HILLENBRAND

Our Transformation Continues

March 21, 2018
Disclosure Regarding Forward-Looking Statements

Forward-Looking Statements and Factors That May Affect Future Results:

Throughout this presentation, we make a number of "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. As the words imply, these statements about future plans, objectives, beliefs, and expectations that might or might not happen in the future, as contrasted with historical information. Forward-looking statements are based on assumptions that we believe are reasonable but by their very nature are subject to a wide range of risks.

Accordingly, in this presentation, we may say something like:

"We expect that future revenue associated with the Process Equipment Group will be influenced by order backlog."

That is a forward-looking statement, as indicated by the word "expect" and by the clear meaning of the sentence.

Other words that could indicate we are making forward-looking statements include:

- intend
- believe
- plan
- expect
- may
- goal
- would
- become
- pursue
- estimate
- will
- forecast
- continue
- could
- target
- encourage
- promise
- improve
- progress
- potential
- should

This is not an exhaustive list, but is intended to give you an idea of how we try to identify forward-looking statements. The absence of any of these words, however, does not mean that the statement is not forward-looking.

**Here is the key point:** Forward-looking statements are not guarantees of future performance, and our actual results could differ materially from what is described in any forward-looking statements.

Any number of factors, many of which are beyond our control, could cause our performance to differ significantly from what is described in the forward-looking statements. This includes the impact of the Tax Act on the Company's financial position, results of operations, and cash flows. For a discussion of factors that could cause actual results to differ from those contained in forward-looking statements, see the discussions under the heading "Risk Factors" in Item 1A of Part I of our Form 10-K for the year ended September 30, 2017, and in Item 1A of Part II of the Form 10-Q for the period ended December 31, 2017, which are located on our website and filed with the SEC. We assume no obligation to update or revise any forward-looking statements.
Company Overview & Strategy
Key Takeaways

1. Significant strides made transforming Hillenbrand into a global diversified industrial company

2. Now focused on building platforms to develop scale and enhance leadership positions to drive profitable growth

3. Market leadership driven by highly-engineered products with core technologies differentiated by applications expertise

4. The Hillenbrand Operating Model (HOM) is a competitive differentiator; historically focused on margin expansion and now adding tools to drive profitable growth

5. Flexible balance sheet supported by strong cash flow and appropriate debt level; expect to make additional strategic acquisitions to accelerate profitable growth

6. Passionate leadership team driving transformation with runway for significant shareholder value creation

Hillenbrand Strategy to Create Shareholder Value

1. Grow Organically through Four Key Imperatives
2. Accelerate Profitable Growth with Disciplined M&A
3. Leverage HOM to Drive Profitable Growth
4. Effectively Deploy Strong Free Cash Flow

Passionate Management Team Executing Strategy for Sustained Profitable Growth
## Strategic Priorities

### Grow Organically through Four Key Imperatives
- Leverage core technologies and applications expertise to build leadership positions
- Deepen customer engagement and revenue potential
- Target broad installed base and pursue new opportunities to grow recurring revenue
- Take advantage of strong geographic footprint to expand customer base and win in new markets

### Accelerate Profitable Growth with Disciplined M&A
- Strengthen existing leadership positions and build targeted platforms in food & pharma, separation and flow control
- Disciplined approach to deal pipeline from a strategic, operational, and financial perspective

### Leverage HOM to Drive Profitable Growth
- Operational excellence demonstrated by consistent margin expansion; adding tools to further drive profitable growth
- Early in operational excellence journey
- Key areas of focus: Innovation, Lean, Procurement, and Business Simplification

### Effectively Deploy Strong Free Cash Flow
- Reinvest in the business through new product development and expand into new end markets and geographies
- Invest in targeted acquisitions with compelling financial returns and profitable growth potential
- Return cash to shareholders through consistent dividends and opportunistic share repurchases
Hillenbrand Operating Model: A Competitive Advantage

Consistent and Repeatable Framework Designed to Produce Efficient Processes and Drive Profitable Growth and Superior Value

- UNDERSTAND THE BUSINESS
- FOCUS ON THE CRITICAL FEW
- GROW: GET BIGGER AND BETTER

Have Realized Benefits but Significant Opportunity Ahead of Us
Focus Areas for Creating Value through HOM

**Procurement**
- Enterprise-wide process optimization and standardization
- Supply-base rationalization
- Strategic supplier relationships for improved cost, quality, and working capital efficiency
- Value engineering to reduce cost and improve manufacturability

**Business Simplification**
- Active footprint management
- Global Business Services operating with standard processes supporting the enterprise
- Unified approach to identify customer needs and provide complete solutions
- Information Technology systems rationalization

**Rapid Response**
- Lead time as a competitive advantage
- Manage global manufacturing and engineering capacities to improve efficiency
- Strategic supplier relationships to manage demand fluctuations and changing customer needs

**Expected Annual Savings of $40 - $50M**

**Improved Operating Leverage**

**Growth**
- Expand applications and systems expertise to adjacent end markets
- Expand service business geographically
- Enhance innovation and new product development
- Develop framework to win in China

**Lean**

**Strategy/SDP**

**Lean**

**Segmentation**

**Lean**

## PORTION OF PEG REVENUE

1 Based on FY 2017 sales.
**Strong Secular Trends Support Global Growth**

Growing Global Population and Rapidly Expanding Middle Class…

…Driving Secular Growth Trends

- Products that require more and highly technical plastics and petrochemicals
- Safe, convenient processed food
- Minerals and fertilizers for agriculture
- Water infrastructure, safety, and efficiency
- Construction and transportation
- Energy consumption
Large Addressable Markets and Areas of Focus

Plastics & Chemicals
$12B

Food & Pharma
$16B

Separation
$10B

Flow Control
$38B

Building Leadership Positions in Core Markets and Near Adjacencies
PEG Strategy

**Strengthen Leadership Positions and Build Targeted Platforms**

- Leverage core technologies and applications expertise to further penetrate current markets
- Grow platforms to critical mass in plastics & chemicals, food & pharma, separation, and flow control to achieve benefits of market leadership and scale
- Enter attractive new markets and near adjacencies with large addressable opportunities
- Leverage global footprint to expand customer base and win in new markets

**Drive Innovation and New Product Development**

- Provide innovative product and service solutions to solve customers’ challenges
- Extend applications expertise to win in adjacent markets with high growth potential
- Develop new products driven by voice of customer input and changing needs
- Provide value-added end-to-end solutions from individual components to integrated systems

**Leverage HOM to Drive Margin Expansion and Profitable Growth**

- Apply HOM tools, including voice of customer and segmentation, for profitable growth
- Drive best-in-class lead times to grow share in aftermarket parts & service business
- Implement strategic supplier relationships to improve cost and quality
- Enhance productivity through process standardization
Batesville
Batesville at a Glance

Confident in Ability to Execute Our Strategy and Achieve Meaningful Returns for Shareholders
Key Takeaways

1. Significant strides made transforming Hillenbrand into a global diversified industrial company

2. Now focused on building platforms to develop scale and enhance leadership positions to drive profitable growth

3. Market leadership driven by highly-engineered products with core technologies differentiated by applications expertise

4. The Hillenbrand Operating Model (HOM) is a competitive differentiator; historically focused on margin expansion and now adding tools to drive profitable growth

5. Flexible balance sheet supported by strong cash flow and appropriate debt level; expect to make additional strategic acquisitions to accelerate profitable growth

6. Passionate leadership team driving transformation with runway for significant shareholder value creation
Disclosure Regarding Non-GAAP Measures

While we report financial results in accordance with accounting principles generally accepted in the United States (GAAP), we also provide certain non-GAAP operating performance measures. These non-GAAP measures are referred to as “adjusted” and exclude expenses associated with backlog amortization, inventory step-up, business acquisition, development and integration, restructuring and restructuring related charges, pension settlement charge, trade name impairment, and certain litigation costs. The related income tax for all of these items is also excluded. These non-GAAP measures also exclude the non-recurring tax benefits and expenses related to the Tax Act. This non-GAAP information is provided as a supplement, not as a substitute for, or as superior to, measures of financial performance prepared in accordance with GAAP.

One important non-GAAP measure that we use is adjusted earnings before interest, income tax, depreciation, and amortization (“adjusted EBITDA”). A part of our strategy is to selectively acquire companies that we believe can benefit from our core competencies to spur faster and more profitable growth. Given that strategy, it is a natural consequence to incur related expenses, such as amortization from acquired intangible assets and additional interest expense from debt-funded acquisitions. Accordingly, we use adjusted EBITDA, among other measures, to monitor our business performance.

Free cash flow (FCF) is defined as cash flow from operations less capital expenditures. We use the related term, free cash flow to net income conversion rate to refer to free cash flow divided by GAAP net income. Hillenbrand considers FCF and free cash flow to net income conversion rate important indicators of the Company’s liquidity, as well as its ability to fund future growth and to provide a return to shareholders. FCF does not include deductions for debt service (repayments of principal), other borrowing activity, dividends on the Company’s common stock, repurchases of the Company’s common stock, business acquisitions, and other items.

Another important non-GAAP measure that we use is backlog. Backlog is not a term recognized under GAAP; however, it is a common measurement used in industries with extended lead times for order fulfillment (long-term contracts), like those in which our Process Equipment Group competes. Order backlog represents the amount of consolidated revenue that we expect to realize on contracts awarded related to the Process Equipment Group. Backlog includes expected revenue from large systems and equipment, as well as replacement parts, components, and service. Given that there is no GAAP financial measure comparable to backlog, a quantitative reconciliation is not provided.

We use this non-GAAP information internally to make operating decisions and believe it is helpful to investors because it allows more meaningful period-to-period comparisons of our ongoing operating results. The information can also be used to perform trend analysis and to better identify operating trends that may otherwise be masked or distorted by these types of items. The Company believes this information provides a higher degree of transparency.
