or licensed to perform conformity assessments by national device regulatory authorities. The conformity assessment procedures require a technical review of the manufacturer's product and an assessment of relevant clinical data. Notified bodies may also perform audits of the manufacturer's quality system. If satisfied that the product conforms to the relevant essential requirements, the notified body issues a certificate of conformity, which the manufacturer uses as a basis for its own declaration of conformity and application of the CE mark.

The EU published a new Medical Device Regulation, or EU MDR, in 2017, which imposes significant additional requirements on medical device manufacturers, including with respect to clinical evaluation, labeling, technical documentation and

quality management systems. Medical devices placed on the market in the EU after May 2021 require certification according to these new requirements, except those legacy devices with valid CE certificates, issued pursuant to the Medical Device Directives before May 2020, which can be placed on the market until those certificates expire, at the latest in May 2024, provided there are no significant changes in the design or intended purpose of the device. In March 2023, the European Parliament officially approved and published the European Commission's proposal to extend the date of compliance out by three to four years depending on the class of medical device, which now extends the date of compliance from 2024 until 2027 or 2028, provided that the manufacturer of the legacy product has submitted a formal application for a conformity assessment by May 2024. This extension is intended to ensure that the various notified bodies have enough time to review legacy products for compliance with the new regulations. The additional requirements of the EU MDR legislation did not change; however the "sell off" date has been removed.

We also market products that are regulated in other product categories, including lasers, prescription and over-the-counter drug products, dietary supplements and medical foods. These products are also subject to extensive government regulation, which vary by jurisdiction. For example, in the US, our drug products must either be marketed in compliance with an applicable over-the-counter drug monograph or receive FDA approval of a New Drug Application. In the European Economic Area, our drug products must receive a marketing authorization from the competent regulatory authorities before they may be placed on the market. There are various application procedures available, depending on the type of product involved.

Clinical trials may be required to support the marketing of our drug or device products. In the US, clinical trials must be conducted in accordance with FDA requirements, including informed consent from study participants, and review and approval by an institutional review board ("IRB"), among other requirements. Additionally, FDA authorization of an Investigational Device Exemption ("IDE") application must be obtained for studies involving significant risk devices prior to commencing the studies. In the EU, clinical trials usually require the approval of an ethics review board and the prior notification to, or authorization of the study from, the regulatory authority in each country in which the trial will be conducted.

Regulations of the FDA and other regulatory agencies in and outside the US impose extensive manufacturing requirements as well as postmarket compliance and monitoring obligations on our business. The manufacture of our device, drug and dietary supplement products is subject to extensive and complex good manufacturing practice and quality system requirements, which govern the methods used in, and the facilities and controls used for, the design, manufacture, packaging, storage, handling and servicing of our products. We are also subject to requirements for product labeling and advertising, sampling, recordkeeping, reporting of adverse experiences and other information to identify potential problems with our marketed products, as well as recalls and field actions. We are also subject to periodic inspections for compliance with these requirements. We expect this regulatory environment will continue to require significant technical expertise and capital investment to ensure compliance.

Medical device, drug and dietary supplement manufacturers are also subject to taxes, as well as application, product, user, establishment and other fees.

Price Controls

The prices of our medical devices and drugs that require prescriptions or are reimbursed through payments to providers for services using our devices or drugs are subject to reimbursement programs and price control mechanisms that vary from country to country. Due to an evolving policy environment and governmental budget constraints, we expect these programs and mechanisms to remain robust and to potentially even be strengthened or expanded. As a result, such programs and mechanisms could have a negative influence on the prices we are able to charge for our products, particularly those used in cataract, vitreoretinal and glaucoma surgeries.

Regulations Governing Reimbursement

In the US, patient access to our drug and device products that require a prescription or are included in provider service payments is determined in large part by the coverage and reimbursement policies of third-party health payors, including health insurers and government programs such as Medicare and Medicaid. Both government and commercial health insurers are increasingly focused on containing health care costs and have imposed, and are continuing to consider, additional measures that exert downward pressure on device and drug prices. For example, the US recently passed the Inflation Reduction Act, which makes significant changes to how drugs are covered and paid for under the Medicare program, including the creation of financial penalties for drugs whose prices rise faster than the rate of inflation, redesign of the Medicare Part D program to require manufacturers to bear more of the liability for certain drug benefits and the introduction of government price-setting for certain Medicare Part D drugs starting in 2026.

Outside the US, global trends toward cost-containment measures likewise may influence prices for our healthcare products in those countries. Adverse decisions relating to either coverage for our products or the amount of reimbursement for our products, could significantly reduce the demand for our products and the prices that our customers are willing to pay for them.

Health Care Fraud and Abuse; Anti-Bribery

We are subject to health care fraud and abuse and anti-bribery laws and regulations in the US and around the world, including state and federal anti-kickback, anti-self-referral and false claims laws in the US. In addition, the FCPA is increasingly used to prosecute relationships between US companies and healthcare providers outside of the US. These laws are complex and subject to evolving interpretation by government agencies and courts. For example, in the US, relationships between manufacturers of products paid for by federal and state healthcare programs and healthcare professionals are regulated by a series of federal and state laws and regulations, such as the Federal Anti-Kickback Statute (and similar US state laws), that restrict the types of permissible financial relationships with referral sources. In addition, transparency and disclosure requirements, such as the US Physician Payments Sunshine Act (Open Payments Program), mandate public reporting of transfers of value to healthcare professionals, increasing compliance and reputational risks. In the US, the False Claims Act permits private litigants to pursue lawsuits that can trigger government investigations and result in substantial financial fines and penalties to the defendant, as well as payment of significant financial rewards to the successful private litigants. Whistleblower protections and incentives further heighten the likelihood of investigations and enforcement actions. As discussed in "Item 4.B. Business Overview—Marketing and Sales", we engage in marketing activities targeted at healthcare professionals, which include among others the provision of training programs. If one or more of these activities were found to be in violation of fraud and abuse laws, anti-bribery laws and regulations or any other law or governmental regulation, or there are changes to the interpretation of these laws, we could be subject to, among other things, civil and criminal penalties, damages, fines, exclusion from the Medicare and Medicaid programs and the curtailment or restructuring of our operations. Violations of these laws may also result in corporate integrity agreements, deferred prosecution arrangements or other settlement mechanisms that impose ongoing monitoring and compliance obligations.

Data Privacy and Cybersecurity

We are subject to certain data privacy and security laws and regulations that continue to evolve, including Swiss privacy laws, the EU GDPR, US HIPAA and state laws, including the CCPA, with respect to some of our products, services and business operations. For example, the GDPR and HIPAA contain enhanced financial and other penalties for noncompliance. The US Federal Trade Commission and state Attorneys General are actively enforcing in the data privacy and cybersecurity space under existing consumer protection laws and newer privacy laws such as the CCPA and FTC Breach Notification Rule. The FDA has also issued further guidance concerning cybersecurity for medical devices.

In addition, certain countries have issued or are considering data localization laws, which limit companies' ability to transfer protected data across country borders. Failure to comply with data privacy and cybersecurity laws and regulations can result in enforcement actions, including civil or criminal penalties.

Trade Regulation

The movement of products, services and investment across borders subject us to extensive trade regulations. A variety of laws and regulations in the countries in which we transact business apply to the sale, shipment and provision of goods, services and technology across borders. These laws and regulations govern, among other things, our import, export and other business activities. We are also subject to the risk that these laws and regulations could change in a way that would expose us to additional costs, penalties or liabilities. Some governments also impose economic sanctions against certain countries, persons or entities.

In addition to our need to comply with such regulations in connection with our direct activities, we also sell and provide goods, technology and services to agents, representatives and distributors who may export such items to customers and end-users. Failure by us or the third parties through which we do business to comply with applicable import, export control or economic sanctions laws and regulations may subject us to civil or criminal enforcement action and varying degrees of liability.

4.C. ORGANIZATIONAL STRUCTURE

Organizational Structure

See "Item 4.B. Business Overview" for additional information.

Significant Subsidiaries

See "Item 6.C. Board Practice" for additional information.

4.D. PROPERTY, PLANTS AND EQUIPMENT

Our corporate headquarters is located in Geneva, Switzerland. The principal office for our Swiss and international operations, which is also our registered office, is located in Fribourg, Switzerland, and the principal office for our US operations is located in Fort Worth, Texas.

We believe that our current manufacturing and production facilities have adequate capacity for our medium-term needs. To ensure that we have sufficient manufacturing capacity to meet future production needs, we regularly review the capacity and utilization of our manufacturing facilities. The FDA and other regulatory agencies regulate the approval for use of manufacturing facilities for medical devices and pharmaceuticals, and compliance with these regulations requires a substantial amount of validation time prior to start-up and approval. Accordingly, it is important to our business that we ensure we have sufficient manufacturing capacity to meet our future production needs.

Major Facilities

The following table sets forth our most significant production and research and development facilities:

| Location | Size of Site (in m ²) | Major Activity |
|-----------------------------------|--------------------------------------|------------------------------------------------------------------------------|
| Fort Worth, Texas | 315,200 | Production, research and development for Surgical and Vision Care businesses |
| Grosswallstadt, Germany | 97,720 | Production, research and development for Vision Care business |
| Singapore | 93,134 | Production for Vision Care business |
| Johns Creek, Georgia | 85,166 | Production, research and development for Vision Care business |
| Johor, Malaysia | 43,900 | Production for Vision Care business |
| Irvine, California | 40,900 | Production, research and development for Surgical business |
| Houston, Texas | 37,400 | Production for Surgical business |
| Huntington, West Virginia | 36,158 | Production for Surgical business |
| Batam, Indonesia | 35,000 | Production for Surgical business |
| Sinking Spring, Pennsylvania | 21,800 | Production for Surgical business |
| Cork, Ireland | 16,300 | Production, research and development for Surgical business |
| Erlangen/Pressath/Teltow, Germany | 10,700 | Production, research and development for Surgical business |
| Puurs, Belgium | 8,000 | Production for Surgical business |
| Schaffhausen, Switzerland | 5,630 | Production, research and development for Surgical business |
| Durham, North Carolina | 4,200 | Research and development for Vision Care business |

In August 2021, we launched an expansion project of our Grosswallstadt, Germany facility to add three additional contact lens production lines for an anticipated cost of \$162 million. Through December 31, 2025, the total amount paid and committed was approximately \$149 million. We expect to complete the project by 2027.

In April 2021, we launched a further expansion of our Singapore facility to add four additional production lines for contact lenses. This project was completed in September 2024. The total amount paid was \$189 million. We approved a further expansion in late 2021 to add three additional production lines and a new building for an expected cost of \$314 million. Through December 31, 2025, the total amount paid and committed for this additional expansion was approximately \$302 million.

million. We expect to complete this expansion in 2027. In late 2023, we commenced an additional expansion to the Singapore facility to add three additional production lines for an expected cost of \$157 million. Through December 31, 2025, the total amount paid and committed for this additional expansion was approximately \$28 million. We expect to complete this project in 2030.

In 2021, we launched an expansion of our Johns Creek, Georgia facility to add two more production lines for contact lenses for \$148 million. Through December 31, 2025, the total amount paid and committed was approximately \$138 million. We expect to complete the project by 2028. Also, in late 2021, we approved an additional expansion to add one more production line for contact lenses. This additional expansion is expected to cost approximately \$73 million and be completed by 2029. Through December 31, 2025, the total amount paid and committed was approximately \$58 million.

We funded each of the projects discussed above from working capital.

Environmental Matters

At Alcon, we believe that excellent environmental performance enables us to achieve our purpose of helping people *See Brilliantly*. We integrate core values of environmental protection into our business strategy to protect the environment, to add value to the business, manage risk and enhance our reputation.

We are committed to reducing the environmental impact of our operations, products and services. We strive to minimize waste and emissions, reuse and recycle materials and conserve natural resources, such as energy and water, across our value chain.

We are subject to laws and regulations concerning the environment, safety matters and regulation of chemicals in the countries where we manufacture and sell our products or otherwise operate our business. As a result, we have established internal policies and standards that aid our operations in systematically identifying relevant hazards, assessing and mitigating risks and communicating risk information. These internal policies and standards are in place to ensure our operations comply with relevant environmental, health and safety laws and regulations and that periodic audits of our operations are conducted. The potential risks we identify are integrated into our business planning, including investments in reducing safety and health risks to our associates and reducing our impact on the environment. We have also dedicated resources to monitor legislative and regulatory developments and emerging issues to anticipate future requirements and undertake policy advocacy when strategically relevant.

Each year, we publish on our website a Social Impact and Sustainability Report that provides additional details regarding our environmental sustainability strategy and highlights the steps we plan to undertake. The information contained on or in connected to our website is not a part of this annual report.

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

5.A. OPERATING RESULTS

This operating and financial review and prospects should be read together with the section captioned "Item 4. Information on the Company—4.B. Business Overview" and our Consolidated Financial Statements and the related notes to those financial statements. Among other things, those financial statements include more detailed information regarding the basis of preparation for the following information. This discussion contains forward-looking statements that involve risks and uncertainties. As a result of many factors, such as those set forth under "Item 3. Key Information —3.D. Risk Factors" and elsewhere in this Annual Report, Alcon's actual results may differ materially from those anticipated in these forward-looking statements. Please see "Special Note About Forward-Looking Statements."

"Item 5. Operating and Financial Review and Prospects", together with "Item 4.B. Business Overview" and "Item 6.D. Employees", constitute the Operating and Financial Review ("Rapport annuel"), as defined by the Swiss Code of Obligations.

Overview

Alcon researches, develops, manufactures, distributes and sells a full suite of eye care products within two segments: Surgical and Vision Care. The Surgical segment is focused on ophthalmic products for cataract surgery, vitreoretinal surgery, refractive laser surgery and glaucoma surgery, and includes implantables, consumables and surgical equipment required for these procedures. The Vision Care segment comprises daily disposable, reusable and color-enhancing contact lenses, cell therapies to treat ocular diseases and a comprehensive portfolio of ocular health products, including products for dry eye, ocular allergies, glaucoma and contact lens care, as well as ocular vitamins and redness relievers.

We are dedicated to providing innovative products that enhance quality of life by helping people *See Brilliantly*. Our strong foundation is based on our longstanding success as a trusted brand, our legacy of industry firsts and advancements, our leading positions in the markets in which we compete and our continued commitment to substantial investment in innovation. With more than 75 years of history in the ophthalmic industry, we believe the Alcon brand name is synonymous with innovation, quality, service and leadership among eye care professionals worldwide. We employ over 25,000 associates operating in 56 countries and serving consumers and patients in over 140 countries and territories.

In 2025, Alcon's net sales amounted to \$10.3 billion. The United States accounted for \$4.7 billion, or 45%, of total net sales, Japan accounted for \$0.6 billion, or 6%, of total net sales, China accounted for \$0.6 billion, or 6%, of total net sales, Switzerland accounted for \$71 million, or 1%, of total net sales, and the rest of the world accounted for the remaining \$4.4 billion of total net sales.

Basis of preparation

The Consolidated Financial Statements, which present our financial position, results of operations, comprehensive income and cash flows have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") ("IFRS Accounting Standards").

The preparation of the Consolidated Financial Statements requires management to make certain estimates and assumptions, either at the balance sheet date or during the year, that affect the reported amounts of assets and liabilities as well as revenues and expenses. Actual outcomes and results could differ from those estimates and assumptions.

For further information on the basis of preparation of the Consolidated Financial Statements, see Note 2 to the Consolidated Financial Statements.

Items you should consider when evaluating our Consolidated Financial Statements

Pillar Two income taxes

The OECD has published Global Anti-Base Erosion ("GloBE") Model Rules, which include a minimum 15% tax rate by jurisdiction ("Pillar Two"). Various countries have enacted or intend to enact tax legislation to comply with Pillar Two rules. Alcon is within the scope of the OECD's Pillar Two, which has implications for Alcon's financial results starting January 1, 2024 onward.

Of the countries that have enacted, or will be enacting Pillar Two legislation, we expect Switzerland to be the most impactful to Alcon. In December 2023, the Swiss government decided to partially implement Pillar Two by introducing a Qualified Domestic Minimum Top-up Tax ("QDMTT") to reach the required taxation level of 15% on Pillar Two qualifying profits earned by companies domiciled in Switzerland effective from January 1, 2024. This QDMTT will not be applied to the Pillar Two qualifying profits earned by subsidiaries domiciled in tax jurisdictions outside of Switzerland. The implementation timing and specific provisions of any further Pillar Two tax regulations in Switzerland remain subject to further assessments at both the Federal and Cantonal levels. In September 2024, the Swiss government introduced the Income Inclusion Rule ("IIR") effective beginning January 1, 2025. Under the IIR, Switzerland will tax the Pillar Two-qualifying profit of foreign subsidiaries in case and to the extent the taxation in those countries does not reach the required taxation level of 15%. On January 15, 2025, the OECD issued administrative guidance related to the treatment of certain deferred taxes to streamline the administration of Pillar Two. This administrative guidance did not impact Alcon's 2025 Consolidated Financial Statements.

For the years ended December 31, 2025 and 2024, we have applied the IASB amendment to IAS 12, *Income Taxes*, which provides a mandatory temporary exception from recognizing or disclosing deferred taxes related to Pillar Two. Further, Alcon's effective tax rates in the relevant jurisdictions met the minimum 15% taxation level in the current year. We do not expect Pillar Two to have a material impact to the effective tax rate. We are continuing to follow Pillar Two legislative developments to evaluate the potential future impact on our consolidated results of operations, financial position and cash flows.

Estimation uncertainty

The preparation of Consolidated Financial Statements requires management to make certain estimates and assumptions, either at the balance sheet date or during the year, that affect the reported amounts of assets and liabilities as well as revenues and expenses. Because of the inherent uncertainties, actual outcomes and results may differ from management's assumptions and estimates. See Note 2 to the Consolidated Financial Statements and the "Critical accounting policies and estimates" section within this Item 5.A.

Segment description

Alcon has two identified reportable segments: Surgical and Vision Care. Both segments are supported by Research and Development and Manufacturing and Technical Operations, whose results are incorporated into the respective segment contribution. Segment contribution excludes amortization and impairment charges for acquired product rights or other intangibles, general and administrative expenses for corporate activities, transformation costs, fair value adjustments to contingent consideration liabilities, past service costs primarily for post-employment benefit plan amendments, acquisition and integration related costs, certain acquisition and divestment related items, product discontinuation costs, fair value adjustments of financial assets in the form of options to acquire a company carried at fair value through profit and loss ("FVPL"), net gains and losses on fund investments and equity securities valued at FVPL, fair value remeasurements of investments in associated companies, restructuring costs, legal provisions and settlements and other income and expense items not attributed to a specific segment. See Note 4 to the Consolidated Financial Statements.

In Surgical, Alcon researches, develops, manufactures, distributes and sells ophthalmic products for cataract surgery, vitreoretinal surgery, refractive laser surgery and glaucoma surgery. The surgical portfolio also includes implantables, consumables and surgical equipment required for these procedures and supports the end-to-end procedure needs of the ophthalmic surgeon. Alcon also provides services, training, education and technical support for the Surgical business. In 2025, the Surgical segment accounted for \$5.8 billion, or 56%, of Alcon net sales, and contributed \$1.5 billion, or 60%, of Alcon operating income (excluding unallocated income and expenses).

In Vision Care, Alcon researches, develops, manufactures, distributes and sells daily disposable, reusable, and color-enhancing contact lenses, cell therapies to treat ocular diseases and a comprehensive portfolio of ocular health products, including products for dry eye, ocular allergies, glaucoma and contact lens care, as well as ocular vitamins and redness relievers. Alcon also provides services, training, education and technical support for the Vision Care business. In 2025, the

Vision Care segment accounted for \$4.6 billion, or 44%, of Alcon net sales, and contributed \$981 million, or 40%, of Alcon operating income (excluding unallocated income and expenses).

Opportunity and risk summary

The surgical and vision care markets in which Alcon operates are large, dynamic and growing. As the world population grows and ages, the need for quality eye care is expanding and evolving. In addition, although it is estimated that 90% of all visual impairments are currently preventable, treatable or curable, we operate in markets that have substantial unmet medical and consumer needs. Our surgical and vision care products are targeted at addressing many of these unmet medical and consumer needs through products that are used in treating multiple ocular health conditions and offer leading eye care solutions for patients throughout their lives.

The surgical market in which we operate includes sales of implantables, consumables and surgical equipment, including associated technical, clinical and service support and training, and is projected to grow approximately 4-6% on average per year from 2025 to 2030. Growth drivers in the surgical market include: global growth of cataract and vitreoretinal procedures, driven by an aging population; a growing role of generative artificial intelligence and digital transformation; continued adoption of premium patient-pay technologies; increased adoption of advanced technologies; and eye disease as a comorbidity linked to the global prevalence of diabetes.

The vision care market in which we operate is comprised of products designed for ocular care and consumer use, and is projected to grow approximately 4-5% on average per year from 2025 to 2030. Growth drivers in the vision care market include: better contact lens material, improved health and comfort and enhanced visual acuity; an expansion in the contact lens market driven by advancements in specialty lenses; a significant worldwide population who suffer from a combination of dry eye symptoms and signs as well as those who are at risk; global growth in primary open-angle glaucoma, driven by an aging population; growing access and consumption of vision care products in emerging markets; and increasing consumer access through the expansion of distribution models.

In each of our markets, we rely on our strong relationships with eye care professionals and consumers to attract and retain customers and expand the market. We believe we have made one of the largest commitments to research and development in the eye care market, which we expect to continue through internal innovation investments and identifying and executing on attractive acquisition, licensing and collaboration opportunities.

Alcon's future expectations are subject to various risks and uncertainties, including market dynamics in the surgical and vision care markets, general economic conditions, the pace of innovation in our industry, as well as successfully achieving our growth strategies and efficiency initiatives. These expectations were, in the view of management, prepared on a reasonable basis, reflect the best currently available estimates and judgments and present, to the best of management's knowledge and belief, the expected future financial performance of Alcon. However, this information is not fact and should not be relied upon as necessarily indicative of future results, and you are cautioned not to place undue reliance on the prospective financial information. There will likely be differences between Alcon expectations and the actual results and those differences could be material. Alcon's expectations may not be achieved and we do not undertake any obligation to release publicly the results of any future revisions we may make to our expectations. When considering Alcon's expectations, you should keep in mind the risk factors and other cautionary statements in "Item 3. Key Information —3.D Risk Factors" and "Special Note About Forward-Looking Statements."

Our financial results are affected to varying degrees by internal and external factors. For example, because of our heavy dependence on information technology systems, cybersecurity breaches or other disruptions of our information technology systems, our inability to comply with data privacy, identity protection or information security laws, particularly with the increased use of AI, our migration to cloud platforms, governance gaps caused by the rapid adoption of AI-driven tools, or our inability to effectively manage the risks associated with the ethical use of disruptive technologies would significantly impact our business. Given our global operations, our compliance with anti-corruption laws is of heightened significance to our business. Litigation risk, including intellectual property and product liability lawsuits, and government investigations are additional risks our business faces.

The effect of a disruption in our global supply chain, including the effect of tariffs, or important facilities or supply constraints would further impact our business. We also may be adversely affected by our inability to accurately forecast demand and manage our inventory levels and the changing buying patterns by our large distributor and retail customers. If we overestimate demand and produce too much of a particular product, we face a risk of inventory obsolescence. In addition, for certain materials, components and services, we rely on sole or limited sources of supply. Our customer relations could be negatively impacted by the loss of our significant suppliers or the inability of any such supplier to meet certain specifications or delivery schedules. Similar, but not identical risks, apply to us when we operate as a third party contract manufacturer.

Further, our ability to manage social impact and sustainability matters to the satisfaction of everyone, some of which may have competing interests, may impact our results of operations. While we make significant efforts to attract and retain a

high quality workforce, we may be unable to attract and retain qualified personnel. Our reliance on outsourcing key business functions adds additional risk.

Moreover, our ability to grow depends on the commercial success of our products and our ability to maintain our position in the highly competitive markets in which we operate. Our ability to grow also depends on the success of our research and development efforts and BD&L activities in bringing new products to market, as well as the commercial acceptance of our products. We continue to invest in early-stage companies with unproven technologies that may never achieve market acceptance. Even if we identify a strategic acquisition, we may be unable to successfully complete or integrate the acquisition. We have incurred debt that we must continue to service, and we may need additional financing in debt or equity.

Even if we protect our intellectual property to the fullest extent permitted by applicable law, competitors may market products that compete with our products. Increased pricing pressure in the healthcare industry in general, including changes in third party payor coverage and reimbursement methodologies, as well as industry consolidation could also impact our ability to generate returns and invest for the future. Product recalls or voluntary market withdrawals in connection with defects or unanticipated use of our products could also have a material adverse effect upon our business.

Further, we strive to properly educate and train healthcare providers and rely on them to recommend our products to their patients and to other members of their organizations. Consumers in the eye health industry have a tendency not to switch products regularly and are repeat consumers, meaning that a physician's initial recommendation of our products, and a consumer's initial choice to use our products, have an impact on the success of our products.

Given our global presence, our operations and business results are also influenced and affected by the global economic and financial environment, including unpredictable political conditions, tax laws and hostilities in various parts of the world. Additionally, a portion of our operations are conducted in emerging markets and are subject to risks and potential costs such as economic, political and social uncertainty, as well as relatively low average income levels and limited government reimbursement for the cost of healthcare products and services. Our operations and business results are also affected by the varying degrees of governmental regulation in the countries in which we operate, especially China, making the process of developing new products and obtaining necessary regulatory marketing authorization lengthy, expensive and uncertain. The manufacture of our products is also highly regulated. Any changes or new requirements related to the regulatory approval process or postmarket requirements applicable to our products in any jurisdiction could be costly and onerous. Finally, if any of our accounting estimates are inaccurate or our internal controls are not effective then our financial results would be adversely impacted.

For more details on these trends and how they could impact our results, see "Item 3. Key Information—3.D. Risk Factors".

Components of results of operations

Net sales

Revenue on the sale of Alcon products and services, which is recorded as "Net sales" in the Consolidated Income Statement, is recognized when a contractual promise to a customer (i.e., a performance obligation) has been fulfilled by transferring control over the promised goods and services to the customer, substantially all of which is at the point in time of shipment to or receipt of the products by the customer or when the services are performed. If contracts contain customer acceptance provisions, revenue would be recognized upon the satisfaction of acceptance criteria. The amount of revenue to be recognized is based on the consideration Alcon expects to receive in exchange for its goods and services, which may be fixed or variable. Variable consideration may include rebates, discounts including cash discounts, chargebacks, estimated payments for Medicare prescription drug program under the Inflation Reduction Act, patient co-pay program coupon utilization and sales returns. Variable consideration is only recognized when it is highly probable that a significant reversal of cumulative sales will not occur.

Surgical equipment may be sold together with other products and services under a single contract. The total consideration is allocated to the separate performance obligations based on the relative stand-alone selling price for each performance obligation. Revenue is recognized upon satisfaction of each performance obligation under the contract.

Other revenues

"Other revenues" include revenue from contract manufacturing services which are recognized over time as the service obligations are completed and third party royalty income. Associated costs for contract manufacturing services are recognized in "Cost of other revenues".

Inventories

Inventory is valued at the lower of acquisition or production cost determined on a first-in, first-out basis and net realizable value. This value is used for the "Cost of net sales" and "Cost of other revenues" in the Consolidated Income Statement. Unsalable inventory is fully written off in the Consolidated Income Statement under "Cost of net sales" and "Cost of other revenues".

Research & development

Internal research and development costs are fully charged to "Research & development" in the Consolidated Income Statement in the period in which they are incurred. Alcon considers that regulatory and other uncertainties inherent in the development of new products preclude the capitalization of internal development expenses as an intangible asset until marketing approval from a regulatory authority is obtained in relevant major markets, such as the United States, the European Union, Switzerland, China or Japan.

Critical accounting policies and estimates

Selected accounting policies are set out in Note 2 to the Consolidated Financial Statements, which are prepared in accordance with IFRS as issued by the IASB.

Given the uncertainties inherent in our business activities, we must make certain estimates and assumptions that require difficult, subjective and complex judgments. Because of uncertainties inherent in such judgments, actual outcomes and results may differ from our assumptions and estimates, which could materially affect our Consolidated Financial Statements.

Application of the following accounting policies requires certain assumptions and estimates that have the potential for the most significant impact on the Consolidated Financial Statements.

Impairment of goodwill and intangible assets

We review long-lived intangible assets for impairment whenever events or changes in circumstance indicate that the carrying amount may not be recoverable. Goodwill, the Alcon brand name and intangible assets not yet ready for use are not amortized but are tested for impairment at least annually. Our annual impairment testing date is Alcon's year-end, December 31.

A cash generating unit ("CGU") to which goodwill has been allocated (reportable segments) is considered impaired when its carrying amount, including the goodwill, exceeds its recoverable amount, which is defined as the higher of its fair value less costs of disposal ("FVLCO") and its value in use ("VIU"). If the recoverable amount of the reportable segment is less than its carrying amount, an impairment loss shall be recognized.

An intangible asset other than goodwill is considered impaired when its balance sheet carrying amount exceeds its estimated recoverable amount, which is defined as the higher of its FVLCO and its VIU. Usually, Alcon applies the FVLCO method for its impairment assessment. In most cases, no direct or indirect observable market prices for identical or similar assets are available to measure the FVLCO. Therefore, an estimate of FVLCO is based on net present value techniques utilizing post-tax cash flows and discount rates. In the limited cases where the VIU method would be applied, net present value techniques would be applied using pre-tax cash flows and discount rates.

FVLCO reflects estimates of assumptions that market participants would be expected to use when pricing the asset or CGUs, and for this purpose management considers the range of economic conditions that are expected to exist over the remaining useful life of the asset.

The estimates used in calculating net present values involve significant judgment by management and include assumptions with measurement uncertainty, such as the following:

- Amount and timing of projected cash flows;
- Long-term sales forecasts, including sales growth rates;
- Royalty rate for the Alcon brand name;
- Terminal growth rate; and
- Discount rate.

Other assumptions used in the net present values calculation include:

- Future tax rate;
- Actions of competitors (launch of competing products, marketing initiatives, etc.); and
- Outcome of R&D activities and forecast of related costs (future product developments).

Generally, for intangible assets with a definite useful life Alcon uses cash flow projections for the whole useful life of these assets. For goodwill and the Alcon brand name, Alcon generally utilizes cash flow projections for a five-year period based on management forecasts, with a terminal value based on cash flow projections considering the long-term expected growth rates and impact of demographic trends of the population to which Alcon products are prescribed, for later periods. Probability-weighted scenarios are typically used.

Discount rates used consider Alcon's estimated weighted average cost of capital adjusted for specific country and currency risks associated with cash flow projections to approximate the weighted average cost of capital of a comparable market participant.

As of February 24, 2026, we expect the clinical trial outcome in the second quarter of 2026 for one of our acquired research and development programs, the results of which could impact the carrying value of such acquired research and development intangible asset. See "Item 3. Key Information—3.D. Risk Factors"

Due to the above factors and those further described in the "Opportunity and risk summary" section above, actual cash flows and values could vary significantly from forecasted future cash flows and related values derived using net present value techniques.

For additional information on intangible assets and impairment charges recognized, see Note 9 to the Consolidated Financial Statements.

Goodwill and other intangible assets represent a significant part of our Consolidated Balance Sheet, primarily due to acquisitions. Although no significant additional impairments are currently anticipated, impairment evaluation could lead to material impairment charges in the future.

Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary may include:

- Fair values of the assets transferred;
- Liabilities incurred to the former owners of the acquired business;
- Equity interests issued by the Company;
- Fair value of an asset or liability resulting from a contingent consideration arrangement; and
- Fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The excess of the consideration transferred over the fair value of the net identifiable assets acquired is recorded as goodwill, or directly in the income statement if it is a bargain purchase. Alcon primarily uses net present value techniques, utilizing post-tax cash flows and discount rates in estimating the fair value of identifiable assets acquired when allocating the purchase consideration for the acquisition. The estimates of the fair values involve significant judgment by management and include assumptions with measurement uncertainty such as the amount and timing of projected cash flows, long-term sales forecasts, the timing and probability of regulatory and commercial success and the discount rate.

If the business combination is achieved in stages, the acquisition date carrying value of Alcon's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognized in "Other income" or "Other expense", respectively, in the Consolidated Income Statement.

Alcon recognizes non-controlling interests in the acquired entity either at fair value or at the non-controlling interests' proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

Acquisition related costs are expensed as incurred.

Alcon may elect on a transaction-by-transaction basis to apply the optional concentration test to assess whether a transaction qualifies as a business. Under the test, when substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets, Alcon will account for the transaction as an asset purchase and not a business combination.

If the concentration test is not met, or Alcon elects not to apply this optional test, Alcon will perform an assessment focusing on the existence of inputs and processes that have the ability to create outputs to determine whether the transaction is an asset purchase or a business combination.

Contingent consideration

In a business combination, it is often necessary to recognize contingent future payments to previous owners, representing contractually defined potential amounts to be paid as a liability. Usually for Alcon these are linked to development or commercial milestones related to certain assets and are recognized as a financial liability at their fair value, which is then re-measured at each subsequent reporting date.

For the determination of the fair value of contingent consideration, various unobservable inputs are used. A change in these inputs might result in a significantly higher or lower fair value measurement. The inputs used are, among others, the timing and probability of regulatory and commercial success, sales forecast and assumptions regarding the discount rate, timing and different scenarios of triggering events. The significance and usage of these inputs to each contingent consideration may vary due to differences in the timing and triggering events for payments or in the nature of the asset related to the contingent consideration. These estimates typically depend on factors such as technical milestones or market performance and are adjusted for the probability of their likelihood of payment, and if material, are appropriately discounted to reflect the impact of time.

Changes in the fair value of contingent consideration liabilities in subsequent periods are recognized in the Consolidated Income Statement in "Cost of net sales" for currently marketed products and in "Research & development" for in-process research & development.

The effect of unwinding the discount over time is recognized in "Interest expense" in the Consolidated Income Statement.

Alcon accounts for variable or contingent consideration associated with asset acquisitions using the cost accumulation model. At the date of the asset acquisition, the intangible asset is initially recognized at the amount paid. Variable payments are subsequently capitalized as part of the cost of the asset when paid, on the basis that such payments represent the direct cost of acquisition.

Taxes

The estimated amounts for current and deferred tax assets or liabilities, including any amounts related to any uncertain tax positions, are based on currently known facts and circumstances. Tax returns are based on an interpretation of tax laws and regulations and reflect estimates based on these judgments and interpretations. The tax returns are subject to examination by the competent taxing authorities which may result in an assessment being made requiring payments of additional tax, interest or penalties. Inherent uncertainties exist in the estimates of the tax positions.

Research & development

Internal research & development costs are fully charged to "Research & development" in the Consolidated Income Statement in the period in which they are incurred. Alcon considers that regulatory and other uncertainties inherent in the development of new products preclude the capitalization of internal development expenses as an intangible asset until marketing approval from the regulatory authority is obtained in a relevant major market, such as the United States, the European Union, Switzerland, China or Japan.

Factors affecting comparability of period to period results of operations

The comparability of the period to period results of our operations can be impacted by significant transactions. Refer to Note 3 to the Consolidated Financial Statements for details related to significant transactions for the periods presented in the Consolidated Financial Statements.

Results of operations

Key figures

| (\$ millions unless indicated otherwise) | 2025 compared to 2024 | | | 2024 compared to 2023 | |
|------------------------------------------------|-----------------------|--------------|------------|-----------------------|----------|
| | 2025 | 2024 | Change % | 2023 | Change % |
| Net sales | 10,319 | 9,836 | 5 | 9,370 | 5 |
| Gross profit | 5,745 | 5,512 | 4 | 5,247 | 5 |
| Operating income | 1,360 | 1,413 | (4) | 1,039 | 36 |
| <i>Operating margin (%)</i> | <i>13.2</i> | <i>14.4</i> | | <i>11.1</i> | |
| Net income | 980 | 1,018 | (4) | 974 | 5 |
| <i>Net income attributable to:</i> | | | | | |
| <i>Shareholders of Alcon Inc.</i> | 980 | 1,018 | (4) | 974 | 5 |
| <i>Non-controlling interests</i> | — | — | — | — | — |
| Basic earnings per share (\$) ⁽¹⁾ | 1.99 | 2.06 | (3) | 1.98 | 4 |
| Diluted earnings per share (\$) ⁽¹⁾ | 1.98 | 2.05 | (3) | 1.96 | 5 |

(1) Earnings per share is calculated on the amount of net income attributable to shareholders of Alcon Inc.

Commentary for the year ended December 31, 2024 compared to 2023 may be found in Item 5 of the Company's Annual Report on Form 20-F filed with the Securities and Exchange Commission ("SEC") on February 25, 2025 ("2024 Form 20-F").

Net sales by segment

| (\$ millions unless indicated otherwise) | 2025 compared to 2024 | | | 2024 compared to 2023 | |
|------------------------------------------|-----------------------|--------------|----------|-----------------------|----------|
| | 2025 | 2024 | Change % | 2023 | Change % |
| Surgical | | | | | |
| Implantables | 1,782 | 1,775 | — | 1,703 | 4 |
| Consumables | 3,028 | 2,861 | 6 | 2,719 | 5 |
| Equipment/other | 941 | 886 | 6 | 892 | (1) |
| Total Surgical | 5,751 | 5,522 | 4 | 5,314 | 4 |
| Vision Care | | | | | |
| Contact lenses | 2,770 | 2,609 | 6 | 2,400 | 9 |
| Ocular health | 1,798 | 1,705 | 5 | 1,656 | 3 |
| Total Vision Care | 4,568 | 4,314 | 6 | 4,056 | 6 |
| Net sales | 10,319 | 9,836 | 5 | 9,370 | 5 |

Surgical

Surgical net sales were \$5.8 billion, an increase of 4%.

- Implantables net sales were \$1.8 billion, in line with the prior year period. These results reflect the launch of *PanOptix Pro* in the US, as well as soft market conditions and competitive pressures.
- Consumables net sales were \$3.0 billion, an increase of 6%, including favorable currency impacts of 1%. Growth was driven by vitreoretinal procedural growth and price increases, partially offset by soft cataract market conditions.
- Equipment/other net sales were \$941 million, an increase of 6%, as sales of recently launched equipment, including *Unity VCS*, were partially offset by declines in legacy equipment.

Vision Care

Vision Care net sales were \$4.6 billion, an increase of 6%, including favorable currency impacts of 1%.

- Contact lenses net sales were \$2.8 billion, an increase of 6%, including favorable currency impacts of 1%. Growth was primarily driven by price increases and product innovation, partially offset by declines in legacy products.
- Ocular health net sales were \$1.8 billion, an increase of 5%, including unfavorable currency impacts of 1%. Growth was led by our portfolio of dry eye products, including *Tryptyr* and *Systane*. The prior year period included sales of certain eye drops in China which were divested and out-licensed in late 2024.

Operating income

| (\$ millions unless indicated otherwise) | 2025 compared to 2024 | | | 2024 compared to 2023 | |
|------------------------------------------|-----------------------|--------------|------------|-----------------------|-----------|
| | 2025 | 2024 | Change % | 2023 | Change % |
| Cost of net sales | (4,592) | (4,328) | (6) | (4,141) | (5) |
| Gross profit | 5,745 | 5,512 | 4 | 5,247 | 5 |
| <i>Gross margin (%)</i> | <i>55.7</i> | <i>56.0</i> | | <i>56.0</i> | |
| Selling, general & administration | (3,449) | (3,250) | (6) | (3,209) | (1) |
| Research & development | (990) | (876) | (13) | (828) | (6) |
| Other income | 169 | 77 | 119 | 80 | (4) |
| Other expense | (115) | (50) | (130) | (251) | 80 |
| Operating income | 1,360 | 1,413 | (4) | 1,039 | 36 |
| <i>Operating margin (%)</i> | <i>13.2</i> | <i>14.4</i> | | <i>11.1</i> | |

Operating income was \$1.4 billion (-4%), down slightly from the prior year period. Operating margin decreased 1.2 percentage points. The current year period included sales and marketing investments behind new product launches, increased investment in research and development, including from recent acquisitions, incremental tariffs, acquisition and integration related items and product discontinuation charges in Vision Care. The decline in operating margin was partially offset by price increases, fair value remeasurements of investments in associated companies, favorability from annual incentive compensation and a positive 0.1 percentage point impact from currency. The prior year period included a net gain related to the divestment of certain product rights in China.

Segment contribution

For additional information regarding segment contribution, please refer to Note 4 to the Consolidated Financial Statements.

| (\$ millions unless indicated otherwise) | 2025 compared to 2024 | | | 2024 compared to 2023 | |
|------------------------------------------|-----------------------|--------------|------------|-----------------------|-----------|
| | 2025 | 2024 | Change % | 2023 | Change % |
| Surgical segment contribution | 1,460 | 1,467 | — | 1,454 | 1 |
| <i>As % of net sales</i> | 25.4 | 26.6 | | 27.4 | |
| Vision Care segment contribution | 981 | 962 | 2 | 777 | 24 |
| <i>As % of net sales</i> | 21.5 | 22.3 | | 19.2 | |
| Not allocated to segments | (1,081) | (1,016) | (6) | (1,192) | 15 |
| Operating income | 1,360 | 1,413 | (4) | 1,039 | 36 |

Surgical

Surgical segment contribution was \$1.5 billion (0%), in line with the prior year period. Segment contribution margin decreased 1.2 percentage points, primarily due to higher inventory-related costs, including incremental tariffs, and sales and marketing investments behind new product launches, partially offset by favorability from annual incentive compensation and price increases.

Vision Care

Vision Care segment contribution was \$981 million (+2%), compared to \$962 million in the prior year period. Segment contribution margin decreased 0.8 percentage points. The current year period included increased investment in research and development, including from a recent acquisition, sales and marketing investments behind new product launches and incremental tariffs, partially offset by price increases, manufacturing efficiencies, favorability from annual incentive compensation and a positive 0.1 percentage point impact from currency. The prior year period was impacted by inventory provisions due to a supplier-related quality issue.

Not allocated to segments

Operating loss not allocated to segments totaled \$1.1 billion (-6%), compared to \$1.0 billion in the prior year period. The current year period included \$58 million of acquisition and integration items, \$44 million of product discontinuation charges, higher amortization of intangible assets and legal items, partially offset by gains of \$142 million on fair value remeasurements of investments in associated companies. The prior year period included a \$57 million net gain related to the divestment of certain product rights in China.

Non-operating income & expense

| (\$ millions unless indicated otherwise) | 2025 compared to 2024 | | | 2024 compared to 2023 | |
|------------------------------------------------|-----------------------|--------------|------------|-----------------------|-----------|
| | 2025 | 2024 | Change % | 2023 | Change % |
| Operating income | 1,360 | 1,413 | (4) | 1,039 | 36 |
| Interest expense | (204) | (192) | (6) | (189) | (2) |
| Other financial income & expense | 22 | 43 | (49) | (18) | nm |
| Share of (loss) from associated companies | (18) | (8) | (125) | — | nm |
| Income before taxes | 1,160 | 1,256 | (8) | 832 | 51 |
| Taxes | (180) | (238) | 24 | 142 | nm |
| Net income | 980 | 1,018 | (4) | 974 | 5 |
| <i>Net income attributable to:</i> | | | | | |
| Shareholders of Alcon Inc. | 980 | 1,018 | (4) | 974 | 5 |
| Non-controlling interests | — | — | — | — | — |
| Basic earnings per share (\$) ⁽¹⁾ | 1.99 | 2.06 | (3) | 1.98 | 4 |
| Diluted earnings per share (\$) ⁽¹⁾ | 1.98 | 2.05 | (3) | 1.96 | 5 |

nm = not meaningful

(1) Earnings per share is calculated on the amount of net income attributable to shareholders of Alcon Inc.

Interest expense

Interest expense was \$204 million, compared to \$192 million in the prior year period, primarily driven by higher interest expense from discounting of long-term contingent consideration liabilities and higher interest expense on lease liabilities.

Other financial income & expense

Other financial income & expense was a net benefit of \$22 million, compared to \$43 million in the prior year period, primarily driven by lower interest income and an increase in foreign currency exchange losses.

Share of (loss) from associated companies

Share of (loss) from associated companies was \$18 million compared to \$8 million in the prior year period, reflecting Alcon's investment in associated companies during the year.

Taxes

Tax expense was \$180 million, compared \$238 million in the prior year period. The average tax rate was 15.5%, compared to 18.9% in the prior year period. The decrease in average tax rate is primarily driven by a non-taxable gain on the fair value remeasurement of an investment in an associated company and higher discrete tax benefits in the current year period.

Net income and earnings per share

Net income was \$980 million, compared to \$1.0 billion in the prior year period, primarily due to lower operating income and higher non-operating income & expense, partially offset by lower tax expense. The associated basic and diluted earnings per share were \$1.99 and \$1.98, respectively, compared to basic and diluted earnings per share of \$2.06 and \$2.05, respectively, in the prior year period.

Effects of currency fluctuations

We prepare our Consolidated Financial Statements in US dollars. As a result, fluctuations in the exchange rates between the US dollar and other currencies can have a significant effect on our results of operations as well as on the reported value of our assets, liabilities and cash flows. This in turn may significantly affect reported earnings (both positively and negatively) and the comparability of period-to-period results of operations.

For purposes of our Consolidated Balance Sheet, we translate assets and liabilities denominated in other currencies into US dollars at the prevailing market exchange rates as of the relevant balance sheet date. For purposes of our Consolidated Income Statement and Consolidated Statement of Cash Flows, revenue, expense and cash flow items in local currencies are translated into US dollars at average exchange rates prevailing during the relevant period. As a result, even if the

amounts or values of these items remain unchanged in the respective local currency, changes in exchange rates have an impact on the amounts or values of these items in our Consolidated Financial Statements.

Alcon manages its global currency exposure by engaging in hedging transactions where management deems appropriate as described in "Item 5.B. Liquidity and Capital Resources". The impact of ongoing macroeconomic conditions is currently unknown and could have a material adverse effect on our results of operations, cash flows or financial condition.

There is also a risk that certain countries could devalue their currency. If this occurs, it could impact the effective prices we are able to charge for our products and it could adversely impact both our Consolidated Income Statement and Consolidated Balance Sheet. Alcon is exposed to a potential adverse devaluation risk on its intercompany funding and total investment in certain subsidiaries operating in countries with exchange controls.

The hyperinflationary economies in which we operate are Argentina, Turkey and Venezuela. Refer to Note 2 to the Consolidated Financial Statements for additional information.

Foreign exchange rates for foreign currency translation

The below tables set forth the foreign exchange rates of the US dollar against key currencies used for foreign currency translation when preparing the Consolidated Financial Statements:

| (\$ per unit unless indicated otherwise) | Average for year | | | As of December 31 | | |
|------------------------------------------|------------------|-------|----------|-------------------|-------|----------|
| | 2025 | 2024 | Change % | 2025 | 2024 | Change % |
| AUD | 0.645 | 0.660 | (2) | 0.669 | 0.622 | 8 |
| BRL | 0.179 | 0.186 | (4) | 0.183 | 0.162 | 13 |
| CAD | 0.716 | 0.730 | (2) | 0.730 | 0.696 | 5 |
| CHF | 1.204 | 1.136 | 6 | 1.261 | 1.107 | 14 |
| CNY | 0.139 | 0.139 | — | 0.143 | 0.137 | 4 |
| EUR | 1.128 | 1.082 | 4 | 1.174 | 1.041 | 13 |
| GBP | 1.317 | 1.278 | 3 | 1.346 | 1.256 | 7 |
| INR (100) | 1.147 | 1.195 | (4) | 1.112 | 1.168 | (5) |
| JPY (100) | 0.668 | 0.660 | 1 | 0.639 | 0.640 | — |
| RUB (100) | 1.193 | 1.077 | 11 | 1.255 | 0.889 | 41 |
| KRW (1,000) | 0.703 | 0.733 | (4) | 0.691 | 0.679 | 2 |

| (\$ per unit unless indicated otherwise) | Average for year | | | As of December 31 | | |
|------------------------------------------|------------------|-------|----------|-------------------|-------|----------|
| | 2024 | 2023 | Change % | 2024 | 2023 | Change % |
| AUD | 0.660 | 0.664 | (1) | 0.622 | 0.683 | (9) |
| BRL | 0.186 | 0.200 | (7) | 0.162 | 0.206 | (21) |
| CAD | 0.730 | 0.741 | (1) | 0.696 | 0.755 | (8) |
| CHF | 1.136 | 1.113 | 2 | 1.107 | 1.189 | (7) |
| CNY | 0.139 | 0.141 | (1) | 0.137 | 0.141 | (3) |
| EUR | 1.082 | 1.081 | — | 1.041 | 1.107 | (6) |
| GBP | 1.278 | 1.243 | 3 | 1.256 | 1.275 | (1) |
| INR (100) | 1.195 | 1.211 | (1) | 1.168 | 1.203 | (3) |
| JPY (100) | 0.660 | 0.712 | (7) | 0.640 | 0.707 | (9) |
| RUB (100) | 1.077 | 1.171 | (8) | 0.889 | 1.111 | (20) |
| KRW (1,000) | 0.733 | 0.765 | (4) | 0.679 | 0.775 | (12) |

The below table shows information concerning the rate of exchange of US dollar per Swiss franc based on exchange rate information found on Bloomberg Market System. The exchange rate in effect on February 16, 2026 as found on Bloomberg Market System was CHF 1.00 = USD 1.30.

| (\$ per CHF) | Low ⁽¹⁾ | High ⁽¹⁾ |
|-------------------------------------------|--------------------|---------------------|
| January 2025 | 1.10 | 1.10 |
| February 2025 | 1.11 | 1.11 |
| March 2025 | 1.13 | 1.14 |
| April 2025 | 1.21 | 1.22 |
| May 2025 | 1.20 | 1.22 |
| June 2025 | 1.25 | 1.26 |
| July 2025 | 1.23 | 1.23 |
| August 2025 | 1.24 | 1.25 |
| September 2025 | 1.25 | 1.26 |
| October 2025 | 1.24 | 1.25 |
| November 2025 | 1.24 | 1.25 |
| December 2025 | 1.26 | 1.26 |
| January 2026 | 1.29 | 1.31 |
| February 2026 (through February 16, 2026) | 1.30 | 1.30 |

(1) Represents the lowest and highest, respectively, of the exchange rates on the last day of each month during the year.

Currency impact on key figures

The below table provides a summary of the currency impact on key company figures due to their conversion into US dollars, Alcon's reporting currency, of the financial data from entities reporting in non-US dollars.

| | 2025 compared to 2024 | | | 2024 compared to 2023 | | |
|------------------------------------|-----------------------|------------------------------------|----------------------------------|-----------------------|------------------------------------|----------------------------------|
| | Total change % | Operations change % ⁽¹⁾ | Currency change % ⁽²⁾ | Total change % | Operations change % ⁽¹⁾ | Currency change % ⁽²⁾ |
| Net sales | 5 | 4 | 1 | 5 | 6 | (1) |
| Gross profit | 4 | 3 | 1 | 5 | 7 | (2) |
| Operating income | (4) | (5) | 1 | 36 | 44 | (8) |
| Net income | (4) | (5) | 1 | 5 | 11 | (6) |
| <i>Net income attributable to:</i> | | | | | | |
| Shareholders of Alcon Inc. | (4) | (5) | 1 | 5 | 11 | (6) |
| Non-controlling interests | — | — | — | — | — | — |
| Basic earnings per share (\$) | (3) | (5) | 2 | 4 | 11 | (7) |
| Diluted earnings per share (\$) | (3) | (5) | 2 | 5 | 11 | (6) |

(1) Represents the change in reported results, excluding the impact of foreign currency exchange rate fluctuations.

(2) Represents the impact of foreign currency exchange rate fluctuations on reported results.

A 1% movement in the USD versus our basket of currencies would have resulted in a \$52 million change in annual net sales and a \$29 million change in annual operating income.

5.B. LIQUIDITY AND CAPITAL RESOURCES

We manage our capital with the objectives of maintaining the ability to continue as a going concern, allow for investment, mitigate against potential future risks and provide returns to shareholders. Alcon is not subject to regulatory or other external capital adequacy requirements. As of December 31, 2025, Alcon's long-term credit rating with S&P Global Ratings was BBB+ (stable outlook) (2024: BBB+) and with Moody's Investors Service was Baa1 (stable outlook) (2024: Baa1).

Our sources of funds have consisted principally of cash flows from operations, bank debt, credit facilities with lenders and issuance of senior notes. Our uses of those funds, other than for operations, have consisted principally of dividend payments, share repurchases, investments in capital expenditures, payments for long-term financial investments, investments in associated companies, purchases of intangible assets, acquisitions and associated expenses, repayment of financial debts and other obligations.

Potential future uses of our liquidity include capital expenditures, acquisitions, repayment of financial debts, dividend payments, share repurchases, restructuring payments and other general corporate purposes. As of December 31, 2025, we had commitments for purchases of property, plant & equipment of \$276 million. In addition, on March 23, 2025, Alcon entered into a definitive agreement to acquire all outstanding shares of LENSAR, Inc. ("LENSAR"), a global medical technology company focused on advanced laser solutions for the treatment of cataracts, with a total consideration of up to approximately \$430 million. The planned acquisition will complement Alcon's existing Surgical portfolio in the treatment of cataracts. The transaction is subject to customary closing conditions, including regulatory approval and is expected to close in the first half of 2026. Refer to Note 21.1 to the Consolidated Financial Statements for additional information.

We use the US Dollar as our reporting currency and are therefore exposed to foreign currency exchange movements and costs to enter hedging agreements, primarily in Euros, Japanese Yen, Chinese Renminbi, Canadian Dollars, Singaporean Dollars, Swiss Francs, Russian Rubles and emerging market currencies. The foreign currency exposure on the balance sheet is hedged with limited exception, but the impact of ongoing macroeconomic conditions is currently unknown and could have a material adverse effect on our results of operations, cash flows or financial condition. As of December 31, 2025 unsettled derivative positions included \$5 million in unrealized gains and \$6 million in unrealized losses.

All comments in this section relate to the year ended December 31, 2025 compared to 2024. Commentary for the year ended December 31, 2024 compared to 2023 may be found in Item 5 of the 2024 Form 20-F.

Cash flow

| (\$ millions) | 2025 | 2024 |
|--------------------------------------------------------------|--------------|--------------|
| Net cash flows from operating activities | 2,271 | 2,077 |
| Net cash flows used in investing activities | (1,344) | (1,167) |
| Net cash flows used in financing activities | (1,119) | (322) |
| Effect of exchange rate changes on cash and cash equivalents | 43 | (6) |
| Net change in cash and cash equivalents | (149) | 582 |
| Cash and cash equivalents at January 1 | 1,676 | 1,094 |
| Cash and cash equivalents at December 31 | 1,527 | 1,676 |

Net cash flows from operating activities

Net cash flows from operating activities amounted to \$2.3 billion in 2025, compared to \$2.1 billion in the prior year period. The current year period reflects increased collections associated with higher sales, lower taxes paid due to timing of payments and deductions as well as tax refunds received, partially offset by increased payments for operating expenses, including sales and marketing investments behind new product launches, increased investment in research and development and incremental tariffs, higher payments for revenue deductions and a higher impact from changes in net working capital.

Changes in net working capital in the current year were mainly driven by an increase in inventories and an increase in trade receivables, partially offset by an increase in trade payables. The increase in inventories was primarily to meet expected upcoming demand. The increase in trade receivables was primarily driven by new receivables from higher sales outpacing collections. The increase in trade payables was primarily driven by the timing of payments and raw materials purchases.

Changes in net working capital in the prior year period were mainly driven by increases in trade receivables and inventories and the net change in other operating liabilities. The increase in trade receivables was primarily due to new receivables from higher sales outpacing collections. The increase in inventories was primarily to meet expected upcoming demand. The net change in other operating liabilities was primarily due to the impact of annual short-term incentive payments. Refer to Note 20 of the Consolidated Financial Statements for additional details regarding changes within net working capital in the current and prior year periods.

Net cash flows used in investing activities

Net cash flows used in investing activities amounted to \$1.3 billion in 2025, compared to \$1.2 billion in the prior year period. Cash outflows in the current year period primarily include the acquisition of a majority interest in Aurion, the acquisitions of LumiThera and Cylite, capital expenditures and purchases of intangible assets, primarily related to software, the purchase of a time deposit in the fourth quarter of 2025 and payments for financial assets measured at fair value through other comprehensive income ("FVOCI"), partially offset by proceeds from a time deposit which matured in February 2025. Refer to Note 21.1 to the Consolidated Financial Statements for additional information on the Aurion, LumiThera and Cylite transactions.

Cash outflows in the prior year period primarily included capital expenditures, purchases of software and other intangible assets, investments in associated companies, purchase of time deposits, payments for financial assets measured at FVOCI, and the acquisition of BELKIN. Refer to Notes 24 and 21.1 of the Consolidated Financial Statements for additional information on the investments in associated companies and BELKIN acquisition, respectively.

Net cash flows used in financing activities

Net cash flows used in financing activities amounted to \$1.1 billion in 2025, compared to \$322 million in the prior year period. Cash outflows in the current year period primarily include payments for the acquisition of treasury shares, dividends paid to shareholders of Alcon Inc., realized foreign exchange losses, lease payments and withholding taxes paid upon net settlements of equity-based compensation.

Cash outflows in the prior year period primarily included dividends paid to shareholders of Alcon Inc., lease payments, net payments related to certain local debt facilities and withholding taxes paid upon net settlements of equity-based compensation.

Balance sheet

Assets

Total non-current assets were \$25.1 billion as of December 31, 2025, an increase of \$1.1 billion when compared to \$24.0 billion as of December 31, 2024. Intangible assets other than goodwill and Goodwill increased \$419 million and \$310 million, respectively, primarily due to the acquisition of a majority interest in Aurion, the acquisitions of LumiThera and Cylite and additions of software and other intangible assets, partially offset by recurring amortization and asset impairments. Property, plant and equipment increased \$385 million primarily due to capital expenditures and foreign currency effects, partially offset by depreciation. Financial assets increased \$116 million primarily due to an increase in long-term receivables from customers as well as additions to and fair value adjustments of long-term financial investments measured at FVOCI. Other non-current assets decreased \$197 million, primarily due to a decrease in investments in associated companies as a result of the Aurion and Cylite transactions.

Total current assets were \$6.4 billion as of December 31, 2025, an increase of \$140 million when compared to \$6.3 billion as of December 31, 2024. Trade receivables increased \$206 million due to higher sales outpacing collections and foreign currency translation effects. Inventories increased \$123 million primarily due to increases to meet expected upcoming demand and foreign currency translation effects. Cash and cash equivalents decreased \$149 million due to the net impact of operating, investing and financing activities as described in the preceding section. Our cash and cash equivalents are maintained at a number of financial institutions. To mitigate the risk of uninsured balances, we select financial institutions based on their credit ratings and financial strength, and we perform ongoing evaluations of these institutions to limit our concentration risk exposure. Time deposits decreased \$73 million due to the maturity of a time deposit in February 2025 offset by a time deposit purchased during the fourth quarter of 2025 with a six-month term, maturing on April 29, 2026. The time deposit is measured at amortized cost and had a carrying value of \$80 million as of December 31, 2025.

Trade receivable balances include sales to wholesalers, retailers, doctor groups, private health systems, government agencies, pharmacy benefit managers, managed health-care organizations and government-supported healthcare systems. We closely monitor the level of trade receivables in the countries deemed to have an elevated credit risk. We consider macroeconomic and geopolitical environment, country profile and historical experience in addition to other relevant information when assessing the credit risk. Deteriorating credit risk factors may result in an increase in the average length of time that it takes to collect these trade receivables and may require Alcon to reevaluate the expected credit loss amount of these trade receivables in future periods or change the terms on which we operate. As of December 31, 2025, the amounts past due for more than one year in elevated credit risk countries are not significant.

The below table summarizes the aging of trade receivables as of December 31, 2025 and 2024:

| (\$ millions) | 2025 | 2024 |
|--------------------------------------------------------------|--------------|--------------|
| Not overdue | 1,634 | 1,448 |
| Past due for not more than one month | 134 | 137 |
| Past due for more than one month but less than three months | 101 | 84 |
| Past due for more than three months but less than six months | 49 | 49 |
| Past due for more than six months but less than one year | 31 | 26 |
| Past due for more than one year | 43 | 33 |
| Provisions for doubtful trade receivables | (50) | (41) |
| Total trade receivables, net | 1,942 | 1,736 |

There is also a risk that certain countries could devalue their currency. Currency exposures are described in more detail in the "Item 5.A. Operating Results — Effects of currency fluctuations" section.

Liabilities

Total non-current liabilities were \$6.5 billion as of December 31, 2025, in line with December 31, 2024. Deferred tax liabilities increased \$217 million primarily related to Aurion and LumiThera, partially offset by deferred tax liabilities related to intangible assets due to recurring amortization. Provisions and other non-current liabilities increased \$114 million primarily due to an increase in contingent consideration liabilities primarily related to the acquisition of LumiThera and an increase in long term employee benefits and deferred compensation. Financial debts decreased \$376 million primarily due to the reclassification of the Series 2026 Notes from non-current to current.

Total current liabilities were \$3.0 billion as of December 31, 2025, an increase of \$771 million when compared to \$2.3 billion as of December 31, 2024. Financial debts increased \$470 million primarily due to the reclassification of the Series 2026 Notes from non-current to current. Trade payables increased \$153 million primarily due to timing of payments, raw materials purchases and foreign exchange effects. Current income tax liabilities increased \$78 million primarily due to timing of payments, partially offset by tax refunds received.

The average maturity of financial debts outstanding as of December 31, 2025 is 8.8 years, and 97% of Alcon's financial debt is at fixed interest rates. We believe that we have adequate liquidity to meet our needs.

The \$1.32 billion revolving credit facility remained undrawn as of December 31, 2025 and February 24, 2026. A \$1.9 billion bridge loan facility was executed in August 2025 and also remained undrawn as of December 31, 2025 and was cancelled in January 2026. Refer to Note 26 of the Consolidated Financial Statements for additional information.

Equity

Equity was \$22.0 billion as of December 31, 2025, an increase of \$482 million when compared to \$21.6 billion as of December 31, 2024. Equity attributable to non-controlling interests amounted to \$1 million as of December 31, 2025 related to Aurion.

Liquidity and financial debt by currency

The below table summarizes liquidity and financial debts by currency as of December 31, 2025 and 2024.

| | Liquidity (%) ⁽¹⁾ | | Financial debts (%) ⁽²⁾ | |
|--------------|------------------------------|------------|------------------------------------|------------|
| | 2025 | 2024 | 2025 | 2024 |
| USD | 70 | 77 | 85 | 87 |
| EUR | 18 | 12 | 12 | 11 |
| CHF | — | 1 | — | — |
| JPY | — | — | 1 | 1 |
| Other | 12 | 10 | 2 | 1 |
| Total | 100 | 100 | 100 | 100 |

(1) Liquidity includes cash and cash equivalents and time deposits.

(2) Financial debts includes non-current and current financial debts.

Terminated Acquisition of STAAR Surgical Company

On August 4, 2025, Alcon entered into a definitive agreement to acquire STAAR Surgical Company ("STAAR"), a global medical technology company focused on the research, development, manufacturing, distribution and sale of phakic intraocular lenses. On August 20, 2025, Alcon executed a \$1.9 billion bridge loan agreement (the "2025 Bridge Loan Facilities") with Morgan Stanley Bank International Limited and Morgan Stanley Bank, N.A., split in two tranches of \$1.4 billion ("Facility A") and \$0.5 billion ("Facility B"), respectively, with Alcon Finance Corporation being an additional possible borrower. Facility A was restricted for use in funding the acquisition of STAAR, whereas Facility B was to be used for financing or refinancing of any other acquisitions. The 2025 Bridge Loan Facilities remained fully undrawn as of December 31, 2025. In January 2026, Alcon terminated its definitive merger agreement with STAAR and cancelled the 2025 Bridge Loan Facilities. There were no termination fees for either company. Refer to Note 26 to the Consolidated Financial Statements for more information.

Tariffs

Beginning April 2025, the United States government announced additional tariffs on goods imported into the United States, and some nations have responded with reciprocal tariffs and other actions. Since then, there have been temporary reductions or pauses of certain tariffs to allow for trade negotiations, as well as new tariff announcements. Additional tariffs incurred in the United States and China during the twelve months ended December 31, 2025 amounted to \$91 million, of which \$67 million was recognized in "Cost of net sales" in the Consolidated Income Statement and \$24 million was recognized in "Inventories" in the Consolidated Balance Sheet as of December 31, 2025. Tariffs incurred for the year were lower than originally forecasted, reflecting operational and supply-chain efficiencies realized during the year. The future effects of these tariffs, along with any additional further changes in trade policies, are uncertain and could have an adverse effect on our business, financial condition, cash flows and results of operations. Further, adverse economic conditions impacting our customers or uncertainty about global economic conditions could cause purchases of our products to decline, which would adversely affect our net sales and operating results.

Refer to "Item 3. Key Information—3.D. Risk Factors—*Changing economic and financial environments in many countries and increasing global political and social instability may adversely impact our business*".

Share repurchase authorization

On February 25, 2025, the Company's Board of Directors authorized the repurchase of up to \$750 million of the Company's common shares. The shares acquired are held in treasury and are intended to offset the dilutive effect of shares vesting under Alcon's equity-based incentive plans. Alcon funded the repurchases through cash generated from operations. The program was authorized by the Swiss Takeover Board and subject to customary safe harbor conditions. The share repurchase program was completed on January 20, 2026 with 9.3 million shares repurchased for a total of \$750 million. Refer to Note 7.4 of the Consolidated Financial Statements for details on share repurchase activity.

Federal legislation

On July 4, 2025, the United States Congress enacted budget reconciliation bill H.R. 1, which includes significant provisions such as the permanent extension of certain provisions of the Tax Cuts and Jobs Act that were set to expire. The legislation has multiple effective dates, with certain provisions effective in 2025 and others to be implemented through 2027. The enactment of H.R. 1 did not materially impact Alcon's Consolidated Financial Statements for the year ended December 31, 2025.

Alcon continues to evaluate the potential future impact of the tax law changes on our Consolidated Financial Statements, but does not expect H.R. 1 to have a material impact to the effective tax rate. The enactment of H.R. 1 resulted in a reduction in cash tax payment obligations in 2025 driven by timing of deductions.

5.C. RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES, ETC.

Alcon research & development expense totaled \$990 million, \$876 million and \$828 million for the years 2025, 2024 and 2023, respectively. As described in the "Risk Factors" section and elsewhere in this Annual Report, we are subject to varying degrees of governmental regulation in the countries in which we operate, which makes the process of developing new products and obtaining necessary regulatory marketing authorization lengthy, expensive and uncertain. See "Item 3. Key Information—3.D. Risk Factors". For further information on Alcon research and development policies and additional product information, as well as a description of the regulatory approval process, see "Item 4. Information on the Company—4.B. Business Overview".

5.D. TREND INFORMATION

Please see "Item 5.A. Operating Results—Opportunity and risk summary" and "Item 4. Information on the Company—4.B. Business Overview" for trend information.

5.E. CRITICAL ACCOUNTING ESTIMATES

Please see "Item 5.A. Operating results—Critical accounting policies and estimates".

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

6.A. DIRECTORS AND SENIOR MANAGEMENT

The information set forth under “Item 6.C. Board Practice—Corporate Governance—Board of Directors—Composition” and “Item 6.C. Board Practice—Corporate Governance—Executive Committee—Composition of the Executive Committee” is incorporated by reference.

6.B. Compensation

Introduction

Dear Shareholder,

On behalf of the Alcon Board of Directors ("Board") and Compensation Committee ("the Committee" or "CC"), I am pleased to present the 2025 Compensation Report. This report outlines Alcon's overall 2025 compensation framework and philosophy for the members of the Board as well as for the members of the Executive Committee of Alcon ("ECA") and provides a general outlook for our 2026 compensation structure.

This Compensation Report covers the financial year from January 2025 to December 2025.

2025 Annual General Meeting Vote and Engagement with Shareholders

At our 2025 Annual General Meeting ("AGM"), our 2024 Compensation Report received support from 87% of the votes cast. We were very encouraged with this result given our disclosure enhancements in the Short-term incentive ("STI") and Long-term incentive ("LTI") sections, complete refresh of our 2024 Compensation Report, additional insights into peer group rationale and pay for performance alignment. During shareholder engagement, we contacted our top 33 shareholders holding approximately 54% of outstanding shares to address any concerns they have on our executive compensation programs. We highlighted our rationale for the composition of our peer group, the judicious approach we take to set CEO's target compensation, our pay for performance alignment and our continuing effort to make our executive compensation disclosure transparent and clear. We received positive support from our shareholders on the composition of our peer group and pay for performance alignment.

Contacted top 33 shareholders, representing 54% of outstanding shares and held 19 meetings with shareholders, representing ~38% of outstanding shares and met with 3 proxy advisors.

Our engagement team included our Board Chair, Chief Human Resources Officer, General Counsel, Head of Investor Relations and Head of Social Impact and Sustainability. We heard directly from investors on a range of important topics including CEO compensation, executive compensation programs and broader Social Impact and Sustainability matters, as summarized in the section "Shareholder Outreach" which sets out the summary of shareholder feedback.

2025 in Review

2025 was marked by a challenging global macroeconomic environment, including tariffs, trade uncertainty and soft market conditions, resulting in performance below expectations. In navigating these dynamics, management executed with discipline and focus and advanced a robust pipeline of new product launches that contributed to improving sales momentum as the year progressed. These actions supported solid operational and financial performance and positioned the Company for sustainable long-term growth.

By the second half of the year, our trajectory shifted meaningfully. A wave of innovative product launches, which were many years in development, began reaching surgeons, eye care professionals, and patients around the world. These launches brought energy and momentum across our business, reaffirming our position as a global leader in eye care.

Business Overview

Alcon experienced a productive year in 2025, driven by strong execution and steady momentum across the business. We launched a wave of innovative new products, including *Unity VCS*, *TRYPTYR*, *PanOptix Pro*, *Voyager*, *Precision7* and *Systane Pro*. These introductions strengthened our market position and further validated the power of our innovation engine. Our results reflect the resilience of the eye care market, the depth of our pipeline and the discipline of our operating model. We generated \$1.7 billion of free cash flow¹ for the year, enabling continued investment while returning capital to shareholders. Together, these achievements underscore the strength of our strategy and reinforce our confidence in delivering sustainable value well into the future.

| | | | |
|------------------------------------------------------------|---------------------------------------------------------------------------------|------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| \$1.7B Free Cash Flow¹ | +5% Vision Care¹ sales growth on a constant currency basis | +4% Surgical¹ sales growth on a constant currency basis | Attained our emission intensity goal by reducing utilization to 112 GHG/terajoules |
| Helped improve vision for over 1.6 million patients | | Screened over 32,000 children and provided spectacles where required | Achieved an estimated landfill diversion rate of 99% for non-hazardous waste from our manufacturing sites and distribution centers |

¹ Free cash flow and constant currency are non-IFRS measures. Refer to "Item 6.B. Compensation - Non-IFRS measures as defined by the Company" section for additional information.

2025 ECA Overview

In 2025, we maintained the leadership structure similar to 2024. The Board and the Committee annually reviews the CEO and ECA target compensation against our peer group and no changes were made to the CEO compensation in 2025. All other ECA members received increases aligned with the global budget for our broad-based associate population.

No increases were made to the CEO's target compensation in 2025.

2025 Incentive Payouts

To ensure our performance goals are appropriately ambitious and aligned to our business strategy, Alcon undertakes a comprehensive approach when evaluating both annual and long-term incentive plan metric targets. Payouts in 2025 were premised on our achieving stretch goals.

SHORT TERM INCENTIVE

In 2025, Alcon delivered overall performance below target, with Sales and Core Operating Income¹ below targets due to the headwinds of a dynamic global environment, tariffs, trade uncertainties and early-year softness in the Surgical market, while Free Cash Flow¹ exceeded expectations. This resulted in a business performance factor ("BPF") of 80% for all eligible associates.

Business Performance Factor

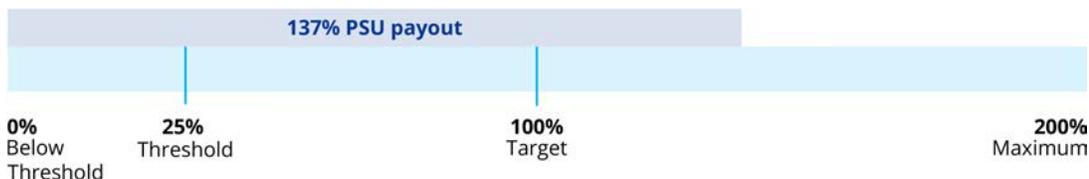

¹ Core operating income and free cash flow are non-IFRS measures. Refer to "Item 6.B. Compensation - Non-IFRS measures as defined by the Company" section for additional information.

LONG TERM INCENTIVE

For the 2023-2025 LTI performance stock unit ("PSU") award, Alcon exceeded target levels for the two financial metrics (Sales CAGR and Core diluted EPS CAGR¹). For the Share of Peers metric, we fell short of the target level and we exceeded our goals set out for the Innovation metric, resulting in a performance factor of 137%. Performance-based LTI making up the majority of ECA compensation is the cornerstone of our pay programs and reflects our focus of alignment of the ECA to long-term value creation. Over the three-year performance period, Alcon's three-year total shareholder return ("TSR") performance was above more than half of our peer group.

Alcon's TSR performance over the past three years is at the 58th percentile of our peer group.

PSU Performance Factor

¹ Core diluted EPS CAGR is a non IFRS measure. Refer to "Item 6.B. Compensation - Non-IFRS measures as defined by the Company" section for additional information.

Details of our targets and achievements for the STI and LTI are set out in Exhibit 21 and 24.

2026 Outlook

As we look ahead into 2026, the Committee intends to maintain the overall structure of CEO and ECA compensation as compared to 2025 including base salary, STI, LTI and continuation of robust share ownership requirements. As discussed in the "Shareholder Outreach" section, the Committee is reviewing ECA compensation for potential adjustments in 2026 to ensure target compensation appropriately reflects market competitiveness while maintaining strong pay for performance alignment. In 2025, the Board conducted a benchmarking study of Alcon's Board pay against other Swiss Market Index ("SMI") companies and determined that our Board pay is below the median level of SMI companies. The Board intends to propose compensation changes for the Board retainer fees at the 2026 AGM for the 2026-2027 AGM term in alignment with SMI peers.

2026 Annual General Meeting

In line with our Articles of Incorporation, we will ask our shareholders to cast a binding vote on the maximum aggregate amount of compensation for members of the Board for their term of office from the 2026 AGM to the 2027 AGM. We will also ask our shareholders to cast a binding vote on the maximum aggregate amount of compensation for members of the ECA for the 2027 financial year. In addition, we will ask our shareholders to endorse this 2025 Compensation Report in an advisory vote.

On behalf of the Board and the members of the Committee, we thank you for your trust and investment in Alcon as well as your feedback and support.

Sincerely,

Karen May

Chair of the Compensation Committee

Shareholder Outreach

2025 Shareholder Engagement on Executive Compensation

It is our standard practice to engage with our largest shareholders once a year during the autumn, to gather their feedback on corporate governance, executive compensation and sustainability practices. In 2025, we conducted a comprehensive governance outreach program targeting our largest shareholders and proxy advisors, representing approximately 54% of shares outstanding. The outreach was designed to allow our Board and Management to better understand shareholder perspectives and ensure alignment with their expectations.

- SUMMER**
 - Review changes to our largest shareholders' proxy voting policies and perspectives
 - Plan for outreach to our largest shareholders and institutional investors with active engagement programs
- AUTUMN**
 - Conduct engagements with our largest investors and institutional investors to discuss corporate governance, executive compensation and sustainability initiatives
 - Share engagement feedback with our Board and committees, as appropriate, for consideration
 - Enhance governance practices and disclosures, as warranted
- WINTER/SPRING**
 - In advance of the annual shareholder meeting, conduct additional engagement with investors as needed/requested and share feedback with the Board and committees
 - Hold annual shareholder meeting
 - Review feedback from annual shareholder meeting and determine future priorities

Engagement Highlights

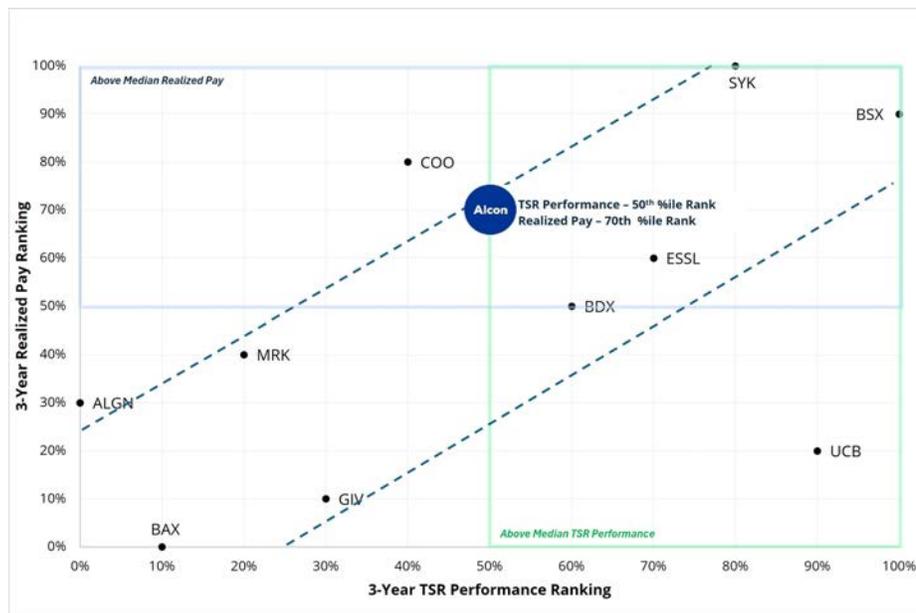

| Contacted | Engaged | Director Involvement |
|-------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|
| Targeted outreach to 33 shareholders and 3 proxy advisors , representing ~54% of shares outstanding | Engaged in one-on-one meetings with 19 shareholders and 3 proxy advisors , representing ~38% of shares outstanding | Our Board Chair led 16 discussions with shareholders, representing ~36% of shares outstanding |

The insights gathered during these engagements were shared with the Committee and Board to inform them on ongoing discussions regarding compensation and governance matters. The outreach focused on key themes related to executive compensation and Board compensation within the context of Alcon's performance, scale and global talent market. Feedback from these discussions was considered as part of Alcon's assessment of future compensation and governance priorities.

The following summary highlights key themes discussed during the 2025 shareholder engagement process.

|  Engagement Theme |  Summary of Investor Perspectives |
|-----------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CEO Compensation Positioning | <ul style="list-style-type: none"> Investors acknowledged Alcon's challenges with respect to the global talent market and the transatlantic pay gap Investors indicated support for a well-explained performance-aligned approach to CEO compensation positioning toward the peer group median provided that adjustments are reasonable, and accompanied by transparent and comprehensive disclosure |
| Board Compensation | <ul style="list-style-type: none"> Investors did not express concerns regarding non-executive director compensation Overall they supported Board compensation alignment with the SMI peers |
| Pay for Performance Alignment | <ul style="list-style-type: none"> Investors emphasized the importance of maintaining a clear and transparent link between executive compensation outcomes and shareholder experience The following pay for performance analysis illustrates general alignment between CEO pay and our total shareholder return performance against peers |

3-Year Realized Pay* vs. 3-Year TSR Performance

Legend

- ALGN** Align Technology
- BAX** Baxter International
- BDX** Becton Dickinson & Co
- BSX** Boston Scientific Corp
- ESSL** EssilorLuxottica
- GIV** Givaudan SA
- MRK** Merck KGaA
- SYK** Stryker Corporation
- COO** The Cooper Companies

The above analysis covers 10 CEOs in the peer group who were CEO over the last three years to ensure a like-for-like comparison.

* Realized Pay = Annualized base salary + earned bonus + value of equity vested over the 3-years period from December 31, 2021 – December 31, 2024.

Compensation at a Glance

Compensation for our ECA members comprises fixed and variable elements. Fixed elements include annual base salary. Variable compensation consists of STI and LTI plans, which are subject to performance measures and capped. Among executives in Swiss-domiciled companies, Alcon's ECA has one of the highest proportions of pay delivered through performance-based long-term incentives.

2025 ECA Compensation Summary

Our ECA compensation program design remained consistent in 2025, with the vast majority of executive pay delivered in variable compensation. The Board and the Committee exercised no positive or negative discretion with regard to payouts under our STI and LTI plans during 2025.

Exhibit 1

| | CEO Target Compensation | Other members of the ECA Target Compensation (average) | Payment Type | Performance Period | Purpose | Performance Measures | Payout Range |

| <p>The Board approves CEO compensation based on proposals from the Committee. The Board is responsible for approving the Compensation Report and for the proposal of the aggregate budget of Board compensation and ECA compensation to the shareholders at the AGM upon recommendations of the Committee.</p> | <p>The Committee decides incentive goals and compensation of the other ECA members based upon an analysis of relevant executive compensation practices, policies and benchmarking information. Conduct an annual review with management to ensure succession planning for key leadership positions, including the CEO. Reviews and recommends CEO compensation to the independent members of the Board, ensuring alignment with performance and shareholder interests.</p> | <p>Provide independent advice on executive compensation, market pay practices and policies, and the overall compensation structure. Offers guidance on incentive plan design, goal-setting and best practices.</p> | <p>Engage in regular feedback discussions on executive compensation and governance practices. Shareholder feedback is incorporated into the Board's decision-making process to ensure transparency and alignment with shareholder expectations.</p> |

Alcon follows a robust corporate governance framework. The Board determines Board compensation based on proposals from the Committee, which are informed by analysis and review of board compensation practices, policies and benchmarking data. Similarly, the Board approves CEO compensation based on proposals from the Committee. The Committee decides compensation of the other ECA members based upon an analysis of relevant executive compensation practices, policies and benchmarking information.

The Corporate Governance Report contained in our 2025 Annual Report in "Item 6.C. Board Practice" provides further details regarding the responsibilities of the Committee.

Compensation Governance

Authority for ECA Compensation Decisions

At Alcon, we are committed to maintaining a robust and transparent governance framework to ensure that our executive compensation aligns with our long-term value creation and shareholder interests. The process is overseen by independent bodies and informed by ongoing shareholder engagement. Exhibit 2 provides an overview of the key roles and responsibilities of these independent bodies.

³ the Compensation Committee

Adherence to Strong Governance Practices

The Committee evaluates many governance factors when designing and establishing compensation for members of the ECA. It uses these mechanisms to help guide its decisions to ensure that the Company is rewarding long-term success, discouraging excessive risk-taking and aligning executive and shareholder interests.

Exhibit 3

WHAT WE DO

- ✓ Provide a majority of executive pay in variable, rather than fixed compensation in order to ensure pay-for performance
- ✓ Tie 100% of STI and LTI to appropriately ambitious performance metrics and goals
- ✓ Ensure full alignment with shareholder expectations by focusing on long-term incentive as a major part of our total compensation
- ✓ Follow best practices in executive compensation design
- ✓ Prohibit hedging, pledging and short sales of Company stock by executive officers and Directors
- ✓ Have robust share ownership requirements to reinforce alignment between executives and shareholders
- ✓ Include forfeiture and claw-back provisions for all variable compensation payments
- ✓ Ensure that STI and LTI plans have target and maximum payout limits
- ✓ Award all equity grants at market value
- ✓ Conduct ongoing investor outreach

WHAT WE DON'T DO

- ✗ No severance agreements
- ✗ No single-trigger change in control payments
- ✗ No change in control related excise tax gross ups
- ✗ No termination notice period in excess of twelve months
- ✗ No stock option awards
- ✗ No guaranteed compensation

ECA Compensation 2025

Compensation Philosophy and Principles

Our compensation program designs and our decisions relating to ECA compensation are guided by the following philosophy and principles:

Responsibility

Ensures a broadly competitive level of compensation appropriate to each executive's scale of responsibility and individual performance

Long-Term Focus

Supports long-term value creation for shareholders with an emphasis on long-term performance-based compensation for the ECA

Strong Governance and Shareholder Alignment

Fully embraces Swiss governance expectations and follows principles of simplicity and transparency and continues to engage with shareholders to address their expectations

Market Competitive

Considers the geographic and industry-specific nature of our talent pool and the medical device industry to attract, retain and motivate a world-class executive team to drive performance

Balance and Equity

Aligns the compensation program for the senior executives with the broader management and associate population

Pay for Performance

Ensures pay outcomes are holistically aligned to delivering the right performance for Alcon and shareholders

Associate Experience

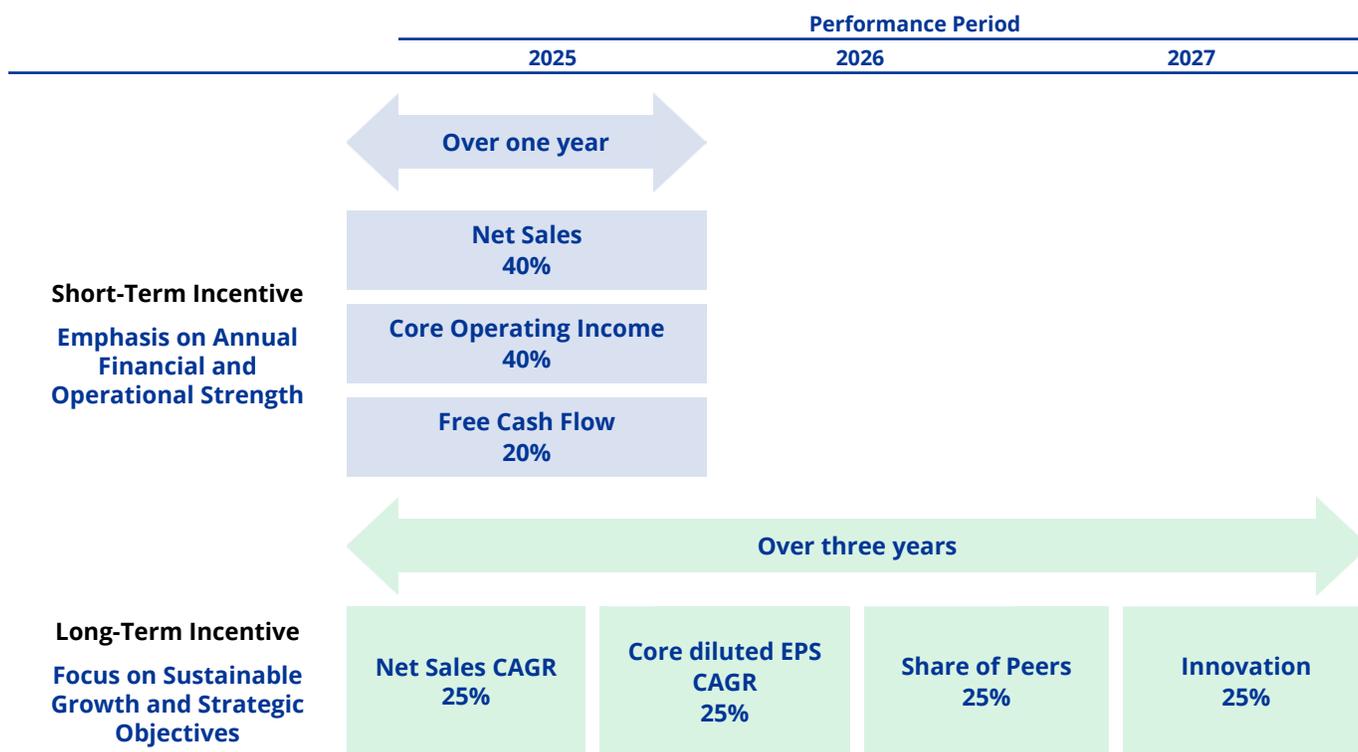

The Board holds the management team accountable for creating and fostering a strong culture that attracts, develops, rewards and retains its associates. Alcon's strong culture is reflected by our top quartile associate engagement and retention levels. Alcon has received Great Place to Work / Top Employer awards recognition in 27 countries and over 25 other external recognitions which reaffirms a positive associate experience. To learn more about our culture, talent practices and focus on associate experience refer to our 2024 Social Impact and Sustainability Report.

Pay for Performance

Variable compensation constitutes the majority of total compensation and affirms our pay for performance philosophy (see more information in Exhibits 21 and 24). Actual payouts are contingent on the achievement of predefined Company and individual performance goals to drive accountability and line-of-sight. Performance metrics and goals are aligned with the Company's business strategy and compensation philosophy, as well as long-term value creation for shareholders. Metrics and goals are approved annually by the Committee and the Board.

Our pay for performance framework measures our annual financial and operational strength, focused on sustainable, long-term growth and achievement of strategic objectives over three years.

Exhibit 4

Goal Setting Approach

To ensure our performance goals are appropriately ambitious and aligned to our business strategy, Alcon undertakes a comprehensive approach when evaluating both annual and long-term incentive plan metric targets. Management and the Committee typically evaluate multiple inputs to provide the necessary perspectives to assist with setting and approving both the annual and long-term performance thresholds, targets and maximums. Both short-term and long-term goals are set at the beginning of the performance period and measured at the end of the performance period. The Committee periodically engages with a third-party advisor to assess Alcon's STI and LTI financial targets and annual target setting process against the peer group.

|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Peer Group Approach

External peer compensation is an important market reference point for evaluating the competitive positioning of the members of the ECA, including our CEO.

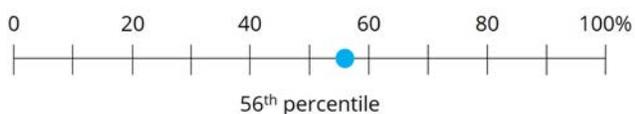

The Committee believes that a relevant set of peer companies that are similar to Alcon in size, industry, business mix and global footprint, enables shareholders to assess the appropriate levels and practices of compensation and allows for pay for performance comparisons. The Committee approved the peer group in 2019 and no changes have been made to the peer group since its inception except for Allergan, which was removed from the peer group after it was acquired by AbbVie. Alcon's revenue and market capitalization are above the median of the peer group companies.

Although Alcon is headquartered in Switzerland, a significant portion of our management, sales team and associate population are based in the US. The US is the largest pool for both medical device and ophthalmology talent, and it is therefore critical that Alcon is able to attract and retain key talent from the US. As a result, the Committee has selected a blended peer group of International and US companies (42% International and 58% US) to balance the European compensation structure with a need to compete for US talent. Based on our compensation philosophy, our desired competitive position is to align target compensation near the median of the peer group. The 2025 peer group is outlined in Exhibit 5.

Market Capitalization against Peer Group*

Revenue against Peer Group*

* Market Capitalization and Revenue data available as of December 31, 2025.

The annual total compensation of ECA members is targeted to the median of comparable benchmarks within this peer group. The Committee takes a comprehensive approach and considers compensation practices, structures and levels based on benchmarking information and advice provided by the Committee's independent external advisors (see more information under the section "Compensation Governance") to inform how it sets the right compensation program for Alcon. The Committee and the Board review the compensation of the CEO and the other ECA members periodically and consider relevant benchmark information. The Committee regularly reviews the peer group and may make adjustments to its composition as appropriate.

Forfeiture and Claw-back Rules

Any variable compensation paid or payable to ECA members is subject to forfeiture and claw-back rules under our STI and LTI plans. These rules allow the Company to withhold unpaid or unvested compensation (forfeiture) or recover compensation already paid in cash or shares (claw-back). Such rules apply in cases where the action or behavior of an executive violates internal codes, guidelines or policies or conflicts with management standards, including Company and accounting rules and regulations or laws. The action to retain or recover variable compensation is subject to applicable laws of the jurisdiction involved. Alcon also adopted its policy for Compensation Recovery in the event of Financial Restatement which contains additional recoupment provisions in accordance with SEC rules and NYSE Listing Standards. The Policy mandates the recovery of certain erroneously paid performance-based incentive compensation that may be received by our ECA members on or after October 2, 2023 if Alcon has a qualifying financial restatement during the three completed fiscal years immediately prior to the fiscal year in which a financial restatement determination is made, subject to limited exceptions.

Share Ownership Requirements for ECA Members

The Board has established share ownership requirements for members of the ECA in order to align executives' interests with those of shareholders. The ownership requirement is expressed as a multiple of the executive's annual base salary and is in line with the practices of our peer group. The following Exhibit illustrates those requirements:

Exhibit 6

All members of the ECA must meet these requirements within five years of service from the commencement of ECA level role. The ownership requirements ensure that executives' interests are aligned with those of shareholders. If any ECA member fails to meet or is not on track to meet the requirement, the Committee may take several actions, such as prohibiting the sale of Alcon shares until the requirements are met. Each ECA member has met or is on track to meet the ownership requirements and our CEO has exceeded his ownership requirement.

Compensation Elements

Base Salary

The ECA members' base salaries set out below are aligned to the market value for the role based on benchmarking against our peer group. Our ECA is comprised of a highly experienced team of leaders in the industry and the Committee sets the ECA members' salaries in accordance with the management and functional expertise they bring to Alcon. Any ECA annual base salary adjustments are generally in line with the adjustments for the broader associate population.

Exhibit 7

| Base Salary | USD | CHF |
|------------------------------------|-----------|-----------|
| David J. Endicott, CEO | 1,425,718 | 1,184,500 |
| Other members of the ECA (average) | 878,737 | 730,063 |

The amounts were converted at the rate of 1 CHF : 1.203645 USD.

Short-Term Incentive

The short-term incentive compensation element is designed to reward the ECA members for their contribution towards achieving annual Company results and for their individual annual performance. The metrics used for the BPF are the same for all ECA members. The IPF varies by individual. Based on this design, each member of the ECA participates in the overall Company's success while also being rewarded for their individual contributions. The annual STI award value at target is based on a percentage of the ECA member's annual base salary.

Exhibit 8

| STI payout opportunity as a % of annual base salary | at target | at maximum |
|-----------------------------------------------------|-----------|------------|
| David J. Endicott, CEO | 120% | 240% |
| Other members of the ECA (average) | 87% | 174% |

The financial metrics for the short-term performance in 2025 are set out in the Exhibit below. The payout of STI is calculated by multiplying the target award by the Business Performance Factor and Individual Performance Factor.

Exhibit 9

| | Metric | Weighting | Definition | Rationale |
|--------------------------------|------------------------|------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| Financial Metrics ¹ | Net Sales |  | Measures the Company's Net Sales performance | Fosters the Company's top line performance |
| | Core Operating Income |  | Measures the Company's profitability | Recognizes the primary indicator of profitability |
| | Free Cash Flow |  | Measures the Company's capacity to realize cash | Recognizes cash generated from operating activities, net of investments in capital expenditures |
| Non-Financial Metric | Individual Performance | Multiplier 0% to 150% | Measures the achievement of individual objectives (including Social Impact and Sustainability objectives) and individual values and behaviors Our design limits the IPF Impact at 33% on overall STI payout at or above target | Considers individual contribution to the Company's results |

¹ Financial achievements are measured in constant exchange rates to reflect operational performance and exclude the impact of acquisitions, divestitures and certain non-recurring items in accordance with the short-term incentive plan.

How STI Payout is Determined

Exhibit 10

¹ Annual Base Salary earned during the financial year.

Each ECA member has individual performance goals with each having specific measurable objectives and initiatives. In 2025, the Board and Committee continued to incorporate the achievement of Social Impact and Sustainability objectives in determining the IPF for ECA members and overall STI payout. The five focus areas are as outlined below:

Performance levels, thresholds, targets and maximum values for the financial performance metrics and individual performance goals, including Social Impact & Sustainability goals, are determined at the beginning of each one-year performance period and measured at the end of the performance period. In line with good governance practice, the Board and the Committee set targets that are appropriately ambitious and aligned with the Company's business strategy and the Board's strategic plan without encouraging the ECA member to take undue risks.

At the end of the year, the Board and the Committee assess each ECA member's achievement of performance objectives to determine their individual performance and IPF. The IPF is determined by the achievement of individual objectives and the demonstration of values and behaviors. The individual performance rating is the basis for determining the IPF (between 0% and 150%). Our design limits the IPF Impact at 33% on overall STI payout at or above target. The CEO and other ECA members are not present when their respective IPF is discussed and determined.

Long-Term Incentive

The long-term incentive plan ties a significant portion of ECA members' compensation to long-term Company performance, aligning their interests with shareholders. LTI awards consist of 100% PSUs that convert to shares upon vesting, contingent on performance over a three-year period. The annual LTI target value is a percentage of each ECA member's base salary.

Our LTI is granted 100% in Performance Stock Units.

Exhibit 11

| LTI Payout Opportunity as a % of annual base salary | At Target | At Maximum ¹ |
|-----------------------------------------------------|-----------|-------------------------|
| David J. Endicott, CEO | 575% | 1,150% |
| Other members of the ECA (average) | 213% | 426% |

¹ The maximum number of units that may be earned is limited to 200% of the target number of units granted.

ECA average LTI target % shows an increase due to changes to the composition and roles of certain members of the ECA in late 2024. Among other changes, Ms. Martin was appointed as a new ECA member after Ms. Lin stepped down as an ECA member in early 2025. Mr. Bell assumed a new role in the Company as the Chief Operating Officer (continuing on the ECA).

The metrics for the measurement of long-term performance are set out in Exhibit 12. The payout is calculated by adding the weighted achievements of the individual targets in a range from 0-200% and multiplying the number of PSUs granted by the resulting performance factor.

Exhibit 12

| Metric | Weighting | Definition | Rationale |
|------------------------------------|---------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Net Sales CAGR ^{1,2} |  25% | Measures the Company's Net Sales performance over a three-year period | Drives the Company's sales growth performance |
| Core Diluted EPS CAGR ² |  25% | Measures the earnings per share over a three-year period | Aligns ECA compensation with shareholder value creation by measuring growth in earnings per share |
| Share of Peers |  25% | Measures the Company's market share of key Surgical and Vision Care product categories relative to competitors using third party syndicated data. Calculated as the change in share across a three-year period | Indicates how well we compete with our peers in terms of market share, and ties achievement to long-term value creation |
| Innovation |  25% | Measures the key product pipeline and achievement of milestones across a three-year period. There are 10 milestones per cycle, typically five in each of the Surgical and Vision Care segments as approved by the Innovation Committee. Measures include: <ul style="list-style-type: none"> • Timeline: On-time completion of key product development activities • Program Cost: Budget adherence • Product Cost: Ability to meet unit cost targets; and • Target Product Profile: Achievement of intended product benefits, measured by first-year revenue | Accounts for future products and key future growth drivers as a leading indicator of success |

¹ CAGR means Compound Annual Growth Rate.

² Financial achievements are measured in constant exchange rates to reflect operational performance. Impact of acquisitions, divestitures and certain non-recurring items are excluded from financial achievement in accordance with the long-term incentive plan.

How the number of PSUs Vesting is Determined

Exhibit 13

Similar to the STI award, the thresholds, targets and maximum values for the LTI performance metrics are determined at the onset of the three-year performance period. In line with good governance practice, the Board and the Committee set targets that are appropriately ambitious, aligned with the strategic plan and avoid creating incentives to take undue risk.

At the end of the three-year performance period of each LTI award, the Board and the Committee determine the performance achievements of each metric against the targets originally set. The Company intends to disclose in the applicable compensation report details of the final LTI payout.

Benefits

Alcon is a global company headquartered in Switzerland with multinational operations; the US serves as the largest pool for both medical device and ophthalmology talent. Of the seven ECA members, five are on Swiss employment contracts and two have employment contracts governed by the US law. Five of our ECA members have been relocated to Switzerland from their home base and are supported with relocation benefits in line with our global mobility policy as highlighted below. Generally, for associates on international assignments:

- Approximately 80% of the benefit costs are related to maintaining the cost-of-living position neutral to their home base
- Of the benefit costs, 75% - 80% of these costs are attributable to tax neutralization

All ECA members are enrolled in benefit plans providing for retirement income savings and insurance for disability and loss of life. These plans are in line with local market practices and legislation and are subject to the Company's plan rules and policies. The ECA members and the Company make statutory contributions.

Exhibit 14

| | |
|-------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Retirement savings and insurance contributions | <p>Retirement and insurance benefits plan contributions provided in line with local market practice (most governed by legal provisions) - Company-paid:</p> <ul style="list-style-type: none"> • Contributions to retirement savings • Insurance premiums for disability and survivor benefits • Health insurance (only in the US) • Contributions to mandatory social security systems |
| Other benefits | <ul style="list-style-type: none"> • Tax equalization* • Housing, schooling/education fees • Cost of living adjustments • International health insurance • Moving and Relocation allowance • Car allowance and other transportation expenses • Expense and representation allowance in line with Swiss market practice (covering small expenses) |

*The extent of tax equalization payments varies each year due to the timing of notification from tax authorities and other factors.

CEO Target Compensation

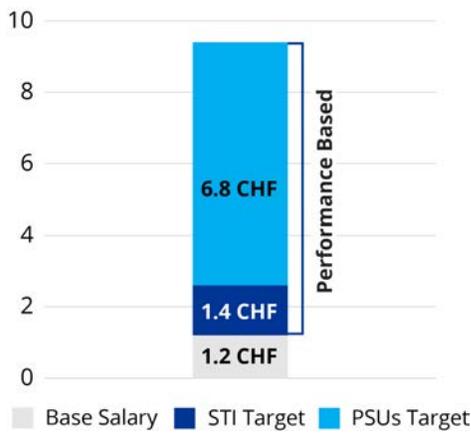

The Board is responsible for attracting and retaining strong leadership talent, with management motivation and retention seen as critical to Alcon's long-term success. Alcon's CEO, Mr. Endicott, has consistently met priorities set by the Board and delivered sustained performance since our spin-off in 2019.

Mr. Endicott's target compensation consists of base salary, STI and PSUs. The Committee recommended, and the Board approved, that Mr. Endicott would receive no increase to any component of his target compensation for 2025.

Looking ahead, the Committee will continue to review CEO target compensation positioning in 2026 in the context of Alcon's performance, a steadily increasing peer group median, evolving talent market and the Company's compensation philosophy.

Exhibit 15

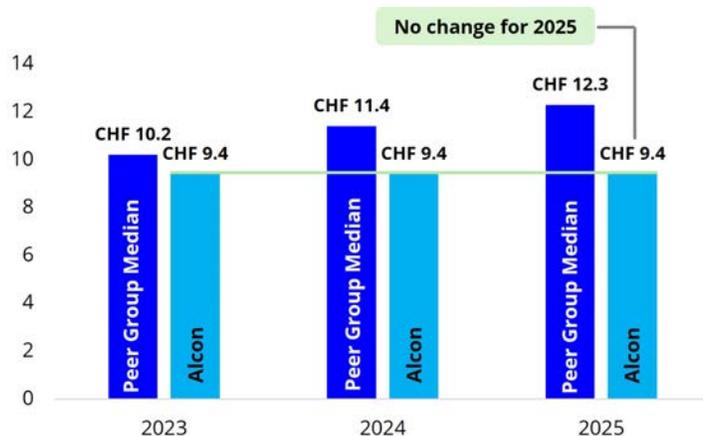

CEO Target Compensation (CHF millions)

All of Mr. Endicott's target compensation other than base salary is tied to the achievement of pre-established and rigorous performance goals that are central to the creation of long-term value for shareholders. No adjustments were made to Mr. Endicott's 2025 target compensation.

The chart below illustrates the positioning of CEO target compensation relative to the peer group median over time. Mr. Endicott's target compensation has remained unchanged for three years despite steady increases to the peer group median.

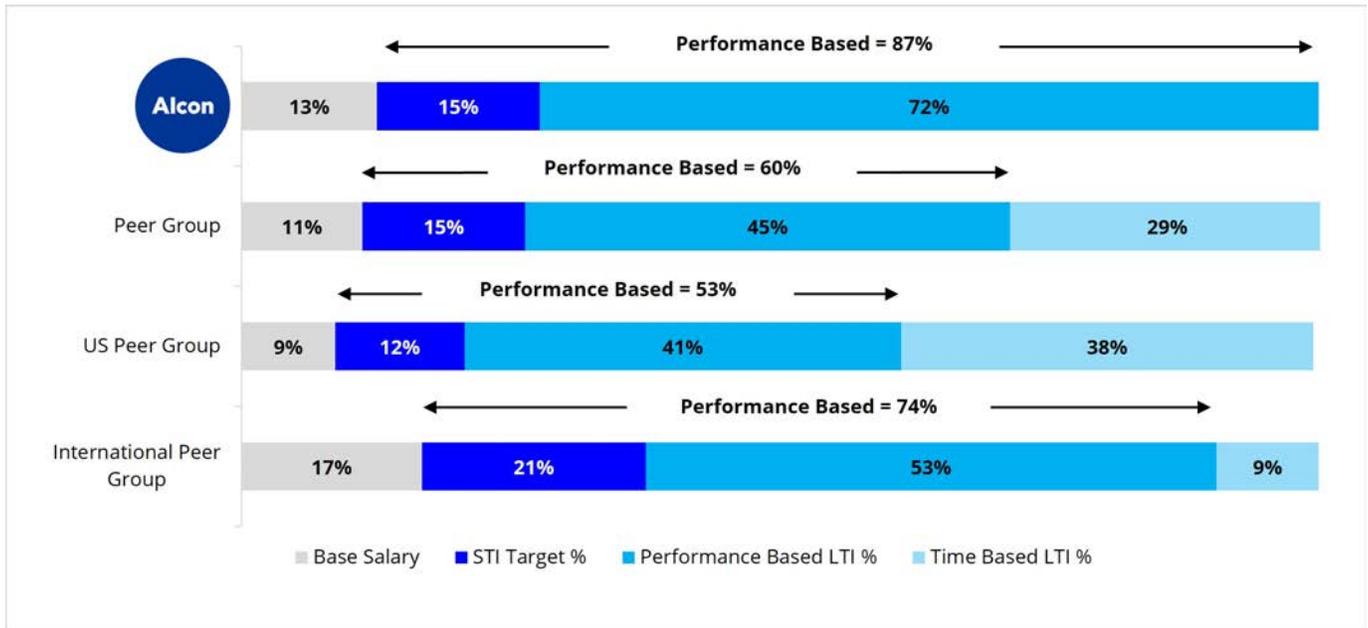

Exhibit 16

- The figure for Peer Group Median reflects the year in which the annual report/proxy statement is filed.
- Data reported in CHF millions.
- Target compensation = annual base salary + short-term incentive target + long-term incentive target.

When compared to the peer group, Mr. Endicott’s performance-based compensation as proportion to target compensation (87%) is notably higher than the average of the peer companies.

Exhibit 17

Note: Time-based LTI includes restricted stock and stock options.

Additional details of each component of Mr. Endicott’s 2025 compensation appear throughout this compensation report.

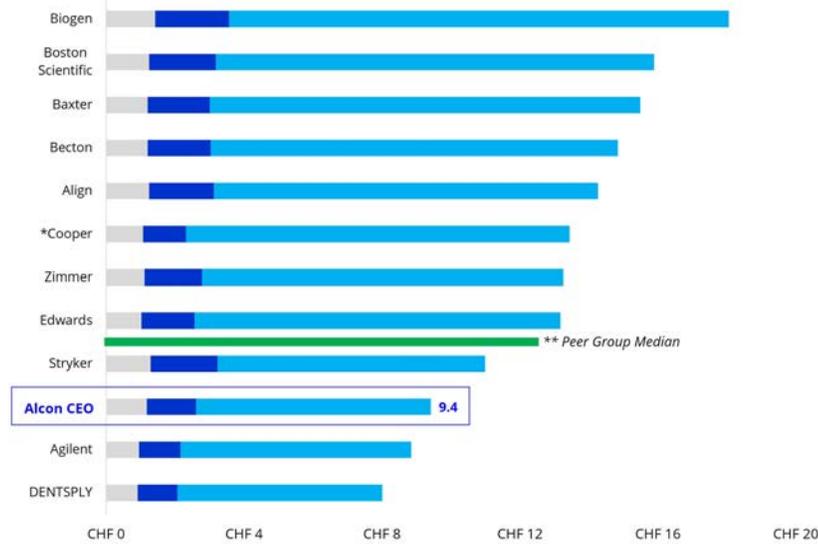

- ✓ Reflects a thoughtful and balanced approach towards setting CEO target compensation
- ✓ Alcon CEO’s target compensation is positioned at 41st percentile of the peer group

While Alcon's market capitalization (56th percentile) and revenue (62nd percentile) are above the median of the peer group, Mr. Endicott's target compensation is below the median. Alcon sets the CEO's target compensation with reference to the US and International peers to address the business need to attract and retain best-in-class medical device and ophthalmology talent, primarily found in the US.

Exhibit 18

CEO Target Compensation against US Peers

(CHF millions)

✓ CEO target compensation continues to be at the low end of US peers and high end of International Peers

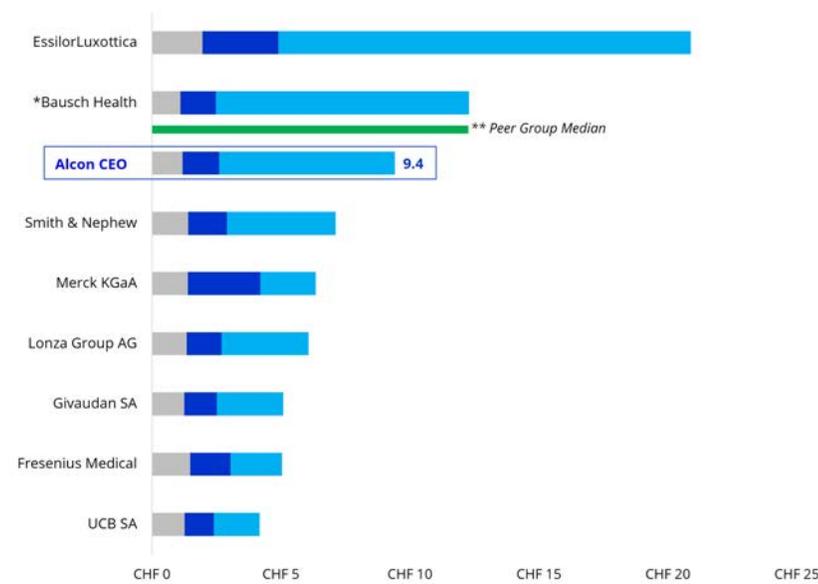

✓ Direct competitor (noted with*) CEO target compensation higher than Alcon CEO despite smaller market cap and revenue

Compensation Payments to the ECA Members

ECA Compensation Payments 2025

The following Exhibit 19 sets forth the total compensation received by the CEO (who is the highest paid member of the ECA) and the aggregate total compensation received by all of the other ECA members for the period from January 1, 2025 to December 31, 2025.

In 2025 total compensation for the ECA members decreased by 12% (in CHF) primarily due to STI payout below target BPF and currency exchange rate fluctuations. The decrease excludes the impact of tax equalization and other taxation-related payments for prior tax years. This impact varies each year due to the timing of notification from tax authorities and other factors.

The compensation Alcon paid to the ECA members in 2025 remained within the approved Say-On-Pay budget.

Exhibit 19

| Compensation Gross Amounts | Fixed Compensation | | Variable Compensation | | Additional Compensation | Totals in USD | Totals in CHF |
|----------------------------------------------|---------------------------------------|------------------------------------------|----------------------------------------------|--------------------------------------------------|--------------------------------|------------------------------------|------------------------------------|
| | Annual Base Salary ¹ | Pension and Insurance ² | 2025 Short-term Incentive ³ | 2025-2027 Long-term Incentive ⁴ | Other Benefits ⁵ | Total Compensation ⁶ | Total Compensation ⁶ |
| From January 1, 2025 to December 31, 2025 | | | | | | | |
| David J. Endicott, CEO | 1,425,718 | 203,187 | 1,231,820 | 7,536,968 | 1,205,051 | 11,602,744 | 9,639,673 |
| Aggregate amount of 6 other ECA members | 5,247,357 | 938,601 | 3,527,896 | 10,412,963 | 7,900,436 | 28,027,253 | 23,285,315 |
| Totals in USD ⁶ | 6,673,075 | 1,141,788 | 4,759,716 | 17,949,931 | 9,105,487 | 39,629,997 | |
| <i>Totals in CHF⁶</i> | <i>5,544,056</i> | <i>948,609</i> | <i>3,954,418</i> | <i>14,912,978</i> | <i>7,564,927</i> | | <i>32,924,988</i> |

¹ The total of Annual Base Salaries paid for the period from January 1, 2025 to December 31, 2025, including increases effective throughout the year, if applicable.

² The pension and insurance benefits are the actual contributions paid by Alcon to benefit plans for the period from January 1 to December 31, 2025. It also includes the amount of USD 50,773 for mandatory contributions paid by Alcon to governmental social security systems for all ECA members, which provide the ECA members with the right to the maximum future insured government pension benefit. The aforementioned amount is a portion of a total amount of contributions of USD 1,966,294 paid by Alcon to the social security systems.

³ The STI award disclosed is the amount earned for the performance year 2025. It will be paid in March 2026 in cash.

⁴ The amounts of the 2025-2027 LTI awards represent the total value of the target number of PSUs granted to the CEO and six active ECA members on February 18, 2025 using the applicable exchange rate as of the last business day of the prior year pursuant to standard company practice for all LTI recipients. The value of the PSUs is based on the closing price of the underlying Alcon share on the date of grant of USD 89.45. In accordance with Swiss market practice, the target value of the PSU at grant, reflects the assumption that the awards will vest at 100% achievement, excluding any share price movement that may occur over the performance period. The future payout will be determined only after the conclusion of the performance period in three years (i.e. at the end of 2027) and the awards will vest in February 2028. The payout range is between 0% and 200% of the target number of PSUs.

⁵ The amounts of other benefits include the contractual Company-paid benefits, values of benefits in kind, payments made and payments or values to ECA members for the relevant period in 2025, including car allowance, other transportation expenses and global mobility benefits for international assignment (e.g., housing, schooling, tax equalization, cost of living adjustment and other international relocation benefits).

⁶ Payments to the CEO are made in CHF and ECA members received payments in CHF and/or USD. The amounts were converted for the purpose of this presentation at the rate of 1 CHF : 1.203645 USD.

ECA Compensation Payments 2024

The following Exhibit 20 sets forth the total compensation received by the CEO (highest paid member of the ECA) and the aggregate total compensation received by all of the other ECA members for the period from January 1, 2024 to December 31, 2024. In 2024, Ms. Martin was appointed as a new ECA member after Ms. Lin stepped down as an ECA member ahead of her retirement in March 2025. No special payments or equity awards were made to Ms. Martin upon the start of her new role. Mr. Bell assumed a new role in the Company (continuing on the ECA). All changes were effective September 1, 2024.

The compensation Alcon paid to the ECA members in 2024 remained within the approved Say-On-Pay budget.

¹ The total of Annual Base Salaries paid for the period from January 1, 2024 to December 31, 2024, including increases effective throughout the year, if applicable. Ms. Lin and Ms. Martin's base salaries are included for their respective time periods as an ECA member.

² The pension and insurance benefits are the actual contributions paid by Alcon to benefit plans for the period from January 1 to December 31, 2024. It also includes the amount of USD 52,761 for mandatory contributions paid by Alcon to governmental social security systems for all ECA members, which provide the ECA members with the right to the maximum future insured government pension benefit. The aforementioned amount is a portion of a total amount of contributions of USD 1,945,626 paid by Alcon to the social security systems.

³ The STI award disclosed is the amount earned for the performance year 2024. It was paid in March 2025 in cash. Ms. Lin and Ms. Martin's STI awards are included for their respective time periods as an ECA member.

⁴ The amounts of the 2024-2026 LTI awards represent the total value of the target number of PSUs granted to the CEO and six active ECA members on February 21, 2024 using the applicable exchange rate as of the last business day of the prior year pursuant to standard company practice for all LTI recipients. The value of the PSUs is based on the closing price of the underlying Alcon share on the date of grant of USD 79.78. In accordance with Swiss market practice, the target value of the PSU at grant, reflects the assumption that the awards will vest at 100% achievement, excluding any share price movement that may occur over the performance period. The future payout will be determined only after the conclusion of the performance period in three years (i.e. at the end of 2026) and the awards will vest in February 2027. The payout range is between 0% and 200% of the target number of PSUs. Ms. Lin stepped down as an ECA member on August 31, 2024.

⁵ The amounts of other benefits include the contractual Company-paid benefits, values of benefits in kind, payments made and payments or values to ECA members for the relevant period in 2024, including car allowance, other transportation expenses and global mobility benefits for international assignment (e.g., housing, schooling, tax equalization, cost of living adjustment and other international relocation benefits). Ms. Lin and Ms. Martin's other benefits are included for their respective time periods as an ECA member.

⁶ Payments to ECA members were made in CHF and/or USD. The amounts were converted for the purpose of this presentation at the rate of 1.0 CHF : 1.135731 USD.

Outcome of Performance Awards 2025

2025 Short-Term Incentive

NET SALES

Alcon's sales were below target. In Surgical, Implantables and Consumables results reflect soft market conditions and competitive pressures, partially offset by the launch of *PanOptix Pro*. In Equipment, declines in legacy products in the first half of the year were partially offset by sales of the recently launched *Unity VCS*.

In Vision Care, Contact Lens results were driven by price increases and product innovation, including our toric and multifocal modalities, partially offset by declines in legacy products. Ocular Health was led by our portfolio of dry eye products, including *Systane* and *TRYPTYR*.

CORE OPERATING INCOME

Core operating income was below target as softer-than anticipated market conditions and competitive pressures in Implantables tempered top-line momentum. Additionally, SG&A expense was higher year-over-year as we invested behind new product launches.

FREE CASH FLOW

Free Cash Flow for 2025 exceeded the target as stronger-than-anticipated cash generation from operating activities provided a meaningful uplift.

Exhibit 21 shows the weighting, target and payout level for the 2025 STI.

Exhibit 21

| Performance Metric | Weighting | 2025 Target ¹ (\$ millions) | 2025 Actual Achievement ^{1, 2} (\$ millions) | Payout Level | Weighted Payout ³ |
|------------------------------------|-------------|-------------------------------------------|-------------------------------------------------------------|--------------|---------------------------------|
| Net Sales | 40% | 10,309 | 10,053 | 75% | 30% |
| Core Operating Income ⁴ | 40% | 2,213 | 2,031 | 59% | 23% |
| Free Cash Flow ⁴ | 20% | 1,715 | 1,835 | 135% | 27% |
| BPF | 100% | | | | 80% |

¹ Expressed at the exchange rates prevalent at the time of Board approval to reflect operational performance.

² Excludes the impact of acquisitions, divestitures and certain non-recurring items as applicable in accordance with the short-term incentive plan.

³ Rounded to the nearest whole %.

⁴ Core Operating Income and Free Cash Flow are non-IFRS measures. Refer to "Item 6.B. Compensation - Non-IFRS measures as defined by the Company" section for additional information.

Each ECA member has individual performance goals with each having specific measurable objectives and initiatives. In 2025, the Board and Committee continued to incorporate the achievement of Social Impact and Sustainability goals in determining the IPF for ECA members and their overall STI payout. The five focus areas, for which all ECA members share accountability, as outlined in Exhibit 22.

At the end of the year, the Committee assesses each ECA member's achievement of performance objectives to determine their individual performance and IPF which directly impacts the final STI payout amount. An average Individual Performance Factor of 98% was determined for the ECA members excluding the CEO, resulting in an average STI payout of 78% of target.

For 2025, the CEO's individual performance goals assessment according to the five focus areas is outlined below. Individual performance goals, including Social Impact & Sustainability goals, are set at the beginning of the year and assessed by the Board at the end of the performance year.

Exhibit 22

| Focus Areas | Achievements |
|-----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  Win With Customers | <ul style="list-style-type: none"> Successfully launched 10 new products including <i>PanOptix Pro</i>, <i>TRYPTYR</i>, <i>Precision7</i>, <i>Systane Pro</i>, <i>Unity VCS/CS</i> and acquired assets <i>Voyager</i>, <i>Vyznova®</i> and <i>Valeda</i> Delivered solid financial results despite market headwinds (e.g., tariffs) although results fell below target expectations: Alcon grew +5%. Excluding favorable currency impacts of 1%, Alcon grew at +4% on a constant currency basis¹ Surgical grew +4% on a reported and constant currency basis¹ and Vision Care grew +6%, or +5% on a constant currency basis¹ |
|  Deliver Innovation | <ul style="list-style-type: none"> Advanced key R&D programs: <i>Unity Dx</i>, <i>TruPlus</i> and <i>Vivity 2.0</i> which completed milestones ahead of plan Overachieved our business development and licensing deal flow targets, resulting in high-impact deals in surgical, vision care and next-generation equipment, including the following acquisitions: Lumithera, Inc, Aurion Biotech, Inc and Cylite Pty Ltd. |
|  Inspire Our People | <ul style="list-style-type: none"> Advanced all our culture and talent goals, achieved top quartile engagement scores and above global benchmark top quartile retention levels Significant advancements in upskilling and adoption of digital, data and AI; delivered technical training, applied skill building, and digital & data learning resources at scale Achieved our 2025 social responsibility five-year commitments and remain on track to achieve commitments for 2030: <ul style="list-style-type: none"> Overachieved our low-middle-income-country program goal: Helped improve vision for over 1.6m patients; completed the delivery of the 2025 five-year commitment Overachieved our Children's Vision Program goal: Screened and provided spectacles for over 32K children; completed the delivery of the 2025 five-year commitment Achieved our GHG emissions reduction toward 112 t/terajoules²; on track for 2030 Overachieved estimated landfill diversion rate, achieving greater than 99% for non-hazardous waste²; on track for 2030 |
|  Drive Efficiency | <ul style="list-style-type: none"> Completed milestones for end to end process efficiency program, exceeding targets for electronic order processing, touchless orders, improved credit collection and dispute process cycle time Successfully transformed top 16 Create-to-Make business processes to accelerate development cycle times against benchmarks Implemented QMS capability enhancements at targeted manufacturing and design centers as planned, strengthening quality system consistency and execution Completed Claims Excellence milestones, enhancing the quality, efficiency and speed of our go-to-market claims process |
|  Execute Our Growth Plan With Integrity | <ul style="list-style-type: none"> Reinvested in the core business for long-term value (e.g., sales and marketing investments behind new product launches, R&D, acquisitions while offsetting external pressures) Grew core operating income^{1,3,4} to \$2.0 billion and core diluted EPS^{1,3,4} to \$2.95, while delivering \$1.8b of free cash flow^{1,3,4} Completed a \$750 million share repurchase program, paid an approximate 10% dividend, and grew free cash flow by 12%. In 2025, Alcon equity traded in-line with both its global and direct peers (ex J&J), though below the MedTech index |

¹ Constant currency, free cash flow and core results such as core operating income and core diluted EPS are non-IFRS measures. Refer to "Item 6.B. Compensation - Non-IFRS measures as defined by the Company" section for additional information.

² As of Nov 2025, December 2025 results not yet available. GHG emission as of Nov 2025 108 t/terajoules

³ Adjusted to exclude M&A (Aurion, LumiThera)

⁴ Expressed at the exchange rates prevalent at the time of Board approval to reflect operational performance

CEO Assessment and Payout

Although our CEO delivered strong performance in non-financial focus areas, the Board and Committee considered this in light of the below target financial performance in 2025 and have assessed Mr. Endicott's IPF at 90%, resulting in an overall STI payout of 72% of target.

2023-2025 Long-Term Incentive

The 2023-2025 LTI awards for the CEO and other ECA members vest in 2026. The Alcon LTI program for the ECA consists of 100% PSUs. PSUs vest based on achievements against four metrics: Net sales CAGR, Core diluted EPS CAGR, Share of Peers and Innovation, weighted equally. Alcon undertakes a rigorous goal setting process to establish ambitious goals while balancing against incentivizing excessive risk taking and the approach is explained above under section "Goal Setting Approach". We have summarized the performance of our PSU metrics including robust disclosures for our non-financial metrics and actual achievements for the financial metrics.

NET SALES CAGR

Over the three-year performance period, Alcon's net sales exceeded target. In Surgical, Consumables benefited from steady cataract and vitreoretinal markets. In Implantables, we saw growth in ATIOLs in international markets. In Equipment/other, we saw an acceleration with sales of recently launched equipment, including *Unity VCS*. In Vision Care, Contact Lenses benefited from product innovation, including the *Precision1* and *Total30* families, as well as the continued strength of *Dailies Total1*, and price. In Ocular Health, we saw continued growth primarily driven by the portfolio of eye drops, including continued strength from the *Systane* family of artificial tears.

CORE DILUTED EPS CAGR

Over the three-year performance period, core diluted EPS grew at a compounded annual growth rate that exceeded the target. This was driven by strong sales and operating leverage, as sales growth outpaced expense growth. Our transformation program, which was completed in the fourth quarter of 2023, has enabled the optimization of our cost structure, delivering leverage while we continued to invest in research and development and sales and marketing. This performance was achieved despite macroeconomic headwinds, including inflationary pressures, geopolitical uncertainty and tariffs.

SHARE OF PEERS

In Vision Care, our growth in contact lenses has outpaced the market, mainly driven by our innovative portfolio, including the *Precision1*, *Precision7* and *Total30* families, specifically our specialty lenses. However, we fell short of our share-expansion target in Contact Lens primarily due to competitive pressure in the Dailies category, as well as growth of private label, particularly in the international market. In Ocular Health, our *Systane* MDPF artificial tears has outpaced preservative-free category growth, but due to competitive launches and overall pricing pressure we didn't hit our share gain targets.

In Surgical, Alcon gained share in the phaco and vitreoretinal cassette packs, as measured by our sales of phacoemulsification fluidics management systems, driven by our recent launches of *Unity VCS* equipment. In ATIOLs, where Alcon already has leading share positions in most markets, Alcon trailed market growth, but stabilized US trifocal market share with the recent launch of *PanOptix Pro*.

| Segments | # of Product Categories | Weighting | Share Data Source |
|-------------|-------------------------|-----------|---------------------------------------|
| Vision Care | 2 | 45% | Gfk-Value/IRI, Amazon, Nielsen, IQVIA |
| Surgical | 4 | 55% | MarketScope |

INNOVATION

We have continued to execute on our research and development strategy to meet innovation milestones. During this 2023-2025 PSU cycle, we focused on the timeline and total product cost categories, primarily due to innovation-stage of our development programs. Innovation program achievements during this period included advancing key Surgical equipment pipeline projects, progressing key Vision Care programs, including first commercial launch of Precision7 Sphere. Key innovation milestones in the Surgical and Vision Care segments are outlined below:

Exhibit 23

| Milestone Categories | Key Highlights |
|-----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Timeline Measure the on-time completion of key product development activities | Exceeded expectations by achievement of timeline targets for multiple Surgical and Vision Care development programs |
| Total Product Cost Measures the ability to meet unit cost targets | Delivered total product cost targets for <i>Precision1</i> Sphere and achieved the overall equipment effectiveness target on pre-defined manufacturing line |

Exhibit 24

| Performance Metric | Weighting | Target | Actual Achievement | Payout Level | Weighted Payout % ¹ |
|---------------------------------------|-----------|-------------------------------------|-------------------------------------|--------------|--------------------------------|
| Net Sales CAGR ² | 25% | 6.4% | 8.0% | 164% | 41% |
| Core diluted EPS CAGR ^{2, 3} | 25% | 14.1% | 21.1% | 200% | 50% |
| Share of Peers | 25% | Restricted Data ⁴ | Restricted Data ⁴ | 35% | 9% |
| Innovation | 25% | Commercially Sensitive ⁵ | Commercially Sensitive ⁵ | 150% | 38% |
| PSU payout (0-200%) | | | | | 137% |

¹ Rounded to the nearest whole %.

² Measured at constant exchange rates to reflect operational performance. Excludes the impact of acquisitions, divestitures and certain non-recurring items as applicable in accordance with the long-term incentive plan. Constant currency is a non-IFRS measure.

³ Core diluted EPS is a non-IFRS measure.

⁴ Data is provided by third-party which restricts disclosure.

⁵ Target and Actual Achievement not disclosed due to competitive nature of the metric.

Based on our results, the performance factor for the 2023-2025 PSU award was 137%.

Equity Instruments Granted to the ECA Members

Equity Instruments Granted in 2025

The PSU Awards for the performance period 2025-2027 were granted on February 18, 2025 to the CEO and the six other members of the ECA. The number of PSUs are set out in Exhibit 25 below. The values of the awards are based on the closing price of the underlying Alcon share on the date of grant and disclosed in section "ECA Compensation Payments 2025", Exhibit 19.

Exhibit 25

| Number of Units Granted to | 2025 PSUs Based on the 2025-2027 LTI Target Award¹ |
|-----------------------------------|------------------------------------------------------------------------------|
| David J. Endicott, CEO | 84,259 |
| Other ECA members | 116,411 |
| Total | 200,670 |

¹ The values of the awards in PSUs are disclosed under "ECA Compensation Payments 2025" (Exhibit 19).

Equity Instruments Granted in 2024

The PSU Awards for the performance period 2024-2026 were granted on February 21, 2024 to the CEO and the six other members of the ECA. The number of PSUs are set out in Exhibit 26 below. The values of the awards are based on the closing price of the underlying Alcon share on the date of grant and disclosed in section "ECA Compensation Payments 2024", Exhibit 20.

Exhibit 26

| Number of Units Granted to | 2024 PSUs Based on the 2024-2026 LTI Target Award¹ |
|-----------------------------------|------------------------------------------------------------------------------|
| David J. Endicott, CEO | 101,469 |
| Other ECA members | 120,946 |
| Total | 222,415 |

¹ The values of the awards in PSUs are disclosed under "ECA Compensation Payments 2024" (Exhibit 20).

Share Ownership of the ECA Members

The number of Alcon shares or share-based units held by ECA members and “persons closely linked” (as defined below) to them as of each of December 31, 2025 and December 31, 2024 is set out in the Exhibit below. As of each of these dates, no ECA members, either individually or together with “persons closely linked”, owned 1% or more of the outstanding shares of Alcon.

Exhibit 27

| Number of Units | December 31 | Vested Shares | Unvested Target PSUs | Total |
|------------------------------------|-------------|----------------|----------------------|------------------|
| David J. Endicott | 2025 | 269,775 | 287,898 | 557,673 |
| | 2024 | 207,111 | 275,279 | 482,390 |
| Laurent Attias | 2025 | 21,913 | 37,024 | 58,937 |
| | 2024 | 22,619 | 35,978 | 58,597 |
| Ian Bell | 2025 | 47,490 | 62,339 | 109,829 |
| | 2024 | 30,232 | 59,449 | 89,681 |
| Leon Sergio Duplan Fraustro | 2025 | 25,133 | 50,870 | 76,003 |
| | 2024 | 22,473 | 49,349 | 71,822 |
| Kim Martin | 2025 | 35,725 | 58,062 | 93,787 |
| | 2024 | 12,030 | 66,715 | 78,745 |
| Rajkumar Narayanan | 2025 | 48,829 | 51,694 | 100,523 |
| | 2024 | 37,827 | 48,254 | 86,081 |
| Timothy C. Stonesifer | 2025 | 140,546 | 101,296 | 241,842 |
| | 2024 | 134,234 | 98,245 | 232,479 |
| Total | 2025 | 589,411 | 649,183 | 1,238,594 |
| | 2024 | 466,526 | 633,269 | 1,099,795 |

Additional Disclosures

Employment Agreements

The Company and the members of the ECA entered into employment agreements for an indefinite period of time. Five of seven ECA members’ employment agreements are governed by Swiss law. Two ECA member’s employment agreements are governed by US law.

All employment contracts with ECA members provide for advanced notice of termination of employment, none of which exceed a 12-month period in accordance with our Articles of Incorporation. None of the employment agreements with the ECA members provide for any severance payment. For a description of Alcon’s change of control mechanisms, please see “Item 6. Directors, Senior Management and Employees—6.C. Board Practice—Corporate Governance—“Changes of Control and Defense Measures.”

Such employment agreements also prohibit the ECA member from competing against Alcon for a period up to 12 months after termination in accordance with our Articles of Incorporation.

Payments to Former Members of the ECA

Effective September 1, 2024, Ms. Lin stepped down as an ECA member ahead of her retirement in March 2025. Thereafter, she received contractually agreed remuneration comprising of outstanding base salary, pensions costs, other global mobility benefits and tax equalization payments of CHF 360,708 during the period of 2025 when she was no longer an ECA member. No payments (or waivers of claims) other than those set out in Exhibit 19 (including the related notes) under section "ECA Compensation Payments 2025" were made to current members of the ECA or to "persons closely linked" to them.

Loans to Members of the ECA

Alcon's Articles of Incorporation and corporate policies do not permit loans to current or former members of the ECA or to "persons closely linked" to them. As a result, no loans were granted in 2025, and none were outstanding as of December 31, 2025.

Persons Closely Linked

Persons closely linked to members of the ECA are (i) their spouse, (ii) their children below age 18, (iii) any legal entities that they own or otherwise control, (iv) any legal or natural person who is acting as their fiduciary or agent and (v) family trusts.

Compensation Expense 2025

The total expense for the year 2025 for compensation awarded to ECA members, using International Financial Reporting Standards (IFRS) measurement rules, is presented in Note 24 to the Company's audited Consolidated Financial Statements. The numbers for compensation expense in Note 24 may differ from the numbers reported in this 2025 Compensation Report due to the accounting and disclosure standards applied.

Alcon Share-Based Units Awarded to Alcon Associates in 2025

In the financial year 2025, the total of approximately 2.6 million restricted shares, RSUs and target PSUs (all unvested) were granted, and approximately 1.8 million Alcon shares vested and were delivered to Alcon associates under the various equity-based incentive or participation plans. Current unvested equity instruments (restricted shares, RSUs and target PSUs) represent approximately 1% of issued shares. Alcon delivers treasury shares to associates to fulfill these obligations.

ECA Mandates Outside of Alcon

Pursuant to Swiss law, the Compensation Report must specify the functions of the ECA members in other for-profit undertakings. According to article 34 of Alcon's Articles of Incorporation, there are limitations as to the number of mandates outside of Alcon that each of our ECA members may have. As of December 31, 2025, the following external mandates in for-profit undertakings are subject to these limitations. Listed companies are denoted with an asterisk (*).

Board of Directors Compensation 2025

Compensation Framework – Components of Board Pay

The Board compensation was set at a level that allowed for the attraction and appointment of high-caliber talent for Board roles with the relevant background and skills, including global experience in the medical devices and ophthalmology industries. The Board is comprised of both Swiss and international members. At the 2025 AGM, Dr. Raquel C. Bono did not stand for reelection to Alcon's Board, and Ms. Deborah Di Sanzo was elected as a new Board member effective September 1, 2025.

Non-executive Board members receive a base fee, with additional fees for roles such as Chair and/or member on the Board committees. The Vice Chair also receives an additional fee. The Board Chair does not receive additional fees for work in committees. David J. Endicott, the CEO of Alcon, does not receive any fees for his Board membership. Mr. Endicott is compensated as a member of the ECA, and his compensation is disclosed in section "ECA Compensation 2025." No increase was made to Board compensation in 2025.

The following table sets out the compensation for the non-executive members of the Board from the 2025 AGM to the 2026 AGM:

Exhibit 29

| Board Function | USD ¹ | CHF |
|---------------------------------------------------|------------------|-----------|
| Annual base fee: | | |
| Board Chair | 1,384,192 | 1,150,000 |
| Board member base fee (Board retainer fee) | 246,747 | 205,000 |
| Additional fees: | | |
| Vice Chair | 48,146 | 40,000 |
| Chair of the Audit and Risk Committee | 84,255 | 70,000 |
| Chair of the Compensation Committee | 72,219 | 60,000 |
| Chair of the Governance and Nomination Committee | 72,219 | 60,000 |
| Chair of the Innovation Committee | 72,219 | 60,000 |
| Member of the Audit and Risk Committee | 42,128 | 35,000 |
| Member of the Compensation Committee | 36,109 | 30,000 |
| Member of the Governance and Nomination Committee | 36,109 | 30,000 |
| Member of the Innovation Committee | 36,109 | 30,000 |

¹ The Board fees are converted at the rate of 1.0 CHF : 1.203645 USD.

In 2025, the following framework applied to the compensation of non-executive Board members:

- Fifty percent of the total fees is paid in shares on a mandatory basis in two installments: September 2025 and March 2026;
- Fifty percent of the total fees is paid in cash in four installments: June, September and December 2025 and March 2026;
- Each Board member may elect to receive up to one hundred percent of their fees in shares;
- The fees are paid in Swiss Francs;
- The shares delivered are unrestricted (free shares) listed on the SIX Swiss Exchange;
- The members of the Board are subject to share ownership requirements (as noted in Exhibit 30);
- Board members bear the full cost of their own social security contributions; and

- Board members do not receive variable compensation, in line with their focus on corporate strategy, supervision and governance. Their payment in shares is in unrestricted shares. They do not receive share options or other share-based instruments.

The general principles of compensation of the members of the Board are defined in our Articles of Incorporation. According to our Articles of Incorporation, Alcon may enter into agreements with members of the Board relating to their compensation for a fixed term of up to one year.

Share Ownership Requirements for Members of the Board

Board members are committed to align their interests with those of shareholders. The Board has set forth share ownership requirements which apply to the non-executive members of the Board.

Each member of the Board, including the Board Chair, is required to own Alcon shares that represent the value of his or her annual base fee. This requirement must be met within four years in office.

Exhibit 30

Each member of the Board has met or is on track to meet the ownership requirement. Board members are prohibited from hedging or pledging their ownership positions in Alcon shares that are part of the share ownership requirement.

Compensation Governance

Authority for Board Compensation Decisions

Decisions regarding Board compensation are taken by the Board upon proposals from the Committee. The Committee's proposals are based on analysis and review of compensation practices, policies and benchmarking information provided by external compensation advisors.

The Board is responsible for approving the Compensation Report and for proposing the aggregate budget of Board compensation subject to a shareholders' vote at the applicable AGM.

Exhibit 31

*Board Chair does not participate in discussions/approvals regarding Board Chair compensation

The Corporate Governance Report in "Item 6.C. Board Practice" of this Annual Report provides further details to the authorities of the Committee.

Independence of Members of the Compensation Committee

Each of the members of the Committee meets the independence criteria set forth in our Board Regulations. Effective from the 2024 AGM, the Committee has been comprised of the following four members: Karen J. May (Chair), Thomas H. Glanzmann, Scott Maw and Ines Pöschel. At each AGM, the shareholders elect the members of the Committee individually for a term of office of one year. The Board then nominates the Committee Chair. Our Articles of Incorporation permit re-election to the Committee. Alcon's 2025 Corporate Governance Report contained in Item 6.C. of the Alcon 2025 Annual Report, provides details regarding the members of the Board and the independence criteria for Board members. The Board Chair, the CEO and the Secretary of the Board may attend the Compensation Committee meetings by invitation but are not present when decisions concerning their own interests are made.

The Compensation Committee's External Advisors

During 2025, the Committee retained Willis Towers Watson ("WTW") as its external compensation advisor. For the same period, the Committee also retained HCM International (Switzerland) ("HCM") for advice with regard to Swiss compensation matters. The Committee appointed each of them in 2019 following a thorough process of evaluating proposals from various consulting firms. During 2025, WTW provided additional services to Alcon including consulting services related to compensation, pension and benefit programs. During the same period, HCM did not provide additional services to Alcon.

The Committee conducted a review of the support received from the selected external advisors and is satisfied with the result of the work completed in 2025. At least annually, the Committee will evaluate the quality of the consulting services received and the need to use specific advisors.

Compensation of the Members of the Board of Directors

Board Compensation 2025

Exhibit 32 outlines the total compensation received by non-executive members of the Board during 2025.

The disclosed compensation represents:

- The fees paid to the members of the Board in March 2025, which was the last installment of the fees for their term of office up to the 2025 AGM; and
- The fees paid up to December 31, 2025 for their term of office from the 2025 AGM to the 2026 AGM.

The installment of the fees paid in March 2025 completed the delivery of all fees due for the term of office from 2024 AGM to the 2025 AGM. The total of fees paid for that term remained within the approved budget.

The fees paid between the 2025 AGM and December 31, 2025 to the members of the Board of Directors are only a part of the total fees they will receive for the service on the Board during the term of office from the 2025 AGM to the 2026 AGM (three of four installments). In accordance with our normal payout schedule, a further payment of fees in cash and shares will be made in March 2026. The board fee structure did not change from 2024 to 2025, variance in 2025 compensation is primarily due to the differences in cash and shares election from year to year.

The CEO of Alcon, David J. Endicott, is not included in this Exhibit 32 as he is not compensated for his Board membership. Mr. Endicott is compensated as a member of the ECA, and his compensation is disclosed in section "ECA Compensation 2025."

¹ Board Committees: "ARC" Audit and Risk Committee; "CC" Compensation Committee; "GNC" Governance and Nomination Committee; "IC" Innovation Committee. F. Michael Ball does not receive an additional fee as a member of the GNC.

² These amounts represent the values of tax and, if applicable, social security due upon the allocation of shares, which were delivered in cash to the accounts. They were then deducted and paid to the applicable authorities. Further, the amounts include the residual amount of cash resulting from rounding down the number of shares to the next whole share. Additionally, these amounts include (i) an amount of USD 23,149 for mandatory employer contributions paid by Alcon to governmental social security systems, which provides the relevant members of the Board with a right to the maximum future insured government pension benefit (this amount is a part of total mandatory employer contributions of USD 86,931 to the governmental social security systems), (ii) USD 22,515 paid to Dr. Cummings (or his related entities) for consulting services, including assistance with clinical trials that Dr. Cummings, as an ophthalmologist, provided to Alcon (these services were unrelated to Dr. Cummings' board service), and (iii) expenses related to Board member spouses not exceeding CHF 2,000 per director.

³ The amounts in USD represent the converted value in CHF based on the Alcon shares granted on February 28, 2025 at the closing price of CHF 83.40 per share on the date of grant and on September 1, 2025, at the closing price of CHF 64.02. The shares granted are listed on the SIX Swiss Exchange.

⁴ The total number of shares reported were delivered to each Board member in (i) the second installment of the fee in shares in March 2025 (2024 AGM - 2025 AGM), and (ii) the first installment of the fee in shares (term 2025 AGM - 2026 AGM). The second and final installment in shares for the services from the 2025 AGM to the 2026 AGM will be delivered in March 2026.

⁵ Payments made to Dr. Bono for the period between January 1, 2025 to May 5, 2025.

⁶ Payments made to Mrs. Di Sanzo for the period between September 1, 2025 to December 31, 2025.

⁷ The payments in cash were made in Swiss Francs (CHF). For consistency they are reported in USD as all compensation in this 2025 Compensation Report. The amounts in CHF were converted to USD at the exchange rate of 1.0 CHF : 1.203645 USD. All amounts are before deductions of social security contributions and income tax paid by the Board members.

Board Compensation 2024

The following Exhibit 33 sets out the total compensation received by non-executive members of the Board during 2024.

The disclosed compensation represents:

- The fees paid to the members of the Board in March 2024, which was the last installment of the fees for their term of office up to the 2024 AGM; and
- The fees paid up to December 31, 2024 for their term of office from the 2024 AGM to the 2025 AGM.

The installment of the fees paid in March 2024 completed the delivery of all fees due for the term of office from 2023 AGM to the 2024 AGM. The total of fees paid for that term remained within the approved budget.

The fees paid between the 2024 AGM and December 31, 2024 to the members of the Board of Directors were only a part of the total fees they received for the service on the Board during the term of office from the 2024 AGM to the 2025 AGM (three of four installments). In accordance with our normal payout schedule, a further payment of fees in cash and shares was made in March 2025.

The CEO of Alcon, David J. Endicott, is not included in this Exhibit 33 as he is not compensated for his Board membership. Mr. Endicott is compensated as a member of the ECA, and his compensation is disclosed in section "ECA Compensation 2024."

¹ Board Committees: "ARC" Audit and Risk Committee; "CC" Compensation Committee; "GNC" Governance and Nomination Committee; "IC" Innovation Committee. F. Michael Ball does not receive an additional fee as a member of the GNC.

² These amounts represent the values of tax and, if applicable, social security due upon the allocation of shares, which were delivered in cash to the accounts. They were then deducted and paid to the applicable authorities. Further, the amounts include the residual amount of cash resulting from rounding down the number of shares to the next whole share. Additionally, these amounts include (i) an amount of USD 21,236 for mandatory employer contributions paid by Alcon to governmental social security systems, which provides the relevant members of the Board with a right to the maximum future insured government pension benefit (this amount is a part of total mandatory employer contributions of USD 80,572 to the governmental social security systems), (ii) USD 26,115 paid to Dr. Cummings (or his related entities) for consulting services, including assistance with clinical trials that Dr. Cummings, as an ophthalmologist, provided to Alcon (these services were unrelated to Dr. Cummings' board service), and (iii) expenses related to Board member spouses not exceeding CHF 2,000 per director.

- ³ The amounts in USD represent the converted value in CHF based on the Alcon shares granted on March 1, 2024 at the closing price of CHF 76.12 per share on the date of grant and on August 30, 2024, at the closing price of CHF 82.30. The shares granted are listed on the SIX Swiss Exchange.
- ⁴ The total number of shares reported were delivered to each Board member in (i) the second installment of the fee in shares in March 2024 (2023 AGM - 2024 AGM), and (ii) the first installment of the fee in shares (term 2024 AGM - 2025 AGM). The second and final installment in shares for the services from the 2024 AGM to the 2025 AGM will be delivered in March 2025.
- ⁵ The payments in cash were made in Swiss Francs (CHF). For consistency they are reported in USD as all compensation in this 2024 Compensation Report. The amounts in CHF were converted to USD at the exchange rate of 1.0 CHF : 1.135731 USD. All amounts are before deductions of social security contributions and income tax paid by the Board members.

Share Ownership of the Members of the Board of Directors

The number of Alcon shares held by members of the Board and “persons closely linked” to them as of December 31, 2025 are set out in Exhibit 34 below. As of this same date, no Board member, either individually or together with “persons closely linked”, owned 1% or more of the outstanding shares of Alcon. The CEO of Alcon and Board member, David J. Endicott, is not included in this Exhibit as his share ownership is disclosed in Exhibit 27.

The number of shares held as of December 31, 2024 is shown for comparison.

Exhibit 34

¹ 2024 total excludes the 4,331 shares owned by former Board member Raquel C. Bono

Additional Disclosures

Loans to Board Members

Alcon’s Articles of Incorporation and corporate policies do not permit loans to current or former members of the Board or to persons closely linked to them. No loans were granted in 2025, and none were outstanding as of December 31, 2025.

Other Payments to Current and Former Board Members

No payments (or waivers of claims) other than those set out in Exhibit 32 (including the related notes) under section “Board Compensation 2025” were made to current or former Board members or to persons closely linked to them.

Persons Closely Linked

Persons closely linked to members of the Board are (i) their spouse, (ii) their children below age 18, (iii) any legal entities that they own or otherwise control, (iv) any legal or natural person who is acting as their fiduciary or agent and (v) family trusts.

Mandates Outside of Alcon

Pursuant to Swiss law, the Compensation Report must specify the functions of the Board members in other for-profit undertakings. According to article 34 of Alcon's Articles of Incorporation, there are limitations as to the number of mandates outside of Alcon that each of our directors may have. As of December 31, 2025, the following external mandates in for-profit undertakings are subject to these limitations. Listed companies are denoted with an asterisk (*).

¹ Under common ownership

Outlook for 2026

ECA Compensation

The Committee is committed to a strong pay for performance framework to align executive compensation with shareholder interests. An anchor point of our philosophy is to offer market competitive compensation closer to the median of our peer group. To achieve this goal, the Committee continuously reviews and benchmarks Alcon's compensation against a global peer group (42% International, 58% US, see "Peer Group" section for details).

Based on the Company's business strategy, compensation philosophy and the analysis of peer group compensation practices, below are the key features of ECA compensation for 2026:

- Same overall structure of ECA compensation as compared to 2025 (base salary, STI, performance-based LTI and benefits) with most of compensation opportunity tied to long-term performance results;
- The Committee will continue to review ECA target compensation positioning in 2026 in the context of Alcon's performance, a steadily increasing peer group median, evolving talent market and the Company's compensation philosophy, while continuing to reinforce strong pay for performance alignment;
- Continuation of robust share ownership requirements; and
- No material changes to benefits provisions.

Board Compensation

The Board compensation framework will remain unchanged for the upcoming term of office 2026 AGM to the 2027 AGM, including:

- The overall framework of Board compensation from the 2025 AGM to the 2026 AGM will be carried forward to the term from the 2026 AGM to 2027
- In 2025, the Board conducted a benchmarking study of Alcon's Board pay against other Swiss Market Index ("SMI") companies and determined that our Board pay is below the median level of SMI companies. The Board intends to propose compensation changes for the Board retainer fees at the 2026 AGM for the 2026-2027 AGM term in alignment with SMI peers; and
- The payment of fifty percent in shares (mandatory) and a voluntary election of a higher percentage in shares will continue.

Shareholder Vote at the 2026 AGM

In accordance with Article 29 of the Articles of Incorporation (<http://investor.alcon.com/governance//default.aspx>), the Board will ask shareholders at the 2026 AGM meeting to cast a binding vote on:

- Compensation for non-executive Board members for their term from the 2026 AGM to the 2027 AGM.
- Compensation for ECA members for the 2027 financial year.

Additionally, shareholders will cast an advisory vote on the 2025 Compensation Report. Article 30 of the Articles of Incorporation also allow for extra compensation when adding new ECA members. The exhibit below outlines the 2026 AGM proposal and the relevant compensation periods.

Non-IFRS measures as defined by the Company

Alcon uses certain non-IFRS metrics when measuring performance, including when measuring current period results against prior periods, including core results, percentage changes measured in constant currencies and free cash flow.

Because of their non-standardized definitions, the non-IFRS measures (unlike IFRS measures) may not be comparable to the calculation of similar measures of other companies. These supplemental non-IFRS measures are presented solely to permit investors to more fully understand how Alcon management assesses underlying performance. These supplemental non-IFRS measures are not, and should not be viewed as, a substitute for IFRS measures.

Core results

Alcon core results, including core operating income and core net income, exclude all amortization and impairment charges of intangible assets, excluding software, product discontinuation charges, net gains and losses on fund investments and equity securities valued at fair value through profit and loss ("FVPL"), fair value adjustments of financial assets in the form of options to acquire a company carried at FVPL, fair value remeasurements of investments in associated companies and certain acquisition related items. The following items that exceed a threshold of \$10 million, are not operating expenses necessary to the operation of the business and have costs that will vary over periods are also excluded from core results: integration and divestment related income and expenses, divestment gains and losses, restructuring charges/releases and related items, legal related items, gains/losses on early extinguishment of debt or debt modifications, past service costs for post-employment benefit plans, impairments of property, plant and equipment and software, as well as income and expense items that management deems exceptional and that are or are expected to accumulate within the year to be over a \$10 million threshold.

Taxes on the adjustments between IFRS and core results take into account, for each individual item included in the adjustment, the tax rate that will finally be applicable to the item based on the jurisdiction where the adjustment will finally have a tax impact. Generally, this results in amortization and impairment of intangible assets and acquisition-related restructuring and integration items having a full tax impact. There is usually a tax impact on other items, although this is not always the case for certain items such as legal settlements in certain jurisdictions.

Alcon believes that investor understanding of its performance is enhanced by disclosing core measures of performance because, since they exclude items that can vary significantly from period to period, the core measures enable a helpful comparison of business performance across periods. For this same reason, Alcon uses these core measures in addition to IFRS and other measures as important factors in assessing its performance.

A limitation of the core measures is that they provide a view of Alcon operations without including all events during a period, such as the effects of an acquisition, divestment, or amortization/impairments of purchased intangible assets and restructurings.

Constant currency

Changes in the relative values of non-US currencies to the US dollar can affect Alcon's financial results and financial position. To provide additional information that may be useful to investors, including changes in sales volume, we present information about changes in our net sales and various values relating to operating and net income that are adjusted for such foreign currency effects.

Constant currency calculations have the goal of eliminating two exchange rate effects so that an estimate can be made of underlying changes in the Consolidated Income Statement excluding:

- the impact of translating the income statements of consolidated entities from their non-US dollar functional currencies to the US dollar; and
- the impact of exchange rate movements on the major transactions of consolidated entities performed in currencies other than their functional currency.

Alcon calculates constant currency measures by translating the current year's foreign currency values for sales and other income statement items into US dollars, using the average exchange rates from the historical comparative period and comparing them to the values from the historical comparative period in US dollars.

Free cash flow

Alcon defines free cash flow as net cash flows from operating activities less cash flow associated with the purchase or sale of property, plant and equipment. Free cash flow is presented as additional information because Alcon management believes it is a useful supplemental indicator of Alcon's ability to operate without reliance on additional borrowing or use of existing cash. Free cash flow is not intended to be a substitute measure for net cash flows from operating activities as determined under IFRS.

Net sales by segment

| (\$ millions unless indicated otherwise) | 2025 compared to 2024 | | | |
|------------------------------------------|-----------------------|--------------|----------|--------------------------------------------|
| | 2025 | 2024 | Change % | |
| | | | \$ | cc ⁽¹⁾ (non-IFRS measure) |
| Total Surgical | 5,751 | 5,522 | 4 | 4 |
| Total Vision Care | 4,568 | 4,314 | 6 | 5 |
| Net sales | 10,319 | 9,836 | 5 | 4 |

(1) Constant currencies is a non-IFRS measure. Refer to "Item 6.B. Compensation—Non-IFRS measures as defined by the Company" section for additional information.

Explanatory footnotes to IFRS to Core reconciliation tables

- (1) Includes amortization for all intangible assets other than software.
- (2) Includes impairment charges related to intangible assets.
- (3) For 2024, includes a net gain related to the divestment of certain product rights in China.
- (4) For 2025, includes gains on fair value remeasurements of investments in associated companies.
- (5) For 2025, Gross profit includes the amortization of inventory fair value adjustments related to an acquisition. Operating income also includes \$46 million of direct acquisition costs and \$11 million of integration related costs related to acquisitions. Acquisition costs primarily include third party professional services for legal, banker, due diligence and accounting fees. Integration related costs include accelerated equity-based compensation expense of \$4 million, third party professional services of \$4 million and severance of \$3 million.

For 2024, Gross profit includes the amortization of inventory fair value adjustments related to an acquisition.

- (6) For 2025, includes provisions for legal matters.
- (7) For 2025, includes charges related to the discontinued commercialization of a product in the Vision Care reportable segment, including \$43 million for the full impairment of the intangible asset and \$1 million in related costs, primarily related to inventory provisions.
- (8) For 2025, Income before taxes includes core adjustments recognized for Aurion in Share of (loss) from associated companies. The expenses were incurred upon change in control from Alcon's acquisition of a majority interest in Aurion and include accelerated equity-based compensation expense of \$2 million, third party professional services of \$2 million for legal and accounting fees and third party bank fees of \$1 million.

For 2024, Operating income includes fair value adjustments to contingent consideration liabilities and fair value adjustments of financial assets, partially offset by the amortization of option rights.

- (9) For 2025, total tax adjustments of \$143 million include tax associated with operating income core adjustments, partially offset by discrete tax items. Operating income core adjustments totaled \$679 million. Excluding the non-taxable gain of \$136 million on fair value remeasurement of Alcon's investment in Aurion, core adjustments to operating income totaled \$815 million. The associated tax effect amounted to \$151 million with an average tax rate of 18.5%. Core tax adjustments for discrete tax items totaled \$8 million.

For 2024, tax associated with operating income core adjustments of \$614 million totaled \$117 million with an average tax rate of 19.1%.

- (10) Core basic earnings per share is calculated using core net income attributable to shareholders of Alcon Inc. and the weighted-average shares of common stock outstanding during the period. Core diluted earnings per share also contemplate dilutive shares associated with unvested equity-based awards as described in Note 7 to the Consolidated Financial Statements.

Free cash flow (non-IFRS measure)

The below table is a summary of free cash flow for 2025 and 2024, together with a reconciliation to net cash flows from operating activities, the most directly comparable IFRS measure.

| (\$ millions) | 2025 | 2024 |
|---------------------------------------------------|--------------|--------------|
| Net cash flows from operating activities | 2,271 | 2,077 |
| Purchase of property, plant & equipment | (543) | (473) |
| Proceeds from sale of property, plant & equipment | 5 | — |
| Free cash flow | 1,733 | 1,604 |

REPORT OF THE STATUTORY AUDITOR

to the General Meeting of Alcon Inc., Fribourg

Report on the audit of the compensation report

Opinion

We have audited the compensation report of Alcon Inc. (the Company) for the year ended December 31, 2025. The audit was limited to the information pursuant to article 734a-734f of the Swiss Code of Obligations (CO) in Exhibit 7, Exhibits 19 through 20, Exhibits 25 through 29, and Exhibits 32 through 35, as well as the additional disclosures on pages 98 through 99 and pages 105 through 106 (hereinafter referred to as “disclosures made on the exhibits and pages defined as subject to audit”) of the compensation report.

In our opinion, the information pursuant to article 734a-734f CO in the accompanying compensation report complies with Swiss law and the Company's articles of incorporation.

Basis for opinion

We conducted our audit in accordance with Swiss law and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the 'Auditor's responsibilities for the audit of the compensation report' section of our report. We are independent of the Company in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors is responsible for the other information. The other information comprises the Annual Report (but does not include the disclosures made on the exhibits and pages defined as subject to audit of the compensation report, the consolidated financial statements, the financial statements and our auditor's reports thereon) and the Say on Pay Brochure, which we obtained prior to the date of this auditor's report, and the Sustainability & Social Impact Report, which is expected to be made available to us after that date.

Our opinion on the compensation report does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the compensation report, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the audited financial information in the compensation report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the compensation report

The Board of Directors is responsible for the preparation of a compensation report in accordance with the provisions of Swiss law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of a compensation report that is free from material misstatement, whether due to fraud or error. It is also charged with structuring the remuneration principles and specifying the individual remuneration components.

Auditor's responsibilities for the audit of the compensation report

Our objectives are to obtain reasonable assurance about whether the information pursuant to article 734a-734f CO is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss

law and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this compensation report.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement in the compensation report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

6.C. BOARD PRACTICE

Corporate Governance

Group Structure and Shareholders

Operational Group Structure

The Company, with its registered office at Rue Louis-d’Affry 6, 1701 Fribourg, Switzerland, is a corporation organized under Swiss law and is the ultimate parent company of Alcon. As of December 31, 2025, the market capitalization of the Company was \$38.414 billion (CHF 30.844 billion).

Alcon is the global leader in eye care with \$10.3 billion in net sales during the year ended December 31, 2025. We research, develop, manufacture, distribute and sell a full suite of eye care products within two key businesses: Surgical and Vision Care. Our Surgical business is focused on ophthalmic products for cataract surgery, vitreoretinal surgery, refractive laser surgery and glaucoma surgery. Our Vision Care business is comprised of various contact lenses, cell therapies to treat ocular diseases and a comprehensive portfolio of ocular health products, including products for dry eye, ocular allergies, glaucoma and contact lens care, as well as ocular vitamins and redness relievers. Further information is available under "Item 4. Information on the Company" and Note 4 to the Consolidated Financial Statements.

Listed and Non-listed Companies Belonging to the Alcon Group

The registered shares of the Company are listed on the SIX Swiss Exchange (Valor 43249246 / ISIN code CH0432492467) and the New York Stock Exchange (CUSIP code H01301128). The Company owns directly or indirectly all consolidated entities of Alcon, none of which has its shares otherwise listed.

The following table lists the most significant subsidiaries of the Company, including those entities with total assets or net sales in excess of 5% of the Company's consolidated total assets or net sales, as applicable, as of December 31, 2025. The referenced share capital may not reflect the taxable share capital and does not include any paid in surplus. Further information regarding the Company's subsidiaries is disclosed in Note 27 of the Consolidated Financial Statements. The combination of the Company's subsidiaries disclosed in the table below and in Note 27 of the Consolidated Financial Statements does not cover all subsidiaries of the Company.

| Country of Organization/ Entity Name | Equity Interest | Principal Place of Business | Share Capital |
|--------------------------------------------|-----------------|-----------------------------|-----------------|
| China | | | |
| Alcon (China) Ophthalmic Product Co., Ltd. | 100% | Beijing | USD 60,000,000 |
| Japan | | | |
| Alcon Japan Ltd. | 100% | Tokyo | JPY 500,000,000 |
| Switzerland | | | |
| Alcon Pharmaceuticals Ltd | 100% | Fribourg | USD 238,000 |
| United States | | | |
| Alcon Finance Corporation | 100% | Fort Worth, TX | USD 1 |
| Alcon Laboratories, Inc. | 100% | Fort Worth, TX | USD 1 |
| Alcon Research, LLC | 100% | Fort Worth, TX | — |
| Alcon Vision, LLC | 100% | Fort Worth, TX | — |

Significant Shareholders

According to the Alcon share register, the following nominee shareholders held more than 3% of the share capital of Alcon Inc. as of December 31, 2025:

| Holder | Number of Shares | Percentage |
|------------------------------------------------|------------------|------------|
| Cede & Co (DTC nominee), New York, NY (USA) | 85,435,247 | 17.1% |
| The Bank of New York Mellon, Everett, MA (USA) | 23,497,026 | 4.7% |

In addition, according solely to disclosure of shareholdings notifications filed with (i) Alcon and the SIX Swiss Exchange ("SIX Threshold Notifications") pursuant to the obligations set forth in the Swiss Federal Act on Financial Market Infrastructure and Market Conduct in Securities and Derivatives Trading ("FMIA") and the rules and regulations promulgated thereunder or (ii) the SEC, there are three shareholders that held shares representing at least 3% of the Company's total share capital as of December 31, 2025, but were not registered with the Alcon share register. These shareholders are identified in the table below.

The information required to be included in the SIX Threshold Notifications regarding these shareholders varies from the information required to be included in beneficial ownership statements filed with the SEC ("SEC Notification").

Interested persons can access the relevant SIX Threshold Notifications online at the SIX Swiss Exchange: <https://www.ser-ag.com/en/resources/notifications-market-participants/significant-shareholders.html#/>

The below table shows the information available to the Company, based on both notification regimes, with respect to shareholders reported to have significant positions in Alcon's share capital as of December 31, 2025:

| Holder | Number of shares and voting rights as per SIX Threshold Notification | Percentage as per SIX Threshold Notification ¹ | Number of shares beneficially owned as per SEC Notification ² | Percentage as per SEC Notification ² |
|-----------------------------------------------------------------------------------------|----------------------------------------------------------------------|-----------------------------------------------------------|--------------------------------------------------------------------------|-------------------------------------------------|
| BlackRock, Inc. 50 Hudson Yards New York, NY 10001 | 24,679,231 ³ | 5.06% ³ | 29,483,962 ⁴ | 6.05% ⁴ |
| UBS Group AG Bahnhofstrasse 45 PO Box CH-8021 Zurich, Switzerland | N/A | N/A | 25,782,426 ⁵ | 5.29% ⁵ |
| UBS Fund Management (Switzerland) AG Aeschenvorstadt 1 CH-4051 Basel, Switzerland | 29,206,327 ⁶ | 5.845% ⁶ | N/A | N/A |

¹ Percentages indicated in this column have been established based on the share capital of the Company registered with the commercial register of the Canton of Fribourg on the date on which the respective disclosure obligation pursuant to the FMIA was triggered. Furthermore, according to the FMIA, this shareholder is required to notify Alcon and the SIX Swiss Exchange only at the time it reaches, exceeds or falls below any of the thresholds set forth in the FMIA; therefore, its shareholding as of December 31, 2025 may differ from the figures indicated as per the contents of the relevant SIX Threshold Notification.

² In general, under SEC rules, "beneficial ownership", for the purposes of this column, refers to shares that an entity had the power to vote or the power to dispose of and shares that such entity or individual had the right to acquire within 60 days after December 31, 2025. Information in this column is current as of February 16, 2026.

³ Based solely on a SIX Threshold Notification dated November 9, 2019. This figure does not include its derivative position.

⁴ Based solely on a Schedule 13G filed with the SEC on April 23, 2025.

⁵ Based solely on a Schedule 13G filed with the SEC on February 13, 2024.

⁶ Based solely on a SIX Threshold Notification dated May 6, 2024.

Cross-Shareholdings

Neither the Company nor any of its consolidated entities has any shareholdings exceeding 5% of the holdings of capital or voting rights in any entity that also has shareholdings exceeding 5% of the holdings of the capital or voting rights in the Company or any of its consolidated entities.

Capital Structure

Share Capital

As of December 31, 2025, the share capital of Alcon Inc. was CHF 19,988,000, fully paid-in and divided into 499,700,000 registered shares, each with a nominal value of CHF 0.04.

On May 5, 2023, Alcon's shareholders approved the introduction of a capital range and a conditional share capital in Alcon's Articles of Incorporation. Further information is available under the section "Capital Range and Conditional Share Capital" as stated below.

An authority to issue shares under an authorized share capital was granted by Alcon's shareholders on January 29, 2019 and expired on January 29, 2021. Within this timeframe, the Board resolved to increase the share capital in two successive transactions: (i) on November 19, 2019 by CHF 120,000 through the issuance of 3,000,000 new registered shares and (ii) on November 10, 2020 by CHF 320,000 through the issuance of 8,000,000 new shares.

Capital Range and Conditional Share Capital

Under the capital range, and until May 5, 2028 or an earlier expiry, the Board has the authority to increase or decrease the share capital ranging from CHF 18,988,600 (lower limit) to CHF 21,986,800 (upper limit). The capital increase or decrease may be effected by (A) issuing up to the lower of (i) 49,970,000 fully paid-in registered shares and (ii) 10% of the share capital at the time of increase or (B) cancelling up to 24,985,000 registered shares, as applicable. The Board is further authorized to withdraw or restrict subscription rights of existing shareholders and allocate such rights to third parties, the Company or any of its group companies, for the purposes of (a) raising equity capital, (b) acquisition transactions, (c) broadening the shareholders constituency in certain financial or investor markets or (d) Board, executive management, associates, advisors or other participation programs. Further details, including the terms and conditions of a capital increase, or decrease, respectively, can be found in Articles 4a and 4c of the Articles of Incorporation, available at https://s1.q4cdn.com/963204942/files/doc_downloads/governance_doc/2023/Alcon-AG-Articles-EN.pdf.

The Board can also rely on a conditional share capital instrument in its Articles of Incorporation through which the share capital may be increased in an amount not to exceed CHF 1,998,800, by the issuance of up to 49,970,000 fully paid-in registered shares through the voluntary or mandatory exercise of conversion, exchange, option, warrant, subscription or other rights granted to or imposed on shareholders or third parties alone or in connection with the issuance of bonds, notes, options, warrants or other similar securities or contractual obligations of the Company or its affiliates. The conditional share capital may be used for the same purposes as stated in the preceding paragraph in connection with the capital range. Further details, including the terms and conditions of a capital increase, can be found in Articles 4b and 4c of the Articles of Incorporation, available at https://s1.q4cdn.com/963204942/files/doc_downloads/governance_doc/2023/Alcon-AG-Articles-EN.pdf.

The introduction of the capital range and the conditional share capital was approved by Alcon's shareholders on May 5, 2023. At year-end 2025, the Board had not made use of the authority under any of the capital range or conditional share capital provisions.

Changes in Capital

| | 2025 | 2024 | 2023 | 2022 |
|---------------------------------------|-------------|-------------|-------------|-------------|
| Share capital in CHF | 19,988,000 | 19,988,000 | 19,988,000 | 19,988,000 |
| Registered shares | 499,700,000 | 499,700,000 | 499,700,000 | 499,700,000 |
| Nominal value per share in CHF | 0.04 | 0.04 | 0.04 | 0.04 |

Shares, Participation Certificates and Profit-sharing Certificates

The Company has a single class of shares, being registered shares in the form of uncertificated securities (in the sense of the Swiss Code of Obligations). A portion of these uncertificated shares is issued as intermediated securities (*titres intermédiés*) within the meaning of the Swiss Federal Intermediated Securities Act via the settlement system operated by SIX SIS, with the remaining shares directly held through Computershare Trust Company, N.A. in the US (including shares held through Computershare Trust Company, N.A. via DTC). All Alcon shares have equal voting rights and carry equal entitlements to dividends. No participation certificates (*bons de participations*) or profit-sharing certificates (*bons de jouissance*) have been issued.

On February 25, 2025, Alcon announced that it would launch a share buyback program for an amount of up to USD 750,000,000. The registered shares to be acquired will be held in treasury and are intended to offset the dilutive effect of registered shares vesting under Alcon's equity-based incentive plans. This share buyback program was completed on January 20, 2026.

Based solely upon shares registered in the Alcon share registry, as of December 31, 2025, approximately 21.46% of the Company's total share capital was held in Switzerland by 74,572 registered shareholders.

Limitations on Transferability and Nominees Registrations

The Articles of Incorporation of the Company do not provide for any limitation on transferability of shares or nominees registration.

Convertible Bonds and Options

As of December 31, 2025, Alcon did not have any convertible bonds, warrants, options or other securities granting rights to Alcon shares.

Board of Directors

Composition

The Board consists of 8 to 13 members according to the Articles of Incorporation. As of December 31, 2025, the size of the Board was 11 members (Dr. Raquel C. Bono did not stand for re-election at the 2025 AGM) and the Board was comprised of the following members (ages listed are as of December 31, 2025):

F. Michael Ball, Chairman

A seasoned healthcare executive with nearly four decades of experience with global healthcare companies, including nearly a decade as the chief executive officer of medical device and pharmaceutical companies, F. Michael Ball brings extensive executive leadership experience as well as in-depth industry and Alcon-specific knowledge to the Board. He previously held the position of Chief Executive Officer of Alcon, while it was a division of Novartis, and served as a member of the Novartis Executive Committee from February 1, 2016 until June 30, 2018. He previously served as Chief Executive Officer of Hospira, Inc. from 2011 to 2015. Prior to that, Mr. Ball held a number of senior leadership positions at Allergan, Inc., including President from 2006 to 2011. Before joining Allergan, Inc. in 1995, he held roles of increasing responsibility in marketing and sales at Syntex Corporation and Eli Lilly & Co. Mr. Ball served on the board of directors of several organizations, including Kythera Biopharmaceuticals Inc., Hospira, Inc., IntraLase Corp., Advamed and sTec, Inc. Mr. Ball is currently Chairman and has been a member of the board of directors of the Ophthalmology Foundation since 2021.

D. Keith Grossman

Keith Grossman, with nearly 40 years of experience with medical devices and supplies, including as Chief Executive Officer of publicly held medical device and technology companies, brings to the Board his executive and board leadership experience as well as operational and strategic planning expertise in the healthcare industry. He was the Chair at Nevro, Inc. from 2019, serving in a non-executive capacity from October 2023 until Nevro's acquisition in April 2025. Mr. Grossman also served as Nevro's Chief Executive Officer and President from 2019 until March 2023 and as Executive Chair of Nevro until October 2023. He has also been a member of the board of directors of Outset Medical, Inc. since 2014 and Supira Medical, Inc. since October 2025. He was President and Chief Executive Officer of Thoratec Corporation from 1996 to 2006 and from 2014 to 2015 and was a member of the board of directors from 1996 to 2015. Mr. Grossman was Chief Executive Officer and a member of the board of directors at Conceptus, Inc. from 2011 to 2013. He was Managing Director and Senior Advisor at TPG Capital, L.P. from 2007 to 2011. Mr. Grossman also served as a member of the board of directors of ViewRay, Inc. from 2018 to 2021, Zeltiq, Inc., as Lead Director, from 2013 to 2017, Intuitive Surgical, Inc. from 2004 to 2010 and Kyphon Inc. in 2007 and served on a number of private boards of directors.

Mr. Grossman holds a Bachelor of Science in Animal Sciences from The Ohio State University and Master of Business Administration in Finance from Pepperdine Graziadio Business School at Pepperdine University, both in the United States.

Key Competencies: Healthcare Industry, International Supply Chain and Technology

Scott Maw

An experienced financial executive with over three decades of experience at global companies, including as the Chief Financial Officer of Starbucks Corporation, Scott Maw contributes to the Board his extensive understanding of complex financial analysis and reporting and internal controls over financial reporting of a global company. He has been a member of the board of directors of Avista Corporation since 2016, where he is the Chair of the Compensation Committee, and Chipotle Mexican Grill Inc. since 2019, serving as its Chairman of the Board since August 2024. Mr. Maw is also a member of the board of trustees of Gonzaga University. He was a member of the board of directors of Root, Inc. from 2020 until 2023. Previously, he was Executive Vice President and Chief Financial Officer at Starbucks Corporation from 2014 until the end of 2018, Senior Vice President in Corporate Finance from 2012 to 2013 and Senior Vice President and Global Controller from 2011 to 2012. From 2010 to 2011, he was Senior Vice President and Chief Financial Officer of SeaBright Holdings, Inc. From 2008 to 2010, he was Senior Vice President and Chief Financial Officer of the Consumer Bank at JP Morgan Chase and Company. Prior to this, Mr. Maw held leadership positions in finance at Washington Mutual, Inc. from 2003 to 2008 and at GE Capital from 1994 to 2003.

Mr. Maw holds a Bachelor of Business Administration in Accounting from Gonzaga University in the United States.

Key Competencies: Financial, Global Business Operations and Consumer Industry

2026

Ines Pöschel

Ines Pöschel brings to the Board not only her experience as a Swiss lawyer, particularly in corporate governance, capital markets and mergers and acquisitions, but her extensive leadership roles in public policy with her appointments on government and public commissions. Ms. Pöschel has served as Of Counsel at Kellerhals Carrard Zurich KIG since 2025, after being a Partner there from 2007 to 2025. Concurrently, as of January 1, 2026, she is an Executive Fellow at International Institute for Management Development. She has been a member of the board of directors of Graubündner Kantonalbank since 2018 and Belimo Holding AG and dormakaba Holding AG since 2023. She was a director of Implenia AG from 2016 until 2022. She earned an ESG Global Designation and Certificate from Competent Boards in 2023. From 2002 to 2007, Ms. Pöschel was a Senior Associate at Bär & Karrer AG. She was a Senior Manager at Andersen Legal LLC from 1999 to 2002. Since 2016, Ms. Pöschel has been a member of the Swiss Federal expert commission for commercial register.

Age: **57**

Citizenship:
Switzerland

Year of initial
appointment:
2019

Expiration of current
term of office:
2026

Ms. Pöschel has a Master's in Law from the University of Zurich in Switzerland, and passed the Swiss Bar Exam in 1996.

Key Competencies: ESG, Legal/Governance and Regulatory/Public Policy

Dieter Spälti, Ph.D.

As an executive of Spectrum Value Management Ltd., the family office of an iconic industrial Swiss family, Dr. Spälti has overseen all of its investments for two decades, which allows Dr. Spälti to bring to the Board significant financial and operational experience in addition to his previous consulting experience with numerous industrial, financial and technology firms in Europe, the US and Southeast Asia. Dr. Spälti served as Managing Partner at Spectrum Value Management Ltd., Switzerland from 2002 to 2006, he was then the Chief Executive Officer from 2006 to 2021 and he continues to serve as a member of their board of directors. Dr. Spälti is also a member of the board of directors of IHAG Holding AG. He was a Vice Chairman and member of the board of directors at Holcim Ltd. from 2003 to 2022 and served, or continues to serve, on the board of directors of various non-listed Swiss and international companies that are controlled by the same beneficial owner. Dr. Spälti was a Partner at McKinsey & Company from 1993 to 2001.

2019

Expiration of current
term of office:
2026

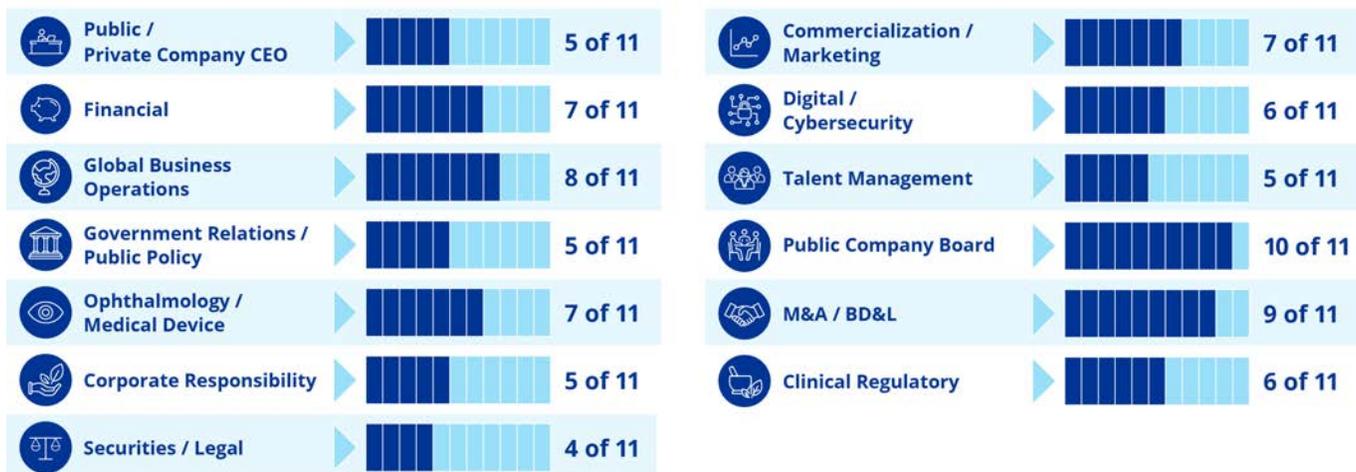

He holds a Ph.D. in Law from the University of Zurich, Switzerland.

Key Competencies: Financial, Legal/Governance and Technology

Board Skills and Expertise

The Board's composition is regularly reviewed to ensure it reflects the skills and experience needed to oversee the Company's strategy and evolving business needs. In this context, the Governance and Nomination Committee considers how individual director qualifications contribute to the Board as a whole. The chart below highlights key skills and experience represented on the Board.

Board Skills and Expertise Distribution

Independence and Executive Function

The independence of Board members is a key element of Alcon's corporate governance framework. Therefore, Alcon has developed a strong set of independence criteria for its Board members based on international best practice standards, including the Swiss Code of Best Practices for Corporate Governance and the NYSE standards, which can be found in the Alcon Board Regulations, available at https://s1.q4cdn.com/963204942/files/doc_governance/2025/Jun/02/Alcon-Regulations_of_Board_6-May-2025_FINAL-w-Charters-WEBSITE-VERSION-03514e.pdf.

The Board assesses the independence of its Board members on a regular basis, at least annually. As of December 31, 2025, all Board members, including the Chair, qualified as independent according to Alcon independence criteria, except for David J. Endicott.

Other than Mr. Endicott, who currently serves as Alcon's Chief Executive Officer, no Board member was a member of the management of the Company or any other Alcon consolidated subsidiary in the last three financial years up to December 31, 2025.

No Board member has a significant business relationship with the Company or with any other Alcon consolidated subsidiary.

Mr. Endicott is an executive member of the Board by reason of his function as Chief Executive Officer of Alcon. All other members of the Board are non-executive directors since none of them carries out operational management tasks within Alcon.

As of December 31, 2025, none of the Board members held any official government functions or political posts.

Limitations of Number of Mandates

No member of the Board may hold more than ten additional mandates in other companies, of which no more than four shall be in other listed companies. Chairs of the board of directors of other listed companies count as two mandates. Mandates shall mean mandates in comparable functions at other organizations with an economic purpose. Mandates in different legal entities which are under joint control or same beneficial ownership are deemed one mandate. Further details can be found in Article 34 of the Articles of Incorporation, available at https://s1.q4cdn.com/963204942/files/doc_downloads/governance_doc/2023/Alcon-AG-Articles-EN.pdf.

Elections and Terms of Office

The Board members, the Chair of the Board and the members of the Compensation Committee shall be elected individually by the General Meeting of Shareholders for a term of office lasting until completion of the next Annual General Meeting of Shareholders. The members of the Audit and Risk Committee, Governance and Nomination Committee and Innovation Committee are appointed by the Board. The chairperson of each of the Board Committees, including the Compensation Committee, is appointed by the Board.

There is no mandatory term limit for Board members.

The rules in the Articles of Incorporation reflect the statutory legal provisions regarding the appointment of the Chair, the members of the Board, the members of the Compensation Committee and the independent proxy.

Internal Organizational Structure

General Principles and Areas of Responsibilities

The Board constitutes itself in compliance with legal requirements and taking into consideration the resolutions of the General Meeting of Shareholders. It shall elect one or two Vice-Chairs. It shall appoint a secretary, who need not be a member of the Board.

The Board is the ultimate governance body of the Company. The Board is led by its independent Chair, F. Michael Ball. Mr. Ball leads the Board in representing the interest of the Company shareholders. Notably, he (i) provides leadership to the Board, (ii) supports the CEO, (iii) ensures an efficient way of working with the Board's Committees, the CEO and the Executive Committee, (iv) leads the annual performance assessment and (v) ensures an effective communication with the shareholders and the public.

The Vice Chair is D. Keith Grossman. In this role, Mr. Grossman leads the Board as long as the Chair is incapacitated.

The duties of Mr. Ball and Mr. Grossman in their respective functions are described in more detail in Articles 20 and 21, respectively, of the Alcon Board Regulations, available at https://s1.q4cdn.com/963204942/files/doc_governance/2025/Jun/02/Alcon-Regulations_of_Board_6-May-2025_FINAL-w-Charters-WEBSITE-VERSION-03514e.pdf.

The Board is responsible for the duties assigned to it by the Articles of Incorporation and the Alcon Board Regulations, which include the overall direction and supervision of management. It holds the ultimate decision-making authority for Alcon, with the exception of any decisions reserved to the shareholders. In performing its tasks, the Board follows the highest standards of ethics, integrity and governance. It undertakes annually a self-assessment process to evaluate its performance, the performance of its committees and the individual performance of its members.

Within the limits of the law and the Articles of Incorporation, the Alcon Board has delegated certain of its duties to the Executive Committee and the Board's Committees.

Delegation to the Executive Committee

The Board has delegated to the Executive Committee the management of the business in accordance with the terms set forth in the Alcon Board Regulations. Such delegation has been formalized in Article 12 of the Alcon Board Regulations and further regulated in a set of internal regulations. Under the lead of the Chief Executive Officer, the Executive Committee is responsible for the management of the business and functions as a coordination committee, independent of any legal entity of the Alcon Group. A non-exhaustive list of the duties assigned to the Executive Committee can be found in Article 23 of the Alcon Board Regulations, available at https://s1.q4cdn.com/963204942/files/doc_governance/2025/Jun/02/Alcon-Regulations_of_Board_6-May-2025_FINAL-w-Charters-WEBSITE-VERSION-03514e.pdf.

Delegation to the Board's Committees

The Board's Committees enable the Board to work in an efficient and effective manner, ensuring a thorough review and discussion of matters, while giving the Board more time for deliberation and decision-making. For this purpose, the Board has delegated certain of its duties to each of its four permanent committees: the Audit and Risk Committee, the Compensation Committee, the Governance and Nomination Committee and the Innovation Committee. Details of the duties, responsibilities and decision-making powers of each committee can be found in the respective committee's charter, contained in the Alcon Board Regulations, available at https://s1.q4cdn.com/963204942/files/doc_governance/2025/Jun/02/Alcon-Regulations_of_Board_6-May-2025_FINAL-w-Charters-WEBSITE-VERSION-03514e.pdf.

As of December 31, 2025, the composition of the respective Board's Committees was as follows:

| Name | Audit and Risk Committee | Compensation Committee | Governance and Nomination Committee | Innovation Committee |
|-------------------------------------|---------------------------------|-------------------------------|--------------------------------------------|-----------------------------|
| F. Michael Ball | | | Member | |
| Lynn D. Bleil¹ | Member | | | Member/Chair |
| Arthur Cummings | | | | Member |
| Deborah Di Sanzo² | Member | | | |
| David J. Endicott | | | | |
| Thomas Glanzmann³ | | Member | Member | Chair/Member |
| D. Keith Grossman | | | Chair | Member |
| Scott Maw | Chair | Member | | |
| Karen May | Member | Chair | | |
| Ines Pöschel | | Member | Member | |
| Dieter Spälti | Member | | | |

¹ Lynn Bleil was appointed as Chair of the Innovation Committee on May 6, 2025.

² Deborah Di Sanzo was appointed as a member of the Audit and Risk Committee on December 12, 2025.

³ Thomas Glanzmann served as Chair of the Innovation Committee until May 6, 2025.

Audit and Risk Committee

The Audit and Risk Committee consists of five members (with the addition of Ms. Di Sanzo on December 12, 2025), all of whom were determined by the Board to be independent and in possession of the financial literacy and accounting or related financial management expertise, as defined in the NYSE standards. The Audit and Risk Committee meets and consults regularly with the management, the Alcon Internal Audit function, the independent external auditors and external consultants. The Audit and Risk Committee regularly reports to the full Board on its decisions and deliberations.

The primary responsibilities of this committee include:

- supervising external auditors and selecting and nominating external auditors for election at the Annual General Meeting of shareholders;
- overseeing internal auditors;
- overseeing accounting policies, financial controls and compliance with accounting and internal control standards;
- approving quarterly financial statements and financial results releases;
- overseeing internal control and compliance processes and procedures;
- overseeing compliance with laws and external and internal regulations;
- ensuring that Alcon has implemented and maintained an appropriate and effective risk management system and process;
- ensuring that all necessary steps are taken to foster a culture of risk-adjusted decision-making without constraining reasonable risk-taking and innovation;
- approving guidelines and reviewing policies and processes; and
- reviewing with management, internal auditors and external auditors the identification, prioritization and management of risks; the accountabilities and roles of the functions involved in risk management; the risk portfolio; and the related actions implemented by management.

Compensation Committee

The Compensation Committee consists of four members, all of whom were determined by the Board to be independent. The Compensation Committee meets and consults regularly with management and external consultants. The Compensation Committee regularly reports to the full Board on its decisions and deliberations.

The primary responsibilities of this committee include:

- developing a compensation philosophy in line with the principles set forth in the Articles of Incorporation and submit to the Board;
- providing oversight for Alcon's human capital strategy, including talent management, ECA members succession planning, diversity and inclusion initiatives and pay equity measures;
- designing, reviewing and recommending to the Board compensation policies and programs;
- reviewing and approving a peer group of companies for executive compensation comparisons;
- advising the Board on the compensation of Directors and the Chief Executive Officer of Alcon;
- determining the compensation of ECA members;
- supporting the Board in preparing the proposals to the General Meeting of Shareholders regarding the compensation of the members of the Board and ECA;
- preparing the annual compensation report and submitting it to the Board for approval;
- establishing executive and director stock ownership guidelines and stock trading policies and monitoring compliance with such policies; and
- overseeing communication and engagement on executive compensation matters with shareholders and their advisors.

Governance and Nomination Committee

The Governance and Nomination Committee consists of four members. The Governance and Nomination Committee meets and consults regularly with management and external consultants. The Governance and Nomination Committee regularly reports to the full Board on its decisions and deliberations.

The primary responsibilities of this committee include:

- designing, reviewing and recommending corporate governance principles to the Board;
- overseeing Alcon's strategy and reputation regarding Social Impact and Sustainability (SIS) matters (including climate change) and annually preparing Alcon's Social Impact and Sustainability Report and submitting it to the Board for approval;
- establishing criteria and identifying candidates for election as Directors;
- assessing existing Directors and recommending to the Board whether they should stand for re-election;
- developing and reviewing an onboarding program for new Directors and an ongoing education plan for existing Directors;
- reviewing periodically the Articles of Incorporation with a view to reinforcing shareholder rights;
- reviewing periodically the composition and size of the Board and its committees;
- directing periodic assessments of the Board, directors and committees;
- reviewing annually the independence status of each Director; and
- reviewing directorships and agreements of Directors for conflicts of interest and dealing with conflicts of interest.

Alcon is committed to fostering a sustainable business that supports the well-being of our associates, communities, customers, and the planet. Our SIS objectives are integrated into our decision-making processes to deliver long-term value for shareholders. SIS is a key component of Alcon's governance framework and is overseen by the Board, primarily through the Governance and Nomination Committee. Additionally, the Alcon SIS Executive Steering Committee guides environmental and social impact strategies and initiatives. The implementation of these strategies and day-to-day activities is carried out by subject matter experts across the enterprise, led by the Global Head of SIS. Our robust SIS governance structure ensures that SIS objectives are considered throughout our decision-making processes. Quantifiable SIS metrics are included in all Executive Committee members' performance goals, impacting the Individual Performance Factor in the Short-Term Incentive compensation.

Sustainability Governance Structure

Innovation Committee

The Innovation Committee consists of four members. The Innovation Committee meets and consults regularly with management. The Innovation Committee regularly reports to the full Board on its decisions and deliberations.

The primary responsibilities of this committee include:

- providing counsel to the Board and management in the area of technology, application of technology and new business models;
- reviewing and making recommendations to the Board on internal pipeline and external investments (e.g. potential acquisitions, equity investments, alliances and collaborations) relative to Alcon's business portfolio, forecasted capital and operating capacity during the strategic and operating reviews;
- reviewing, evaluating and advising the Board on the strategic direction and competitiveness of the innovation pipeline through the evaluation of key innovation metrics;
- setting, reviewing, scoring and recommending for approval any innovation metrics/targets that may be incorporated into Alcon's incentive compensation plans applicable to the ECA members;
- assisting the Board with oversight, risk management and evaluation of management's criteria for selecting major new R&D and BD&L projects, assessing progress against major milestones, budget execution and post-launch revenue impact;
- reviewing, discussing and informing the Board of significant emerging science, technology, programs, issues or trends relevant to Alcon; and
- reviewing such other matters in relation to Alcon research and development, technology and innovation programs as the committee may, in its own discretion, deem desirable in connection with its responsibilities.

Frequency, Duration and Attendance of the Meetings of the Board of Directors and its Committees

The Board and its Committees are convened as often as the conduct of the business may require.

In 2025, the Board and its Committees met as follows:

| | Board of Directors | Audit and Risk Committee | Compensation Committee | Governance and Nomination Committee | Innovation Committee |
|-------------------------------------------|--------------------|--------------------------|------------------------|-------------------------------------|----------------------|
| Number of meetings | 7 | 8 | 5 | 4 | 4 |
| Approximate average duration ¹ | 5 hrs 50 min | 1 hr 40 min | 2 hrs | 2 hrs 05 min | 2 hrs 15 min |
| Overall attendance | 97.5% | 100% | 95% | 100% | 90% |

¹The approximate average duration does not include dinners, lunches or breaks.

During 2025, each Board member attended the meetings of the Board and each Committee on which he or she serves, as represented below:

| Meeting attendance ¹ | Board of Directors | Audit and Risk Committee | Compensation Committee | Governance and Nomination Committee | Innovation Committee |
|-------------------------------------|--------------------|--------------------------|------------------------|-------------------------------------|----------------------|
| | Number of Meetings | Number of Meetings | Number of Meetings | Number of Meetings | Number of Meetings |
| | 7 | 8 | 5 | 4 | 4 |
| F. Michael Ball | 6 | | | 4 | |
| Lynn D. Bleil | 7 | 8 | | | 4 |
| Arthur Cummings | 7 | | | | 4 |
| Deborah Di Sanzo² | 2 | | | | |
| David J. Endicott | 7 | | | | |
| Thomas Glanzmann | 7 | | 5 | 4 | 4 |
| D. Keith Grossman | 7 | | | 4 | 4 |
| Scott Maw | 7 | 8 | 4 | | |
| Karen May | 7 | 8 | 5 | | |
| Ines Pöschel | 7 | | 5 | 4 | |
| Dieter Spälti | 7 | 8 | | | |

¹ Raquel Bono did not attend any meeting of the Innovation Committee until she stepped down as a board member as of May 6, 2025.

² While she joined the board on September 1, 2025, Deborah Di Sanzo was appointed as a member of the Audit and Risk Committee on December 12, 2025. Therefore, she did not attend any committee meeting in 2025.

Board Evaluation and Education

The Governance and Nomination Committee and the Chair of the Board coordinate an annual self-evaluation of the Board and its Committees, which includes individual interviews with the Board Chair and the completion of a confidential survey by Board members. The Chair summarizes for the Board the results of the evaluation, and any findings are appropriately addressed. In addition, each Committee conducts its own self-evaluation annually. Periodically, the Governance and Nomination Committee will engage a third party to conduct the Board and Committee evaluation process. In 2024, a third party conducted the interviews with Board members and provided an assessment to the Chair and the full Board.

The Board recognizes the value of independent development and learning by its members. Therefore, it established a Director Education Program for its members, the purpose of which is to provide for internal and external speakers on trending topics, experiential learning of Alcon and its industry through site tours and product demonstrations and, at each Board member's option, externally provided coursework. The intent of the Director Education Program is to ensure Board members are well-versed in matters related to Alcon, its business and the rapidly changing corporate governance environment.

Information and Control System of the Board vis-à-vis the Management

The Board ensures that it receives through several channels sufficient information from the Executive Committee to perform its supervisory duties and to make the decisions that are reserved to it by law, i.e. its non-delegable decisions.

Information to the Board of Directors

The Alcon Board Regulations confer to the members of the Board the right to have full and unrestricted access to management and associates of the Company and its subsidiaries in the execution of their duties. Also, the Chief Executive Officer regularly informs the Board regarding the performance of the business including risks and potential upsides to the operating plan. The Board and its Committees meet as often as required with the Chief Executive Officer and members of the Executive Committee or other members of the senior management. Further, the Board may invite, in accordance with the Alcon Board Regulations, external advisors to attend board or committee meetings in order to obtain a third party independent perspective on certain topics. Information is further communicated to the Board through regular reports (please refer to the section below “Alcon Management Information System”).

Alcon Management Information System

The Board receives monthly reports on the financial performance of the Company, including the performance of the Surgical and Vision Care segments. On a quarterly basis, prior to the release of each quarter’s results, the Board receives the Consolidated Financial Statement information and an outlook of the full-year results together with related commentary.

On an annual basis, the Board receives and approves the financial targets for the fiscal year. Mid-year, the Board meets for a strategic review of the business and approves the strategic plan for the next five years. Additionally, throughout the year, the Board directly or through its Committees also receives reports on, among other things:

- the enterprise risk management program and risk assessment reports;
- the compliance program;
- the internal audit function;
- manufacturing and technical operations;
- research and development and product pipeline;
- SIS matters;
- organic and inorganic innovation;
- commercial strategies and product launches;
- digital commerce opportunities;
- legal matters;
- competitive developments; and
- industry trends.

In matters of significance, the Board receives direct, immediate information.

Internal Audit

The purpose of the internal audit function is to review Alcon’s financial, operational, information technology and compliance activities to review compliance with laws, regulations and internal policies. It also supports Alcon’s efforts to maintain accurate and timely financial reporting while seeking to add value by suggesting improvements to Alcon’s operations and to assist Alcon in achieving its strategic and financial objectives. Internal audit is led by the Chief Audit Executive (“CAE”) who functionally reports to the Chair of the Audit and Risk Committee. The CAE is responsible for the development, review and modification of Alcon’s internal audit policies and procedures. The CAE reviews effectiveness and efficiency of the internal control framework with existing policies and regulations and proposes remediation actions where deficiencies were identified. The CAE periodically submits to the Audit and Risk Committee reports on the activities of the internal audit function. In 2025, internal audit was involved in a total of 73 audit engagements. The results and remediation status of these audit engagements are reported to the Audit and Risk Committee on a periodic basis. At the final meeting for the year 2025, the Audit and Risk Committee reviewed and approved the Internal Audit plan for 2026.

Internal Control System

Alcon's internal control system is designed to provide reasonable assurance to the Board and management regarding the reliability of financial reporting and accounting policies and the preparation and the presentation of the Company's financial statements. In 2025, Alcon's internal controls framework has been fully tested for effectiveness. The Audit and Risk Committee has ultimate responsibility to oversee the adequacy and effectiveness of internal control over financial reporting.

Risk Management

The Audit and Risk Committee has the responsibility to ensure the implementation of an appropriate and effective risk management system and process and to foster a culture of risk-adjusted decision-making without constraining reasonable risk taking and innovation. It approves guidelines and reviews policies and processes. In addition, the Audit and Risk Committee reviews with management, internal auditors and external auditors, the identification, prioritization and management of the risks, the accountabilities and roles of the functions involved with risk management, the risk portfolio and the related actions implemented by management. The Audit and Risk Committee informs the Executive Committee and the Board on a periodic basis on the risk management system and on the most significant risks and how these are managed. The CAE supports the Audit and Risk Committee and performs appropriate reviews of Alcon's risk management strategy.

Alcon's key risk management tool is the Enterprise Risk Management ("ERM") program, the purpose of which is to help execute on Alcon's strategy within the boundaries of regulations and improve the probability of achieving Alcon's strategic and financial objectives. Alcon's vision is to design a sustainable and appropriately scaled ERM program to proactively manage existing and emerging threats and opportunities to the business. The ERM program aims in particular to provide the business with the following: (i) operation discipline and rigor to enable business continuity, creation and preservation of value, (ii) forums for frequent risk discussions and escalation of relevant items with leadership and (iii) guidance, techniques and support to identify, assess (e.g. likelihood and impact), manage, monitor and report on major risks, including proper mitigation if necessary. The ERM program is under the supervision of a dedicated committee that is comprised of senior members of management and the members of the Audit and Risk Committee.

Compliance Function

As part of its global control system, Alcon has established a comprehensive global integrity and compliance program, under the supervision of the Audit and Risk Committee. The program is led by the Global Head, Integrity and Compliance under the functional leadership of Alcon's General Counsel and is intended to help prevent, detect and mitigate compliance risk across the organization. The program is built on a culture and expectation of compliance at all levels. The fundamental elements of the program include dedicated resources to address compliance globally, formal compliance governance, a global intake process to receive questions and concerns (including through Alcon's Ethics Helpline), written standards, communications, training, multiple levels of risk-based auditing and monitoring, review of alleged misconduct and corrective/disciplinary actions for violations. The Audit and Risk Committee receives periodic updates on the performance of the Integrity and Compliance program and compliance related matters. The program also includes compliance committees, which have been established at the corporate, regional and country-levels and include participation by the Executive Committee and other senior leadership to provide strategic direction and oversight relating to the management of compliance risks for Alcon. Policies are reviewed and updated on a regular basis to address changes in laws and regulations and to strengthen compliance.

Executive Committee

Composition of the Executive Committee

As of December 31, 2025, the Executive Committee of Alcon was composed of the following members (ages listed are as of December 31, 2025):

David J. Endicott, Chief Executive Officer

Please refer to the biography set forth under "Board of Directors."

Age: 60

Citizenship:
United States

Laurent Attias, SVP, Corporate Strategy, Business Development and Licensing (BD&L) and Mergers and Acquisitions (M&A)

Laurent Attias is Senior Vice President, Corporate Strategy, BD&L and M&A, leading the development of long-term strategic plans for the Surgical and Vision Care segments of Alcon, a role he has held since 2015. Since 1994 when Mr. Attias joined Alcon, he has had various roles with increasing responsibility beginning with positions in Alcon's Sales and Marketing functions and then holding the positions of Vice President, Refractive Sales and Marketing from 2002 to 2007; Vice President/General Manager of Alcon Canada from 2007 to 2009; Vice President, Central & Eastern Europe, Italy and Greece from 2009 to 2010; and President, Europe, Middle East and Africa ("EMEA") from 2010 to 2012. From 2012 to 2015, as Senior Vice President of Global Commercial Franchises, Mr. Attias led all commercial execution and product pipeline activities of Alcon's Surgical, Pharmaceutical and Vision Care franchises.

Mr. Attias holds both a Bachelor of Business Administration in Marketing and a Master of Business Administration from Texas Christian University in the United States.

Ian Bell, SVP, Chief Operating Officer

Ian Bell is Senior Vice President, Chief Operating Officer driving excellence in commercial, manufacturing and quality and regulatory operations. Prior to assuming this role in September 2024, Mr. Bell served as President, Global Business & Innovation since 2021 overseeing the development of new products across Surgical, Vision Care, and Digital Health Solutions. From 2019 until 2021, he was President-International, overseeing the Europe, Russia, Middle East and Africa, Asia Pacific, Japan and Latin America and Caribbean markets. He joined Alcon in 2016 as President of EMEA. From 2014 until joining Alcon, Mr. Bell served as Corporate Vice President and President of the EMEA region for Hospira, Inc. Mr. Bell was based in Singapore as the Corporate Vice President and President of Allergan, Inc.'s Asia Pacific region from 2008 to 2014. Mr. Bell joined Allergan in 2005 as Vice President and Managing Director of its neurosciences division for the EMEA region. He began his career at GlaxoSmithKline plc, where he held roles of increasing responsibility and scope in sales, marketing and strategy for more than 10 years.

Mr. Bell holds the degree of Bachelor of Arts with honors in Economics from the University of York in the United Kingdom.

Age: **55**

Citizenship:
United Kingdom

Leon Sergio Duplan Fraustro, SVP, President, Americas

Sergio Duplan is Senior Vice President, President, Americas overseeing the US, Latin America and Canadian markets. Mr. Duplan joined Alcon in 2012 and served as Alcon's President of Latin America and Canada for three years. Mr. Duplan began his career with Novartis in 2004, as Vice President of Sales in General Medicines, in Mexico then served as Head of Marketing and Sales for Latin America, General Medicines, Pharma from 2006 to 2008 and then Country Pharma Organization Head and Country President of Novartis Mexico from 2008 to 2012. Prior to joining Novartis, Mr. Duplan held several positions of increasing responsibility in sales, finance and country management at Procter & Gamble Company and Eli Lilly & Co.

Mr. Duplan holds a Bachelor's degree in Industrial Engineering from Universidad Iberoamericana in Mexico and a Master's of Business Administration from The Wharton School at the University of Pennsylvania in the United States.

Age: **58**

Citizenship:
Mexico and United States

Kim Martin, SVP, Chief Human Resources and Corporate Communications Officer

Kim Martin is Senior Vice President, Chief Human Resources and Corporate Communications Officer for Alcon. She leads the talent, culture, communication and organization strategies across Alcon's more than 25,000 associates. Prior to joining Alcon in 2020, Ms. Martin was Chief Human Resources Officer for Worldpay, a global payment processing and technology provider, from 2010 to 2019. She also served as an executive human resources leader at Zimmer Holdings Inc. for five years, as well as more than 11 years in progressive human resources and talent acquisition positions at General Electric Healthcare. Since 2021, she has served on the board of directors of Accentcare, Inc., a home health and hospice services company.

Ms. Martin attended the University of Illinois Urbana-Champaign, in the US, where she received her Bachelor of Arts in Speech Communications and her Masters in Labor and Industrial Relations.

Rajkumar Narayanan, SVP, President, International

Raj Narayanan is Senior Vice President, President, International overseeing the Europe, Russia, Middle East and Africa, Asia Pacific, China, Japan, and Caribbean markets. Mr. Narayanan has led Alcon's International business since 2021. From 2019 until he was appointed to his current role, he was Senior Vice President, Operational Strategy and Chief Transformation Officer and was responsible for leading the development and implementation of Alcon's transformation program. He joined Alcon in 2017 as President of the Asia Pacific region from Allergan, Inc., where he worked for more than 20 years in roles of increasing responsibility, including Senior Vice President Asia Pacific Region from 2014 to 2017; Vice President and Managing Director of the Medical Aesthetic Franchise for Europe Africa and the Middle East from 2011 to 2014; and Vice-President, Greater China and Japan from 2008 to 2011. Prior to those roles, Mr. Narayanan was a part of Allergan's Finance function in a number of country, region and corporate finance roles. Mr. Narayanan started his career in finance with Hindustan Unilever India in 1987.

Mr. Narayanan holds a Bachelor of Science degree in Accounting and Finance from Mumbai University. He is also a Chartered Accountant and a Cost and Works Accountant in India.

Age: **61**

Citizenship:
United States

Timothy C. Stonesifer, SVP, Chief Financial Officer

Tim Stonesifer is Senior Vice President, Chief Financial Officer, a role he has held since 2019. Prior to joining Alcon, he served as Executive Vice President and Chief Financial Officer at Hewlett Packard Enterprise from 2015 through 2018. Prior to that role, Mr. Stonesifer acted as Senior Vice President and Chief Financial Officer, Enterprise Group at HP Co. since 2014. Before joining HP Co., he served as Chief Financial Officer of General Motors' International Operations from 2011 to 2014. Previously, he served as Chief Financial Officer of Alegco Scotsman, a storage company, from 2010 to May 2011; Chief Financial Officer of Sabic Innovative Plastics (formerly GE Plastics) from 2007 to 2010; and various other positions at General Electric since joining the company in 1989. He has served on the board of directors of Insulet Corporation since January 2024.

Age: **58**

Citizenship:
United States

Mr. Stonesifer holds a Bachelor of Arts in Economics from the University of Michigan in the United States.

Role of the Executive Committee

The members of the Executive Committee are appointed by the Board. In accordance with the Articles of Incorporation and the Alcon Board Regulations, the Board delegated the responsibility for the management of the business to the Executive Committee, under the lead of the Chief Executive Officer.

The Executive Committee shall in particular (i) develop strategies and policies and implement those upon approval by the Board, (ii) coordinate and monitor the group's functions to achieve the business targets, (iii) ensure the efficient operation of the group, (iv) manage the proper provision and use of capacity and financial and other resources within the group and (v) ensure the development and succession of the senior management.

Alcon has not entered into any management agreements with any third parties pursuant to which Alcon would delegate any business management responsibilities to any such third parties.

As of December 31, 2025, none of the members of the Executive Committee held any official functions or political posts.

Limitations of Number of Mandates

No member of the Executive Committee may hold more than six additional mandates in other companies, of which no more than two additional mandates shall be in other listed companies. Each of these mandates shall be subject to approval by the Board. Members of the Executive Committee are not allowed to hold chairs of the board of directors of other listed companies. Mandates shall mean mandates in comparable functions at other organizations with an economic purpose. Mandates in different legal entities which are under joint control are deemed one mandate. Further details can be found in Article 34 of the Articles of Incorporation, available at https://s1.q4cdn.com/963204942/files/doc_downloads/governance_doc/2023/Alcon-AG-Articles-EN.pdf.

Compensation, Shareholdings and Loans

Please refer to "Item 6.B - Compensation".

Shareholders' Participations Rights

Voting-right Restrictions and Representation

Alcon has not imposed any restriction regarding share ownership or voting rights. Nominees shareholdings are not subject to any limitations. The right to vote at Alcon general meetings may only be exercised by a shareholder, usufructuary or nominee who is duly registered in Alcon share register on the record date for the applicable general meeting. Shareholders can be represented at general meetings by the independent proxy or by a third person authorized by written proxy who does not need to be a shareholder. As required by law, shareholders will also be given the opportunity to issue their voting instructions to the independent proxy electronically through an online voting platform.

Each Alcon share has the right to one vote. Shares held by the Company or any of its consolidated subsidiaries are not entitled to vote. Votes are taken either by a show of hands or by electronic voting, unless the General Meeting of Shareholders resolves to have a ballot or where a ballot is ordered by the chair of the meeting. Further information can be found in Article 16 of the Articles of Incorporation, available at https://s1.q4cdn.com/963204942/files/doc_downloads/governance_doc/2023/Alcon-AG-Articles-EN.pdf.

Statutory Quorums

Unless otherwise required by law, the General Meeting passes resolutions and elections with the absolute majority of the votes duly represented.

According to Article 704 of the Swiss Code of Obligations and as reflected in Article 18 of Alcon's Articles of Incorporation, the following shareholders' resolutions require the approval of at least two thirds of the votes represented at a General Meeting of Shareholders: (1) an alteration of Alcon's corporate purpose; (2) the combination of shares, (3) the creation of shares with increased voting powers; (4) the change of currency of the share capital; (5) an implementation of restrictions on the transfer of registered shares and the removal of such restrictions; (6) the introduction of shares with privileged voting rights; (7) the introduction of a capital range or the introduction of a conditional share capital; (8) an increase of the share capital through the conversion of equity surplus, against contributions in kind or by set-off against a claim and the grant of special rights; (9) a restriction or suspension of rights of option to subscribe to new shares; (10) the delisting of Alcon equity securities; (11) a provision of the Articles of Incorporation on holding the General Meeting abroad; (12) the introduction of an arbitration clause in the Articles of Incorporation; (13) a change of Alcon's registered office; (14) Alcon's dissolution; (15) any other matters that are reserved by law or the Articles of Incorporation; or (16) any amendment to the Articles of Incorporation which would create or eliminate a qualified majority requirement.

Article 704 of the Swiss Code of Obligations also provides that the introduction by the General Meeting of a casting vote for the person chairing the General Meeting requires a qualified majority.

Swiss law further provides for a qualified majority for certain special resolutions, such as in case of merger or demerger.

Convocation of General Meetings

The Annual General Meeting shall be held within six months after the close of the financial year of the Company. Extraordinary General Meetings may be convened upon request of the Alcon Board, the auditors or one or more shareholders representing in aggregate not less than 5% of the Company's share capital. At least 20 days before the General Meeting, the invitation including the agenda is published in the Swiss Gazette of Commerce and can be mailed to the registered shareholders.

Agenda

One or more Alcon shareholders whose combined shareholdings represent an aggregate nominal value of at least 0.5% may demand that an item be included in the agenda of a General Meeting of Shareholders, or that a proposal relating to an agenda item be included in the notice convening the General Meeting of Shareholders. Such a demand must be made in writing at the latest 45 days before the meeting and shall specify the items and the proposals of such shareholder.

Registration in the Share Register

The share register of the Company is a non-public register, subject to confidentiality and privacy and data protections imposed on Alcon to protect registered shareholders. Alcon shares can be voted only if their relevant holder is registered in the Alcon share register by the record date. As the Articles of Incorporation do not provide for any specific rule regarding the closure of the share register, the Board determines the record date, which is usually set two weeks prior to the Annual General Meeting, notably taking into consideration requirements of the NYSE.

Changes of Control and Defense Measures

Duty to Make an Offer

Under the Swiss Financial Market Infrastructure Act, shareholders and groups of shareholders acting in concert who acquire more than 33.3% of Alcon shares would be under an obligation to make an offer to acquire all remaining Alcon shares. Alcon has neither opted out from the mandatory takeover offer obligation nor opted to increase the threshold for mandatory takeover offers in the Articles of Incorporation.

Clauses on Change of Control

In accordance with the Swiss rules against excessive compensation in listed companies, Alcon does not provide severance payments upon a change of control or “golden parachute” provisions in its agreements with its Directors, Executive Committee members or other members of senior management. Alcon’s Long Term Incentive Plan, which is applicable to all employee participants including Executive Committee members, provides for double trigger accelerated vesting of outstanding stock awards in the event a participant leaves the company for “good reason” or Alcon terminates the associates without “cause,” as such terms are defined in the plan, within two years following a change of control. If such a double trigger event occurs, the participant’s outstanding unvested awards would vest in full. In the case of Performance Share Units, awards less than 50% vested would vest at target and awards more than 50% vested would vest in accordance with Alcon’s actual performance, as determined by the Compensation Committee.

Auditors

Duration of the Mandate and Terms of Office of the Auditors

PricewaterhouseCoopers SA, Switzerland (“PwC Switzerland”), has been the statutory auditor of the Company since 2019 and conducts the audit activities required by Swiss law and the related SIX regulations. It was re-elected on May 6, 2025 for a term of one year for the 2025 financial year. Claudia Benz has been since 2024 the new auditor in charge of the statutory audit as Alcon has a policy to rotate the lead audit partner of the statutory auditor at least once every five years.

Separately, on February 19, 2025, the Company appointed PricewaterhouseCoopers LLP, United States (“PwC US”) (PCAOB ID No. 238), for a term of one year, as its independent registered accounting firm to conduct the audit activities required by US law and the related NYSE regulations. PwC US performs the audit from offices located in Fort Worth, Texas. The appointment of PwC US does not require approval of the Company’s shareholders.

Auditing Fees and Additional Fees

The following table sets forth the amount of audit fees, audit-related fees, tax fees and all other fees billed or expected to be billed in aggregate by PwC Switzerland, PwC US and any other member firm of PricewaterhouseCoopers International Limited that rendered audit and related services to any member of Alcon, for the fiscal years ended December 31, 2025 and December 31, 2024:

| (\$ millions) | 2025 | 2024 |
|--------------------|-------------|-------------|
| Audit fees | 10.6 | 10.0 |
| Audit related fees | 0.3 | 0.4 |
| Tax fees | 0.2 | 0.1 |
| All other fees | 0.4 | 0.2 |
| Total | 11.5 | 10.7 |

Audit fees include fees billed for professional services rendered for audits of our annual consolidated and stand-alone financial statements, reviews of consolidated quarterly financial information and statutory audits of the Company (including in particular the Compensation Report) and our subsidiaries.

Audit-related fees include fees billed, as applicable, for assurance and related services such as due diligence, accounting consultations and audits in connection with mergers and acquisitions, employee benefit plan audits, internal control reviews and consultations concerning financial accounting and reporting standards, and other limited assurance services including in connection with sustainability reporting.

Tax fees include fees billed for professional services for tax compliance, tax advice and tax planning.

All other fees include non-audit and accounting research services and readiness assessments.

Control Measures over the Activities of the Auditors

The Board has delegated to the Audit and Risk Committee the oversight of the activities of the external auditors. The Audit and Risk Committee evaluates on an annual basis the qualifications and performance of our auditors and will determine whether PwC Switzerland should be proposed to the general meeting to stand for re-election. The criteria applicable to the performance assessment of our auditors include professional competence, sufficiency of resources to complete the audit mandate, independence and objectivity, capability to provide effective and pragmatic recommendations and coordination with the Audit and Risk Committee and other functions of the Alcon group, including internal audit.

Upon recommendation of the Audit and Risk Committee, the Board proposed that the shareholders accept the audited Consolidated Financial Statements of the Alcon group and the financial statements of the Company.

The Audit and Risk Committee is further responsible for the compensation of our auditors and pre-approve all auditing services, internal control-related services and non-audit services permitted under applicable statutory law, regulations and listing requirements.

In 2025, our auditors participated in eight meetings of the Audit and Risk Committee in order to discuss auditing matters and present the 2025 audit strategy and audit results. In addition, our auditors regularly meet in private session with the Audit and Risk Committee and individually with the Chair of the Audit and Risk Committee. Our auditors provide at least once a year to the Audit and Risk Committee a report regarding (i) the external auditor's internal quality-control procedures, (ii) any material issues raised by quality-control reviews or any inquiry or investigation by governmental or professional authorities, (iii) any step taken to deal with such issues and (iv) all relationships between the external auditor and the Alcon group.

Information Policy

Alcon is committed to pursuing an open and transparent communication with shareholders, suppliers, customers, patients and associates. It publishes information in a professional manner in accordance with best practices and legal requirements.

Investor Relations

Effective communication with shareholders is an important part of Alcon's governance framework. Therefore, the Company is committed to actively engaging with shareholders and keeping them informed about Alcon's business, governance, strategy and performance, in accordance with applicable laws and regulations. Supported by the Investor Relations team, the Board Chair leads and supervises the annual shareholder outreach initiative, while the CEO and the CFO are responsible for the management of the activities necessary to maintain transparent and open shareholder relationships. The Company believes engagement and dialogue with the capital markets is crucial in securing support and confidence in management's leadership and Board's governance of Alcon. The Investor Relations team regularly organizes opportunities to learn about the Company through in-person and virtual meetings throughout the year, subject to its quiet period policy.

Communications

Financial information is published in the form of annual and quarterly financial results, in accordance with internationally recognized accounting standards. Related material, including annual reports, forms 20-F, quarterly results releases, investors presentations and conference call webcasts are available on the Alcon investor relations website. From time to time, Alcon issues press releases regarding business developments. Investors may subscribe to receive email distributions providing news and notifications about Alcon. The dissemination of material information about business developments is made in accordance with the rules of the SIX and the NYSE.

Information contained in reports and releases may only be deemed accurate in any material respect at the time of the publication. Past releases are not updated to reflect subsequent events.

Alcon's website provides regular information and updates about the Company at www.alcon.com. Detailed information regarding certain topics may be found as follows:

Social Impact and Sustainability Report

Alcon publishes an annual Social Impact and Sustainability Report, which describes Alcon's corporate responsibility strategy and highlights Alcon's approach to SIS matters. This 2024 report is available at <https://alcon.widen.net/s/hfr2v6hpgm/alcon-2024-sustainability-and-social-impact-report>.

Quiet Periods

The Company has strict internal policies regarding insider trading, in line with applicable regulations and international best practice standards.

Quiet Periods start fourteen days prior to the beginning of the last trading day of each calendar quarter and end following the first full trading day after the date of the release of the quarterly and/or annual results, unless otherwise designated by the Alcon Disclosure Committee. The Company has identified a certain number of Continuing Insiders, i.e. key individuals who may continuously be in possession of material non-public information, that are prohibited from trading in any Alcon securities during Quiet Periods and may trade in any such securities outside of Quiet Periods only with the prior written approval of the Company's corporate legal department.

In addition, Alcon associates may be designated Temporary Insiders in connection with confidential projects. In this capacity, they are prohibited to trade, during a certain period of time defined as a No Trading Period, in any securities of either Alcon or another company in which any such Alcon associate may have acquired material non-public information.

Differences in Corporate Governance Standards

According to the NYSE listing standards on corporate governance, listed foreign private issuers are required to disclose any significant ways in which their corporate governance practices differ from those governance practices that must be followed by NYSE-listed US domestic companies. We briefly summarize those differences in the following paragraphs.

Responsibility of the Audit Committee with regard to Independent Auditors

Our Audit and Risk Committee is responsible for the compensation, retention and oversight of our independent statutory auditors. It assesses the performance and qualification of our statutory auditors and submits its proposal for appointment, reappointment or removal of our statutory auditors to the full Board. As required by the Swiss Code of Obligations, our Board then submits its proposal to the shareholders for their vote at the Annual General Meeting. In contrast, under NYSE listing standards, the audit committee for US domestic companies is responsible for the appointment of the independent auditors.

Supervision of the Internal Audit Function

The CFO and the Audit and Risk Committee share the supervisory responsibility with respect to the internal audit function. In contrast, under NYSE standards, only the audit committee supervises the internal audit function.

Responsibility of the Compensation Committee for Performance Evaluations of Senior Management

In line with Swiss law, our Compensation Committee, together with the Board, proposes for shareholder approval at the Annual General Meeting the maximum aggregate amount of compensation for the Board and the maximum aggregate amount of fixed and variable compensation for the Executive Committee. Our shareholders elect each of the members of the Compensation Committee at the Annual General Meeting. In contrast, under NYSE standards, it is the responsibility of the compensation committee to evaluate senior management performance and to determine and approve, as a committee or together with the other independent directors, the compensation for senior officers and the board. US domestic companies listed on NYSE are required only to provide shareholders a periodic advisory non-binding vote on a company's executive compensation practices.

Shareholders' Votes on Equity Compensation Plans

Swiss law authorizes the Board to approve equity-based compensation plans. Shareholder approval is only mandatory if equity-based compensation plans require an increase in capital. No shareholder approval is required if shares for issuance under such plans are purchased by the issuer in the open market. In contrast, the NYSE standards require shareholder approval for the establishment of and material revisions to all equity compensation plans.

6.D. EMPLOYEES

The table below sets forth the breakdown of the total year-end number of our full-time equivalent associates by main category of activity for the past three years.

| | For the year ended December 31, | | |
|----------------------------------------------|---------------------------------|---------------|---------------|
| | 2025 | 2024 | 2023 |
| Production & Supply | 12,278 | 12,414 | 12,639 |
| Marketing & Sales | 8,578 | 8,346 | 8,124 |
| General & Administration | 2,302 | 2,282 | 2,166 |
| Research & Development (including support) | 2,784 | 2,557 | 2,386 |
| Total full-time equivalent associates | 25,942 | 25,599 | 25,315 |

Unions or works councils represent a significant number of our associates. We have not experienced any material work stoppages in recent years, and we consider our associate relations to be good.

6.E. SHARE OWNERSHIP

The information set forth under "Item 6.B. Compensation" is incorporated by reference. Also, refer to Note 23 to the Consolidated Financial Statements for a discussion of our equity-based compensation programs.

6.F. DISCLOSURE OF A REGISTRANT'S ACTION TO RECOVER ERRONEOUSLY AWARDED COMPENSATION

None.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

7.A. MAJOR SHAREHOLDERS

The information set forth under “Item 6. Directors, Senior Management and Employees—6.C. Board Practice—Corporate Governance” is incorporated by reference.

7.B. RELATED PARTY TRANSACTIONS

In December 2023, we acquired approximately 8.5% voting interest of an associated company for \$10 million which was accounted for using the equity method as Alcon is considered to have the ability to exercise significant influence. On January 16, 2025, Alcon executed a stock purchase agreement and purchased the remaining equity interest of the associated company for \$78 million.

In 2025, Alcon acquired additional shares of an associated company for \$548 million. As of December 31, 2025, Alcon owned approximately 99% of this company's outstanding shares.

7.C. INTERESTS OF EXPERTS AND COUNSEL

Not Applicable.

ITEM 8. FINANCIAL INFORMATION

8.A. CONSOLIDATED STATEMENTS AND OTHER FINANCIAL INFORMATION

Please refer to the financial statements beginning on page F-1 of this Annual Report.

Legal Proceedings

Please refer to Note 18 Provisions and other non-current liabilities of the financial statements beginning on page F-1 of this Annual Report.

Dividend Policy

Alcon expects that it will continue to recommend to shareholders the payment of a regular annual cash dividend based on the prior year's core net income; however, the declaration, timing and amount, including potential increases, of any dividends will be subject to the approval of our shareholders at a General Meeting. The determination of the Board as to whether to recommend a dividend and the approval of any such proposed dividend by our shareholders will depend upon many factors, including our financial condition, earnings, corporate strategy, capital requirements of our operating subsidiaries, covenants, legal requirements and other factors deemed relevant by the Board and shareholders. For additional information, see "Item 3. Key Information—3.D. Risk Factors—Risks related to the Ownership of our Shares—We may not pay or declare dividends".

For information about deduction of the withholding tax or other duties from dividend payments, see "Item 10. Additional Information—10.E. Taxation—Swiss Taxation—Swiss Residents—Withholding Tax on Dividends" and "Item 10. Additional Information—10.E. Taxation—US Federal Income Taxation—Distributions on the Shares".

8.B. SIGNIFICANT CHANGES

A discussion of significant changes in our business can be found under "Item 4. Information on the Company —4.A. History and Development of the Company", "Item 4. Information on the Company — 4.B. Business Overview" and "Item 5. Operating and Financial Review and Prospects — 5.A. Operating Results".

ITEM 9. THE OFFER AND LISTING

9.A. OFFER AND LISTING DETAILS

Alcon Inc. shares are listed on the SIX and the NYSE as global registered shares under the trading ticker “ALC”. As such, they can be traded and transferred across applicable borders, without the need for conversion, with identical shares traded on different stock exchanges in different currencies. During 2025, the average daily trading volume of Alcon Inc. shares was approximately 1.1 million shares on the SIX and 1.8 million shares on the NYSE.

As of the date of this Annual Report, our shares are included in a number of indices, including the “Swiss Market Index”, or SMI, the principal Swiss index published by the SIX. This index contains 20 of the largest and most liquid stocks based on market capitalization and the most active stocks listed on the SIX. The SMI indicates trends in the Swiss stock market as a whole and is one of the most widely followed stock price indices in Switzerland.

9.B. PLAN OF DISTRIBUTION

Not Applicable.

9.C. MARKETS

See “Item 9.A. Offer and listing Details.”

9.D. SELLING SHAREHOLDERS

Not Applicable.

9.E. DILUTION

Not Applicable.

9.F. EXPENSES OF THE ISSUE

Not Applicable.

ITEM 10. ADDITIONAL INFORMATION

10.A. SHARE CAPITAL

Not Applicable.

10.B. MEMORANDUM AND ARTICLES OF ASSOCIATION

The information set forth in Exhibit 2.1 to this Form 20-F is incorporated herein by reference.

10.C. MATERIAL CONTRACTS

As of February 16, 2026, since January 1, 2023, there have been no material contracts, other than contracts entered into in the ordinary course of business, to which Alcon is a party.

10.D. EXCHANGE CONTROLS

There are no Swiss governmental laws, decrees or regulations that restrict, in a manner material to Alcon, the export or import of capital, including any foreign exchange controls, or that generally affect the remittance of dividends or other payments to non-residents or non-citizens of Switzerland who hold Alcon shares.

10.E. TAXATION

The taxation discussion set forth below is intended only as a general summary and does not purport to be a complete analysis or listing of all potential tax considerations relevant to the ownership or disposition of our shares. The statements of US and Swiss tax laws set forth below are based on the laws and regulations in force as of the date of this Annual Report, including the current Convention Between the United States and the Swiss Confederation for the Avoidance of Double Taxation with Respect to Taxes on Income, entered into force on December 19, 1997 (the "Treaty"), and the US Internal Revenue Code of 1986, as amended (the "Code"), Treasury Regulations, rulings, judicial decisions and administrative pronouncements, all as in effect on the date hereof, and all of which are subject to change (possibly with retroactive effect) and to differing interpretations.

Swiss Taxation

The following is a general summary of certain tax consequences relating to owning and disposing of Alcon shares based on the Swiss tax laws and regulations and regulatory practices in force on the date of this Annual Report. Tax consequences are subject to changes in applicable law (or subject to changes in interpretation), including changes that could have a retroactive effect.

This is not a complete summary of the potential Swiss tax effects relevant to the Alcon shares nor does the summary take into account or discuss the tax laws of any jurisdiction other than Switzerland. For example, this summary does not address estate, gift, inheritance, capital or wealth taxes. It also does not take into account investors' individual circumstances. This summary does not purport to be a legal opinion or to address all tax aspects that may be relevant to any particular investor.

YOU ARE URGED TO CONSULT YOUR OWN TAX ADVISOR WITH RESPECT TO ACQUIRING, OWNING AND DISPOSING OF ALCON SHARES.

Swiss Residents

Withholding Tax on Dividends

Dividends that we pay and any similar cash or in-kind distributions we may make to a holder of our shares (including distributions of liquidation proceeds in excess of the nominal value, stock dividends and, under certain circumstances, proceeds from repurchases of shares by us in excess of the nominal value) are generally subject to a Swiss federal withholding tax (the "Withholding Tax") at a current rate of 35%. We are required to withhold this Withholding Tax from the gross distribution and to pay the Withholding Tax to the Swiss Federal Tax Administration. The Withholding Tax is refundable in full to Swiss residents who are the beneficial owners of the taxable distribution at the time it is resolved and duly report the gross distribution received on their personal tax return or in their financial statements for tax purposes, as the case may be. Under certain circumstances distributions out of capital contribution reserves made by shareholders after December 31, 1996 are exempt from the Withholding Tax.

Swiss Transfer Stamp Duty upon Transfer of Securities

The sale of our shares, whether by Swiss residents or Non-resident Holders, may be subject to federal securities Transfer Stamp Duty (*Umsatzabgabe*) of 0.15%, calculated on the gross sale proceeds, if the sale occurs through or with a Swiss or Liechtenstein bank or other Swiss securities dealer (*Effekthändler*), as defined in the Swiss Federal Stamp Duty Act. The Transfer Stamp Duty has to be paid by the securities dealer and may be charged to the parties in a taxable transaction who are not securities dealers. In addition to this Transfer Stamp Duty, the sale of shares by or through a member of the SIX may be subject to a minor stock exchange levy.

Income Tax on Dividends

A Swiss Holder who holds Alcon shares as private assets ("Swiss Resident Private Shareholder") is required to report the receipt of dividends and similar distributions (including stock dividends and liquidation surplus) in its individual income tax returns and is subject to Swiss federal, cantonal and communal income tax on any net taxable income for the relevant tax period. Repayments of the nominal value of Alcon shares or capital contribution reserves recognized by the Swiss Federal Tax Administration are not subject to federal, cantonal and communal income tax.

A Swiss Holder who is Swiss resident for tax purposes, a non-Swiss individual who is subject to Swiss income tax for reasons other than residency and a legal entity tax resident in Switzerland, in each case that holds Alcon shares as business assets, and a non-Swiss tax resident legal entity that holds Alcon shares as part of a Swiss permanent establishment or fixed place of business (each, a "Swiss Resident Commercial Shareholder") is required to recognize dividends and similar distributions (including stock dividends and liquidation surplus) on Alcon shares in its income statement for the relevant taxation period and is subject to Swiss federal, cantonal and communal individual or corporate income tax, as the case may be, on any net taxable earnings for such taxation period. The same tax treatment also applies to a Swiss Holder who, for income tax purposes, is classified as a "professional securities dealer" for reasons of, *inter alia*, frequent dealing, or leveraged investments, in shares and other securities. Swiss Resident Commercial Shareholders who are corporate taxpayers may be eligible for a participation deduction (*Beteiligungsabzug*) in respect of dividends if the Alcon shares held by them as part of a Swiss business have an aggregate market value of at least CHF 1 million.

Taxes upon Disposition of Alcon Shares

Capital gains realized on the sale or other disposal of Alcon shares held by a Swiss Resident Private Shareholder are generally not subject to any federal, cantonal or communal income taxation. However, gain realized upon a repurchase of shares by us may be characterized as taxable dividend income if certain conditions are met. Capital gains realized on shares held by a Swiss Resident Commercial Shareholder are, in general, included in the taxable income of such person.

Residents of Other Countries

Recipients of dividends and similar distributions on our shares who are neither residents of Switzerland for tax purposes nor holding shares as part of a business conducted through a permanent establishment situated in Switzerland ("Non-resident Holders") are not subject to Swiss income taxes in respect of such distributions. Moreover, gain realized by such recipients upon the disposal of our shares is not subject to Swiss income tax.

Non-resident Holders of our shares are, however, subject to the Withholding Tax on dividends and similar distributions mentioned above and under certain circumstances to the Transfer Stamp Duty described above. Such Non-resident Holders may be entitled to a partial refund of the Withholding Tax if the country in which they reside has entered into a bilateral treaty for the avoidance of double taxation with Switzerland. Non-resident Holders should be aware that the procedures for claiming treaty refunds (and the time frame required for obtaining a refund) may differ from country to

country. Non-resident Holders should consult their own tax advisors regarding the receipt, ownership, purchase, sale or other dispositions of our shares and the procedures for claiming a refund of the Withholding Tax.

A Non-resident Holder of our shares will not be liable for any Swiss taxes other than the Withholding Tax described above and, if the transfer occurs through or with a Swiss or Liechtenstein bank or other Swiss securities dealer, the Transfer Stamp Duty described above. If, however, the shares of Non-resident Holders can be attributed to a permanent establishment or a fixed place of business maintained by such person within Switzerland during the relevant tax year, the shares may be subject to Swiss income taxes in respect of income and gains realized on the shares and such person may qualify for a full refund of the Withholding Tax based on Swiss tax law.

Residents of the United States

Non-resident Holders who are residents of the United States for purposes of the Treaty are eligible for a reduced rate of tax on dividends equal to 15% of the dividend, provided that such holders qualify for benefits under the Treaty and do not conduct business through a permanent establishment or fixed base in Switzerland to which our shares are attributable. Such holders should consult their own tax advisors regarding their eligibility to claim the reduced rate and the procedures for claiming a refund of the amount of the Withholding Tax in excess of the 15% Treaty rate.

International Automatic Exchange of Information in Tax Matters

Switzerland has concluded a multilateral agreement with the EU on the international automatic exchange of information in tax matters which applies to all EU member states. In addition, Switzerland has concluded the multilateral competent authority agreement (the "MCAA") on the automatic exchange of financial account information (the "AEOI") and, based on the MCAA, a number of bilateral AEOI agreements with other countries. With respect to such agreements and the implementing laws of Switzerland, Switzerland collects and exchanges data of financial assets, which may include Alcon shares, held in, and income derived thereon and credited to, accounts or deposits with a paying agent in Switzerland for the benefit of individuals resident in an EU member state or in another treaty state. An up-to-date list of the AEOI agreements to which Switzerland is a party that are in effect or signed but not yet in effect can be found on the website of the State Secretariat for International Finance Matters.

The United States and Switzerland entered an intergovernmental agreement (an "IGA") to facilitate the implementation of the US Foreign Account Tax Compliance Act ("FATCA"). Under the IGA, financial institutions acting out of Switzerland are generally directed to become participating foreign financial institutions. The agreement ensures that accounts held by US persons with Swiss financial institutions are disclosed to the US tax authorities either with the consent of the account holder or by means of group requests within the scope of administrative assistance on the basis of the double taxation agreement between the United States and Switzerland. In this regard, on July 17, 2019, the US Senate approved the 2009 amendment protocol to the double taxation agreement regarding income tax between Switzerland and the US (the "DTA"). The amended DTA entered into force in 2019 and now provides for a mechanisms for the exchange of information upon request in tax matters between Switzerland and the United States, which is in line with international standards, and allows the United States to make group requests under FATCA concerning non-consenting US accounts and non-consenting non-participating foreign financial institutions for periods from June 30, 2014.

On June 27, 2024, Switzerland and the United States signed a new FATCA agreement providing for a change of the current direct-notification-based regime to a regime where the relevant information is sent to the Swiss Federal Tax Administration, which in turn provides the information to the US tax authorities (reciprocal FATCA Model 1 intergovernmental agreement, the "Model 1 IGA"). Implementation of the new Model 1 IGA requires national law to be amended. In Switzerland, the Federal Assembly will decide on this. According to the current schedule, Switzerland's change of model will come into force on January 1, 2028, at the earliest.

US Federal Income Taxation

The following discussion is a summary of the US federal income tax considerations generally applicable to the ownership and disposition of our shares. This summary is based on the Code, its legislative history, US Treasury Regulations, administrative guidance, published court decisions and the Treaty, all in effect as of the date hereof, and any of which may be repealed, revoked, or modified (possibly with retroactive effect) so as to result in US federal income tax consequences different from those discussed below. This summary is applicable to US Holders (as defined below) who are residents of the United States for purposes of the Treaty and who qualify for the full benefits of the Treaty. It applies only to US Holders that hold our shares as capital assets (generally, property held for investment purposes). This summary should not be construed to constitute legal or tax advice to any particular US Holder.

This summary does not apply to or address US Holders subject to special rules, including, without limitation, brokers, dealers in securities or currencies, traders in securities that elect to use a mark-to-market method of accounting for securities holdings, tax-

exempt entities (including private foundations), insurance companies, banks, thrifts and other financial institutions, persons liable for alternative minimum tax, persons that hold an interest in an entity that holds our shares, persons that will own, or will have owned, directly, indirectly or constructively 10% or more (by vote or value) of our stock, persons that hold our shares as part of a straddle, hedge, conversion, constructive sale or other integrated transaction for US federal income tax purposes or persons whose functional currency is not the US dollar.

*This summary does not purport to be a complete analysis of all of the potential US federal income tax considerations that may be relevant to US Holders in light of their particular circumstances. Further, it does not address any aspect of foreign, state, local or estate or gift taxation or the 3.8% Medicare tax imposed on certain net investment income. **Each US Holder is urged to consult its tax advisor regarding the application of US federal taxation to its particular circumstances and the, state, local, non-US and other tax considerations of the ownership and disposition of our shares.***

General

For purposes of this discussion, a “US Holder” is a beneficial owner of our shares that is, for US federal income tax purposes:

- an individual who is a citizen or resident of the United States;
- a corporation (or other entity or arrangement treated as a corporation for US federal income tax purposes) created in or organized under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is includable in gross income for US federal income tax purposes regardless of its source; or
- a trust (A) the administration of which is subject to the primary supervision of a US court and which has one or more US persons who have the authority to control all substantial decisions of the trust or (B) that has otherwise validly elected to be treated as a US person under the Code.

If a partnership (or other entity or arrangement treated as a partnership for US federal income tax purposes) is a beneficial owner of our shares, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. Partnerships holding our shares and partners in such partnerships are urged to consult their tax advisors as to the particular US federal income tax consequences of an investment in our shares.

Distributions on the Shares

Subject to the passive foreign investment company (“PFIC”) rules discussed below, the gross amount of any distribution received by a US Holder with respect to our shares (including any amounts withheld to pay Swiss withholding taxes) generally will be included in the gross income of the US Holder as a dividend to the extent attributable to the Company’s current or accumulated earnings and profits, as determined under US federal income tax principles. The Company may not calculate its earnings and profits under US federal income tax rules. Accordingly, US Holders should expect that a distribution generally will be treated as a dividend for US federal income tax purposes. Unless the Company is treated as a PFIC for the taxable year in which it pays a distribution or in the preceding taxable year (see “Passive Foreign Investment Company Rules” below), the Company believes that it may qualify as a “qualified foreign corporation,” in which case distributions treated as dividends and received by non-corporate US Holders may be eligible for a preferential tax rate. Distributions on our shares generally will not be eligible for the dividends received deduction available to US Holders that are corporations.

The amount of any dividend paid in Swiss francs (including any amounts withheld to pay Swiss withholding taxes) will be included in the gross income of a US Holder in an amount equal to the US dollar value of the Swiss francs calculated by reference to the exchange rate in effect on the date the dividend is actually or constructively received by the US Holder, regardless of whether the Swiss francs are converted into US dollars on such date. A US Holder will have a tax basis in the Swiss francs equal to their US dollar value on the date of receipt. If the Swiss francs received are converted into US dollars on the date of receipt, the US Holder generally should not be required to recognize foreign currency gain or loss in respect of the distribution. If the Swiss francs received are not converted into US dollars on the date of receipt, a US Holder may recognize foreign currency gain or loss on a subsequent conversion or other disposition of the Swiss francs. Such gain or loss generally will be treated as US source ordinary income or loss.

A US Holder may be entitled to deduct or credit Swiss withholding tax imposed on dividends paid to a US Holder, subject to applicable limitations in the Code. The rules governing the foreign tax credit are complex. US Holders are urged to consult their own tax advisors regarding the availability of the foreign tax credit under their particular circumstances.

Sale, Exchange or Other Taxable Disposition of Our Shares

Subject to the PFIC rules discussed below, a US Holder generally will recognize a capital gain or loss on the sale, exchange or other taxable disposition of our shares in an amount equal to the difference between the amount realized for the

shares and the US Holder's adjusted tax basis in the shares. Any capital gain or loss will be long-term capital gain or loss if the ordinary shares have been held for more than one year. Individuals and other non-corporate US Holders who have long-term capital gains will generally be eligible for reduced tax rates. The deductibility of capital losses is subject to limitations. Any capital gain or loss recognized by a US Holder generally will be treated as US source gain or loss for US foreign tax credit purposes.

Passive Foreign Investment Company Rules

A foreign corporation will be considered a PFIC for any taxable year in which (i) 75% or more of its gross income is "passive income" or (ii) 50% or more of the average quarterly value of its assets produce (or are held for the production of) "passive income." For this purpose, "passive income" generally includes interest, dividends, rents, royalties and certain gains. We currently do not believe that we were a PFIC in the taxable year ending December 31, 2025, nor do we anticipate that we will be a PFIC in subsequent taxable years. However, the determination of PFIC status is based on an annual determination that cannot be made until the close of the taxable year, involves extensive factual investigation, including ascertaining the fair market value of all of our assets on a quarterly basis and the character of each item of income that we earn, and is subject to uncertainty in several respects. Accordingly, we cannot assure you that we will not be treated as a PFIC for the taxable year ending December 31, 2025, or any subsequent taxable year, or that the IRS will not take a contrary position.

Required Disclosure with Respect to Foreign Financial Assets

Certain US Holders are required to report information relating to their holding an interest in our shares, subject to certain exceptions (including an exception for shares held in accounts maintained by certain financial institutions), by attaching a completed IRS Form 8938, Statement of Specified Foreign Financial Assets, with their tax return for each year in which they hold an interest in the shares. US Holders are urged to consult their tax advisors regarding information reporting requirements relating to their ownership of our shares.

10.F. DIVIDENDS AND PAYING AGENTS

Not Applicable.

10.G. STATEMENTS BY EXPERTS

Not Applicable.

10.H. DOCUMENTS ON DISPLAY

We maintain a website at the following address: www.alcon.com. The information on our website is not incorporated by reference in this Annual Report. We make available on or through our website certain reports and amendments to those reports that we file with or furnish to the SEC in accordance with the Exchange Act. We make this information available on our website free of charge as soon as reasonably practicable after we electronically file the information with, or furnish it to, the SEC.

You may read and copy any reports or other information that we file through the Electronic Data Gathering, Analysis and Retrieval (EDGAR) system through the SEC's website on the internet at www.sec.gov.

We also make certain other documents available to the public (such as our Board committee charters, press releases and investor presentations) on our website (www.alcon.com).

Any statement in this Annual Report about any of our contracts or other documents is not necessarily complete. If the contract or document is filed as an exhibit to this Annual Report, the contract or document is deemed to modify the description contained in this Annual Report. You must review the exhibits themselves for a complete description of the contract or document.

Unless stated otherwise in this Annual Report, none of these documents form part of this Annual Report.

10.I. SUBSIDIARY INFORMATION

Not Applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The major financing risks faced by Alcon are managed by the Alcon treasury function. For information about the effects of currency and interest rate fluctuations and how we manage currency and interest risk, see "Item 5. Operating and Financial Review and Prospects—5.A. Operating Results" and "—5.B. Liquidity and Capital Resources". Please also see the information set forth under Note 17 to the Consolidated Financial Statements.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

12.A. DEBT SECURITIES

Not Applicable.

12.B. WARRANTS AND RIGHTS

Not Applicable.

12.C. OTHER SECURITIES

Not Applicable.

12.D. AMERICAN DEPOSITARY SHARES

Not Applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

None.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

None.

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of December 31, 2025, the end of the period covered by this Annual Report, our management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of December 31, 2025, the end of the period covered by this Annual Report, we maintained effective disclosure controls and procedures.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of internal control over financial reporting using the criteria set forth in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on the results of this evaluation, our management concluded that our internal control over financial reporting was effective as of December 31, 2025.

Our independent registered public accounting firm, PricewaterhouseCoopers LLP, audited the effectiveness of our internal control over financial reporting. PricewaterhouseCoopers LLP's report as of December 31, 2025 is included in Item 18 of this Annual Report.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the fiscal year ended December 31, 2025 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Our Board has determined that Lynn D. Bleil, Deborah Di Sanzo, Scott Maw, Karen May and Dieter Spälti, each of whom serves on our Audit and Risk Committee ("ARC"), are independent for purposes of serving on the audit committee under Rule 10A-3 and the listing standards promulgated by the New York Stock Exchange and are audit committee financial experts.

ITEM 16B. CODE OF ETHICS

Our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer are bound to adhere to our Code of Business Conduct, which applies to all of our associates and members of our Board. Our Code of Business Conduct is available on our website at www.alcon.com/about-us/responsible-business-practice. The information contained on or connected to our website is not a part of this annual report.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information set forth under "Item 6. Directors, Senior Management and Employees—6.C. Board Practice—Corporate Governance—Auditors—Auditing Fees and Additional Fees" is incorporated by reference.

Policy on Audit and Risk Committee Pre-Approval of Services of Principal Accountant

The Audit and Risk Committee has established a written policy to pre-approve, on an annual basis, all anticipated audit and non-audit services provided by our independent auditors ("Pre-Approval Policy"). These services may include audit services, audit-related services, tax services and other services. Pre-approval is generally provided for up to 12 months from the date of pre-approval, and any pre-approval is detailed as to the particular service or category of services and is generally subject to a specific budget.

The Pre-Approval Policy provides that the independent auditors may not perform any services for Alcon unless the independent auditors are engaged pursuant to the Pre-Approval Policy. In addition, the Pre-Approval Policy prohibits the Audit and Risk Committee from pre-approving certain non-audit services that are prohibited from being performed by the independent auditors by applicable securities laws. Management is required to periodically report to the Audit and Risk Committee regarding the extent of services provided by the independent auditors. In 2025, all audit-related, tax and other services provided by PwC Switzerland, PwC US and any other firm of PricewaterhouseCoopers International Limited were pre-approved.

In connection with its review and evaluation of non-audit services, the Audit and Risk Committee is required to and does consider and conclude that the provision of the non-audit services is compatible with maintaining the independence of the independent auditor.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not Applicable.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

| Period | Total Number of Shares Purchased ⁽¹⁾ | Average Price Paid per Share (USD) ⁽²⁾⁽³⁾ | Total Number of Shares Purchased as part of Publicly Announced Plans or Programs ⁽⁴⁾ | Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs |

| June 1-30 | 600,000 | 86.81 | 600,000 | 629,388,044 |
| July 1-31 | 690,000 | 88.65 | 690,000 | 568,218,318 |
| August 1-31 | 810,810 | 83.18 | 795,000 | 502,033,577 |
| September 1-30 | 1,750,000 | 77.41 | 1,750,000 | 366,559,193 |
| October 1-31 | 1,547,394 | 75.33 | 1,547,394 | 250,000,039 |
| November 1-30 | 900,000 | 77.56 | 900,000 | 180,198,673 |
| December 1-31 | 1,395,000 | 79.70 | 1,395,000 | 69,020,512 |
| Total | 8,456,204 | 80.71 | 8,437,394 | |

(1) Includes shares repurchased on the SIX Swiss Exchange plus 18,810 shares purchased in the open market by affiliated purchasers.

(2) Excludes stamp duties and broker and transaction fees.

(3) Purchases were made in CHF. the amounts in this column have been converted as the prevailing market exchange rate as of the purchase date.

(4) Shares repurchased on the SIX Swiss Exchange under the three year share repurchase program publicly announced on February 25, 2025 for up to \$750 million of our Ordinary shares. The shares acquired are held in treasury and are intended to offset the dilutive effect of shares vesting under our equity based incentive plans. The program was authorized by the Swiss Takeover Board and subject to customary safe harbor conditions.

ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not Applicable.

ITEM 16G. CORPORATE GOVERNANCE

The information set forth under "Item 6. Directors, Senior Management and Employees—6.C. Board Practice—Corporate Governance—Differences in Corporate Governance Standards" is incorporated by reference.

ITEM 16H. MINE SAFETY DISCLOSURE

Not Applicable.

ITEM 16I. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not Applicable.

ITEM 16J. INSIDER TRADING POLICIES

Our Global Policy on Insider Information governs purchases, sales and other dispositions of our securities by our directors, officers, associates and external consultants, including those of our subsidiaries. We believe our Global Policy on Insider Information is reasonably designed to promote compliance with applicable insider trading laws, rules and regulations and the NYSE listing standards applicable to us. Our Global Policy on Insider Information prohibits purchases, sales and other dispositions of our securities while in possession of material nonpublic information about us and the securities of companies with which we do business, contemplate to do business or which we contemplate to fully or partially acquire. It also imposes additional restrictions on and preclearance and trading requirements for trading in our securities, including quarterly blackout periods, by certain associates who, on a regular basis, have access to material non-public information. The foregoing summary does not purport to be complete and is qualified in its entirety by our Global Policy on Insider Information, a copy of which is filed as Exhibit 11.1 to this Annual Report.

ITEM 16K. CYBERSECURITY

Cybersecurity Risk Management and Strategy

We recognize the importance of assessing, preventing, identifying, and managing risks associated with Cybersecurity Threats, as defined in Form 20-F, Part II, Item 16K(a). These risks include operational disruptions, intellectual property theft, fraud, extortion, harm to associates, customers or patients, privacy violations, litigation exposure and reputational damage. We have implemented processes, technologies and controls to help address these risks.

Our Enterprise Risk Management program considers Cybersecurity Threat risks alongside other company risks. Internal Audit works with specialists to evaluate likelihood, severity and mitigation strategies. We use tools such as network and endpoint monitoring, vulnerability assessments, penetration testing and tabletop exercises to detect, mitigate and respond to risk.

We maintain a cybersecurity-specific risk assessment process aligned with industry frameworks, including National Institute of Standards and Technology ("NIST") and ISO 27001, and engage experts to test our Information Systems. To support data availability, regulatory compliance and effective incident response, we:

- Follow the NIST incident handling framework in our IT Security Incident Response policy, and coordinate with IT, Data Privacy and Legal teams to meet notification and legal obligations;
- Monitor data protection laws and update safeguards as needed;
- Review consumer-facing cybersecurity policies and notify customers of substantive changes;
- Provide a structured governance model to ensure AI/ML systems are secure, ethical and compliant;
- Maintain a Security Control Matrix mapping controls to industry frameworks and regulatory requirements, supporting controls applied based on risk;
- Deliver annual training on data privacy, cybersecurity and compliance for all associates, and conduct phishing simulations and incident response tabletop exercises; and
- Maintain cybersecurity insurance coverage and an incident response retainer with a leading provider.

We require associates and third-party service providers to handle Alcon data in accordance with our policies. Our incident response process includes triage, containment, investigation, remediation and compliance with legal obligations.

We also manage third-party risks through due diligence, contractual requirements and audits. Cybersecurity considerations influence vendor selection and oversight.

Our Information Security team regularly engages with Alcon's Data Privacy and Legal team, as well as external assessors, including through annual reviews by a Qualified Security Assessor. In the last three fiscal years, we have not experienced any material Cybersecurity Incidents, and related expenses have been immaterial. We have not paid any penalties or settlements in the past three years. For further discussion on cybersecurity risks, see Item 3.D. Risk Factors—*Cybersecurity breaches and technology failures could disrupt operations, adversely impact reputation and compromise confidential or protected data.*

Cybersecurity Governance

Cybersecurity is an integral part of our risk management program and a growing focus for our Board and management.

The Audit and Risk Committee oversees risks from Cybersecurity Threats. At least annually, the Committee receives updates on security posture, third-party assessments, progress toward risk mitigation goals, incident response plans and material Cybersecurity Threats risks or incidents. These sessions include a cybersecurity scorecard and discussions with our Chief Information Security Officer (CISO). Committee members also engage in ad hoc discussions on emerging threats and program updates.

Cybersecurity Threat risks are considered during Board discussions on enterprise risk management, budgeting, strategic planning, business continuity, mergers and acquisitions and brand management.

Our CISO, with over 30 years of experience in global information security and IT leadership, leads our cybersecurity strategy and programs. The CISO manages a team of approximately 60 certified professionals who work closely with

regional privacy officers and the Global Data Privacy Officer. This team oversees prevention, detection, classification, and remediation of incidents and reports to the Audit and Risk Committee at least annually.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC.

1. Description of business

Alcon Inc. (the "Company") and the subsidiaries it controls (collectively "Alcon") is a leading eye care company. Alcon is a global company specializing in the research, development, manufacturing and marketing of a broad range of eye care products within two businesses: Surgical and Vision Care. Alcon is a stock corporation organized under the laws of Switzerland, domiciled in Fribourg, Switzerland, with global headquarters located in Geneva, Switzerland. The shares of the Company are listed on the SIX Swiss Stock Exchange ("SIX") and on the New York Stock Exchange ("NYSE") under the symbol "ALC".

The Consolidated Financial Statements of Alcon are comprised of the Consolidated Balance Sheet as of December 31, 2025 and 2024 and the Consolidated Income Statement, Consolidated Statement of Comprehensive Income, Consolidated Statement of Changes in Equity and Consolidated Statement of Cash Flows for each of the years ended December 31, 2025, 2024 and 2023.

The country of operation and percentage ownership of the legal entities with "Total assets" or "Net sales" in excess of \$5 million included in the Consolidated Financial Statements are disclosed in Note 27.

2. Selected accounting policies

Basis of preparation

The accompanying Consolidated Financial Statements present our historical financial position, results of operations, comprehensive income and cash flows in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") ("IFRS Accounting Standards"). Alcon's principal accounting policies are described in this Note.

Principles of consolidation and equity accounting

The Consolidated Financial Statements include the accounts of the Company and all entities over which the Company directly or indirectly has control. In the event that the Company directly or indirectly has control over another entity that is not wholly owned, the assets, liabilities, results of operations and cash flows of such entity are included in the Company's Consolidated Financial Statements with non-controlling interests recognized to reflect the portion of equity that is not attributable, directly or indirectly, to shareholders of the Company. The Consolidated Financial Statements of the Company are prepared in accordance with IFRS as issued by the IASB. They are prepared in accordance with the historical cost convention except for items that are required to be accounted for at fair value. All intercompany transactions and accounts within Alcon were eliminated.

The Company's financial year-end is December 31, which is also the annual closing date of the individual entities' financial statements incorporated into the Consolidated Financial Statements.

Associated companies are all entities over which Alcon has a significant influence but not control or joint control. This is generally the case where Alcon holds between 20% and 50% of an entity's voting rights. Alcon can also have significant influence over an investee where it holds less than 20% of the voting rights if Alcon has significant transactions with the investee, Alcon has influence over the investee's policy making decisions through Board representation, Alcon shares significant technical information with the investee or Alcon exchanges personnel with the investee. Investments in associated companies are accounted for using the equity method from the date when the investee is determined to be an associated company until the date when Alcon loses significant influence over the investee. Under the equity method, the investment is initially recognized at cost. Investments in associated companies acquired in stages are accounted for under the fair value as deemed cost approach. Under this policy election, Alcon revalues its pre-existing investment to fair value on the date the investee becomes an associated company. Transaction costs for the acquisition of an additional stake are expensed when incurred. The carrying amount of the investment is subsequently increased or decreased, to recognize Alcon's share of profit or loss and other comprehensive income of the associated company after the date of initial recognition.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

Alcon eliminates its share of profit/(loss) from unrealized gains/(losses) from its transactions with associated companies against the carrying amount of the investment. Dividends received or receivable from associated companies are recognized as a reduction in the carrying amount of the investment.

The use of the equity method is discontinued from the date when the investee is determined to no longer be an associated company. The investment retained or disposed after cessation of the equity method is remeasured at fair value, and any gain or loss on such remeasurement is recognized in "Other income" or "Other expense", respectively in the Consolidated Income Statement.

The carrying amounts of investments in associated companies are tested for impairment when triggering events are identified.

Use of estimates and assumptions

The preparation of Consolidated Financial Statements requires management to make certain estimates and assumptions, either at the balance sheet date or during the period, that affect the reported amounts of assets and liabilities as well as revenues and expenses. Because of the inherent uncertainties, actual outcomes and results may differ from management's assumptions and estimates.

Foreign currencies

The Consolidated Financial Statements are presented in US dollars ("USD"). The functional currency of individual entities incorporated into the Consolidated Financial Statements is generally the local currency of the respective entity. The functional currency used for the reporting of certain Swiss entities is USD instead of their respective local currencies. This reflects the fact that the cash flows and transactions of these entities are primarily denominated in this currency.

For entities not operating in hyperinflationary economies, the entities' results, financial position and cash flows that do not have USD as their functional currency are translated into USD using the following exchange rates:

- Income, expense and cash flows using for each month the average exchange rate, with the USD values for each month being aggregated during the year;
- Balance sheet using period-end exchange rates; and
- Resulting exchange rate differences are recognized in other comprehensive income.

The hyperinflationary economies in which Alcon operates are Argentina, Turkey and Venezuela, all of which were hyperinflationary for all years presented.

Hyperinflationary accounting under IAS 29, *Financial Reporting in Hyperinflationary Economies*, requires restatement of non-monetary assets and liabilities to the general price index at the end of the period. The income statement and components of comprehensive income are restated for changes in general price index from the period in which the transactions were initially recorded to the end of the reporting period, with the restated amounts translated using period-end exchange rates. Alcon records the impacts of applying IAS 29 in "Other reserves" in the Consolidated Statement of Changes in Equity and "Other financial income & expense" in the Consolidated Income Statement.

Treasury shares

Common shares repurchased are measured at fair value on their trade date and include transaction costs directly attributable to the repurchase. They are held in treasury and are deducted from equity. No gains or losses are recognized in the Consolidated Income Statement on the purchase or issuance of such shares. Payments for the acquisition of treasury shares are recorded in "Payments for acquisition of treasury shares" in the Consolidated Statement of Cash Flows.

Treasury share repurchases denominated in a currency other than the reporting currency are valued at the trade date using the spot exchange rate for the reporting currency. Any realized foreign exchange gains or losses arising between the trade date and settlement date is recognized in "Other financial income & expense" in the Consolidated Income Statement. If the trade date by the broker or bank and settlement date of the repurchase by the Company fall in different reporting periods, an accrued liability is recognized at period-end for the settlement obligation in "Provisions & other current liabilities" in the Consolidated Balance Sheet.

Acquisition of assets

Assets separately acquired are initially recognized on the balance sheet at cost if they meet the criteria for capitalization. The capitalized cost of the asset includes the purchase price and any directly attributable costs for bringing the asset into the condition to operate as intended. Expected costs for obligations to dismantle and remove property, plant and equipment when it is no longer used are included in their cost.

Property, plant and equipment

Property, plant and equipment are depreciated on a straight-line basis over their estimated useful lives. Freehold land is not depreciated. The related depreciation expense is included in the costs of the functions using the asset or "Cost of net sales" in the Consolidated Income Statement.

Property, plant and equipment are assessed for impairment at the cash generating unit ("CGU") level whenever there is an indication that the balance sheet carrying amount may not be recoverable, using cash flow projections for the useful life.

The below table shows the respective useful lives for property, plant and equipment.

| | Useful life |
|-------------------------------|--------------------|
| Buildings and improvements | 10 to 40 years |
| Machinery and other equipment | |
| Machinery and equipment | 5 to 20 years |
| Furniture and vehicles | 5 to 10 years |
| Computer hardware | 3 to 7 years |

Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary may include:

- Fair values of the assets transferred;
- Liabilities incurred to the former owners of the acquired business;
- Equity interests issued by the Company;
- Fair value of an asset or liability resulting from a contingent consideration arrangement; and
- Fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The excess of the consideration transferred over the fair value of the net identifiable assets acquired is recorded as goodwill, or directly in the income statement if it is a bargain purchase. Alcon primarily uses net present value techniques, utilizing post-tax cash flows and discount rates in estimating the fair value of identifiable assets acquired when allocating the purchase consideration for the acquisition. The estimates of the fair values involve significant judgment by management and include assumptions with measurement uncertainty such as the amount and timing of projected cash flows, long-term sales forecasts, the timing and probability of regulatory and commercial success and the discount rate.

If the business combination is achieved in stages, the acquisition date carrying value of Alcon's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognized in "Other income" or "Other expense", respectively, in the Consolidated Income Statement.

Alcon recognizes non-controlling interests in the acquired entity either at fair value or at the non-controlling interests' proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

Acquisition related costs are expensed as incurred.

Alcon may elect on a transaction-by-transaction basis to apply the optional concentration test to assess whether a transaction qualifies as a business. Under the test, when substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets, Alcon will account for the transaction as an asset purchase and not a business combination.

If the concentration test is not met, or Alcon elects not to apply this optional test, Alcon will perform an assessment focusing on the existence of inputs and processes that have the ability to create outputs to determine whether the transaction is an asset purchase or a business combination.

Goodwill and intangible assets

The annual impairment testing date is Alcon's financial year-end, December 31.

Goodwill

Goodwill arises in a business combination and is the excess of the fair value of purchase consideration to acquire a business over the underlying fair value of the net identified assets acquired. It is allocated to groups of CGUs which are usually represented by the reportable segments, which are the same as Alcon's operating segments. Goodwill is tested for impairment annually at the level of these groups of CGUs, and any impairment charges are recorded under "Other expense" in the Consolidated Income Statement.

Intangible assets available-for-use

Alcon has the following classes of available-for-use intangible assets: Currently marketed products, Marketing know-how, Technologies, Other intangible assets (including software) and the Alcon brand name.

Currently marketed products represent the composite value of acquired intellectual property, patents, and distribution rights and product trade names.

Marketing know-how represents the value attributable to the expertise acquired for marketing and distributing Alcon surgical products.

Technologies represent identified and separable acquired know-how used in the research, development and production processes.

Significant investments in internally developed and acquired software are capitalized and included in the "Other" category and amortized once available for use.

The Alcon brand name is shown separately as it is the only Alcon intangible asset that is available for use with an indefinite useful life. Alcon considers it appropriate that the brand name has an indefinite life since the branded products have a history of strong revenue and cash flow performance, and Alcon has the intent and ability to support the brand with spending to maintain its value for the foreseeable future.

Except for the Alcon brand name, intangible assets available for use are amortized over their estimated useful lives on a straight-line basis and evaluated for potential impairment whenever facts and circumstances indicate that their carrying value may not be recoverable. The Alcon brand name is not amortized, but evaluated for potential impairment annually.

The below table shows the respective useful lives for available-for-use intangible assets and the location in the Consolidated Income Statement in which the respective amortization and any potential impairment charge is recognized.

| | Useful life | Income statement location for amortization and impairment charges |
|-----------------------------|---------------------------------------|-------------------------------------------------------------------|
| Currently marketed products | 5 to 20 years | "Cost of net sales" |
| Marketing know-how | 25 years | "Cost of net sales" |
| Technologies | 10 to 20 years | "Cost of net sales" or "Research and Development" |
| Other (including software) | 3 to 10 years | In the respective functional expense |
| Alcon brand name | Not amortized, indefinite useful life | "Other expense" |

Acquired In-Process Research & Development ("IPR&D")

Acquired research and development intangible assets, which are still under development and have accordingly not yet obtained marketing approval, are recognized as IPR&D.

IPR&D is not amortized, but evaluated for potential impairment on an annual basis or when facts and circumstances warrant. IPR&D is considered impaired when its balance sheet carrying amount exceeds its estimated recoverable amount, which is defined as the higher of its fair value less costs of disposal ("FVLCOD") and its value in use ("VIU"). Usually, Alcon applies the FVLCOD method for its impairment assessments. Under this approach when evaluating IPR&D for potential impairment, FVLCOD is estimated using net present value techniques utilizing post-tax cash flows and discount rates as there are no direct or indirect observable prices in active markets for identical or similar assets. The estimates used in calculating the net present values involve significant judgment by management and include assumptions with measurement uncertainty such as, the amount and timing of projected cash flows, long-term sales forecasts, discount rate, and the timing and probability of regulatory and commercial success, which includes our evaluation of clinical trial outcomes. In the limited cases where the VIU method would be applied, net present value techniques would be applied using pre-tax cash flows and discount rates.

Any impairment charge is recorded in the Consolidated Income Statement under "Research & development".

Once a project included in IPR&D has been successfully developed, it is transferred to the "Currently marketed products" category.

Impairment of goodwill, Alcon brand name and definite lived intangible assets

A CGU to which goodwill has been allocated (reportable segments) is considered impaired when its carrying amount, including the goodwill, exceeds its recoverable amount, which is defined as the higher of its FVLCOD and its VIU. If the recoverable amount of the reportable segment is less than its carrying amount, an impairment loss shall be recognized. The impairment loss shall be allocated to reduce the carrying amount of any goodwill allocated to the reportable segment first, with any remaining impairment loss allocated to other assets of the reportable segment on a pro-rata basis of their carrying amount.

An intangible asset other than goodwill is considered impaired when its balance sheet carrying amount exceeds its estimated recoverable amount, which is defined as the higher of its FVLCOD and its VIU. If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset shall be reduced to its recoverable amount. That reduction is an impairment loss. Usually, Alcon applies the FVLCOD method for its impairment assessment. In most cases, no direct or indirect observable market prices for identical or similar assets are available to measure the FVLCOD. Therefore, an estimate of FVLCOD is based on net present value techniques utilizing post-tax cash flows and discount rates. In the limited cases where the VIU method would be applied, net present value techniques would be applied using pre-tax cash flows and discount rates.

FVLCOD reflects estimates of assumptions that market participants would be expected to use when pricing the asset or CGUs, and for this purpose management considers the range of economic conditions that are expected to exist over the remaining useful life of the asset.

The estimates used in calculating the net present values involve significant judgment by management and include assumptions with measurement uncertainty, such as the following:

- Amount and timing of projected cash flows;
- Long-term sales forecasts, including sales growth rates;
- Royalty rate for the Alcon brand name;
- Terminal growth rate; and
- Discount rate.

Other assumptions used in the net present values calculation include:

- Future tax rate;
- Actions of competitors (launch of competing products, marketing initiatives, etc.); and
- Outcome of R&D activities and forecast of related costs (future product developments).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

Generally, for intangible assets with a definite useful life Alcon uses cash flow projections for the whole useful life of these assets. For goodwill and the Alcon brand name, Alcon generally utilizes cash flow projections for a five-year period based on management forecasts, with a terminal value based on cash flow projections considering the long-term expected growth rates and impact of demographic trends of the population to which Alcon products are prescribed, for later periods. Probability-weighted scenarios are typically used.

Discount rates used consider Alcon's estimated weighted average cost of capital adjusted for specific country and currency risks associated with cash flow projections to approximate the weighted average cost of capital of a comparable market participant. Actual cash flows and values could vary significantly from forecasted future cash flows and related values derived using net present value techniques.

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, and other short-term and highly liquid investments. Other short-term and highly liquid investments are classified as cash and cash equivalents when original or weighted-average maturities are three months or less and amounts are readily convertible to known amounts of cash which are subject to an insignificant risk of changes in value. Bank overdrafts are usually presented within current "Financial debts" on the Consolidated Balance Sheet except in cases where a right of offset has been agreed with a bank which then allows for presentation on a net basis.

Time deposits

Time deposits are financial instruments recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. Time deposits with a maturity date greater than three months but less than twelve months are reported in the Consolidated Balance Sheet in "Time deposits" in current assets. Time deposits with a maturity date greater than twelve months are reported in "Financial assets" in non-current assets. Interest income is recognized in "Other financial income & expense" in the Consolidated Income Statement.

Financial assets

Financial assets measured at amortized cost

Non-current financial assets measured at amortized cost generally include long-term note receivables, long-term receivables from customers, primarily related to surgical equipment sales arrangements, loans, advances and other deposits. The carrying value of these assets reflects the time value of money, less any allowances for uncollectable amounts.

Alcon assesses on a forward-looking basis the expected credit losses associated with its non-current financial assets valued at amortized cost.

Purchased or originated credit-impaired financial assets are financial assets that are credit-impaired on initial recognition with one or more events that have a detrimental impact on the estimated future cash flows of those financial assets. The interest income of the financial assets is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset. The calculation does not revert to the gross basis even if the credit risk of the financial asset subsequently improves so that the financial asset is no longer credit-impaired. Interest income is recognized in "Other financial income and expense" in the Consolidated Income Statement.

The lifetime expected credit loss ("ECL") of the purchased or originated credit-impaired financial assets is analyzed at inception and utilized in calculating the credit-adjusted effective interest rate, with no Day 1 impact on the carrying value of the financial assets. The value of any collateral related to the financial assets is considered in estimating the lifetime ECL at inception. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including ECLs, to the amortized cost of the debt instrument on initial recognition. Any change in the lifetime ECL from inception would be reflected as a credit loss in the Consolidated Income statement.

For long-term receivables from customers, provisions for uncollectable amounts, which are based on their expected credit losses, are recorded as marketing and selling costs recognized in the Consolidated Income Statement within "Selling, general & administration" expenses.

For loans, advances and other deposits valued at amortized cost, impairments, which are based on their expected credit losses, and exchange rate losses are included in "Other expense" in the Consolidated Income Statement and exchange rate gains and interest income, using the effective interest rate method, are included in "Other income" in the Consolidated Income Statement.

Financial assets measured at fair value through profit and loss ("FVPL")

Financial assets measured at FVPL generally include options to acquire private companies, fund investments and derivative financial instruments. Changes in the fair value of options to acquire development stage private companies are charged to "Research and development" expense in the Consolidated Income Statement. Unrealized or realized gains and losses for fund investments, including exchange gains and losses, are recognized in the Consolidated Income Statement in "Other income" for gains and "Other expense" for losses.

Derivative financial instruments are initially recognized in the Consolidated Balance Sheet at fair value and are remeasured to their current fair value at the end of each subsequent reporting period. The valuation of forward exchange rate contracts and foreign exchange swaps are based on the discounted cash flow model, using interest curves and spot rates at the reporting date as observable inputs. Unsettled forward contracts and swaps are measured at fair value at the reporting date with changes in fair value recorded to the Consolidated Income Statement as unrealized gains or losses in "Other financial income & expense". Settled forward contracts and swaps are measured at maturity date at fair value with corresponding realized gains or losses recognized in the Consolidated Income Statement in "Other financial income & expense". No hedge accounting is applied for these arrangements.

Financial assets measured at fair value through other comprehensive income ("FVOCI")

Equity investments, including equity securities and convertible notes receivable held as strategic investments, are generally designated at the date of acquisition as financial assets measured at FVOCI with no subsequent recycling through profit and loss. Unrealized gains and losses, including exchange gains and losses, are recorded as a fair value adjustment in the Consolidated Statement of Comprehensive Income. They are reclassified to "Other reserves" when the equity investment is sold or settled. If these equity securities and convertible notes receivable are not designated at the date of acquisition as financial assets valued at FVOCI, they are valued at FVPL, as described above.

For all financial assets measured at fair value, Alcon recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the transfers have occurred.

Inventories

Inventory is valued at the lower of acquisition or production cost determined on a first-in, first-out basis and net realizable value. This value is used for the "Cost of net sales" and "Cost of other revenues" in the Consolidated Income Statement. Unsalable inventory is fully written off in the Consolidated Income Statement under "Cost of net sales" and "Cost of other revenues".

Trade receivables

Trade receivables are initially recognized at their invoiced amounts, including any related sales taxes less adjustments for estimated revenue deductions such as chargebacks and cash discounts.

Provisions for expected credit losses are established using an expected credit loss model ("ECL"). The provisions are based on a forward-looking ECL, which includes possible default events on the trade receivables over the entire holding period of the trade receivable. These provisions represent the difference between the trade receivable's carrying amount and the estimated net collectible amount. Charges for doubtful trade receivables are recorded as marketing and selling costs and are recognized in the Consolidated Income Statement within "Selling, general & administration" expenses.

Leases

As lessee, Alcon assesses whether a contract contains a lease at inception or modification of a contract based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Alcon allocates contractual payments between lease and non-lease components based on their relative stand-alone price. Alcon recognizes a right-of-use asset and a corresponding lease liability for all arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases for which Alcon has elected the recognition exemptions allowed under IFRS 16.

Right-of-use assets

Right-of-use assets are initially recognized at cost, which is comprised of the amount of the initial measurement of the corresponding lease liabilities, adjusted for any lease payments made at or prior to the commencement date of the lease, lease incentives received and initial direct costs incurred, as well as any expected costs for obligations to dismantle and remove right-of-use assets when they are no longer used.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

Right-of-use assets are depreciated on a straight-line basis over the shorter of the useful life of the right-of-use asset or the lease term.

Right-of-use assets are assessed for impairment whenever there is an indication that the balance sheet carrying amount may not be recoverable using cash flow projections for the useful life.

Lease liabilities

Lease liabilities are accounted for at amortized cost and are initially measured at the present value of future lease payments and are classified as current or non-current based on the due dates of the underlying principal payments. In determining the lease term, Alcon evaluates the renewal options and termination options reasonably certain to be exercised. Lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, the incremental borrowing rate Alcon would be expected to pay within the respective markets, on a borrowing with a similar term and security. Interest in the period is recorded within "Interest expense" in the Consolidated Income Statement.

Lease liabilities are remeasured for changes in estimated lease term, future lease payments arising from a change in an index or rate, amounts expected to be payable under a residual value guarantee, or in assessment of whether Alcon will exercise a purchase, extension or termination option. Changes to initial lease contract terms are assessed to determine their impact on the scope of lease, and any modifications increasing the scope of the lease are treated as new contracts under the initial measurement principles, while modifications that do not increase or that decrease the scope of the lease result in an adjustment to the right-of-use asset which is remeasured as of the date of the modification.

Principal payments made on lease liabilities and any initial direct costs paid are classified as financing cash outflows, while interest payments are classified as operating cash outflows.

Payments associated with short-term leases and leases of low-value assets are recognized on a straight-line basis as an expense in the Consolidated Income Statement and are classified as cash flows from operating activities.

Legal liabilities

Alcon is subject to contingencies arising in the ordinary course of business such as patent litigation and other product-related litigation, commercial litigation, and governmental investigations and proceedings. Provisions are recorded where a reliable estimate can be made of the probable outcome of legal or other disputes.

Contingent consideration

In a business combination, it is necessary to recognize contingent future payments to previous owners representing contractually defined potential amounts to be paid as a liability. Usually for Alcon, these are linked to development or commercial milestones related to certain assets and are recognized as a financial liability at their fair value, which is then re-measured at each subsequent reporting date.

For the determination of the fair value of a contingent consideration, various unobservable inputs are used. A change in these inputs might result in a significantly higher or lower fair value measurement. The inputs used are, among others, the timing and probability of regulatory and commercial success, sales forecast and assumptions regarding the discount rate, timing and different scenarios of triggering events. The significance and usage of these inputs to each contingent consideration may vary due to differences in the timing and triggering events for payments or in the nature of the asset related to the contingent consideration. These estimates typically depend on factors such as technical milestones or market performance and are adjusted for the probability of their likelihood of payment, and if material, appropriately discounted to reflect the impact of time.

Changes in the fair value of contingent consideration liabilities in subsequent periods are recognized in the Consolidated Income Statement in "Cost of net sales" for currently marketed products and in "Research & development" for IPR&D.

The effect of unwinding the discount over time is recognized in "Interest expense" in the Consolidated Income Statement.

Alcon accounts for variable or contingent consideration associated with asset acquisitions using the cost accumulation model. At the date of the asset acquisition, the intangible asset is initially recognized at the amount paid. Variable payments are subsequently capitalized as part of the cost of the asset when paid, on the basis that such payments represent the direct cost of acquisition.

Defined benefit pension plans and other post-employment benefits

The liability or asset recognized in the balance sheet in respect of defined benefit pension plans and other post-employment benefits is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit ("PUC") method.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating the terms of the related obligation. In countries where there is no sufficient market for such bonds, the market rates on government bonds are used.

The current service cost for such post-employment benefit plans is included in the personnel expenses of the various functions where the associates are employed. The net interest on the net defined benefit liability is recognized as "Other expense" or "Other income". The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. Past service cost is recognized as "Other expense" or "Other income" in the Consolidated Income Statement for the change in the present value of a defined benefit obligation for employee service in prior periods resulting from a plan amendment or a curtailment.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income.

Defined contribution plans

For defined contribution plans, Alcon contributes to publicly or privately administered plans. Alcon has no further payment obligations once the contributions have been paid. The contributions are included in the personnel expenses of the various functions where the associates are employed.

Financial debts

Financial debts are initially recognized at fair value, net of transaction costs incurred. Financial debts are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs and discounts) and the redemption amount is recognized in the Consolidated Income Statement over the period of the financial debts using the effective interest method. Fees paid on the establishment of credit facilities are recognized as transaction costs of the financial debt to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent that there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates, and is recognized in "Other financial income & expense" in the Consolidated Income Statement.

Financial debts are derecognized from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial debt that has been extinguished and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in "Other financial income & expense" in the Consolidated Income Statement.

Interest paid on financial debts is classified as operating activities in the Consolidated Statement of Cash Flows. Proceeds and repayments of borrowings with due dates of three months or less are presented net as financing activities in the Consolidated Statement of Cash Flows.

On January 1, 2024, Alcon adopted Amendments to International Accounting Standards 1 ("IAS 1"), *Presentation of Financial Statements*, which clarified the criteria used in determining the classification on the balance sheet of a liability as non-current where an entity has the right to postpone settlement of the liability for at least twelve months after the reporting date. Under IAS 1, financial debts are classified as current liabilities unless Alcon has a right to defer the settlement of the liability for at least twelve months after the reporting period.

Revenue

Net sales

Revenue on the sale of Alcon products and services, which is recorded as "Net sales" in the Consolidated Income Statement, is recognized when a contractual promise to a customer (i.e., a performance obligation) has been fulfilled by transferring control over the promised goods and services to the customer, substantially all of which is at the point in time of shipment to or receipt of the products by the customer or when the services are performed. If contracts contain customer acceptance provisions, revenue would be recognized upon the satisfaction of acceptance criteria. The amount of revenue to be recognized is based on the consideration Alcon expects to receive in exchange for its goods and services. If a contract contains more than one performance obligation, the consideration is allocated based on the relative stand-alone selling price of each performance obligation.

Surgical equipment may be sold together with other products and services under a single contract and may be structured as an outright cash sale, an installment sale, or a lease. Surgical equipment installment sales and leases have a fixed payment amount which the customer may pay either in fixed intervals or as the customer purchases consumables and/or implantables. Revenues are recognized upon satisfaction of each of the performance obligations in the contract and the consideration is allocated based on the relative stand-alone selling price of each performance obligation.

- Surgical equipment revenue from outright cash sales and installment sales arrangements is recognized at the point in time when control is transferred to the customer. The current portion of long-term receivables from customers and long-term receivables from customers for installment sales arrangements are recorded in "Other current assets" (see "Current portion of long-term receivables from customers" in Note 14) and "Financial assets" (see "Long-term receivables from customers" in Note 11), respectively. Financing income for installment sales arrangements longer than twelve months is recognized over the term of the arrangement in "Other income". Alcon applies the practical expedient under IFRS 15 to installment sales arrangements that are twelve months or less in duration.
- In addition to cash and installment sales, revenue is recognized under finance and operating lease arrangements. Leases in which Alcon transfers substantially all the risks and rewards incidental to ownership to the customer are treated as finance lease arrangements. Revenue from finance lease arrangements is recognized at amounts equal to the fair value of the equipment, which approximates the present value of the minimum lease payments under the arrangements. As interest rates embedded in lease arrangements are approximately market rates, revenue under finance lease arrangements is comparable to revenue for outright sales. Finance income for arrangements longer than twelve months is deferred and subsequently recognized based on a pattern that approximates the use of the effective interest method and recorded in "Other income". Operating lease revenue for equipment rentals is recognized on a straight-line basis over the lease term in "Net sales".

The consideration Alcon receives in exchange for its goods or services may be fixed or variable. Variable consideration is only recognized when it is highly probable that a significant reversal of cumulative sales will not occur. The most common elements of variable consideration are listed below:

- Rebates and discounts granted to government agencies, wholesalers, retail pharmacies, managed health-care organizations and other customers, estimated payments for Medicare prescription drug program under the Inflation Reduction Act, patient co-pay program coupon utilization, as well as chargebacks are provisioned and recorded as a deduction from revenue at the time the related revenues are recorded or when the incentives are offered. They are calculated based on historical experience, regulations, the specific terms in the individual agreements, product pricing, channels and payors.
- Cash discounts are offered to customers to encourage prompt payment and are provisioned and recorded as revenue deductions at the time the related sales are recorded.
- Sales returns provisions are recognized and recorded as revenue deductions when there is historical experience of Alcon agreeing to customer returns and Alcon can reasonably estimate expected future returns. In doing so, the estimated rate of return is applied, determined based on historical experience of customer returns and considering any other relevant factors. This is applied to the amounts invoiced. Where shipments are made on a re-sale or return basis, without sufficient historical experience for estimating sales returns, revenue is only recorded when there is evidence of consumption or when the right of return has expired.

Provisions for revenue deductions are adjusted to actual amounts as rebates, discounts, chargebacks, payment for Medicare prescription drug program under the Inflation Reduction Act, patient co-pay program coupon utilization and returns are processed. The provision represents estimates of the related obligations, requiring the use of judgment when estimating the effect of these sales deductions.

Other revenues

"Other revenues" include revenue from contract manufacturing services which are recognized over time as the service obligations are completed and third-party royalty income. Associated costs for contract manufacturing services are recognized in "Cost of other revenues".

Research & development

Internal research & development ("R&D") costs are fully charged to "Research & development" in the Consolidated Income Statement in the period in which they are incurred. Alcon considers that regulatory and other uncertainties inherent in the development of new products preclude the capitalization of internal development expenses as an intangible asset until marketing approval from a regulatory authority is obtained in a major market such as the United States, the European Union, Switzerland, China or Japan.

Payments made to third parties to in-license or acquire intellectual property rights and products, including initial upfront and subsequent milestone payments, are capitalized as intangible assets. If additional payments are made to the originator company to continue to perform R&D activities, an evaluation is made as to the nature of the payments. Such additional payments will be expensed if they are deemed to be compensation for subcontracted R&D services not resulting in an additional transfer of intellectual property rights to Alcon. Such additional payments will be capitalized if they are deemed to be compensation for the transfer to Alcon of additional intellectual property developed at the risk of the originator company. Subsequent internal R&D costs in relation to IPR&D and other assets are expensed until such time that technical feasibility can be proven, as demonstrated by the receipt of marketing approval for the related product from a regulatory authority in a major market.

Equity-based compensation

Each of the periods presented include expense related to incentive compensation provided to eligible Alcon associates in the form of equity-settled or equity-based awards including restricted stock units ("RSUs") and performance stock units ("PSUs").

Alcon expenses the fair values of RSUs and PSUs granted to associates as compensation over the related vesting periods within the various functions where the associates are employed. The fair values of the awards are determined on their grant dates and are adjusted to account for the specific provisions of each of the corresponding grant agreements.

Alcon RSUs do not entitle the recipients to dividends. As such, the fair value upon grant is based on the Alcon share price at the grant date adjusted for potential future dividends to be paid within the holding period. The fair value of these grants, after making adjustments for assumptions related to their forfeiture during the vesting period, is expensed on a straight-line basis over the respective vesting period.

PSUs are subject to certain performance criteria being achieved during the vesting period and require plan participants to provide services during the vesting period. PSUs granted under Alcon's plans are subject to performance criteria based on internal performance metrics. The expense is determined taking into account assumptions concerning performance during the period relative to targets and expected forfeitures due to plan participants not meeting their service conditions. These assumptions are periodically adjusted. Any change in estimates for past services is recorded immediately as an expense or income in the Consolidated Income Statement and amounts for future periods are expensed over the remaining vesting period. As a result, at the end of the vesting period, the total charge during the whole vesting period represents the amount that will finally vest. The number of equity instruments that finally vest is determined at the vesting date.

If a plan participant leaves Alcon for reasons other than retirement, disability or death, then unvested restricted shares, RSUs and PSUs are forfeited, unless determined otherwise by the provision of the plan rules or by the Compensation Committee of the Company's Board of Directors, for example, in connection with a reorganization.

Restructuring charges

Restructuring provisions are recognized for the direct expenditures arising from the restructuring, where the plans are sufficiently detailed and where appropriate communication to those affected has been made.

Charges to increase restructuring provisions are included in "Other expense" in the Consolidated Income Statement. Corresponding releases are recorded in "Other income" in the Consolidated Income Statement.

Taxes

Taxes on income are expensed in the same periods as the revenues and expenses to which they relate and include any interest and penalties incurred during the period. Deferred taxes are determined using the comprehensive liability method and are calculated on the temporary differences that arise between the tax basis of an asset or liability and its carrying value in the balance sheet prepared for purposes of these Consolidated Financial Statements, except for those temporary differences related to investments in subsidiaries where the timing of their reversal can be controlled and it is probable that the difference will not reverse in the foreseeable future. Alcon recognizes deferred taxes for a new temporary difference where there are previously unrecognized temporary differences, instead of adjusting the amount of those unrecognized differences, for changes in the underlying economics where the initial recognition exemption applies. Since the retained earnings are reinvested, withholding or other taxes on eventual distribution of a subsidiary's retained earnings are only taken into account when a dividend has been planned.

The estimated amounts for current and deferred tax assets or liabilities, including any amounts related to any uncertain tax positions, are based on currently known facts and circumstances. Tax returns are based on an interpretation of tax laws and regulations and reflect estimates based on these judgments and interpretations. The tax returns are subject to examination by the competent taxing authorities which may result in an assessment being made requiring payments of additional tax, interest or penalties. Inherent uncertainties exist in the estimates of the tax positions.

The Organization for Economic Cooperation and Development ("OECD") has published Global Anti-Base Erosion ("GloBE") Model Rules, which include a minimum 15% tax rate by jurisdiction ("Pillar Two"). For the periods ended December 31, 2025, 2024, and 2023, we have applied the IASB amendment to IAS 12, *Income Taxes*, which provides a mandatory temporary exception from recognizing or disclosing deferred taxes related to Pillar Two.

Earnings per share

Basic earnings per share is based on the weighted average number of common shares outstanding. Diluted earnings per share is based on the weighted average number of common shares outstanding and all dilutive potential common shares outstanding.

New standards and interpretations not yet adopted

In April 2024, the IASB issued IFRS 18, *Presentation and Disclosure in Financial Statements*, which will replace IAS 1, *Presentation of Financial Statements* and accompanies limited amendments to other standards which will be effective upon the adoption of the new standard. IFRS 18 will be retroactively effective for our annual reporting periods beginning on January 1, 2027, with early adoption permitted. The standard is expected to improve comparability and transparency of financial statements by requiring defined subtotals in the Consolidated Income Statement, requiring disclosure of management-defined performance measures and adding new principles for aggregation and disaggregation of information. IFRS 18 will not impact recognition or measurement of the financial statement items. However, it may impact operating income due to the reclassification of certain income and expense items within the income statement. Additionally, it may also change the disclosure of operating activities, investing activities and financing activities within the statement of cash flows due to the change in classification of certain cash flow items. Alcon is currently evaluating the impact of adopting this standard on its Consolidated Financial Statements.

Other than previously described, as of December 31, 2025, there are no IFRS Accounting Standards, interpretations or amendments not yet effective that would be expected to have a material impact on Alcon upon adoption.

3. Significant transactions

Significant transactions in 2025

Surgical - Acquisition of LumiThera, Inc.

On September 2, 2025, Alcon closed on a merger agreement and acquired the remaining outstanding equity of LumiThera Inc. ("LumiThera"), resulting in 100% ownership when combined with Alcon's existing investment in LumiThera. LumiThera is a privately held, US-based company that developed and commercializes the *Valeda* photobiomodulation device, a multi-wavelength treatment for dry age-related macular degeneration, which supplements Alcon's Surgical portfolio. The acquisition of the equity interest was accounted for as a business combination that resulted in goodwill of \$38 million after the updated preliminary purchase price allocation ("PPA") of the consideration to the fair values of acquired assets and assumed liabilities. The fair value of the assets acquired and liabilities assumed for the acquisition were based on preliminary calculations and valuations, and are subject to change as additional information is obtained during the respective measurement period up to one year from the acquisition date. Total cash paid at closing, net of cash acquired, was \$124 million. Refer to Note 21.1 for additional information and preliminary PPA.

Vision Care - Acquisition of majority interest in Aurion Biotech, Inc.

On March 24, 2025, Alcon closed on agreements with certain existing shareholders of Aurion Biotech, Inc. ("Aurion") to acquire approximately 58.7% of outstanding equity for approximately \$486 million and outstanding convertible notes from the same shareholders for approximately \$36 million, totaling \$522 million cash paid at closing. When combined with Alcon's existing 40.3% investment in Aurion, the transaction resulted in 99% ownership of Aurion on an outstanding basis. Aurion's ownership on a fully diluted basis at closing was approximately 85.0% held by Alcon and 15.0% held by non-controlling interests. This transaction supports Alcon's ophthalmic pharmaceutical portfolio expansion, including biopharmaceutical applications, with the potential to advance the first-ever corneal cell therapy candidate. The acquisition of majority interest was accounted for as a business combination that resulted in goodwill of \$175 million after the final PPA of the consideration to the fair values of acquired assets and assumed liabilities. Total cash paid at closing, net of cash acquired, was \$496 million. The PPA was finalized in the fourth quarter of 2025. Refer to Note 21.1 for additional information, including the final PPA and details related to the associated non-controlling interests.

Surgical - Acquisition of Cylite Pty Ltd.

On January 16, 2025, Alcon executed a stock purchase agreement and acquired approximately 91.2% of outstanding equity from Cylite Pty Ltd. ("Cylite") shareholders, resulting in 100% ownership when combined with Alcon's existing 8.8% investment in Cylite. The Cylite diagnostic device complements Alcon's existing Surgical portfolio for cataracts. The acquisition of the remaining equity interest was accounted for as a business combination that resulted in goodwill of \$90 million after the final PPA of the consideration to the fair values of acquired assets and assumed liabilities. Total cash paid at closing, net of cash acquired, was \$72 million. The PPA was finalized in the fourth quarter of 2025. Refer to Note 21.1 for additional information and final PPA.

Significant transactions in 2024

Divestment of product rights and out-licensing in China

On October 17, 2024, Alcon closed on a set of definitive agreements to divest its rights in China in favor of Ocumension Therapeutics (Hong Kong) Limited ("Ocumension") to *Bion Tears* and *Tears Naturale* (reported in Vision Care segment) and procedural eye drops (reported in Surgical segment). Under the terms of the agreements, Ocumension licensed the exclusive commercialization rights to *Systane Ultra* in China and development and commercialization rights to AR-15512 in China. In exchange, Alcon received up-front consideration of \$116 million in the form of approximately 16.7% of the ordinary shares of Ocumension. Alcon will also receive royalties and defined AR-15512 sales milestones. Refer to Note 21.3 for additional information.

Surgical - Acquisition of BELKIN Vision Ltd.

On July 1, 2024, Alcon acquired 100% of the outstanding shares and equity of BELKIN Vision Ltd. ("BELKIN") as provided under the Agreement and Plan of Merger ("BELKIN Agreement"). This transaction complements Alcon's existing Surgical portfolio in the treatment of glaucoma. The acquisition was accounted for as a business combination that resulted in goodwill of \$20 million after the PPA of the consideration to the fair values of acquired assets and assumed liabilities. Total cash paid at closing for the net identifiable assets recognized, net of cash acquired, was \$61 million. Refer to Note 21.1 for additional information and final PPA.

Significant transactions in 2023

There were no significant transactions during 2023.

4. Segment information

The segment information disclosed in these Consolidated Financial Statements reflects historical results consistent with the identifiable reportable segments of Alcon and financial information that the Chief Operating Decision Maker ("CODM") reviews to evaluate segmental performance and allocate resources among the segments. The CODM is the Executive Committee of Alcon.

The businesses of Alcon are divided operationally on a worldwide basis into two identified reportable segments, Surgical and Vision Care. Alcon's reportable segments are the same as its operating segments as Alcon does not aggregate any operating segments in arriving at its reportable segments. As indicated below, certain income and expenses are not allocated to segments.

Reportable segments are presented in a manner consistent with the internal reporting to the CODM. The reportable segments are managed separately due to their distinct needs and activities for research, development, manufacturing, distribution and commercial execution.

The Executive Committee of Alcon is responsible for allocating resources and assessing the performance of the reportable segments.

In Surgical, Alcon researches, develops, manufactures, distributes and sells ophthalmic products for cataract surgery, vitreoretinal surgery, refractive laser surgery and glaucoma surgery. The surgical portfolio also includes implantables, consumables and surgical equipment required for these procedures and supports the end-to-end procedure needs of the ophthalmic surgeon.

In Vision Care, Alcon researches, develops, manufactures, distributes and sells daily disposable, reusable, and color-enhancing contact lenses, cell therapies to treat ocular diseases and a comprehensive portfolio of ocular health products, including products for dry eye, ocular allergies, glaucoma and contact lens care, as well as ocular vitamins and redness relievers.

Alcon also provides services, training, education and technical support for both the Surgical and Vision Care businesses.

The basis of preparation and the selected accounting policies mentioned in Note 2 are used in the reporting of segment results.

The Executive Committee of Alcon evaluates segmental performance and allocates resources among the segments based on net sales and segment contribution, which is the single measure of segment profitability.

Net identifiable assets are not assigned to the segments in the internal reporting to the CODM, and are not considered in evaluating the performance of the business segments by the Executive Committee of Alcon.

Segment contribution excludes amortization and impairment charges for acquired product rights or other intangibles, general and administrative expenses for corporate activities, transformation costs, fair value adjustments to contingent consideration liabilities, past service costs primarily for post-employment benefit plan amendments, acquisition and integration related costs, certain acquisition and divestment related items, product discontinuation costs, fair value adjustments of financial assets in the form of options to acquire a company carried at FVPL, net gains and losses on fund investments and equity securities valued at FVPL, fair value remeasurements of investments in associated companies, restructuring costs, legal provisions and settlements and other income and expense items not attributed to a specific segment.

Net sales and other revenues by segment

| (\$ millions) | 2025 | 2024 | 2023 |
|-------------------------------------------|---------------|--------------|--------------|
| Surgical | | | |
| Implantables | 1,782 | 1,775 | 1,703 |
| Consumables | 3,028 | 2,861 | 2,719 |

| Total net sales and other revenues | 10,401 | 9,911 | 9,455 |

Segment contribution and reconciliation to income before taxes

The below table summarizes segment contribution, including material items of income and expense as required by IFRS 8, *Operating Segments*, and the associated International Financial Reporting Interpretations Committee agenda decision published in July 2024. The below table also includes a reconciliation of segment contribution to Income before taxes.

| (\$ millions) | Surgical | | | Vision Care | | | Not allocated to segments | | | Total | | |
|--------------------------------------------------|--------------|--------------|--------------|--------------|--------------|--------------|---------------------------|----------------|----------------|---------------|--------------|--------------|
| | 2025 | 2024 | 2023 | 2025 | 2024 | 2023 | 2025 | 2024 | 2023 | 2025 | 2024 | 2023 |
| Net sales | 5,751 | 5,522 | 5,314 | 4,568 | 4,314 | 4,056 | — | — | — | 10,319 | 9,836 | 9,370 |
| Other revenues | 3 | 4 | — | 79 | 71 | 85 | — | — | — | 82 | 75 | 85 |
| Cost of net sales | (2,167) | (2,014) | (1,898) | (1,649) | (1,605) | (1,535) | (776) | (709) | (708) | (4,592) | (4,328) | (4,141) |
| Cost of other revenues | (3) | (4) | — | (61) | (67) | (67) | — | — | — | (64) | (71) | (67) |
| Selling, general & administration | (1,527) | (1,461) | (1,435) | (1,587) | (1,467) | (1,473) | (335) | (322) | (301) | (3,449) | (3,250) | (3,209) |

| Switzerland | 604 | 493 | 359 |
| Foreign | 556 | 763 | 473 |
| Total income before taxes | 1,160 | 1,256 | 832 |

Current and deferred income taxes

| (\$ millions) | 2025 | 2024 | 2023 |
|------------------------------------------|--------------|--------------|--------------|
| Switzerland | (80) | (95) | (74) |
| Foreign | (106) | (239) | (93) |
| Current income tax (expense) | (186) | (334) | (167) |
| Switzerland | 25 | 25 | 313 |
| Foreign | (19) | 71 | (4) |
| Deferred tax income | 6 | 96 | 309 |
| Total income tax (expense)/income | (180) | (238) | 142 |

Analysis of tax rate

Alcon's overall applicable tax rate can change each year since it is calculated as the weighted average tax rate based on pre-tax income/(loss) of each subsidiary. The main elements contributing to the difference between Alcon's overall applicable tax rate and the effective tax rate are summarized in the below table.

| (\$ millions unless indicated otherwise) ⁽¹⁾ | 2025 | | 2024 | | 2023 | |
|------------------------------------------------------------------------------------------|--------------|---------------|--------------|---------------|------------|----------------|
| | | % | | % | | % |
| Applicable tax rate | (217) | 18.7 % | (256) | 20.4 % | (168) | 20.2 % |
| Effect of disallowed expenditures | (16) | 1.4 % | (4) | 0.3 % | (7) | 0.8 % |
| Effect of gain on the fair value remeasurement of an investment in an associated company | 28 | (2.4)% | — | — % | — | — % |
| Effect of deemed legal entity liquidation | — | — % | 57 | (4.5)% | — | — % |
| Effect of equity-based compensation | (1) | 0.1 % | (2) | 0.2 % | (3) | 0.4 % |
| Effect of tax credits and allowances | 27 | (2.3)% | 18 | (1.4)% | 12 | (1.4)% |
| Effect of deductibility of a statutory expense in Switzerland ⁽²⁾ | — | — % | — | — % | 568 | (68.3)% |
| Effect of adjustments to contingent consideration and other liabilities | — | — % | — | — % | 2 | (0.2)% |
| Effect of changes in uncertain tax positions ⁽³⁾ | 3 | (0.3)% | (43) | 3.4 % | (271) | 32.6 % |
| Effect of previously (recognized)/unrecognized tax loss carryforward | (7) | 0.6 % | 12 | (1.0)% | 11 | (1.3)% |
| Effect of 2022 APA on prior years | — | — % | — | — % | 6 | (0.7)% |
| Effect of non-deductible amortization | (6) | 0.5 % | (9) | 0.7 % | (8) | 1.0 % |
| Effect of other items | 4 | (0.3)% | (10) | 0.8 % | (6) | 0.7 % |
| Effect of prior year items | 5 | (0.4)% | (1) | 0.1 % | 6 | (0.7)% |
| Effective tax rate | (180) | 15.5 % | (238) | 18.9 % | 142 | (17.1)% |

(1) Percentages may not sum due to rounding.

(2) 2023 includes a long-term Swiss Tax Agreement; however, it is uncertain whether Alcon will obtain a similar treatment for future years for a portion of the benefit.

(3) Includes the net effect of partial reserves and benefits recognized for the deductibility of statutory expenses in Switzerland. 2024 also includes reserves for the deemed liquidation of a legal entity. 2023 also includes the release of reserves in US and Germany following the conclusion of tax audits and other items.

Alcon has a substantial business presence in many countries and is therefore subject to different income and expense items that are non-taxable (permanent differences) or are taxed at different rates in those tax jurisdictions. This results in a difference between Alcon's applicable tax rate and effective tax rate as shown in the table above.

Fluctuations in taxes and effective tax rates are primarily due to the geographical pre-tax income and loss mix across certain tax jurisdictions relative to Alcon's consolidated income before taxes, changes in uncertain tax positions and certain non-recurring items.

The applicable tax rate was 18.7% in 2025 compared to 20.4% in 2024, primarily due to the mix of pre-tax income/(loss) across geographical jurisdictions. The effective tax rate was 15.5% in 2025 compared to 18.9% in 2024, primarily due to the non-taxable gain on the fair value remeasurement of an investment in an associated company and higher discrete tax benefits in the current year.

The applicable tax rate was 20.4% in 2024 compared to 20.2% in 2023, primarily due to the mix of pre-tax income/(loss) across geographical jurisdictions. The effective tax rate was a 17.1% benefit in 2023 primarily driven by a \$263 million net benefit associated with the 2023 Swiss Tax Agreement (as defined below) and a net benefit of \$36 million from other discrete tax items.

Tax returns are subject to examination by competent taxing authorities, which may result in assessments being made requiring payments of additional tax, interest or penalties. Inherent uncertainties exist in the estimates of the tax positions.

Federal legislation

On July 4, 2025, the United States Congress enacted budget reconciliation bill H.R. 1, which includes significant provisions such as the permanent extension of certain provisions of the Tax Cuts and Jobs Act that were set to expire. The legislation has multiple effective dates, with certain provisions effective in 2025 and others to be implemented through 2027. The enactment of H.R. 1 did not materially impact Alcon's Consolidated Financial Statements for the year ended December 31, 2025.

Alcon continues to evaluate the potential future impact of the tax law changes on our Consolidated Financial Statements, but does not expect H.R. 1 to have a material impact to the effective tax rate. The enactment of H.R. 1 resulted in a reduction in cash tax payment obligations in 2025 driven by timing of deductions.

2023 Swiss Tax Agreement

In 2023, Alcon entered into a long-term agreement with Switzerland tax authorities related to the deductibility of a statutory expense in Switzerland through March 31, 2039 (the "2023 Swiss Tax Agreement"). As a result, in 2023 Alcon recorded a discrete tax benefit of \$263 million in "Taxes" in the Consolidated Income Statement and corresponding deferred tax asset, net of reserves.

Pillar Two income taxes

The OECD has published GloBE Model Rules, which include a minimum 15% tax rate by jurisdiction ("Pillar Two"). Various countries have enacted or intend to enact tax legislation to comply with Pillar Two rules. Alcon is within the scope of the OECD's Pillar Two, which has implications for Alcon's financial results starting January 1, 2024 onward.

Of the countries that have enacted, or will be enacting Pillar Two legislation, we expect Switzerland to be the most impactful to Alcon. In December 2023, the Swiss government decided to partially implement Pillar Two by introducing a Qualified Domestic Minimum Top-up Tax ("QDMTT") to reach the required taxation level of 15% on Pillar Two qualifying profits earned by companies domiciled in Switzerland effective from January 1, 2024. This QDMTT will not be applied to the Pillar Two qualifying profits earned by subsidiaries domiciled in tax jurisdictions outside of Switzerland. The implementation timing and specific provisions of any further Pillar Two tax regulations in Switzerland remain subject to further assessments at both the Federal and Cantonal levels. In September 2024, the Swiss government introduced the Income Inclusion Rule ("IIR") effective beginning January 1, 2025. Under the IIR, Switzerland will tax the Pillar Two-qualifying profit of foreign subsidiaries in case and to the extent the taxation in those countries does not reach the required taxation level of 15%. On January 15, 2025, the OECD issued administrative guidance related to the treatment of certain deferred taxes to streamline the administration of Pillar Two. This administrative guidance did not impact Alcon's 2025 Consolidated Financial Statements.

For the years ended December 31, 2025 and 2024, we have applied the IASB amendment to IAS 12, *Income Taxes*, which provides a mandatory temporary exception from recognizing or disclosing deferred taxes related to Pillar Two. Further, Alcon's effective tax rates in the relevant jurisdictions met the minimum 15% taxation level in the current year. We do not expect Pillar Two to have a material impact to the effective tax rate. Alcon is continuing to follow Pillar Two legislative developments to evaluate the potential future impact on our consolidated results of operations, financial position and cash flows.

7. Share capital, dividends, earnings per share and share repurchase program

7.1 Share capital

The share capital of the Company as of December 31, 2025 is CHF 20 million, which is comprised of 499.7 million registered shares, nominal value of CHF 0.04 per share.

The below table shows the movement in the shares.

| (shares in millions) ⁽¹⁾ | Common stock shares outstanding | Treasury stock shares | Total shares |
|-------------------------------------|---------------------------------------|--------------------------|--------------|
| January 1, 2023 | 491.8 | 7.9 | 499.7 |
| Settlement of equity-based awards | 1.5 | (1.5) | — |
| December 31, 2023 | 493.2 | 6.4 | 499.7 |
| Settlement of equity-based awards | 1.4 | (1.4) | — |
| December 31, 2024 | 494.6 | 5.1 | 499.7 |
| Settlement of equity-based awards | 1.2 | (1.2) | — |
| Acquisition of treasury shares | (8.4) | 8.4 | — |
| December 31, 2025 | 487.4 | 12.3 | 499.7 |

(1) Totals may not sum due to rounding.

All of the Company's 12.3 million shares held in treasury as of December 31, 2025 may only be used to fulfill the future vesting of existing and future equity-based awards.

Capital range and conditional share capital

On May 5, 2023, Alcon's shareholders approved the introduction of a capital range and a conditional share capital in Alcon's Articles of Incorporation. Under the capital range, and until May 5, 2028 or an earlier expiry, the Company's Board of Directors (the "Board") has the authority to increase or decrease the share capital ranging from CHF 19 million (lower limit) to CHF 22 million (upper limit). The capital increase or decrease may be effected by (A) issuing up to the lower of (i) 50 million fully paid-in registered shares and (ii) 10% of the share capital at the time of increase or (B) cancelling up to 25 million registered shares, as applicable. The Board is further authorized to withdraw or restrict subscription rights of existing shareholders and allocate such rights to third parties, the Company or any of its group companies, for the purposes of (a) raising equity capital, (b) acquisition transactions, (c) broadening the shareholders constituency in certain financial or investor markets or (d) Board, executive management, employees, advisors or other participation programs.

The Board can also rely on a conditional share capital instrument in its Articles of Incorporation through which the share capital may be increased in an amount not to exceed CHF 2.0 million, by the issuance of up to 50 million fully paid-in registered shares through the voluntary or mandatory exercise of conversion, exchange, option, warrant, subscription or other rights granted to or imposed on shareholders or third parties alone or in connection with the issuance of bonds, notes, options, warrants or other similar securities or contractual obligations of the Company or its affiliates. The conditional share capital may be used for the same purposes as stated in the preceding paragraph in connection with the capital range. As of December 31, 2025, the Board had not made use of the authority under any of the capital range or conditional share capital provisions.

7.2 Dividends

On February 25, 2025, the Board proposed a dividend of CHF 0.28 per share, which was subsequently approved by the shareholders at the Annual General Meeting on May 6, 2025 and paid in May 2025 for an amount of \$166 million.

On February 27, 2024, the Board proposed a dividend of CHF 0.24 per share, which was subsequently approved by the shareholders at the Annual General Meeting on May 8, 2024 and paid in May 2024 for an amount of \$130 million.

On February 27, 2023, the Board proposed a dividend of CHF 0.21 per share, which was subsequently approved by the shareholders at the Annual General Meeting on May 5, 2023 and paid in May 2023 for an amount of \$116 million.

7.3 Earnings per share

Basic earnings per share is computed by dividing net income attributable to the shareholders of Alcon Inc. for the period by the weighted average number of common shares outstanding during the period. For the years ended December 31, 2025, 2024 and 2023, the weighted average number of shares outstanding was 493.2 million, 494.4 million and 493.0 million, respectively.

The only potentially dilutive securities are the outstanding unvested equity-based awards under the Company's equity-based incentive plans, as described in Note 23. Except when the effect would be anti-dilutive, the calculation of diluted earnings per common share includes the weighted average net impact of unvested equity-based awards. For the years ended December 31, 2025, 2024 and 2023, the weighted average diluted number of shares outstanding was 496.2 million, 497.5 million and 496.5 million, respectively, which includes the potential conversion of 3.0 million, 3.1 million and 3.5 million unvested equity-based awards, respectively.

The average market value of the Company's shares for the purposes of calculating the potentially dilutive effects of unvested equity-based awards was based on quoted market prices for the period that the unvested awards were outstanding.

7.4 Share repurchase program

On February 25, 2025, the Board authorized the repurchase of up to \$750 million of the Company's common shares. The shares acquired are held in treasury and are intended to offset the dilutive effect of shares vesting under Alcon's equity-based incentive plans. Alcon funded the repurchases through cash generated from operations. The program was authorized by the Swiss Takeover Board and subject to customary safe harbor conditions.

On March 27, 2025, the Company executed an agreement with a bank to set the terms on which the bank will execute the share repurchases as the Company's agent. The agreement with the bank is cancellable at any time without continuing obligation such that no financial liability exists to the Company from execution of the agreement or the approval of the program. As of December 31, 2025, 8.4 million shares were repurchased for a total consideration of \$682 million. Total cash payments for acquisition of treasury shares of \$676 million were recorded to "Payments for acquisition of treasury shares" within the financing section of the Consolidated Statement of Cash Flows. Liabilities of \$6 million were recorded to "Provisions & other current liabilities" on the Consolidated Balance Sheet for share repurchases which were initiated but not settled as of December 31, 2025.

The share repurchase program was completed on January 20, 2026 with 9.3 million shares repurchased for a total of \$750 million.

8. Property, plant & equipment

The below table summarizes the movements of property, plant & equipment in 2025.

| (\$ millions) | Land | Buildings & improvements | Construction in progress | Machinery & other equipment | Total |
|------------------------------------------------|-----------|--------------------------|--------------------------|-----------------------------|----------------|
| Cost | | | | | |
| January 1, 2025 | 39 | 2,339 | 940 | 4,270 | 7,588 |
| Additions | 3 | 46 | 421 | 167 | 637 |
| Impact of business combinations | — | 1 | — | 3 | 4 |
| Disposals and derecognitions ⁽¹⁾ | — | (13) | — | (126) | (139) |

| December 31, 2024 | 39 | 2,339 | 940 | 4,270 | 7,588 |
| Accumulated depreciation | | | | | |
| January 1, 2024 | — | (952) | (2) | (2,021) | (2,975) |
| Depreciation charge | — | (111) | — | (281) | (392) |
| Impairment charges | — | — | — | (1) | (1) |
| Disposals and derecognitions ⁽¹⁾ | — | 16 | — | 99 | 115 |
| Currency translation effects | — | 18 | 1 | 35 | 54 |
| December 31, 2024 | — | (1,029) | (1) | (2,169) | (3,199) |
| Net book value at December 31, 2024 | 39 | 1,310 | 939 | 2,101 | 4,389 |

(1) Derecognition of assets that are no longer used and are not considered to have a significant disposal value or other alternative use.

As of December 31, 2024, commitments for purchases of property, plant & equipment were \$221 million.

9. Goodwill and other intangible assets

The below table summarizes the movements of goodwill and other intangible assets in 2025.

| (\$ millions) | Intangible assets other than goodwill | | | | | | | Total |
|---------------------------------------------|---------------------------------------|------------------|--------------------------------------------|----------------|-----------------------------|--------------------|----------------------------------------------|-----------------|
| | Goodwill | Alcon brand name | Acquired in-process research & development | Technologies | Currently marketed products | Marketing know-how | Other intangible assets (including software) | |
| Cost | | | | | | | | |
| January 1, 2025 | 8,946 | 2,980 | 963 | 5,348 | 6,229 | 5,960 | 896 | 22,376 |
| Impact of business combinations | 303 | — | 853 | — | 259 | — | — | 1,112 |
| Additions | — | — | 22 | — | — | — | 122 | 144 |
| Reclassifications ⁽¹⁾ | — | — | (268) | — | 268 | — | — | — |
| Disposals and derecognitions ⁽²⁾ | — | — | — | (4) | (3) | — | (53) | (60) |
| Currency translation effects | 7 | — | 1 | — | 4 | — | 1 | 6 |
| December 31, 2025 | 9,256 | 2,980 | 1,571 | 5,344 | 6,757 | 5,960 | 966 | 23,578 |
| Accumulated amortization | | | | | | | | |
| January 1, 2025 | — | — | (188) | (5,320) | (4,485) | (3,338) | (458) | (13,789) |
| Amortization charge | — | — | — | (22) | (402) | (238) | (122) | (784) |
| Disposals and derecognitions ⁽²⁾ | — | — | — | 4 | 3 | — | 42 | 49 |
| Impairment charges | — | — | (2) | — | (43) | — | — | (45) |
| Currency translation effects | — | — | — | — | (2) | — | (1) | (3) |
| December 31, 2025 | — | — | (190) | (5,338) | (4,929) | (3,576) | (539) | (14,572) |
| Net book value at December 31, 2025 | 9,256 | 2,980 | 1,381 | 6 | 1,828 | 2,384 | 427 | 9,006 |

- (1) Reclassifications between asset categories as a result of a project included in IPR&D that has been successfully developed.
- (2) Derecognitions of assets that are no longer used or being developed and are not considered to have a significant disposal value or other alternative use. The current year period also includes previously-held commercialization rights in intangible assets derecognized as part of a business combination as described in Note 21.1.

The below table summarizes the allocation of the net book values of goodwill and other intangible assets by reportable segment at December 31, 2025.

| (\$ millions) | Intangible assets other than goodwill | | | | | | | Total |
|--------------------------------------------|---------------------------------------|------------------|--------------------------------------------|--------------|-----------------------------|--------------------|----------------------------------------------|--------------|
| | Goodwill | Alcon brand name | Acquired in-process research & development | Technologies | Currently marketed products | Marketing know-how | Other intangible assets (including software) | |
| Surgical | 4,700 | — | 555 | 6 | 749 | 2,384 | 261 | 3,955 |
| Vision Care | 4,556 | — | 826 | — | 1,079 | — | 166 | 2,071 |
| Not allocated to segments | — | 2,980 | — | — | — | — | — | 2,980 |
| Net book value at December 31, 2025 | 9,256 | 2,980 | 1,381 | 6 | 1,828 | 2,384 | 427 | 9,006 |

The Surgical and Vision Care reportable segments' CGUs, to which goodwill is allocated, are comprised of a group of smaller CGUs. The valuation method of the recoverable amount of the CGUs, to which goodwill is allocated, is based on the FVL COD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

The Alcon brand name is an intangible asset with an indefinite life. The intangible asset is not allocated to the reportable segments as it is used to market the Alcon-branded products of both the Surgical and Vision Care businesses. Net sales of these products together are the grouping of CGUs, which is used to determine the recoverable amount. The valuation method is based on the FVLCOB.

The following assumptions were used in the calculations for the recoverable amounts of goodwill and the Alcon brand name at December 31, 2025 and 2024:

| (As a percentage) | Surgical | Vision Care |
|--------------------------|----------|-------------|
| Terminal growth rate | 3.0 | 3.0 |
| Discount rate (post-tax) | 8.5 | 8.0 |

The Surgical and Vision Care reportable segments' terminal growth rate assumption of 3.0% takes into consideration how the industry is expected to grow, analysis of industry expert reports, and expected relevant changes in demographics for various markets. The discount rates for both Surgical and Vision Care reportable segments consider Alcon's weighted average cost of capital, adjusted to approximate the weighted average cost of capital of comparable market participants. Both the terminal growth rates and the discount rates are consistent with external sources of information.

The FVLCOB, for all groupings of CGUs containing goodwill or indefinite life intangible assets, is reviewed for the impact of reasonably possible changes in key assumptions. In particular, Alcon considered an increase in the discount rate, a decrease in the terminal growth rate and certain negative impacts on the forecasted cash flows. These reasonably possible changes in key assumptions did not indicate an impairment.

Refer to "Impairment of goodwill, Alcon brand name and definite lived intangible assets" and "Acquired In-Process Research & Development ("IPR&D")" in Note 2 for additional disclosures on how Alcon performs goodwill and intangible assets impairment testing.

The below table summarizes the movements of goodwill and other intangible assets in 2024.

| (\$ millions) | Intangible assets other than goodwill | | | | | | | Total |
|---------------------------------------------|---------------------------------------|------------------|--------------------------------------------|----------------|-----------------------------|--------------------|----------------------------------------------|-----------------|
| | Goodwill | Alcon brand name | Acquired in-process research & development | Technologies | Currently marketed products | Marketing know-how | Other intangible assets (including software) | |
| Cost | | | | | | | | |
| January 1, 2024 | 8,926 | 2,980 | 918 | 5,369 | 6,204 | 5,960 | 810 | 22,241 |

| Accumulated amortization | | | | | | | | |
| January 1, 2024 | — | — | (179) | (5,309) | (4,186) | (3,099) | (408) | (13,181) |
| Amortization charge | — | — | — | (32) | (378) | (239) | (94) | (743) |
| Disposals and derecognitions ⁽¹⁾ | — | — | — | 21 | 79 | — | 44 | 144 |
| Impairment charges | — | — | (9) | — | — | — | — | (9) |
| December 31, 2024 | — | — | (188) | (5,320) | (4,485) | (3,338) | (458) | (13,789) |
| Net book value at December 31, 2024 | 8,946 | 2,980 | 775 | 28 | 1,744 | 2,622 | 438 | 8,587 |

(1) Derecognitions of assets that are no longer used or being developed and are not considered to have a significant disposal value or other alternative use. 2024 also included currently marketed products divested as described in Note 21.3.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

The below table summarizes the allocation of the net book values of goodwill and other intangible assets by reportable segment at December 31, 2024.

| (\$ millions) | Intangible assets other than goodwill | | | | | | | Total |
|--------------------------------------------|---------------------------------------|------------------|--------------------------------------------|--------------|-----------------------------|--------------------|----------------------------------------------|--------------|
| | Goodwill | Alcon brand name | Acquired in-process research & development | Technologies | Currently marketed products | Marketing know-how | Other intangible assets (including software) | |
| Surgical | 4,564 | — | 562 | 28 | 581 | 2,622 | 271 | 4,064 |
| Vision Care | 4,382 | — | 213 | — | 1,163 | — | 167 | 1,543 |
| Not allocated to segments | — | 2,980 | — | — | — | — | — | 2,980 |
| Net book value at December 31, 2024 | 8,946 | 2,980 | 775 | 28 | 1,744 | 2,622 | 438 | 8,587 |

Intangible asset impairment charges

The below table shows the intangible asset impairment charges in 2025, 2024 and 2023.

| (\$ millions) | 2025 | 2024 | 2023 |
|---------------|-------------|------------|----------|
| Surgical | — | (9) | — |
| Vision Care | (45) | — | — |
| Total | (45) | (9) | — |

Impairment charges during the year ended December 31, 2025 amounted to \$45 million, including \$43 million recognized in "Cost of net sales" in the Consolidated Income Statement in the second quarter due to the full impairment of a currently marketed product CGU in the Vision Care reportable segment due to discontinuation of commercialization of the product; and \$2 million recognized in "Research and development" in the Consolidated Income Statement in the third quarter due to the full impairment of an acquired IPR&D CGU in the Vision Care reportable segment due to discontinuation of the project.

Impairment charges during the year ended December 31, 2024 amounted to \$9 million recognized in "Research & development" in the Consolidated Income Statement during the second quarter due to the full impairment of an acquired IPR&D CGU in the Surgical reportable segment due to discontinuation of the project.

There were no impairments during the year ended December 31, 2023.

The recoverable amounts were zero based on the net present value techniques at the time of impairment. The estimates used in calculating net present values involve significant judgment by management and include assumptions with measurement uncertainty. The estimates include cash flow projections for a five-year period based on management forecasts, sales forecasts beyond the five-year period extrapolated using long-term expected growth rates, discount rates and future tax rates. Actual cash flows and values could vary significantly from forecasted future cash flows and related values derived using net present value techniques. Since the cash flow projections are a significant unobservable input, the fair value of the CGUs were classified as Level 3 in the fair value hierarchy.

10. Deferred tax assets and liabilities

| (\$ millions) | Property, plant & equipment | Intangible assets and deductible goodwill | Pensions and other benefit obligations of associates | Inventories | Tax loss carry- forwards | Other assets, provisions and accruals | Total |
|----------------------------------------------------------|-----------------------------------|----------------------------------------------------|---------------------------------------------------------------|-------------|--------------------------------|---------------------------------------------------|--------------|
| Gross deferred tax assets at December 31, 2024 | 34 | 246 | 80 | 384 | 187 | 627 | 1,558 |
| Gross deferred tax liabilities at December 31, 2024 | (332) | (1,318) | — | (33) | — | (178) | (1,861) |
| Net deferred tax balance at December 31, 2024 | (298) | (1,072) | 80 | 351 | 187 | 449 | (303) |
| At December 31, 2024 | (298) | (1,072) | 80 | 351 | 187 | 449 | (303) |
| (Charged)/credited to income | (18) | 93 | 2 | 21 | (24) | (68) | 6 |
| Credited to equity | — | — | — | — | 3 | 22 | 25 |
| (Charged)/credited to other comprehensive income | (4) | (1) | (1) | 2 | 1 | — | (3) |
| Impact of business combinations | — | (257) | — | — | 34 | 15 | (208) |
| Net deferred tax balance at December 31, 2025 | (320) | (1,237) | 81 | 374 | 201 | 418 | (483) |
| Gross deferred tax assets at December 31, 2025 | 39 | 229 | 81 | 410 | 201 | 584 | 1,544 |
| Gross deferred tax liabilities at December 31, 2025 | (359) | (1,466) | — | (36) | — | (166) | (2,027) |
| Net deferred tax balance at December 31, 2025 | (320) | (1,237) | 81 | 374 | 201 | 418 | (483) |

The below table presents the Net deferred tax balance as of December 31, 2025 after offsetting \$1.1 billion of deferred tax assets and liabilities within the same tax jurisdiction.

| (\$ millions) | At December 31, 2025 |
|-------------------------------------|----------------------|
| Deferred tax assets | 458 |
| Deferred tax liabilities | (941) |
| Net deferred tax liabilities | (483) |

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

| (\$ millions) | Property, plant & equipment | Intangible assets and deductible goodwill | Pensions and other benefit obligations of associates | Inventories | Tax loss carry-forwards | Other assets, provisions and accruals | Total |
|------------------------------------------------------|-----------------------------|-------------------------------------------|------------------------------------------------------|-------------|-------------------------|---------------------------------------|--------------|
| Gross deferred tax assets at December 31, 2023 | 39 | 267 | 85 | 377 | 194 | 618 | 1,580 |
| Gross deferred tax liabilities at December 31, 2023 | (337) | (1,417) | — | (30) | — | (150) | (1,934) |
| Net deferred tax balance at December 31, 2023 | (298) | (1,150) | 85 | 347 | 194 | 468 | (354) |
| At December 31, 2023 | (298) | (1,150) | 85 | 347 | 194 | 468 | (354) |
| (Charged)/credited to income | (1) | 95 | 2 | 11 | (15) | 4 | 96 |
| Credited to equity | — | — | — | — | 2 | 5 | 7 |
| Credited/(charged) to other comprehensive income | 1 | — | (7) | (7) | — | (28) | (41) |
| Impact of business combinations | — | (17) | — | — | 6 | — | (11) |
| Net deferred tax balance at December 31, 2024 | (298) | (1,072) | 80 | 351 | 187 | 449 | (303) |
| Gross deferred tax assets at December 31, 2024 | 34 | 246 | 80 | 384 | 187 | 627 | 1,558 |
| Gross deferred tax liabilities at December 31, 2024 | (332) | (1,318) | — | (33) | — | (178) | (1,861) |
| Net deferred tax balance at December 31, 2024 | (298) | (1,072) | 80 | 351 | 187 | 449 | (303) |

The below table presents the Net deferred tax balance as of December 31, 2024 after offsetting \$1.1 billion of deferred tax assets and liabilities within the same tax jurisdiction.

| (\$ millions) | At December 31, 2024 |
|-------------------------------------|----------------------|
| Deferred tax assets | 421 |
| Deferred tax liabilities | (724) |
| Net deferred tax liabilities | (303) |

The below table presents deferred tax assets and deferred tax liabilities expected to have an impact on current taxes payable after more than twelve months.

| (\$ billions) | At December 31, 2025 | At December 31, 2024 |
|--------------------------|----------------------|----------------------|
| Deferred tax assets | 1.1 | 1.2 |
| Deferred tax liabilities | 1.9 | 1.7 |

For foreign unremitted earnings retained by consolidated entities for reinvestment, which amounted to \$10 billion as of December 31, 2025 and December 31, 2024, no provision is made for income taxes that would be payable upon the distribution of these earnings. If these earnings were remitted, an income tax charge could result based on the tax statutes currently in effect.

IFRS exceptions to recognizing taxable temporary differences include an exception to recognizing a deferred tax liability arising on the initial recognition of goodwill from acquisitions. As such, we have not provided a deferred tax for goodwill from acquisitions which amounted to \$9.3 billion and \$8.9 billion as of December 31, 2025 and 2024, respectively.

The gross value of capital loss carryforwards for which no deferred tax assets were recognized amounted to \$82 million at December 31, 2025 (\$83 million at December 31, 2024), most of which will expire in one year.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

Tax loss carryforwards are capitalized as deferred tax assets to the extent it is probable that sufficient taxable income will be available for the foreseeable future. The below tables present the gross value of tax loss carryforwards that have or have not been recognized as deferred tax assets, with their expiry dates, as of December 31, 2025 and 2024.

| (\$ millions) | Unrecognized | Recognized | Total at December 31, 2025 |
|----------------------------------------------|--------------|--------------|-------------------------------|
| Within five years | 17 | 50 | 67 |
| More than five years | 488 | 336 | 824 |
| Not subject to expiry | 48 | 822 | 870 |
| Gross value of tax loss carryforwards | 553 | 1,208 | 1,761 |

| (\$ millions) | Unrecognized | Recognized | Total at December 31, 2024 |
|----------------------------------------------|--------------|--------------|-------------------------------|
| Within five years | 6 | 55 | 61 |
| More than five years | 443 | 375 | 818 |
| Not subject to expiry | — | 691 | 691 |
| Gross value of tax loss carryforwards | 449 | 1,121 | 1,570 |

No tax losses carried forward expired in 2025 and 2023. Tax losses carried forward of \$1 million expired in 2024.

11. Financial and other non-current assets

The below tables provide details related to Financial assets and Other non-current assets as of December 31, 2025 and 2024.

Financial assets

| (\$ millions) | 2025 | 2024 |
|---------------------------------------------------------------------------------|------------|------------|
| Long-term note receivable and other financial assets measured at amortized cost | 191 | 175 |
| Long-term financial investments measured at FVOCI ⁽¹⁾ | 328 | 282 |
| Long-term financial investments measured at FVPL | 4 | 1 |
| Long-term receivables from customers | 168 | 121 |
| Non-current minimum lease payments from finance lease agreements | 31 | 28 |
| Long-term loans, advances and security deposits | 46 | 45 |
| Total financial assets | 768 | 652 |

(1) Includes \$11 million of Long-term convertible notes due from associated companies as of December 31, 2024. Refer to Note 24 for additional information.

Minimum lease payments from finance lease agreements

The below table shows the receivables of the gross investments in finance leases and the net present value of the minimum lease payments, as well as unearned finance income, related to surgical equipment lease arrangements. The finance income is recorded in "Other income".

| (\$ millions) | 2025 | | | | | 2024 | | | | |
|----------------------------------------|-----------------------|-------------------------|---------------|------------|----------------|-----------------------|-------------------------|---------------|------------|----------------|
| | Total future payments | Unearned finance income | Present value | Provision | Net book value | Total future payments | Unearned finance income | Present value | Provision | Net book value |
| Not later than one year ⁽¹⁾ | 25 | (1) | 24 | — | 24 | 25 | (2) | 23 | — | 23 |
| Between one and five years | 35 | (2) | 33 | (4) | 29 | 36 | (2) | 34 | (8) | 26 |
| Later than five years | 2 | — | 2 | — | 2 | 2 | — | 2 | — | 2 |
| Total | 62 | (3) | 59 | (4) | 55 | 63 | (4) | 59 | (8) | 51 |

(1) The current portion of the minimum lease payments is recorded in Trade receivables or Other current assets (to the extent not yet invoiced).

Other non-current assets

| (\$ millions) | Note | 2025 | 2024 |
|---------------------------------------|------|------------|------------|
| Deferred compensation plans | | 202 | 180 |
| Prepaid post-employment benefit plans | 22 | 7 | 6 |
| Investments in associated companies | 24 | 77 | 293 |
| Other non-current assets | | 111 | 115 |
| Total other non-current assets | | 397 | 594 |

12. Inventories

The amount of inventory recognized as an expense in "Cost of net sales" in the Consolidated Income Statement during 2025 amounted to \$3.2 billion (2024: \$3.0 billion, 2023: \$2.9 billion). The amount of inventory recognized as an expense in "Cost of other revenues" in the Consolidated Income Statement during 2025 amounted to \$64 million (2024: \$71 million, 2023: \$67 million).

| (\$ millions) | 2025 | 2024 |
|---------------------------|--------------|--------------|
| Raw material, consumables | 476 | 438 |
| Work in progress | 190 | 199 |
| Finished products | 1,725 | 1,631 |
| Total inventories | 2,391 | 2,268 |

Alcon recognized inventory provisions and write-downs amounting to \$206 million in 2025 (2024: \$217 million, 2023: \$206 million) and reversed inventory provisions amounting to \$59 million in 2025 (2024: \$64 million, 2023: \$88 million). Inventory provisions mainly relate to the adjustment of inventory balances to their net realizable value based on the forecasted sales. Reversals are made when the products become salable.

13. Trade receivables

Trade receivable balances include sales to wholesalers, retailers, doctor groups, private health systems, government agencies, pharmacy benefit managers, managed health-care organizations and government-supported healthcare systems. We closely monitor the level of trade receivables in the countries deemed to have an elevated credit risk. We consider macroeconomic and geopolitical environment, country profile and historical experience in addition to other relevant information when assessing the credit risk. Deteriorating credit risk factors may result in an increase in the average length of time that it takes to collect these trade receivables and may require Alcon to reevaluate the expected credit loss amount of these trade receivables in future periods or change the terms on which we operate. As of December 31, 2025, the amounts past due for more than one year in elevated credit risk countries are not significant.

The below tables provide details related to Trade receivables as of December 31, 2025 and 2024, including trade receivables that are not overdue as specified in the payment terms and conditions established with Alcon's customers, as well as an analysis of overdue amounts, expected credit loss rates and related provisions for doubtful trade receivables.

| (\$ millions) | 2025 | | | |
|--------------------------------------------------------------|-------------------------|-------------|------------------------|----------------------------|
| | Gross trade receivables | Provision | Trade receivables, net | Expected credit loss rates |
| Not overdue | 1,634 | (2) | 1,632 | 0.1 % |
| Past due for not more than one month | 134 | (1) | 133 | 0.7 % |
| Past due for more than one month but less than three months | 101 | (2) | 99 | 2.0 % |
| Past due for more than three months but less than six months | 49 | (3) | 46 | 6.1 % |
| Past due for more than six months but less than one year | 31 | (13) | 18 | 41.9 % |
| Past due for more than one year | 43 | (29) | 14 | 67.4 % |
| Total | 1,992 | (50) | 1,942 | |

| (\$ millions) | 2024 | | | |
|--------------------------------------------------------------|-------------------------|-------------|------------------------|----------------------------|
| | Gross trade receivables | Provision | Trade receivables, net | Expected credit loss rates |
| Not overdue | 1,448 | (2) | 1,446 | 0.1 % |
| Past due for not more than one month | 137 | (1) | 136 | 0.7 % |
| Past due for more than one month but less than three months | 84 | (2) | 82 | 2.4 % |
| Past due for more than three months but less than six months | 49 | (3) | 46 | 6.1 % |
| Past due for more than six months but less than one year | 26 | (10) | 16 | 38.5 % |
| Past due for more than one year | 33 | (23) | 10 | 69.7 % |
| Total | 1,777 | (41) | 1,736 | |

The below table summarizes the movement in the provision for doubtful trade receivables.

| (\$ millions) | 2025 | 2024 | 2023 |
|----------------------------------------------------------------------------------------|-------------|-------------|-------------|
| January 1 | (41) | (44) | (57) |
| Provisions for doubtful trade receivables charged to the Consolidated Income Statement | (35) | (24) | (26) |
| Utilization of provisions for doubtful trade receivables | 6 | 6 | 14 |
| Reversal of provisions for doubtful trade receivables | 23 | 19 | 26 |
| Currency translation effects | (3) | 2 | (1) |
| December 31 | (50) | (41) | (44) |

Trade receivables include amounts denominated in the following major currencies:

| (\$ millions) | 2025 | 2024 |
|-------------------------------------|--------------|--------------|
| US dollar (USD) | 776 | 723 |
| Euro (EUR) | 351 | 303 |

14. Other current assets

The below table provides details related to Other current assets as of December 31, 2025 and 2024.

| (\$ millions) | 2025 | 2024 |
|-------------------------------------------------------------------------|------------|------------|
| Current portion of long-term receivables from customers | 137 | 117 |
| Current portion of minimum lease payments from finance lease agreements | 24 | 23 |
| Current portion of long-term financial investments measured at FVPL | 1 | 1 |
| Prepaid expenses | 124 | 117 |
| VAT receivables | 71 | 59 |
| Other receivables, security deposits and current assets | 127 | 124 |
| Derivative financial instruments | 5 | 12 |
| Total other current assets | 489 | 453 |

15. Right-of-use assets and Lease liabilities

Right-of-use assets

Right-of-use assets as of December 31, 2025 and 2024 were comprised of the following:

| (\$ millions) | 2025 | 2024 |
|----------------------------------------|------------|------------|
| Land | 22 | 21 |
| Buildings | 385 | 392 |
| Machinery & equipment and other assets | 40 | 36 |
| Total right-of-use assets | 447 | 449 |

Depreciation charges of \$89 million, \$83 million and \$91 million for the years ended December 31, 2025, 2024 and 2023, respectively, are shown in the table below by underlying class of asset.

| (\$ millions) | 2025 | 2024 | 2023 |
|--------------------------------------------------|-----------|-----------|-----------|
| Land | 1 | 1 | 1 |
| Buildings | 66 | 62 | 72 |
| Machinery & equipment and other assets | 22 | 20 | 18 |
| Total depreciation of right-of-use assets | 89 | 83 | 91 |

Lease liabilities

Lease liabilities totaled \$509 million as of December 31, 2025, including \$80 million in current Lease liabilities and \$429 million in non-current Lease liabilities. The contractual maturities of the undiscounted lease liabilities as of December 31, 2025 and 2024 are as follows:

| (\$ millions) | Lease liabilities undiscounted | |
|---------------------------------------------|--------------------------------|------------|
| | 2025 | 2024 |
| Not later than one year | 103 | 89 |
| Between one and five years | 259 | 244 |
| Later than five years | 283 | 307 |
| Total lease liabilities undiscounted | 645 | 640 |

| (\$ millions) | Lease liabilities | |
|--------------------------------|-------------------|------------|
| | 2025 | 2024 |
| Not later than one year | 80 | 68 |
| Between one and five years | 197 | 183 |
| Later than five years | 232 | 246 |
| Total lease liabilities | 509 | 497 |

Additional disclosures

The below table provides additional disclosures related to Right-of-use assets and Lease liabilities.

| (\$ millions) | 2025 | 2024 | 2023 |
|------------------------------------------------------------------------|------|------|------|
| Interest expense on lease liabilities | 23 | 19 | 17 |
| Expense on short-term, low value and variable leases | 2 | 3 | 3 |
| Total cash outflows for leases | 106 | 105 | 99 |
| <i>Thereof:</i> | | | |
| <i>Lease liability payments⁽¹⁾</i> | 81 | 83 | 79 |
| <i>Interest payments⁽²⁾</i> | 23 | 19 | 17 |
| <i>Short-term, low value and variable lease payments⁽²⁾</i> | 2 | 3 | 3 |

(1) Reported as cash outflows from financing activities net of lease incentives received.

(2) Included within total net cash flows from operating activities.

16. Non-current and current financial debts

The below table summarizes non-current and current Financial debts outstanding as of December 31, 2025 and 2024. The Company's debt is denominated primarily in U.S. dollars, with the exception of the Series 2028 Notes, which are denominated in euros, and certain local credit facilities, which are primarily denominated in Japanese yen.

| (\$ millions) | 2025 | 2024 |
|-------------------------------------------------------|--------------|--------------|
| Non-current financial debts | | |
| Local facilities (Japan), floating rate debt due 2028 | 53 | — |
| 2.750% Series 2026 Notes | — | 499 |
| 2.375% Series 2028 Notes | 584 | 517 |
| 3.000% Series 2029 Notes | 996 | 995 |
| 2.600% Series 2030 Notes | 747 | 746 |
| 5.375% Series 2032 Notes | 695 | 694 |
| 3.800% Series 2049 Notes | 495 | 495 |
| 5.750% Series 2052 Notes | 592 | 592 |
| Revolving facility, floating rate due 2030 | — | — |
| Total non-current financial debts | 4,162 | 4,538 |
| Current financial debts | | |
| Local facilities, floating rate: | | |
| Japan | — | 26 |
| All others | 65 | 67 |
| 2.750% Series 2026 Notes | 499 | — |
| Other short-term financial debts, floating rate | 5 | 8 |
| Derivatives | 6 | 4 |
| Total current financial debts | 575 | 105 |
| Total financial debts | 4,737 | 4,643 |

Interest expense recognized for Financial debts was \$169 million, \$165 million and \$162 million for the years ended December 31, 2025, 2024 and 2023, respectively. The weighted average interest rate on Financial debts was 3.6% and 3.5% in 2025 and 2024, respectively.

Revolving Credit Facility

On October 27, 2023, the Company and certain of its subsidiaries and a group of commercial banks entered into a refinancing agreement to replace the \$1.0 billion unsecured committed multicurrency revolving credit facility maturing in March 2026. The new agreement consists of a \$1.32 billion unsecured committed multicurrency revolving credit facility maturing five years after the date of the agreement. In the third quarter of 2024, the Company exercised its option to extend the maturity of the Revolving Credit Facility for an additional year to October 2029. The Revolving Credit Facility Agreement primarily bears interest rates equal to a term reference rate or a compounded reference rate, depending on currency, plus an applicable margin and a term reference rate credit adjustment spread, if applicable. It also includes relevant fallback mechanisms in case of rate unavailability. In the third quarter of 2025, the Revolving Credit Facility was extended for one additional year to October 2030. The Revolving Credit Facility remained undrawn as of December 31, 2025.

Local bilateral facilities

Alcon holds a number of local bilateral facilities in different countries, including Japan. These facilities are routinely drawn and repaid throughout the year in the normal course of business. On January 20, 2025, three local bilateral facilities in Japan which were set to mature in February 2025 were refinanced by two facilities with three year maturities totaling \$64 million (JPY 10 billion) using the FX rate as of January 20, 2025. Of that amount, \$53 million was drawn as of December 31, 2025.

Guarantees

The Series 2026, 2028, 2029, 2030, 2032, 2049 and 2052 Notes, the two local bilateral facilities in Japan and the undrawn Revolving Credit Facility are guaranteed by the Company.

Maturity of contractual undiscounted cash flows and interest payment commitments

The below table provides details on the maturity of the contractual undiscounted cash flows for Alcon's borrowings as of December 31, 2025 and 2024.

| (\$ millions) | 2025 | | | 2024 | | |
|--------------------------------------------------|---------------------------------------------------------|-------------|--------------|---------------------------------------------------------|-------------|--------------|
| | Nominal amount - Current and non-current financial debt | Derivatives | Total | Nominal amount - Current and non-current financial debt | Derivatives | Total |
| Not later than one year | 570 | 6 | 576 | 101 | 4 | 105 |
| Between one and five years | 2,389 | — | 2,389 | 2,021 | — | 2,021 |
| Later than five years | 1,800 | — | 1,800 | 2,550 | — | 2,550 |
| Total contractual undiscounted cash flows | 4,759 | 6 | 4,765 | 4,672 | 4 | 4,676 |
| Unamortized debt discount and issuance costs | (28) | — | (28) | (33) | — | (33) |
| Total carrying value | 4,731 | 6 | 4,737 | 4,639 | 4 | 4,643 |

The below table provides details on the maturity of the future contractual interest payments commitments as of December 31, 2025 and 2024.

| (\$ millions) | 2025 | 2024 |
|----------------------------|--------------|--------------|
| Not later than one year | 169 | 167 |
| Between one and five years | 552 | 613 |
| Later than five years | 1,195 | 1,296 |
| Total cash flows | 1,916 | 2,076 |

17. Financial instruments - additional disclosures

Fair value by hierarchy

As required by IFRS, financial assets and liabilities recorded at fair value in the Consolidated Financial Statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. There are three hierarchical levels, based on an increasing amount of judgment associated with the inputs to derive fair value for these financial assets and liabilities, which are as follows:

Financial assets and liabilities carried at Level 1 fair value hierarchy are listed in active markets.

Financial assets and liabilities carried at Level 2 fair value hierarchy are valued using corroborated market data.

Level 1 financial assets include money market funds, equity securities in public companies and deferred compensation assets. There were no financial liabilities carried at Level 1 fair value, and Level 2 financial assets and liabilities include derivative financial instruments.

Investments in money market funds and equity securities in public companies are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. Investments in money market funds are classified as Cash & cash equivalents within the Consolidated Balance Sheet.

Deferred compensation investments for certain employee benefit plans are held in a rabbi trust and dedicated to pay the benefits under the associated plans but are not considered plan assets as the assets remain available to creditors of Alcon in certain events, including bankruptcy. Rabbi trust assets primarily consist of investments in mutual funds. These assets are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices.

Level 3 inputs are unobservable for the financial asset or liability. Fair value measurements classified as Level 3 are performed primarily using the income approach or market approach. The financial assets and liabilities generally included in the Level 3 fair value hierarchy are equity securities and convertible notes receivable of private companies measured at FVOCI, fund investments, options to acquire private companies, and contingent consideration liabilities measured at FVPL.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

The below table summarizes financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2025 and December 31, 2024.

| (\$ millions) | December 31, 2025 | | | | December 31, 2024 | | | |
|---------------------------------------------------------------------|-------------------|------------|--------------|--------------|-------------------|------------|-------------|--------------|
| | Level 1 | Level 2 | Level 3 | Total | Level 1 | Level 2 | Level 3 | Total |
| Non-current financial assets | | | | | | | | |
| Long-term financial investments measured at FVOCI | 132 | — | 196 | 328 | 81 | — | 201 | 282 |
| Long-term financial investments measured at FVPL | — | — | 4 | 4 | — | — | 1 | 1 |
| Deferred compensation assets | 202 | — | — | 202 | 180 | — | — | 180 |
| Non-current financial assets at fair value | 334 | — | 200 | 534 | 261 | — | 202 | 463 |
| Current financial assets | | | | | | | | |
| Money market funds | 562 | — | — | 562 | 432 | — | — | 432 |
| Current portion of long-term financial investments measured at FVPL | — | — | 1 | 1 | — | — | 1 | 1 |
| Derivative financial instruments | — | 5 | — | 5 | — | 12 | — | 12 |
| Current financial assets at fair value | 562 | 5 | 1 | 568 | 432 | 12 | 1 | 445 |
| Financial assets at fair value | 896 | 5 | 201 | 1,102 | 693 | 12 | 203 | 908 |
| Non-current financial liabilities | | | | | | | | |
| Non-current contingent consideration liabilities | — | — | (160) | (160) | — | — | (96) | (96) |
| Non-current financial liabilities at fair value | — | — | (160) | (160) | — | — | (96) | (96) |
| Current financial liabilities | | | | | | | | |
| Current contingent consideration liabilities | — | — | (9) | (9) | — | — | — | — |
| Derivative financial instruments | — | (6) | — | (6) | — | (4) | — | (4) |
| Current financial liabilities at fair value | — | (6) | (9) | (15) | — | (4) | — | (4) |
| Financial liabilities at fair value | — | (6) | (169) | (175) | — | (4) | (96) | (100) |

There were no transfers of financial assets or liabilities between levels in the fair value hierarchy during the twelve months ended December 31, 2025 and December 31, 2024.

The carrying amount is a reasonable approximation of fair value for all other financial instruments as of December 31, 2025 and December 31, 2024, with the exception of the Series 2026, 2028, 2029, 2030, 2032, 2049 and 2052 Notes ("Notes"). As of December 31, 2025, the Notes are recorded in Non-current financial debts, with the exception of the Series 2026 Notes, which are recorded in Current financial debts. As of December 31, 2025, the Notes had a fair value of \$4,466 million and carrying value of \$4,608 million. As of December 31, 2024, the Notes are recorded in Non-current financial debts. As of December 31, 2024, the Notes had a fair value of \$4,240 million and carrying value of \$4,538 million. The fair value of the Notes was determined using Level 2 inputs. The Notes were valued using the quoted market price for such Notes, which have low trading volumes.

Level 3 financial instruments measured at fair value on a recurring basis

Financial assets

| (\$ millions) | Long-term financial investments measured at FVOCI | | Financial investments measured at FVPL | |
|---------------------------------------------------------------------------------|---------------------------------------------------|------------|----------------------------------------|----------|
| | 2025 | 2024 | 2025 | 2024 |
| Balance as of January 1 | 201 | 147 | 2 | 8 |
| Additions | 42 | 116 | 5 | — |
| Net (losses)/gains recognized in Consolidated Statement of Comprehensive Income | (20) | 90 | — | — |
| Net gains recognized in Consolidated Income Statement | — | — | — | 2 |
| Amortization | — | — | (2) | (3) |
| Transfer to Other non-current assets | — | (132) | — | — |
| Settlements | (27) | (20) | — | (5) |
| Balance as of December 31 | 196 | 201 | 5 | 2 |

During the prior year, net gains recognized for Level 3 Long-term financial investments measured at FVOCI primarily relate to a fair value adjustment for an equity interest in a private company. The fair value of the equity interest was determined using the market approach with Level 3 inputs that are not readily observable, primarily prices for similar securities of the same company. During 2024, Alcon acquired additional equity interest in that company and classified the investment as an associated company, which is accounted for using the equity method as Alcon is considered to have significant influence. The investment was transferred to Investments in associated companies within "Other non-current assets".

If the pricing parameters for the Level 3 inputs were to change for Long-term financial investments measured at FVOCI and Financial investments measurement at FVPL by 10% positively or negatively, this would change the amount recorded in the 2025 Consolidated Statement of Comprehensive Income by \$20 million.

Financial liabilities

| (\$ millions) | Contingent consideration liabilities | |
|----------------------------------------|--------------------------------------|-------------|
| | 2025 | 2024 |
| Balance as of January 1 | (96) | (90) |
| Additions | (63) | (6) |
| Accretion for passage of time | (11) | (7) |
| Adjustments for changes in assumptions | — | 7 |
| Currency translation effects | 1 | — |
| Balance as of December 31 | (169) | (96) |

Additions to contingent consideration liabilities in the current year period relate to the LumiThera and Cylite acquisitions. Additions to contingent consideration liabilities in the prior year period relate to the BELKIN acquisition. Refer to Note 21.1 for additional information.

As of December 31, 2025, the probability of success for various development and commercial milestones ranges from 0% to 95% and the maximum remaining potential payments related to contingent consideration from business combinations is \$1.4 billion, plus other amounts calculated as a percentage of commercial sales in cases where there is not a specified maximum contractual payment amount. The estimation of probability typically depends on factors such as technical milestones or market performance and is adjusted for the probability of payment. If material, probable payments are appropriately discounted to reflect the impact of time.

Changes in contingent consideration liabilities in the prior year included fair value adjustments for changes in assumptions of \$7 million, primarily due to revised expectations for timing of settlement for development and commercial milestones. As of December 31, 2024, the probability of success for various development and commercial milestones ranged from 0% to 55% and the maximum remaining potential payments related to contingent consideration from business combinations was \$780 million, plus other amounts calculated as a percentage of commercial sales in cases where there is not a specified maximum contractual payment amount.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

Contingent consideration liabilities are reported in "Provisions & other non-current liabilities" and "Provisions & other current liabilities" based on the projected timing of settlement which is estimated to range from 2026 through 2039 for contingent consideration obligations as of December 31, 2025.

For the determination of the fair value of a contingent consideration various unobservable inputs are used. A change in these inputs might result in a significantly higher or lower fair value measurement. The inputs used are, among others, the probability of success, sales forecast and assumptions regarding the discount rate, timing and different scenarios of triggering events. The significance and usage of these inputs to each contingent consideration may vary due to differences in the timing and triggering events for payments or in the nature of the asset related to the contingent consideration.

As the most significant Level 3 input for contingent consideration liabilities, if the probability of success were to change by 10% positively or negatively, the amounts recorded in the 2025 Consolidated Income Statement for contingent consideration would increase by \$55 million or decrease by \$37 million, respectively.

Time deposits

During 2025, Alcon purchased time deposits of \$80 million with a six-month term maturing on April 29, 2026. During 2024, Alcon purchased time deposits of \$150 million with a six-month term maturing on February 17, 2025. The time deposits are measured at amortized cost and had a carrying value of \$80 million and \$153 million as of December 31, 2025 and 2024, respectively.

Long-term note receivable and other financial assets measured at amortized cost

On May 22, 2023, Alcon entered into financing arrangements with a long-term supplier, Lifecore Biomedical, Inc. and certain of its affiliates (collectively, "Lifecore"). Alcon provided Lifecore total commitments of \$150 million, primarily related to a \$142 million senior term loan facility ("Long-term note receivable") maturing on May 22, 2029. The arrangements also include a sale and leaseback agreement for certain machinery and equipment. Transaction costs directly attributable to the acquisition of the financial assets amounting to \$4 million were capitalized to financial assets at amortized cost.

The Long-term note receivable bears an annual fixed interest rate of 10%, which is payable in kind ("PIK") for the first three years, and payable 3% in cash interest and 7% PIK interest thereafter until maturity, unless otherwise elected by Lifecore to pay a greater proportion in cash. The Long-term note receivable is secured by a Pledge and Security agreement ("security agreement") whereby Alcon is granted first priority security interest in certain collateral, including but not limited to equipment, fixtures, real property and intellectual property. The security agreement is in effect until the payment in full of the term loan facility.

Due to Lifecore's significant financial difficulties at the time the loan was originated, Alcon concluded the financial assets were originated credit-impaired. The lifetime ECL was analyzed at inception and utilized in calculating the credit-adjusted effective interest rate with no impact on the carrying value of the financial assets or effective interest rate of 10%. In addition, as of December 31, 2025 and December 31, 2024, Alcon assessed there was no lifetime ECL due to the assessment of the collateral under the security agreement.

Derivatives

The below table summarizes the net value of unsettled positions for currency derivatives contracts including swaps, forwards and options as of December 31, 2025 and December 31, 2024.

| (\$ millions) | December 31, 2025 | December 31, 2024 |
|-------------------------------------------------------------------|-------------------|-------------------|
| Unrealized gains in Other current assets | 5 | 12 |
| Unrealized losses in Current financial debts | (6) | (4) |
| Net value of unsettled positions for derivatives contracts | (1) | 8 |

There are master agreements with several banking counterparties for derivatives financial instruments; however, there were no derivative financial instruments meeting the offsetting criteria under IFRS as of December 31, 2025 or December 31, 2024.

Capital management

Alcon manages its capital with the objectives of maintaining the ability to continue as a going concern, allow for investment, mitigate against potential future risks and provide returns to shareholders. The capital structure of Alcon consists of Cash and cash equivalents, Time deposits, Total equity and Total financial debts and is reported to management as part of regular internal review processes. Alcon is not subject to regulatory or other external capital adequacy requirements. As of December 31, 2025, Alcon's long-term credit rating with S&P Global Ratings was BBB+ (stable outlook) (2024: BBB+) and with Moody's Investor Service was Baa1 (stable outlook) (2024: Baa1).

Nature and extent of risks arising from financial instruments

Market risk

Alcon is exposed to market risk, primarily related to foreign currency exchange rates, interest rates and the market value of investments, including investments of liquid funds and equity investments. Alcon actively monitors and seeks to reduce, where it deems it appropriate to do so, fluctuations in these exposures. It is Alcon policy and practice to enter into a variety of derivative financial instruments to manage the volatility of these exposures and to enhance the yield on the investment of liquid funds. Alcon does not enter into any financial transactions containing a risk that cannot be quantified at the time the transaction is concluded. In addition, Alcon does not sell short assets it does not have, or does not know it will have, in the future. Alcon only sells existing assets or enters into transactions and future transactions (in the case of anticipatory hedges) that it confidently expects it will have in the future, based on past experience.

In the case of liquid funds, Alcon may write call options on assets it has, or write put options on positions it wants to acquire and has the liquidity to acquire. Alcon expects that any loss in value for these instruments generally would be offset by increases in the value of the underlying transactions. Further, Alcon limits its equity investments to strategic transactions as part of business development activities.

Foreign currency exchange rate and interest rate risks are described in additional detail below.

Foreign currency exchange rate risk

Alcon uses the US Dollar as its reporting currency and is therefore exposed to foreign currency exchange movements, primarily in Euros, Japanese Yen, Chinese Renminbi, Canadian Dollars, Singaporean Dollars, Swiss Francs, Russian Rubles and emerging market currencies. Fluctuations in the exchange rate between the US Dollar and other currencies can have a significant effect on both Alcon's results of operations, including reported sales and earnings, as well as on the reported value of Alcon's assets, liabilities and cash flows. This, in turn, may significantly affect the comparability of period-to-period results of operations.

Alcon manages its global currency exposure by engaging in hedging transactions where management deems appropriate (forward contracts, options and swaps). Specifically, Alcon enters into various contracts that reflect the changes in the value of foreign currency exchange rates to preserve the value of assets. Refer to Note 2 for information regarding the hyperinflationary economies in which Alcon operates.

Interest rate risk

Alcon's exposure to cash flow interest rate risks arises from the portion of financial debts at variable rates as well as short-term financial investments. Alcon may enter into interest rate swap agreements, in which it exchanges periodic payments based on a notional amount and agreed-upon fixed and variable rate interests. If the interest rates for financial debts at variable rates and short-term financial investments had been higher / lower by 1% in 2025, the income before taxes would have been higher / lower by \$13 million from the impacts of interest expense and interest income based on the change in the interest rate. As of December 31, 2025, 97% of Alcon's financial debt is at fixed interest rates, materially reducing exposure to cash flow interest rate risk in the near term. However, Alcon's exposure to cash flow interest rate risk may increase following the maturity of financial debts with fixed interest rates.

Commodity price risk

Alcon's exposure to commodity price risk arises from inflation and supply chain challenges related to anticipated purchases of certain commodities used as raw materials by Alcon's businesses. A change in those prices may alter the gross margin of a specific business, but generally not by more than 10% of the gross margin and thus below Alcon's risk management tolerance levels. Alcon primarily manages inflationary pressures through pricing actions and productivity initiatives. Based on historical and anticipated price fluctuations, Alcon does not enter into significant forward and option contracts to manage fluctuations in prices of anticipated purchases.

Credit risk

Credit risks arise from the possibility that customers may not be able to settle their obligations as agreed. To manage this risk, Alcon periodically assesses credit risk, assigns individual credit limits, and takes actions to mitigate credit risk where appropriate. Refer to Note 13 for more information.

No customer accounted for 10% or more of Alcon's net sales in 2025, 2024 or 2023.

Credit risk also arises from originated credit-impaired financial assets (Long-term note receivable and other financial assets at amortized cost). The maximum exposure to credit risk is reflected in the carrying value of the assets, which amounted to \$192 million as of December 31, 2025, including a non-current portion of \$191 million in "Financial assets" and a current portion of \$1 million in "Other current assets". As of December 31, 2025, in accordance with the terms of the security agreement, the credit risk exposure is fully mitigated by the collateral, with an estimated amount of approximately \$420 million. The estimated amount of collateral increased approximately 30% from December 31, 2024 based on updated forecasts reflecting recent market data and discounted cash flow analysis. There have been no significant changes in the quality of the collateral or the terms of the signed security agreement. In addition, Alcon performs an ongoing credit evaluation of Lifecore's financial condition, monitors payment performance and assesses current economic conditions, as well as reasonable and supportable forecasts of future economic conditions, that may affect collectability of the outstanding financial assets.

Liquidity risk

Liquidity risk is defined as the risk that Alcon may not be able to settle or meet its obligations on time or at a reasonable price. Alcon Treasury is responsible for liquidity, funding and settlement management. In addition, liquidity and funding risks, and related processes and policies, are overseen by management. Alcon manages its liquidity risk on a consolidated basis according to business needs, tax, capital or regulatory considerations, if applicable, through numerous sources of financing in order to maintain flexibility. Alcon's cash and cash equivalents are maintained at a number of financial institutions. To mitigate the risk of uninsured balances, management selects financial institutions based on their credit ratings and financial strength, and performs ongoing evaluations of these institutions to limit our concentration risk exposure. Management monitors Alcon's net debt or liquidity position through rolling forecasts on the basis of expected cash flows. Refer to Note 16 for further information on maturity of the contractual undiscounted cash flows for Alcon's borrowings and interest on borrowings.

18. Provisions and other non-current liabilities

The below table provides details related to Provisions and other non-current liabilities as of December 31, 2025 and 2024.

| (\$ millions) | Note | 2025 | 2024 |
|-------------------------------------------------------------|------|------------|------------|
| Accrued liability for employee benefits: | | | |
| Defined benefit pension plans | 22 | 210 | 198 |
| Other post-employment benefits | 22 | 206 | 208 |
| Other long-term employee benefits and deferred compensation | | 232 | 205 |
| Provisions for litigation and other legal matters | | — | — |
| Contingent consideration | 17 | 160 | 96 |
| Deferred income | | 91 | 86 |
| Other non-current liabilities | | 40 | 32 |
| Total provisions and other non-current liabilities | | 939 | 825 |

Alcon believes that its total provisions are adequate based upon currently available information. However, given the inherent difficulties in estimating liabilities in this area, Alcon may incur additional costs beyond the amounts provided. Management believes that such additional amounts, if any, would not be material to Alcon's financial condition but could be material to the results of operations or cash flows in a given period.

Provisions for litigation and other legal matters

Alcon has established provisions for certain litigation and other legal matters, where a potential cash outflow is probable and a reliable estimate can be made of the amount of the outflow. These provisions represent the current best estimate of the total financial effect for these matters. Potential cash outflows reflected in a provision may be fully or partially offset by insurance in certain circumstances.

Alcon has not established provisions for potential damage awards for certain additional legal claims if Alcon currently believes that a payment is either not probable or cannot be reliably estimated. A number of other legal matters are in such early stages or the issues presented are such that Alcon has not made any provisions since it cannot currently estimate either a potential outcome or the amount of any potential losses. For these reasons, among others, Alcon generally is unable to make a reliable estimate of possible loss with respect to such cases. It is therefore not practicable to provide information about the potential financial impact of those cases.

There might also be cases for which Alcon was able to make a reliable estimate of the possible loss or the range of possible loss, but Alcon believes that publication of such information on a case-by-case basis would prejudice Alcon's position in ongoing legal proceedings or in any related settlement discussions. Accordingly, in such cases, information would be disclosed with respect to the nature of the contingency, but no disclosure is provided as to an estimate of the possible loss or range of possible loss.

Note 25 contains additional information on contingencies.

Summary of significant legal proceedings

A number of Alcon companies are, and will likely continue to be, subject to various legal proceedings and investigations that arise from time to time, including proceedings regarding product liability, sales and marketing practices, commercial disputes, mergers and acquisitions, employment, wrongful discharge, antitrust, securities, health and safety, environmental, tax, international trade, privacy, intellectual property, including under the Hatch-Waxman Act, and anti-bribery matters such as those under the Foreign Corrupt Practices Act of 1977 ("FCPA"), as amended.

As a result, Alcon may become subject to substantial liabilities that may not be covered by insurance and could affect Alcon's business, financial position and reputation. While Alcon does not believe that any of these legal proceedings will have a material adverse effect on its financial position, litigation is inherently unpredictable and large judgments sometimes occur. As a consequence, Alcon may in the future incur judgments or enter into settlements of claims that could have a material adverse effect on its results of operations or cash flow. The following is a summary as of February 24, 2026 of significant legal proceedings to which Alcon or its subsidiaries were or are currently a party.

Hatch-Waxman patent litigation

From time to time, Alcon is a party to certain patent infringement proceedings in the US in connection with Notices of Paragraph IV Certification under the Hatch-Waxman Act received from third-party generic manufacturers respecting their applications for generic versions of certain products sold by or on behalf of Alcon, including *Simbrinza*, *Pataday*, *Rhopressa* and *Rocklatan*, or other similar suits.

During the third quarter of 2022, Alcon received a Paragraph IV Certification Letter under the Hatch-Waxman Act notifying Alcon that a generic drug company filed an application with the FDA seeking pre-patent expiry approval to sell a generic version of *Simbrinza* (brinzolamide/brimonidine tartrate ophthalmic suspension) 1%/0.2%. In October 2022, Alcon filed a patent infringement lawsuit in the US District Court for the District of Delaware against that generic drug company. The lawsuit, which asserted two patents, automatically stayed FDA approval of the generic drug application for up to 30 months from receipt of the Paragraph IV Certification Letter. In August 2024, the court granted in part the generic drug company defendants' motion for summary judgment of non-infringement of the asserted patents. A trial on the remaining patent claims was held on October 21, 2024 through October 23, 2024. On February 5, 2025, the Court issued Findings of Fact and Conclusions of Law concerning the patent claims, and the defenses to those claims, that were the subject of the trial. The Court ruled that Alcon did not prove by a preponderance of the evidence that the defendant's proposed generic version of *Simbrinza* infringed the patent claims asserted at the trial. The Court also ruled that the generic drug company defendant did not prove by clear and convincing evidence that those patent claims were invalid. In the first quarter of 2025, both Alcon and the generic drug company defendant filed notices of appeal of certain rulings made by the trial court. The parties' written briefing in the appeal concluded in January 2026.

Civil Investigative Demand

In July 2024, Alcon received a Civil Investigative Demand from the US Department of Justice (“DoJ”) in connection with a civil investigation under the False Claims Act relating to discounts on surgical equipment servicing contracts. Alcon is cooperating with the DoJ.

Litigation and other legal matters provision movements

| (\$ millions) | 2025 | 2024 | 2023 |
|-------------------------------------------------------------------------------------|-----------|----------|------------|
| January 1 | 4 | 6 | 206 |
| Additions to provisions | 25 | 15 | 3 |
| Cash payments | (9) | (13) | (201) |
| Releases of provisions | (2) | (4) | (2) |
| December 31 | 18 | 4 | 6 |
| Less current portion | (18) | (4) | (6) |
| Non-current provisions for litigation and other legal matters at December 31 | — | — | — |

Alcon believes that its total provisions for litigation and other legal matters are adequate based upon currently available information. However, given the inherent difficulties in estimating liabilities, additional liabilities and costs may be incurred beyond the amounts provided.

19. Provisions and other current liabilities

The below table provides details related to Provisions and other current liabilities as of December 31, 2025 and 2024.

| (\$ millions) | Note | 2025 | 2024 |
|-------------------------------------------------------------------|------|--------------|--------------|
| Accruals for compensation and benefits including social security | | 498 | 531 |
| Accruals for deductions from revenue | | 402 | 396 |
| Taxes other than income taxes | | 84 | 59 |
| Deferred income | | 84 | 73 |
| Accrued expenses for goods and services received but not invoiced | | 82 | 65 |
| Accrued interest on financial debts | | 34 | 32 |
| Provisions for litigation and other legal matters | 18 | 18 | 4 |
| Accruals for royalties | | 10 | 11 |
| Contingent consideration | 17 | 9 | — |
| Accrued equity-based payments | | 9 | 11 |
| Restructuring provisions | | — | — |
| Other payables | | 56 | 46 |
| Total provisions and other current liabilities | | 1,286 | 1,228 |

Provisions and accruals are based upon management's best estimate and adjusted for actual experience. Such adjustments to the historical estimates have not been material.

Accruals for deductions from revenue

The below table shows the movement of accruals for deductions from revenue.

| (\$ millions) | 2025 | 2024 | 2023 |
|---------------------------------------------------|------------|------------|------------|
| January 1 | 396 | 394 | 386 |
| Additions | 1,316 | 1,256 | 1,235 |
| Payments/utilizations | (1,319) | (1,243) | (1,218) |
| Changes in offset against gross trade receivables | — | 1 | (8) |
| Currency translation effects | 9 | (12) | (1) |
| December 31 | 402 | 396 | 394 |

Restructuring provisions

The below table shows the movement of restructuring provisions.

| (\$ millions) | 2025 | 2024 | 2023 |
|------------------------------|----------|-----------|-----------|
| January 1 | — | 29 | 64 |
| Additions | — | — | 39 |
| Cash payments | — | (27) | (74) |
| Releases | — | (1) | — |
| Currency translation effects | — | (1) | — |
| December 31 | — | — | 29 |

There were no additions to restructuring provisions in 2025 and 2024. In 2023, additions to restructuring provisions of \$39 million were primarily related to the multi-year transformation program initially announced by Alcon on November 19, 2019, subsequently expanded as announced on November 15, 2022 and completed in the fourth quarter of 2023. The costs were mainly related to accrued severance for the associates whose positions were eliminated.

20. Consolidated Statement of Cash Flows - additional details

The Consolidated Statement of Cash Flows was prepared in accordance with IAS 7, *Statement of Cash Flows*. The below tables provide additional detail supporting select line items in the Consolidated Statement of Cash Flows.

20.1 Depreciation, amortization, impairments and fair value adjustments

| (\$ millions) | 2025 | 2024 | 2023 |
|-----------------------------------------|--------------|--------------|--------------|
| Property, plant & equipment | 417 | 393 | 385 |
| Right-of-use assets | 89 | 83 | 91 |
| Intangible assets | 829 | 752 | 745 |
| Financial assets | — | — | 7 |
| Other non-current assets ⁽¹⁾ | (144) | (2) | (2) |
| Total | 1,191 | 1,226 | 1,226 |

(1) For the year ended December 31, 2025, Other non-current assets includes gains on fair value remeasurements of investments in associated companies. Refer to Note 21 for additional information.

20.2 Change in net current assets and other operating cash flow items

| (\$ millions) | 2025 | 2024 | 2023 |
|-------------------------------------------|--------------|--------------|--------------|
| (Increase) in inventories | (156) | (47) | (271) |
| (Increase) in trade receivables | (129) | (55) | (110) |
| Increase/(decrease) in trade payables | 116 | (15) | (51) |
| Net change in other operating assets | (47) | (28) | (23) |
| Net change in other operating liabilities | (24) | (44) | 51 |
| Total | (240) | (189) | (404) |

20.3 Reconciliation of liabilities arising from financing activities

| (\$ millions) | Financial Liabilities | | | |
|----------------------------------------------------------------------------------------------------------------|-----------------------------|-------------------------|-------------------------------|---------------------------|
| | Non-current financial debts | Current financial debts | Non-current lease liabilities | Current lease liabilities |
| January 1, 2025 | 4,538 | 105 | 429 | 68 |
| Repayment of financial debts | (1) | (111) | | |
| Proceeds from financial debts, net of issuance costs | — | 59 | | |
| Impact from business combinations | 1 | 34 | 4 | 3 |
| Additions to leases | | | 63 | 14 |
| Other net changes in financial debts | 55 | (17) | | |
| Amortization of discounts on financial debts | 2 | — | | |
| Payments of lease liabilities, net | | | — | (81) |
| Interest payments for amounts included in lease liabilities classified as cash flows from operating activities | | | — | (23) |
| Changes in fair values and other non-cash changes, net | 3 | 2 | (5) | 20 |
| Currency translation effects | 63 | 4 | 14 | 3 |
| Reclassification from non-current to current | (499) | 499 | (76) | 76 |
| December 31, 2025 | 4,162 | 575 | 429 | 80 |

| (\$ millions) | Financial Liabilities | | | |
|----------------------------------------------------------------------------------------------------------------|-----------------------------|-------------------------|-------------------------------|---------------------------|
| | Non-current financial debts | Current financial debts | Non-current lease liabilities | Current lease liabilities |
| January 1, 2024⁽¹⁾ | 4,676 | 63 | 335 | 71 |
| Repayment of financial debts | — | (47) | | |
| Proceeds from financial debts, net of issuance costs | — | 59 | | |
| Additions to leases | | | 170 | 21 |
| Other net changes in financial debts | — | (66) | | |
| Amortization of discounts on financial debts | 2 | — | | |
| Payments of lease liabilities, net | | | — | (83) |
| Interest payments for amounts included in lease liabilities classified as cash flows from operating activities | | | — | (19) |
| Changes in fair values and other non-cash changes, net | 3 | (6) | (1) | 16 |
| Currency translation effects | (39) | (2) | (10) | (3) |
| Reclassification between non-current and current | (104) | 104 | (65) | 65 |
| December 31, 2024 | 4,538 | 105 | 429 | 68 |

(1) As described in Note 2, Alcon adopted Amendments to IAS 1, *Presentation of Financial Statements*, effective January 1, 2024, resulting in retrospective reclassification of financial debts of \$82 million from current to non-current.

| (\$ millions) | Financial Liabilities | | | |
|----------------------------------------------------------------------------------------------------------------|-----------------------------|-------------------------|-------------------------------|---------------------------|
| | Non-current financial debts | Current financial debts | Non-current lease liabilities | Current lease liabilities |
| January 1, 2023 | 4,541 | 107 | 359 | 71 |
| Repayment of financial debts | — | (34) | | |
| Proceeds from financial debts, net of issuance costs | 29 | 40 | | |
| Additions to leases | | | 48 | 15 |
| Other net changes in financial debts | — | 37 | | |
| Amortization of discounts on financial debts | 2 | — | | |
| Payments of lease liabilities, net | | | — | (79) |
| Interest payments for amounts included in lease liabilities classified as cash flows from operating activities | | | — | (17) |
| Changes in fair values and other non-cash changes, net | 3 | (1) | (4) | 11 |
| Currency translation effects | 19 | (4) | 2 | — |
| Reclassification between non-current and current ⁽¹⁾ | 82 | (82) | (70) | 70 |
| December 31, 2023⁽¹⁾ | 4,676 | 63 | 335 | 71 |

(1) As described in Note 2, Alcon adopted Amendments to IAS 1, *Presentation of Financial Statements*, effective January 1, 2024, resulting in retrospective reclassification of financial debts of \$82 million from current to non-current.

20.4 Additional disclosure of non-cash investing and financing activities

| (\$ millions) | 2025 | 2024 | 2023 |
|--------------------------------------------------------------------------------------------------|------|------|------|
| Treasury stock issued for settlement of equity-based compensation plan, net of withholding taxes | 110 | 109 | 107 |
| Non-cash additions of right-of-use assets in exchange for a lease liability | 77 | 191 | 63 |
| Non-cash additions of property, plant & equipment | 70 | 53 | 55 |
| Non-cash additions of intangible assets | 22 | 13 | 16 |
| Non-cash additions of financial assets | — | 118 | — |

21. Acquisitions, divestment of product rights and out-licensing

21.1 Acquisitions of businesses

Fair value of assets and liabilities arising from acquisition of businesses

During 2025, acquisitions of businesses included LumiThera, Inc., Aurion Biotech, Inc., and Cylite Pty Ltd. During 2024, acquisition of a business included BELKIN Vision Ltd. There were no acquisitions of businesses in 2023.

Surgical - Acquisition of LumiThera, Inc.

On September 2, 2025, Alcon closed on a merger agreement and acquired the remaining outstanding equity of LumiThera, resulting in 100% ownership when combined with Alcon's existing investment in LumiThera. LumiThera is a privately held, US-based company that developed and commercializes the *Valeda* photobiomodulation device, a multi-wavelength treatment for dry age-related macular degeneration, which supplements Alcon's Surgical portfolio. The acquisition of the equity interest was accounted for as a business combination that resulted in goodwill of \$38 million after the updated preliminary PPA of the consideration to the fair values of acquired assets and assumed liabilities. Total cash paid at closing, net of cash acquired, was \$124 million.

The potential commercial milestones payable for specified revenue targets between 2026 and 2039 could be up to \$660 million and the potential development milestones payments for regulatory approval in China or Japan could be up to \$30 million. The contingent consideration recognized during the third quarter of 2025 represents its fair value (Level 3) at the acquisition date.

The acquisition date fair value of the previously held financial investment measured at FVOCI by Alcon was \$16 million, resulting in a remeasurement fair value gain in Other comprehensive income of \$9 million, net of taxes.

During the measurement period, Alcon updated its preliminary valuation of the fair value of acquired assets and assumed liabilities, primarily due to finalization of opening balance sheet testing procedures post-acquisition date. The below table summarizes the updated preliminary PPA for the LumiThera business combination as of December 31, 2025. The PPA remains provisional and is subject to change as additional information is obtained during the respective measurement period up to one year from the acquisition date.

| (\$ millions) | Preliminary PPA | Measurement period adjustments | Updated preliminary PPA |
|----------------------------------------------------------------|-----------------|--------------------------------|-------------------------|
| Current marketed products | 185 | 5 | 190 |
| Deferred tax assets | 9 | — | 9 |
| Inventories | 5 | (2) | 3 |
| Trade receivables | 2 | — | 2 |
| Cash and cash equivalents | 1 | — | 1 |
| Other current assets | 1 | — | 1 |
| Deferred tax liabilities | (42) | (2) | (44) |
| Trade payables | (2) | — | (2) |
| Provisions and other current liabilities | (3) | 1 | (2) |
| Net identifiable assets acquired | 156 | 2 | 158 |
| Goodwill | 42 | (4) | 38 |
| Net assets acquired as a result of business combination | 198 | (2) | 196 |
| Cash paid at closing | 126 | (1) | 125 |
| Cash expected to be paid after closing | 2 | (1) | 1 |
| Previously-held FVOCI financial investment | 16 | — | 16 |
| Contingent consideration | 54 | — | 54 |
| Total acquisition date fair value of consideration | 198 | (2) | 196 |

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

Goodwill is attributable primarily to the accounting impact of deferred tax liabilities and assembled workforce. The goodwill is not deductible for tax purposes.

Direct acquisition costs of \$6 million were recognized in "Other expense" in the 2025 Consolidated Income Statement and were reported in operating cash flows in the 2025 Consolidated Statement of Cash Flows.

Pro forma financial information is not presented for the LumiThera business acquisition as it is not material to the Consolidated Financial Statements. The results of operations since the date of acquisition were not material.

Vision Care - Acquisition of majority interest in Aurion Biotech, Inc.

On March 24, 2025, Alcon closed on agreements with certain existing shareholders of Aurion to acquire approximately 58.7% of outstanding equity for approximately \$486 million and outstanding convertible notes from the same shareholders for approximately \$36 million, totaling \$522 million cash paid at closing. When combined with Alcon's existing 40.3% investment in Aurion, the transaction resulted in 99% ownership of Aurion on an outstanding basis. Aurion's ownership on a fully diluted basis at closing was approximately 85.0% held by Alcon and 15.0% held by non-controlling interests. This transaction supports Alcon's ophthalmic pharmaceutical portfolio expansion, including biopharmaceutical applications, with the potential to advance the first-ever corneal cell therapy candidate. The acquisition of majority interest was accounted for as a business combination that resulted in goodwill of \$175 million after the final PPA of the consideration to the fair values of acquired assets and assumed liabilities. Total cash paid at closing, net of cash acquired, was \$496 million. The transaction also resulted in non-controlling interests, described below.

The acquisition date fair value of the equity interest previously held by Alcon was \$334 million, resulting in a remeasurement fair value gain of \$136 million in the first quarter of 2025. The fair value gain has been included in "Other income" in the 2025 Consolidated Income Statement.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

During the measurement period, Alcon updated its preliminary valuation of the fair value of acquired assets and assumed liabilities, primarily due to changes in financial projections for certain operations. The below table summarizes the PPA for the Aurion business combination which was finalized in the fourth quarter of 2025.

| (\$ millions) | Preliminary PPA | Measurement period adjustments | Final PPA |
|----------------------------------------------------------------|-----------------|--------------------------------------|------------|
| Property, plant and equipment | 3 | — | 3 |
| Right-of-use assets | 6 | — | 6 |
| Current marketed products | 105 | (40) | 65 |
| Acquired IPR&D | 825 | (5) | 820 |
| Deferred tax assets | 43 | (3) | 40 |
| Other current assets | 6 | — | 6 |
| Cash and cash equivalents | 26 | — | 26 |
| Non-current lease liabilities | (4) | — | (4) |
| Non-current financial debts | (1) | — | (1) |
| Deferred tax liabilities | (212) | 10 | (202) |
| Current financial debts | (34) | — | (34) |
| Current lease liabilities | (2) | — | (2) |
| Current income tax liabilities | (1) | — | (1) |
| Trade payables | (3) | — | (3) |
| Provisions and other current liabilities | (14) | 3 | (11) |
| Net identifiable assets acquired | 743 | (35) | 708 |
| Goodwill | 140 | 35 | 175 |
| Non-controlling interests | (27) | — | (27) |
| Net assets acquired as a result of business combination | 856 | — | 856 |
| Cash paid at closing | 522 | — | 522 |
| Previously-held investment in associated company | 334 | — | 334 |
| Total acquisition date fair value of consideration | 856 | — | 856 |

Goodwill is attributable primarily to assembled workforce and biopharmaceutical research and development capabilities. The goodwill is not deductible for tax purposes.

Direct acquisition costs of \$2 million were recognized in "Other expense" in the 2025 Consolidated Income Statement and were reported in operating cash flows in the 2025 Consolidated Statement of Cash Flows.

Subsequent to the acquisition, the current and non-current financial debts were repaid in the second quarter of 2025.

Pro forma financial information is not presented for the Aurion business acquisition as it is not material to the Consolidated Financial Statements.

For the period from the date of the Aurion acquisition, March 24, 2025, through December 31, 2025, the acquired business increased Alcon's "Net sales" by \$12 million and reduced Alcon's "Net income" by \$37 million.

Non-controlling interests

Alcon elected to recognize the non-controlling interests in Aurion at fair value.

Non-controlling interests with a fair value of \$27 million were recognized at acquisition date, comprised of common stock and vested options. The fair value of non-controlling interests was estimated using the market and income approaches, which were equally weighted. The income approach valuation utilized net present value techniques which involve significant judgment by management and include assumptions with measurement uncertainty. The estimates include cash flow projections for a five-year period based on management forecasts, sales forecasts beyond the five-year period extrapolated using long-term expected growth rates, discount rates and future tax rates. Actual cash flows and values could vary significantly from forecasted future cash flows and related values derived using net present value techniques. Since the cash flow projections are a significant unobservable input, the fair value of the non-controlling interests was classified as Level 3 in the fair value hierarchy.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

On March 26, 2025, the Aurion Board exercised its discretion under the Aurion stock plan and approved an exchange of outstanding vested options of Aurion employees for cash as settlement of their non-controlling interests in Aurion. During the third quarter of 2025, settlement agreements were executed among certain former Aurion executives, Alcon and Aurion. As part of these agreements, certain payments were made to these former executives and, additionally, Alcon acquired additional non-controlling interests in Aurion. During the fourth quarter of 2025, Alcon entered into stock purchase agreements and purchased additional non-controlling interests in Aurion. As a result, Alcon's fully diluted interest in Aurion increased from 85% on the business combination date to 99% as of December 31, 2025.

The below table summarizes movements in the non-controlling interests on a fully diluted basis from the acquisition date to the end of the reporting period.

| (\$ millions unless indicated otherwise) | Non-controlling interests (%) | Non-controlling interests |
|----------------------------------------------------------|-------------------------------|---------------------------|
| Initial recognition at acquisition date | 15 % | 27 |
| Changes in non-controlling interests | (14)% | (26) |
| Non-controlling interests as of December 31, 2025 | 1 % | 1 |

Profits and losses attributable to non-controlling interests are calculated on an outstanding basis.

Surgical - Acquisition of Cylite Pty Ltd.

On January 16, 2025, Alcon executed a stock purchase agreement and acquired approximately 91.2% of outstanding equity from Cylite shareholders, resulting in 100% ownership when combined with Alcon's existing 8.8% investment in Cylite. The Cylite diagnostic device complements Alcon's existing Surgical portfolio for cataracts. The acquisition of the remaining equity interest was accounted for as a business combination that resulted in goodwill of \$90 million after the final PPA of the consideration to the fair values of acquired assets and assumed liabilities. Total cash paid at closing, net of cash acquired, was \$72 million.

The development milestone contingent consideration is related to a potential payment of up to \$10 million upon achievement of the first commercial sale of a defined product within the United States. The contingent consideration recognized during the first quarter of 2025 represents its fair value (Level 3) at the acquisition date.

The acquisition date fair value of the equity interest previously held by Alcon was \$14 million, resulting in a remeasurement fair value gain of \$6 million in the first quarter of 2025. The fair value gain has been included in "Other income" in the 2025 Consolidated Income Statement.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

The below table summarizes the PPA for the Cylite business combination which was finalized in the fourth quarter of 2025 without identifying any measurement period adjustment.

| (\$ millions) | Final PPA |
|----------------------------------------------------------------|------------------|
| Property, plant and equipment | 1 |
| Right-of-use assets | 1 |
| Current marketed products | 4 |
| Acquired IPR&D | 33 |
| Inventories | 1 |
| Cash and cash equivalents | 6 |
| Other assets | 1 |
| Deferred tax liabilities | (11) |
| Lease liabilities | (1) |
| Trade payables | (1) |
| Provisions and other current liabilities | (1) |
| Net identifiable assets acquired | 33 |
| Goodwill | 90 |
| Net assets acquired as a result of business combination | 123 |
| Cash paid at closing | 78 |
| Cash expected to be paid after closing | 2 |
| Previously-held FVOCI financial investment | 11 |
| Previously-held commercialization rights in intangible assets | 9 |
| Contingent consideration | 9 |
| Previously-held investment in associated company | 14 |
| Total acquisition date fair value of consideration | 123 |

Goodwill is attributable primarily to buyer-specific synergies, including benefits to intraocular lens sales, development collaboration arrangement and associated development timeline reduction and assembled workforce. The goodwill is not deductible for tax purposes.

Direct acquisition costs of \$1 million were recognized in "Other expense" in the 2025 Consolidated Income Statement and were reported in operating cash flows in the 2025 Consolidated Statement of Cash Flows.

Pro forma financial information is not presented for the Cylite business acquisition as it is not material to the Consolidated Financial Statements.

For the period from the date of the Cylite acquisition, January 16, 2025, through December 31, 2025, the acquired business reduced Alcon's "Net income" by \$15 million.

Surgical - Acquisition of BELKIN Vision Ltd.

On July 1, 2024, Alcon acquired 100% of the outstanding shares and equity of BELKIN as provided under the BELKIN Agreement. This transaction complements Alcon's existing Surgical portfolio in the treatment of glaucoma. The acquisition was accounted for as a business combination that resulted in goodwill of \$20 million after the PPA of the consideration to the fair values of acquired assets and assumed liabilities. The acquisition date fair value of the previously-held financial investments measured at FVOCI by Alcon was \$20 million. Total cash paid at closing for the net identifiable assets recognized, net of cash acquired, was \$61 million.

Under the BELKIN Agreement, there are additional amounts, up to \$385 million, to be potentially paid upon achievement of certain commercial milestones if annual sales exceed defined targets within defined periods after closing. The contingent consideration recognized during the third quarter of 2024 totaled \$6 million, which represents its fair value (Level 3) at the acquisition date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

The below table summarizes the PPA for the BELKIN business combination which was finalized in the third quarter of 2024.

| (\$ millions) | Final PPA |
|----------------------------------------------------------------|-----------|
| Property, plant and equipment | 1 |
| Currently marketed products | 75 |
| Deferred tax assets | 6 |
| Inventories | 3 |
| Cash and cash equivalents | 3 |
| Other current assets | 2 |
| Deferred tax liabilities | (17) |
| Provisions and other current liabilities | (1) |
| Net identifiable assets acquired | 72 |
| Goodwill | 20 |
| Net assets acquired as a result of business combination | 92 |
| | |
| Cash paid at closing | 64 |
| Cash expected to be paid after closing | 2 |
| Previously-held FVOCI financial investments | 20 |
| Contingent consideration | 6 |
| Total acquisition date fair value of consideration | 92 |

The goodwill is primarily attributable to buyer-specific synergies and assembled workforce. The goodwill is not deductible for tax purposes.

Direct acquisition costs of \$1 million were recognized in "Other expense" in the 2024 Consolidated Income Statement and were reported in operating cash flows in the 2024 Consolidated Statement of Cash Flows.

Pro forma financial information is not presented for the BELKIN business acquisition as it is not material to the Consolidated Financial Statements.

For the period from the date of the BELKIN acquisition, July 1, 2024, through December 31, 2024, the acquired business increased Alcon's 2024 "Net sales" by \$1 million and reduced Alcon's 2024 "Net income" by \$4 million.

Proposed acquisition of LENSAR, Inc.

On March 23, 2025, Alcon entered into a definitive agreement to acquire all outstanding shares of LENSAR, Inc. ("LENSAR"), a global medical technology company focused on advanced laser solutions for the treatment of cataracts, with a total consideration of up to approximately \$430 million. The planned acquisition will complement Alcon's existing Surgical portfolio in the treatment of cataracts. The transaction is subject to customary closing conditions, including regulatory approval and is expected to close in the first half of 2026.

21.2 Acquisitions of assets

During 2025 and 2024, there were no acquisitions of assets recognized under IFRS 3, *Business Combinations*.

Acquisitions of assets in 2023 amounted to \$2 million.

21.3 Divestment of product rights and out-licensing in China

On October 17, 2024, Alcon closed on a set of definitive agreements to divest its rights in China in favor of Ocumension to *Bion Tears* and *Tears Naturale* (reported in Vision Care segment) and procedural eye drops (reported in Surgical segment). Under the terms of the agreements, Ocumension licensed the exclusive commercialization rights to *Systane Ultra* in China and development and commercialization rights to AR-15512 in China. In exchange, Alcon received up-front consideration of \$116 million in the form of approximately 16.7% of the ordinary shares of Ocumension, which Alcon is holding as a strategic investment and was designated at the closing date as Financial assets valued at FVOCI (Level 1). Related transaction costs of \$2 million were also capitalized. Alcon will also receive royalties and defined AR-15512 sales milestones. There are additional amounts, up to \$50 million, to be potentially received upon achievement of certain commercial milestones.

With the exception of *Systane Ultra*, the transaction was accounted for during the fourth quarter of 2024 as a divestment of product rights resulting in a net gain of approximately \$57 million recognized in "Other income" in the 2024 Consolidated Income Statement. The net carrying value of the divested rights in China was approximately \$2 million.

For *Systane Ultra*, the transaction will be accounted for as a supply agreement over the 15-year licensing term. The current and non-current portions of the up-front consideration allocated to the supply agreement, which amounted to \$2 million and \$54 million, respectively, were recorded as deferred income on the 2024 Consolidated Balance Sheet and will be recognized as "Other revenues" over the licensing term. Royalty revenues will be recognized in "Other revenues" in the Consolidated Income Statement as they are earned.

22. Post-employment benefits for associates

Defined benefit plans

In addition to the legally required social security schemes, Alcon has sponsored numerous independent pension and other post-employment benefit plans. In most cases, these plans are externally funded in entities that are legally separate from Alcon. For certain subsidiaries, however, no independent plan assets exist for the pension and other post-employment benefit obligations of associates. In these cases the related unfunded liability is included in the Consolidated Balance Sheet. The value of the post-employment benefits promised under the pension and other post-employment benefit plans is represented by the defined benefit obligation ("DBO"), which is measured based on the PUC method. Independent actuaries reappraise the DBOs of all major pension and other post-employment benefit plans annually. Plan assets are recognized at fair value.

The major pension and other post-employment benefit plans are based in Switzerland, the United States, Germany and the United Kingdom. As of December 31, 2025, these plans represent 88% of Alcon's total DBO and are independently sponsored by Alcon. Details of the plans in those significant countries are provided below.

The principal plan in Switzerland is funded and open for new joiners. For the Swiss pension plan, active insured members' benefits are partially linked to the contributions paid into the plan. Certain features of the Swiss pension plan required by law preclude the plan from being categorized as a defined contribution plan. These factors include a minimum interest guarantee on retirement savings accounts, a pre-determined factor for converting the accumulated savings account balance into a pension and embedded death and disability benefits. All benefits granted under a Swiss-based principal pension plan are vested, and Swiss legislation prescribes that the employer has to contribute a fixed percentage of an associate's pay to an external pension trust. Additional employer contributions may be required whenever the foundation's statutory funding ratio falls below a certain level. The associate also contributes to the plan.

Alcon's Swiss pension obligation is set up under an Alcon-sponsored arrangement affiliated with Copré La Collective de Prévoyance ("Copré") – a Swiss collective foundation. As a collective foundation, Copré is governed by its own board of trustees which is responsible for the foundation regulations and asset investment strategy for multiple entities participating in the collective foundation. Alcon maintains its own pension committee, consisting of representatives nominated by Alcon and the active insured associates.

The principal plan in the United States (Qualified Plan) is funded, whereas the plans providing additional benefits for executives (Defined Benefit Restoration Plan and Grandfathered Supplemental Executive Plan) are unfunded. Benefits in the Qualified Plan and Restoration Plan are frozen for all participants. Employer contributions are required for the Qualified Plan whenever the statutory funding ratio falls below a certain level. Furthermore, the United States other post-employment benefit plans (US OPEB plans) represent 98% of the total DBO for other post-employment benefit plans. These benefits in the US primarily consist of post-employment healthcare which has been closed to new members since 2015. Effective January 1, 2021, the Alcon sponsored group health plan for current and future eligible retired participants age 65 and over utilizes a private Medicare marketplace while providing an annual notional contribution to a Health Reimbursement Account for each covered member and spouse. There is no statutory funding requirement for the US OPEB plans.

The major pension arrangements in Germany are governed by the Occupational Pensions Act ("BetrAVG"). The plans are partly funded by a Contractual Trust arrangement or direct insurances. The employer is responsible for contributing the premiums to the insurances and paying certain benefits when they are due. All defined benefit plans are closed for new entrants and the benefits are fully vested for all participants. For some participants the benefits are based on final salary and length of employment, and for others the benefit is earned each year based on the current salary in the year of service. Associates do not contribute towards the cost of the benefits.

The plan in the United Kingdom is closed with only former Alcon associates entitled to current or future benefits. The Alcon United Kingdom Pension Scheme is governed and administered by a board of trustees in accordance with its Trust Deed. United Kingdom legislation requires that pension schemes are funded prudently (i.e., to a level in excess of the "best estimate" expected cost of providing benefits). Funding is assessed on a triennial basis using assumptions agreed by the board of trustees and Alcon. The board of trustees is responsible for jointly agreeing with Alcon the level of contributions needed to eliminate any shortfall over a reasonable period of time. Under the governing documentation, if a surplus remains once liabilities have been settled it would be refunded to Alcon.

Alcon has certain pension plans with a surplus that are not recognized on the basis that future economic benefits are not available to the entity in the form of a reduction in future contributions or a cash refund.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

The below table summarizes the funded and unfunded DBO for pension and other post-employment benefit plans of Alcon associates at December 31, 2025 and 2024.

| (\$ millions) | Pension plans | | Other post-employment benefit plans | |
|----------------------------------------------------------------------------|---------------|--------------|-------------------------------------|--------------|
| | 2025 | 2024 | 2025 | 2024 |
| Benefit obligation at January 1 | 592 | 638 | 208 | 213 |
| Current service cost | 18 | 16 | 4 | 5 |
| Interest cost | 19 | 18 | 12 | 10 |
| Past service costs and settlements | (1) | — | — | — |
| Administrative expenses | 1 | 1 | — | — |

| Funded status | (86) | (22) | (63) | 4 | 5 | (162) |

The below table shows the principal weighted average actuarial assumptions used for calculating defined benefit plans and other post-employment benefits of Alcon associates.

| | Pension plans | | Other post-employment benefit plans | |
|---------------------------------------------------------------------|---------------|-------|-------------------------------------|-------|
| | 2025 | 2024 | 2025 | 2024 |
| Discount rate | 3.3 % | 3.2 % | 5.2 % | 5.5 % |
| Expected rate of pension increase | 0.9 % | 1.0 % | | |
| Expected rate of salary increase | 2.4 % | 2.6 % | | |
| Interest on savings account | 3.0 % | 2.0 % | | |
| Current average life expectancy for a 65-year-old male (in years) | 20 | 20 | 21 | 21 |
| Current average life expectancy for a 65-year-old female (in years) | 22 | 22 | 23 | 23 |

The below table shows additional details related to the weighted average discount rates for pension and other post-employment benefit plans for each significant country.

| | Pension plans | | Other post-employment benefit plans | |
|----------------|---------------|-------|-------------------------------------|-------|
| | 2025 | 2024 | 2025 | 2024 |
| Switzerland | 1.8 % | 1.6 % | | |
| United States | 5.0 % | 5.4 % | 5.2 % | 5.5 % |
| Germany | 4.3 % | 3.5 % | | |
| United Kingdom | 5.5 % | 5.5 % | | |

Changes in the aforementioned actuarial assumptions can result in significant volatility in the accounting for pension plans and other post-employment benefit plans in the Consolidated Financial Statements. This can result in substantial changes in Alcon's other comprehensive income, non-current liabilities and prepaid pension assets.

The DBO is significantly impacted by assumptions related to the rate used to discount the actuarially determined post-employment benefit liability. This rate is based on yields of high-quality corporate bonds in the country of the plan. Increasing corporate bond yields increase the discount rate. An increase in the discount rate results in a decrease in the DBO and an increase in the funded status.

The impact of increasing interest rates on a plan's assets is more difficult to predict. A significant part of plan assets is invested in bonds. Bond values typically are inversely correlated to interest rates. Bond values usually decrease when interest rates rise and may therefore partially offset the increase in the funded status. Furthermore, pension assets also include significant holdings of equity instruments. Share prices tend to fall when interest rates increase and therefore

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

often offset the positive impact of the decreasing DBO on the funded status (although the correlation of interest rates with returns on equities is not as strong as with bonds, especially in the short term).

The assumption for the expected rate for pension increases significantly affects the DBO of most plans in Switzerland, Germany and the United Kingdom. Such pension increases generally decrease the funded status, although there is no strong correlation between the value of the plan assets and pension/inflation increases.

The assumption for the expected rate for salary increases significantly affects the DBO by influencing projected future compensation levels used in determining benefit payments. A lower salary growth rate reduces projected benefits and results in a decrease to the DBO, while a higher assumed growth rate increases the DBO.

The assumption for the interest rate credited to savings accounts is a key driver of the DBO for cash balance plans, primarily in Switzerland and the United States. Higher assumed interest rates increase the annual interest credits allocated to participant account balances, which in turn accelerates benefit growth and increases the DBO.

Assumptions regarding life expectancy significantly impact the DBO. While the life expectancy assumption remained flat in the current year, generally an increase in longevity increases the DBO. There is no offsetting impact from the plan assets, as no longevity bonds or swaps are held by the pension funds. Generational mortality tables are used where this data is available.

The below table shows the sensitivity of the defined benefit pension and other post-employment benefit obligations to the principal actuarial assumptions as of December 31, 2025.

| (\$ millions) | (Decrease)/increase in 2025 year-end liability |
|--------------------------------------------------------------------|-----------------------------------------------------------|
| 25 basis point increase in discount rate | (25) |
| 25 basis point decrease in discount rate | 26 |
| 1 year increase in life expectancy | 16 |
| 25 basis point increase in rate of pension increase | 8 |
| 25 basis point decrease in rate of pension increase ⁽¹⁾ | (4) |
| 25 basis point increase of interest on savings account | 4 |
| 25 basis point decrease of interest on savings account | (4) |
| 25 basis point increase in rate of salary increase | 3 |
| 25 basis point decrease in rate of salary increase | (3) |

(1) Decrease in rate of pension increase is limited to zero.

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes of the assumptions may be correlated. When calculating the sensitivity of the DBO to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the PUC method at the end of the reporting period) has been applied as when calculating the net liability recognized in the Consolidated Balance Sheet.

The below table summarizes the healthcare cost trend rate assumptions used for other post-employment benefits.

| | 2025 | 2024 | 2023 |
|---------------------------------------------------------|-------------|-------------|-------------|
| Healthcare cost trend rate assumed for next year | 6.7 % | 7.0 % | 6.0 % |
| Rate to which the cost trend rate is assumed to decline | 4.5 % | 4.5 % | 4.5 % |
| Year that the rate reaches the ultimate trend rate | 2035 | 2035 | 2030 |

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS OF ALCON INC. (Continued)

The below table shows the weighted average plan asset allocation of funded defined benefit pension plans at December 31, 2025, and 2024.

| (as a percentage) | Pension plans | | 2025 | 2024 |
|----------------------------|--------------------------|--------------------------|------------|------------|
| | Long-term target minimum | Long-term target maximum | | |
| Equity securities | 15 | 40 | 31 | 33 |
| Debt securities | 20 | 60 | 43 | 40 |
| Real estate | 5 | 20 | 11 | 11 |
| Alternative investments | — | 20 | 13 | 13 |
| Cash and other investments | — | 15 | 2 | 3 |
| Total | | | 100 | 100 |

Cash and most of the equity and debt securities have a quoted market price in an active market. Real estate and alternative investments, which include hedge fund and private equity investments, usually do not have a quoted market price.

The strategic allocation of assets of the different pension plans is determined with the objective of achieving an investment return that, together with employer contributions and contributions of associates (where applicable), is sufficient to manage the various funding risks of the plans. Based upon the market and economic environments, actual asset allocations may temporarily be permitted to deviate from policy targets.

The weighted average duration of the DBO is 12.1 years and 12.0 years as of December 31, 2025 and December 31, 2024, respectively.

Alcon's ordinary contribution to the various pension plans is based on the rules of each plan and its respective country. Additional contributions are made whenever required by local statute or law (i.e., usually when statutory funding levels fall below predetermined thresholds).

The below table summarizes expected employer contributions for one year and expected future benefit payments for ten years for pension and other post-employment benefit plans as of December 31, 2025.

| (\$ millions) | Pension plans | Other post-employment benefit plans |
|-----------------------------------------|---------------|-------------------------------------|
| Employer contributions | | |
| 2026 (estimated) | 11 | — |
| Expected future benefit payments | | |
| 2026 | 41 | 16 |
| 2027 | 37 | 17 |
| 2028 | 38 | 18 |
| 2029 | 42 | 19 |
| 2030 | 44 | 19 |
| 2031-2035 | 220 | 89 |

Defined contribution plans

In many countries, associates are covered by defined contribution plans. Contributions charged to the 2025 Consolidated Income Statement for the defined contribution plans were \$161 million (2024: \$153 million; 2023: \$151 million).

23. Equity-based compensation

For the year ended December 31, 2025, Alcon recorded equity-based compensation expense of \$171 million (2024: \$162 million, 2023: \$159 million).

Liabilities from cash-settled equity-based compensation plans were \$9 million as of December 31, 2025 (\$11 million as of December 31, 2024).

At December 31, 2025, Alcon has various equity-based incentive plans, under which Alcon may grant awards in the form of restricted stock units ("RSUs"), performance-based restricted stock units ("PSUs"), restricted stock awards ("RSAs"), or any other form of award at the discretion of the Board. Certain associates in select countries may also participate in share ownership savings plans.

Summary of unvested share movements

The below table summarizes unvested share movements for all Alcon equity-based incentive plans for the years ended December 31, 2025 and 2024.

| | 2025 | | | 2024 | | |
|---------------------------------------|-------------------------------|-------------------------------------------------|-----------------------------------------|-------------------------------|-------------------------------------------------|-----------------------------------------|
| | Number of shares in thousands | Weighted average fair value at grant date in \$ | Fair value at grant date in \$ millions | Number of shares in thousands | Weighted average fair value at grant date in \$ | Fair value at grant date in \$ millions |
| Unvested shares at January 1 | 5,167 | 74.63 | 386 | 4,942 | 71.82 | 355 |
| Granted | | | | | | |
| Restricted awards | 1,465 | 88.69 | 130 | 1,560 | 80.95 | 126 |
| Performance awards | 1,180 | 85.78 | 101 | 771 | 77.99 | 60 |
| Vested | (1,751) | 77.39 | (136) | (1,902) | 73.76 | (140) |
| Forfeited | (335) | 81.49 | (27) | (204) | 75.72 | (15) |
| Unvested shares at December 31 | 5,726 | 79.30 | 454 | 5,167 | 74.63 | 386 |

The remaining weighted-average vesting period of unvested equity-based awards as of December 31, 2025 was 1.1 years.

Equity-based incentive plans

The below table summarizes the number of shares authorized under the plans as of December 31, 2025.

| (thousands) | Authorized shares |
|------------------------------------------|-------------------|
| Long-term Incentive Plan | 20,000 |
| Deferred Bonus Stock Plan ⁽¹⁾ | 1,500 |
| Swiss Employee Share Ownership Plan | 475 |
| Other share savings plans | 275 |
| Total | 22,250 |

(1) No grants under the Deferred Bonus Stock Plan were made in 2025, 2024 or 2023.

Long-term Incentive Plan ("LTIP") - Restricted Stock Units and Restricted Stock Awards

Under Alcon's LTIP, certain associates may receive grants of RSUs and RSAs (together "Restricted awards"). The awards generally vest on the third anniversary of the award and are generally forfeited if the employment relationship with Alcon terminates prior to vesting. Recipients of RSU awards do not have any shareholder rights, such as voting or dividend rights, until the shares are delivered. Alcon associates receiving grants of RSAs are entitled to the dividends that may be declared and paid over the vesting period only if the associates vest in such award.

LTIP - Performance Stock Units

The Alcon CEO and certain senior-level associates participate in Alcon's long-term performance program. PSUs granted under the LTIP each convert to unrestricted Alcon Inc. shares at vesting, subject to the achievement of performance measures.

PSUs awarded to plan participants are granted at target incentive ranges from 40% to 575% of base compensation and vest over a three-year period. The payout between 0% and 200% of target is dependent upon four equally weighted performance metrics which are determined at the onset of the performance period by the Board. The metrics include compound annual growth rate of Net sales, compound annual growth rate of core earnings per share, market share of peers, and innovation. The Board and the Compensation Committee assess the performance against the defined measures, including input from the Innovation Committee for the innovation metric, and approve the final payout. PSUs granted under the performance plan do not carry voting rights, but do carry dividend equivalents that are paid in cash or Alcon Inc. shares at vesting, provided participants remain associates of Alcon.

From time to time, Alcon grants one-time PSU awards to plan participants to provide an incentive to meet specific company objectives. These awards represent an immaterial portion of total PSU grants outstanding as of December 31, 2025. The aggregate grant-date fair value and related expense associated with these awards are insignificant to Alcon's overall equity-based incentive plan as of December 31, 2025.

Swiss Employee Share Ownership Plan and other share savings plans

Alcon associates in certain countries are encouraged to invest in share savings plans. Under the share savings plans, participants may elect to receive some of their wages or annual incentives in Alcon Inc. shares in lieu of cash. Subject to plan rules and limitations, as a reward for their participation in the share savings plans, at no additional cost to the participant, Alcon may partially match their investments in shares after a holding period of 3 years.

24. Related parties transactions

Executive officers

The below table summarizes compensation information for key management personnel.

| (\$ millions) | 2025 | 2024 | 2023 |
|-----------------------------|-------------|-------------|-------------|
| Cash and other compensation | 18.5 | 24.4 | 20.1 |
| Post-employment benefits | 3.1 | 2.9 | 1.1 |
| Equity-based compensation | 24.4 | 22.5 | 23.1 |
| Total | 46.0 | 49.8 | 44.3 |

Investments in associated companies

As of December 31, 2025, Alcon holds voting interests of approximately 21.4% in an associated company. As of December 31, 2024, Alcon also held voting interests of approximately 40.3% in an associated company which Alcon acquired a majority interest in during 2025. As of December 31, 2024, Alcon also held voting interests of approximately 8.8% in an associated company which was initially acquired for \$10 million during 2023 and wholly acquired during 2025. Associated companies are accounted for using the equity method as Alcon is considered to have significant influence.

The below table summarizes activity related to investments in associated companies for the years ended December 31, 2025 and 2024.

| (\$ millions) | Investments in associated companies | |
|-----------------------------------------------------------------------------------------------|-------------------------------------|------------|
| | 2025 | 2024 |
| Balance as of January 1 | 293 | 10 |
| Purchases | 8 | 159 |
| Transfer from Financial assets | — | 132 |
| Share of (loss) from associated companies recognized in Consolidated Income Statement | (18) | (8) |
| Gains on fair value remeasurements recognized in Consolidated Income Statement ⁽¹⁾ | 142 | — |
| Recognition of business combinations ⁽¹⁾ | (348) | — |
| Balance as of December 31 | 77 | 293 |

(1) Refer to Note 21 for additional information.

There were no amounts due from associated companies as of December 31, 2025. As of December 31, 2024, long-term convertible notes due from associated companies included in "Financial assets" on the Consolidated Balance Sheet amounted to \$11 million.

There were no other payments or payables to associated companies in 2025. Other payments and payables to associated companies in 2024 amounted to \$2 million primarily for research and development costs. Other payments to associated companies in 2023 amounted to \$3 million to extend the duration of an option to acquire certain exclusive commercialization rights.

25. Commitments and contingencies

Commitments

Research & development

Alcon has entered into long-term research agreements with various institutions which provide for potential milestone payments and other payments by Alcon that may be capitalized. As of December 31, 2025, the commitments to make payments under those agreements, and their estimated timing, were as follows:

| (\$ millions) | 2025 |
|---------------|-----------|
| 2026 | 6 |
| 2027 | 5 |
| 2028 | 7 |
| 2029 | — |
| 2030 | 1 |
| Thereafter | 68 |
| Total | 87 |

Other

Alcon entered into various purchase commitments for services and materials as well as for equipment in the ordinary course of business. These commitments are generally entered into at current market prices and reflect normal business operations. For disclosure of Property, plant and equipment purchase commitments, see Note 8.

Contingencies

The Alcon companies have to observe the laws, government orders and regulations of the country in which they operate.

A number of Alcon companies are, and will likely continue to be, subject to various legal proceedings and investigations that arise from time to time, including proceedings regarding product liability, sales and marketing practices, commercial disputes, mergers and acquisitions, employment, wrongful discharge, antitrust, securities, health and safety, environmental, tax, international trade, privacy, intellectual property including under the Hatch-Waxman Act, and anti-bribery matters such as those under the FCPA, as amended. As a result, Alcon may become subject to substantial liabilities that may not be covered by insurance and could affect Alcon's business, financial position and reputation. While Alcon does not believe that any of these legal proceedings will have a material adverse effect on its financial position, litigation is inherently unpredictable and large judgments sometimes occur. As a consequence, Alcon may in the future incur judgments or enter into settlements of claims that could have a material adverse effect on its results of operations or cash flow.

Governments and regulatory authorities around the world have been stepping up their compliance and law enforcement activities in recent years in key areas, including marketing practices, pricing, corruption, trade restrictions, embargo legislation, insider trading, antitrust, cybersecurity and data privacy. Further, when one government or regulatory authority undertakes an investigation, it is not uncommon for other governments or regulators to undertake investigations regarding the same or similar matters. Responding to such investigations is costly and requires an increasing amount of management's time and attention. In addition, such investigations may affect Alcon's reputation, create a risk of potential exclusion from government reimbursement programs in the United States and other countries, and may lead to (or arise from) litigation. These factors have contributed to decisions by Alcon and other companies in the healthcare industry, when deemed in their interest, to enter into settlement agreements with governmental authorities around the world prior to any formal decision by the authorities or a court. Those government settlements have involved and may continue to involve, in current government investigations and proceedings, large cash payments, sometimes in the hundreds of millions of dollars or more, including the potential repayment of amounts allegedly obtained improperly and other penalties, including treble damages. In addition, settlements of government healthcare fraud cases often require companies to enter into corporate integrity agreements, which are intended to regulate company behavior for a period of years. Also, matters underlying governmental investigations and settlements may be the subject of separate private litigation.

While provisions have been made for probable losses, which management deems to be reasonable or appropriate, there are uncertainties connected with these estimates. Note 18 contains additional information on these matters.

Alcon is involved in legal proceedings concerning intellectual property rights. The inherent unpredictability of such proceedings means that there can be no assurances as to their ultimate outcome. A negative result in any such proceeding could potentially adversely affect the ability of certain Alcon companies to sell their products, or require the payment of substantial damages or royalties.

Alcon's potential for environmental remediation liability is assessed based on a risk assessment and investigation of the various sites identified by Alcon as at risk for environmental remediation exposure. Alcon's future remediation expenses are affected by a number of uncertainties. These uncertainties include, but are not limited to, the method and extent of remediation, the percentage of material attributable to Alcon at the remediation sites relative to that attributable to other parties, and the financial capabilities of the other potentially responsible parties.

Alcon has no significant environmental liabilities as of December 31, 2025 and 2024 and has incurred no significant remediation costs for the years ended December 31, 2025, 2024 and 2023.

26. Subsequent events

On August 4, 2025, Alcon entered into a definitive agreement to acquire STAAR Surgical Company ("STAAR"), a global medical technology company focused on the research, development, manufacturing, distribution and sale of phakic intraocular lenses. Pursuant to the terms of the agreement as amended, Alcon agreed to acquire all outstanding shares of STAAR's common stock for total consideration of approximately \$1.8 billion. On January 6, 2026, Alcon terminated its definitive merger agreement with STAAR. There were no termination fees for either company.

On August 20, 2025, Alcon executed a \$1.9 billion bridge loan agreement (the "2025 Bridge Loan Facilities") with Morgan Stanley Bank International Limited and Morgan Stanley Bank, N.A., split in two tranches of \$1.4 billion ("Facility A") and \$0.5 billion ("Facility B"), respectively. Facility A was restricted for use in funding the acquisition of STAAR, whereas Facility B was to be used for financing or refinancing of any other acquisitions. The 2025 Bridge Loan Facilities remained fully undrawn as of December 31, 2025. The maturity of the 2025 Bridge Loan Facilities was to be determined upon the completion of the related acquisitions. In January 2026, Alcon cancelled the 2025 Bridge Loan Facilities.

On February 24, 2026, Alcon announced certain efficiency measures supported by operational improvements and infrastructure investments. Alcon estimates the total cost to implement these efficiency measures to be approximately \$150 million and expects the implementation to be completed in 2026.

On February 24, 2026, the Board approved the proposal to submit the 2025 financial statements of Alcon Inc. and these Consolidated Financial Statements for approval at the Annual General Meeting on April 30, 2026. Additionally on February 24, 2026, the Board proposed a dividend of CHF 0.28 per share to be approved at the same Annual General Meeting. If approved by the shareholders, the total dividend payments would amount to a maximum of approximately \$182 million using the CHF/USD exchange rate as of February 16, 2026.

The Board has evaluated subsequent events as they relate to Alcon for potential recognition or disclosures from January 1, 2026 to the date of the approval of these Consolidated Financial Statements and has determined there are no additional subsequent events to be reported in these Consolidated Financial Statements.

27. Alcon subsidiaries and associated companies

The following table lists the subsidiaries of Alcon Inc. with Total assets or Net sales in excess of \$5 million included in the Consolidated Financial Statements at and for the year ended December 31, 2025, respectively. The equity interest percentage shown in the table represents Alcon's share in voting rights in those entities. Unless otherwise stated, each entity has share capital consisting of equity held directly by the Company or another of its consolidated subsidiaries.

REPORT OF THE STATUTORY AUDITOR

to the General Meeting of Alcon Inc., Fribourg

Report on the audit of the consolidated financial statements

Opinion

We have audited the consolidated financial statements of Alcon Inc. and its subsidiaries (the Group), which comprise the consolidated balance sheet as at December 31, 2025, and the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity, and the consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the consolidated financial statements (pages F-1 to F-75) give a true and fair view of the consolidated financial position of the Group as at December 31, 2025 and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards and comply with Swiss law.

Basis for opinion

We conducted our audit in accordance with Swiss law, International Standards on Auditing (ISA) and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the 'Auditor's responsibilities for the audit of the consolidated financial statements' section of our report. We are independent of the Group in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession that are relevant to audits of the financial statements of public interest entities, as well as the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code), as applicable to audits of financial statements of public interest entities. We have also fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit approach

Overview

Overall group materiality: USD 75 million

The entities in-scope for full scope audit work as well as specified procedures or full scope audit work on account balances addressed 74% of the Group's net sales.

As key audit matters the following areas of focus have been identified:

- Annual Impairment Assessments for Goodwill for a Certain Cash Generating Unit and Alcon Brand Name
- Annual Impairment Assessment for a Certain Acquired In-Process Research and Development Intangible Asset
- Acquisition of a Majority Interest in Aurion Biotech, Inc. – Valuation of Acquired In-Process Research and Development Intangible Asset

Materiality

The scope of our audit was influenced by our application of materiality. Our audit opinion aims to provide reasonable assurance that the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall Group materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the consolidated financial statements as a whole.

| | |
|--------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Overall group materiality | USD 75 million |
| Benchmark applied | Overall group materiality was determined based on consideration of relevant benchmarks including unadjusted EBITDA and "Core" EBITDA, net sales, pre-tax net income and "Core" pre-tax net income, with EBITDA as the primary benchmark. |
| Rationale for the materiality benchmark applied | We chose this benchmark because, in our view, it is the measure against which the performance of the Group is most commonly assessed. The benchmark metrics noted provided a range, from which we determined the overall Group materiality. |

We agreed with the Audit and Risk Committee that we would report to them misstatements above USD 7.5 million identified during our audit as well as any misstatements below that amount which, in our view, warranted reporting for qualitative reasons.

Audit scope

We designed our audit by determining materiality and assessing the risks of material misstatement in the consolidated financial statements. In particular, we considered where subjective judgements were made; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Annual Impairment Assessments for Goodwill for a Certain Cash Generating Unit and Alcon Brand Name

| Key audit matter | How our audit addressed the key audit matter |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>As described in Notes 2 and 9 to the consolidated financial statements, as of December 31, 2025, the Group had USD 9.3 billion of goodwill, of which a significant portion relates to a certain cash generating unit (CGU), as well as a USD 3.0 billion indefinite life intangible asset related to the Alcon brand name. An impairment assessment on goodwill and indefinite life intangible assets, which is performed over the groupings of CGUs containing goodwill or the Alcon brand name, is performed at least annually. A CGU to which goodwill has been allocated is considered impaired when its carrying amount, including the goodwill, exceeds its recoverable amount, which is defined as the higher of its fair value less costs of disposal and its value in use. An intangible asset other than goodwill is considered impaired when its balance sheet carrying amount exceeds its estimated recoverable amount, which is defined as the higher of its fair value less costs of disposal and its value in use. Usually, management applies the fair value less costs of disposal method for its impairment assessment. In most cases, no direct or indirect observable market prices for identical or similar assets are available to measure the fair value less costs of disposal. Therefore, an estimate of fair value less costs of disposal is based on net present value techniques utilizing post-tax cash flows and discount rates. The estimates of fair value less costs of disposal involve significant judgment by management and include assumptions with measurement uncertainty, such as the amount and timing of projected cash flows, long-term sales forecasts, terminal growth rate, discount rate, and, additionally for the Alcon brand name, royalty rate.</p> <p>The principal considerations for our determination that performing procedures relating to the annual impairment assessments for goodwill for a certain CGU and the Alcon brand name is a key audit matter are (i) the significant judgment by management when developing the fair value less costs of disposal estimates for a certain CGU and the Alcon brand name; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to (a) long-term sales forecasts and discount rate for a certain CGU and (b) long-term sales forecasts, discount rate, and royalty rate for the Alcon brand name; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.</p> | <p>Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's goodwill and the Alcon brand name impairment assessments, including controls over the valuation of a certain CGU and the Alcon brand name. These procedures also included, among others (i) testing management's process for developing the fair value less costs of disposal estimates for a certain CGU and the Alcon brand name; (ii) evaluating the appropriateness of the valuation method used by management; (iii) testing the completeness and accuracy of the underlying data used in the valuation method; and (iv) evaluating the reasonableness of the significant assumptions used by management related to (a) long-term sales forecasts and discount rate for a certain CGU and (b) long-term sales forecasts, discount rate, and royalty rate for the Alcon brand name. Evaluating management's assumptions related to long-term sales forecasts for a certain CGU and the Alcon brand name involved evaluating whether the assumptions used by management were reasonable considering (i) the current and past performance of the business; (ii) the consistency with external market and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of management's valuation method and (ii) the reasonableness of the (a) discount rate assumption for a certain CGU and (b) discount rate and royalty rate assumptions for the Alcon brand name.</p> |

Annual Impairment Assessment for a Certain Acquired In-Process Research and Development Intangible Asset

Key audit matter

As described in Notes 2 and 9 to the consolidated financial statements, as of December 31, 2025, the Group had USD 1.4 billion of acquired in-process research and development (IPR&D) net intangible assets, of which a portion relates to a certain acquired IPR&D intangible asset. IPR&D is not amortized, but evaluated for potential impairment on an annual basis or when facts and circumstances warrant. IPR&D is considered impaired when its balance sheet carrying amount exceeds its estimated recoverable amount, which is defined as the higher of its fair value less costs of disposal and its value in use. Usually, management applies the fair value less costs of disposal method for its impairment assessments. Under this approach, fair value less costs of disposal is estimated using net present value techniques utilizing post-tax cash flows and discount rates as there are no direct or indirect observable prices in active markets for identical or similar assets. The estimates of fair value less costs of disposal involve significant judgment by management and include assumptions with measurement uncertainty, such as the amount and timing of projected cash flows, long-term sales forecasts, discount rate, and the timing and probability of regulatory and commercial success, which includes the evaluation of clinical trial outcomes.

The principal considerations for our determination that performing procedures relating to the annual impairment assessment for a certain acquired IPR&D intangible asset is a key audit matter are (i) the significant judgment by management when developing the fair value less costs of disposal estimate for a certain acquired IPR&D intangible asset; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to long-term sales forecasts, discount rate, and probability of regulatory and commercial success; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

How our audit addressed the key audit matter

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's acquired IPR&D intangible asset impairment assessments, including controls over the valuation of a certain acquired IPR&D intangible asset. These procedures also included, among others (i) testing management's process for developing the fair value less costs of disposal estimate for a certain acquired IPR&D intangible asset; (ii) evaluating the appropriateness of the valuation method used by management; (iii) testing the completeness and accuracy of the underlying data used in the valuation method; and (iv) evaluating the reasonableness of the significant assumptions used by management related to long-term sales forecasts, discount rate, and probability of regulatory and commercial success. Evaluating management's assumptions related to long-term sales forecasts and probability of regulatory and commercial success involved evaluating whether the assumptions used by management were reasonable considering (i) the current and past performance of the business; (ii) the consistency with external market and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of management's valuation method and (ii) the reasonableness of the discount rate assumption.

Acquisition of a Majority Interest in Aurion Biotech, Inc. – Valuation of Acquired In-Process Research and Development Intangible Asset

| Key audit matter | How our audit addressed the key audit matter |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>As described in Notes 2, 3, and 21 to the consolidated financial statements, on March 24, 2025, the Group completed the acquisition of approximately 58.7% of the outstanding equity of Aurion Biotech, Inc. (Aurion). The total acquisition date fair value of consideration was USD 856 million. Of the identifiable intangible assets acquired, USD 820 million of acquired in-process research and development (IPR&D) was recorded. Management primarily uses net present value techniques, utilizing post-tax cash flows and discount rates in estimating the fair value of identifiable assets acquired when allocating the purchase consideration paid for the acquisition. The estimates of the fair values involve significant judgment by management and include assumptions with measurement uncertainty, such as the amount and timing of projected cash flows, long-term sales forecasts, timing and probability of regulatory and commercial success, and discount rate.</p> <p>The principal considerations for our determination that performing procedures relating to the valuation of the acquired IPR&D intangible asset acquired in the acquisition of a majority interest in Aurion is a key audit matter are (i) the significant judgment by management when developing the fair value estimate of the acquired IPR&D intangible asset; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to long-term sales forecasts, probability of regulatory and commercial success, and discount rate; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.</p> | <p>Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the acquisition accounting, including controls over management's valuation of the acquired IPR&D intangible asset. These procedures also included, among others (i) reading the purchase agreement; (ii) testing management's process for developing the fair value estimate of the acquired IPR&D intangible asset; (iii) evaluating the appropriateness of the valuation method used by management; (iv) testing the completeness and accuracy of the underlying data used in the valuation method; and (v) evaluating the reasonableness of the significant assumptions used by management related to long-term sales forecasts, probability of regulatory and commercial success, and discount rate. Evaluating management's assumptions related to long-term sales forecasts and probability of regulatory and commercial success involved considering (i) the current and past performance of the Aurion business; (ii) the consistency with external market and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of management's valuation method and (ii) the reasonableness of the discount rate assumption.</p> |

Other information

The Board of Directors is responsible for the other information. The other information comprises the Annual Report (but does not include the financial statements, the consolidated financial statements, the disclosures made on the exhibits and pages defined as subject to audit of the compensation report and our auditor's reports thereon) and the Say on Pay Brochure, which we obtained prior to the date of this auditor's report, and the Sustainability & Social Impact Report, which is expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the consolidated financial statements

The Board of Directors is responsible for the preparation of consolidated financial statements, that give a true and fair view in accordance with IFRS Accounting Standards and the provisions of Swiss law, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law, ISA and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Swiss law, ISA and SA-CH, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them regarding all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors or its relevant committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

In accordance with article 728a para. 1 item 3 CO and PS-CH 890, we confirm the existence of an internal control system that has been designed, pursuant to the instructions of the Board of Directors, for the preparation of the consolidated financial statements.

We recommend that the consolidated financial statements submitted to you be approved.

The accompanying Notes are an integral part of these Financial Statements.

NOTES TO FINANCIAL STATEMENTS OF ALCON INC.

1. Introduction

Alcon Inc. (the "Company") is a stock corporation (Aktiengesellschaft) organized under the laws of Switzerland in accordance with article 620 et seq. of the Swiss Code of Obligations ("SCO") and registered as of September 21, 2018.

These Financial Statements of Alcon Inc., with registered office in Fribourg, were prepared according to the principles of the Swiss Law on Accounting and Financial Reporting (32nd title of the Swiss Code of Obligations). Where not prescribed by law, the significant accounting and valuation principles applied are described below.

Alcon Inc. presents its Consolidated Financial Statements according to IFRS Accounting Standards ("International Financial Reporting Standards"). As a result, Alcon Inc. has applied the exemption included in art. 961d SCO and has not included additional disclosures, a cash flow statement or a management report in its Financial Statements.

Alcon Group is defined as Alcon Inc. and all of its direct and indirect subsidiaries.

2. Accounting policies

Cash and cash equivalents

Cash and cash equivalents include cash and investments with a maturity or conversion period of three months or less and are valued at nominal value.

Investments

Investments are initially recognized at cost, assessed annually for impairment triggers, and adjusted to their recoverable amount as needed.

Loans granted to and from subsidiaries

Current and non-current loans to and from Alcon Group subsidiaries are valued at nominal value under consideration of any impairment if needed.

Prepaid expenses and accrued income

Fees related to external financing are recognized as prepaid expenses and amortized on a straight-line basis over the related period. Agency fees are expensed to the income statement. Accrued interest income on cash and cash equivalents is recorded under prepaid expenses and accrued income.

Treasury shares

Treasury shares are initially recognized at cost at the time of acquisition and recorded as a reduction of equity. Any subsequent usage of treasury shares resulting in a net gain or net loss is recorded in the income statement under other income or other expenses.

NOTES TO FINANCIAL STATEMENTS OF ALCON INC. (Continued)

Positions denominated in foreign currencies

The positions in the balance sheet denominated in foreign currencies are translated to CHF with the following foreign exchange rates as of December 31, 2025 and 2024:

| Currency | 2025 | 2024 |
|----------|---------|---------|
| USD | 0.79305 | 0.90365 |
| EUR | 0.93092 | 0.94076 |

Unrealized gains and losses

Unrealized gains on current loans and non-current positions are deferred and will be recognized upon realization under Financial Income. Unrealized losses are recognized in the income statement in the corresponding period under Financial expense.

3. Other income

Other income solely includes net income from subsequent usage of treasury shares as defined in Note 2.

4. Investments

The principal direct and indirect subsidiaries and other holdings of Alcon Inc. are shown in Note 27 to the Group's Consolidated Financial Statements.

During 2025, Alcon Inc. did not impair any Group investment (2024: CHF 4.0 million) and did not dispose of any investments (2024: CHF 28.4 million).

| (CHF thousands) | 2025 | 2024 |

NOTES TO FINANCIAL STATEMENTS OF ALCON INC. (Continued)

6. Current interest-bearing loans due from group subsidiary

In 2025, the loan denominated in USD and issued in December 2022 was classified as a non-current interest-bearing loan as the related maturity date was extended to November 2028 from November 2025.

The loan denominated in CHF and issued in April 2021 was fully repaid in 2025.

As of December 31, 2025, the entity does not have any current interest-bearing loans due from its group subsidiaries.

As of December 31, 2024, the current interest-bearing loans due from group subsidiary are presented in the table below.

| Original Borrower | Start date | Repayment date | (USD thousands) | Total (CHF thousands) |
|-------------------------------------------|-------------------|-----------------------|------------------------|----------------------------------|
| Alcon Pharmaceuticals Ltd. | December, 2022 | November, 2025 | 489,000 | 441,885 |
| Deferred unrealized foreign exchange gain | | | | (3,541) |
| Alcon Pharmaceuticals Ltd. | April, 2021 | May, 2025 | — | 230,463 |
| Total at December 31, 2024 | | | | 668,807 |

7. Non-current interest-bearing loan due from group subsidiary

In 2025, the loan issued in December 2022 was classified as a non-current interest-bearing loan as the related maturity date was extended to November 2028 from November 2025. In addition, the loan was converted to CHF, partially repaid during the year, and had a balance of CHF 47.8 million as of December 31, 2025.

As of December 31, 2024, the entity does not have any non-current interest bearing loans due to its group subsidiaries.

| Original Borrower | Start date | Repayment date | Total (CHF thousands) |
|-----------------------------------|-------------------|-----------------------|----------------------------------|
| Alcon Pharmaceuticals Ltd. | December, 2022 | November, 2028 | 47,825 |
| Total at December 31, 2025 | | | 47,825 |

8. Non-current interest-bearing loan due to group subsidiary

In 2025, the entity entered into a non-current loan for EUR 100.0 million with a group subsidiary.

Unrealized foreign exchange gains are deferred in accordance with the accounting policy. As of December 31, 2025, an unrealized gain of CHF 0.1 million is deferred.

| Original Lender | Start date | Repayment date | (EUR thousands) | Total (CHF thousands) |
|-------------------------------------------|-------------------|-----------------------|------------------------|----------------------------------|
| Alcon Pharmaceuticals Ltd. | December, 2025 | December, 2030 | 100,000 | 93,092 |
| Deferred unrealized foreign exchange gain | | | | 59 |
| Total at December 31, 2025 | | | | 93,151 |

NOTES TO FINANCIAL STATEMENTS OF ALCON INC. (Continued)

9. Share capital

The share capital consists of 499,700,000 registered shares with a nominal value of CHF 0.04 (CHF 19,988,000).

Capital movements

| Total | 12,272,080 | (542,800) | 5,083,676 | (203) |

11. Declaration of full time equivalent (FTE) employees

The Company employs less than 10 associates.

NOTES TO FINANCIAL STATEMENTS OF ALCON INC. (Continued)

12. Shares held by management and administrative bodies

The below table includes shares held by members of the Board of Directors and Alcon Executive Committee as of December 31, 2025 and December 31, 2024, respectively.

| | Number of shares | |
|---------------------------|------------------|-----------|
| | 2025 | 2024 |
| Board of Directors | 253,460 | 213,819 |
| Alcon Executive Committee | 1,238,594 | 1,099,795 |

Further information regarding the individual holding of the members of the Board of Directors and the Alcon Executive Committee is available in “Board of Directors Compensation 2025—Share Ownership of the Members of the Board of Directors” and “ECA Compensation 2025—Share Ownership of the ECA Members”, respectively, of “Item 6.B Compensation” in the Annual Report.

13. Major shareholders

According to the Alcon share register, the following nominee shareholders held more than 5% of the share capital of Alcon Inc. as of either December 31, 2025 or 2024:

| | % Holding of share capital | |
|---------------------------------------------|----------------------------|---------|
| | 2025 | 2024 |
| Cede & Co (DTC nominee), New York, NY (USA) | 17.10 % | 17.51 % |

In addition, according to disclosure notifications filed with (i) Alcon and the SIX Swiss Exchange pursuant to the obligations set forth in the Swiss Federal Act on Financial Market Infrastructures and Market Conduct in Securities and Derivatives Trading (FMIA) and/or (ii) the SEC related to beneficial ownership statements, the below companies held between 5% and 10% of the Company's total share capital as of December 31, 2025 and/or 2024, respectively, but was not registered with the Alcon share register:

| | % Holding of share capital | |
|----------------------------------------------------------|----------------------------|--------------------|
| | 2025 | 2024 |
| BlackRock, Inc., NY, USA | Between 5% and 10% | Between 5% and 10% |
| UBS Fund Management (Switzerland) SA, Basel, Switzerland | Between 5% and 10% | Between 5% and 10% |
| UBS Group AG, Zurich, Switzerland | Between 5% and 10% | Between 5% and 10% |

14. Contingent liabilities

The Company is liable as unconditional guarantor for the below:

- USD 4.05 billion (CHF 3.21 billion) senior notes issued by Alcon Finance Corporation.
- A JPY 5.0 billion (CHF 0.03 billion) loan due to Mizuho Bank Ltd partially drawn by Alcon Japan Ltd.
- A JPY 5.0 billion (CHF 0.03 billion) loan due to SMBC Bank Ltd partially drawn by Alcon Japan Ltd.
- A EUR 0.5 billion (CHF 0.47 billion) senior note issued by Alcon Finance BV.

Alcon Inc. currently guarantees up to USD 1.32 billion (CHF 1.05 billion) over the Revolving Facility Agreement available to Alcon Vision LLC, Alcon Finance Corporation, Alcon Finance B.V., Alcon Pharmaceuticals Ltd. and Alcon Inc. The Revolving Facility Agreement primarily bears interest rates equal to a term reference rate or a compounded reference rate, depending on currency, plus an applicable margin and a term reference rate credit adjustment spread, if applicable.

Alcon Inc. also guarantees up to USD 1.90 billion (CHF 1.51 billion) over a Bridge Facility Agreement available to Alcon Finance Corporation and Alcon Inc. The Bridge Facility Agreement primarily bears interest rates equal to a term reference rate plus an applicable margin.

As of December 31, 2025 the Facility Agreements were not drawn.

The Company is part of the Swiss Alcon value added tax ("VAT") group and is therefore jointly liable for existing and future VAT claims from Swiss Federal Tax Administration.

15. Significant events after the balance sheet date

In 2026, Alcon Inc. terminated the USD 1.90 billion (CHF 1.51 billion) Bridge Facility Agreement available to Alcon Finance Corporation and Alcon Inc.

| Available unappropriated earnings and free reserves | | |
| Balance brought forward | 17,946,370 | 17,790,649 |
| Dividend paid during the year | (138,674) | (118,670) |
| Net income for the year | 62,753 | 274,391 |
| Total available earnings and free reserves at the disposal of the Annual General Meeting | 17,870,449 | 17,946,370 |
| Appropriation proposed by the Board of Directors (cash dividend) | (139,916) | (139,916) |
| Total unappropriated earnings and free reserves after appropriation of cash dividend to be carried forward | 17,730,533 | 17,806,454 |

For the year 2025, the Board of Directors proposes that out of the earnings available to the Annual General Meeting, a dividend of CHF 0.28 gross per registered share be distributed. Calculated on the total number of issued shares of 499,700,000, this corresponds to a maximum total amount of CHF 139.9 million.

In deciding on the appropriation of dividends, the Annual General Meeting shall take into account that Alcon Inc. will not pay dividends on own shares held by the Company.

REPORT OF THE STATUTORY AUDITOR

to the General Meeting of Alcon Inc., Fribourg

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Alcon Inc. (the Company), which comprise the income statement for the year ended December 31, 2025, and the balance sheet as at December 31, 2025, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements (pages A-1 to A-9) comply with Swiss law and the Company's articles of incorporation.

Basis for opinion

We conducted our audit in accordance with Swiss law and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the 'Auditor's responsibilities for the audit of the financial statements' section of our report. We are independent of the Company in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession that are relevant to audits of the financial statements of public interest entities. We have also fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit approach

Materiality

The scope of our audit was influenced by our application of materiality. Our audit opinion aims to provide reasonable assurance that the financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall materiality for the financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the financial statements as a whole.

| | |
|--------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Overall materiality | CHF 174.6 million |
| Benchmark applied | Total assets |
| Rationale for the materiality benchmark applied | We chose total assets as the benchmark because, in our view, it is the benchmark which reflects the actual substance of the entity. This is a generally accepted benchmark for ultimate holding entities. |

We agreed with the Audit and Risk Committee that we would report to them misstatements above CHF 8.7 million identified during our audit as well as any misstatements below that amount which, in our view, warranted reporting for qualitative reasons.

Audit scope

We designed our audit by determining materiality and assessing the risks of material misstatement in the financial statements. In particular, we considered where subjective judgements were made; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which the Company operates.

Key audit matters

We have determined that there are no key audit matters to communicate in our report.

Other information

The Board of Directors is responsible for the other information. The other information comprises the Annual Report (but does not include the financial statements, the consolidated financial statements, the disclosures made on the exhibits and pages defined as subject to audit of the compensation report and our auditor's reports thereon) and the Say on Pay Brochure, which we obtained prior to the date of this auditor's report, and the Sustainability & Social Impact Report, which is expected to be made available to us after that date.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the financial statements

The Board of Directors is responsible for the preparation of financial statements in accordance with the provisions of Swiss law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.

- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them regarding all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors or its relevant committee, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

In accordance with article 728a para. 1 item 3 CO and PS-CH 890, we confirm the existence of an internal control system that has been designed, pursuant to the instructions of the Board of Directors, for the preparation of the financial statements.

Based on our audit according to article 728a para. 1 item 2 CO, we confirm that the Board of Directors' proposal complies with Swiss law and the Company's articles of incorporation. We recommend that the financial statements submitted to you be approved.
